PROCEEDINGS AND DEBATES OF THE 87th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES

WEDNESDAY, SEPTEMBER 6, 1961

The House met at 11 o'clock a.m.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

From the prophecy of Isaiah (Isaiah 35: 4): *Say to them who are of a fearful heart, Be strong, fear not.*

O Thou who art always seeking to enlighten and encourage us with the supply and strength of Thy divine guidance and goodness, bless our President and the Congress, who, in this time of grave peril, are burdened with heavy responsibility and facing the arduous task of safeguarding our freedom.

Gird their minds and hearts with that intrepid and indomitable faith which will enable them to meet fearlessly and valiantly the forces of tyranny and aggression striving to enslave us.

Grant that, in this time of world tragedy and tension, we may have the grace of heart to pray even for our enemies who, in their blindness and brutality, are threatening and terrorizing mankind with indescribable suffering and sorrow.

Inspire us with the dynamic virtues of love and forgiveness and show us how we may lift humanity into that higher spiritual unity where all antagonism and antipathies are transcended by the spirit of brotherhood and good will. Hear us in the name of the Prince of Peace. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed a bill of the following title, in which concurrence of the House is requested:

S. 2481. An act to amend the National Aeronautics and Space Administration Authorization Act for the fiscal year 1962.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 7916) entitled "An act to expand and extend the saline water conversion program being conducted by the Secretary of the Interior," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JACKSON, Mr. BIBLE, Mr. CARROLL, Mr. KUCHEL, and Mr. ALLOTT to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 1540) entitled "An act to amend the law establishing the Indian revolving loan fund," agrees to the conference requested by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. CHURCH, Mr. GRUENING, Mr. BURDICK, Mr. GOLDWATER, and Mr. ALLOTT to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7576) entitled "An act to authorize appropriations for the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes."

STATEMENT OF REP. CARL ALBERT ON PROPOSAL THAT LAKE TO BE FORMED BY EUFAULA DAM, NOW UNDER CONSTRUCTION, LOCATED ON THE CANADIAN RIVER, 12 MILES EAST OF EUFAULA IN McINTOSH COUNTY, BE NAMED "LAKE OF THE FIVE CIVILIZED TRIBES"

Mr. ALBERT. Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ALBERT. Mr. Speaker, I have introduced a bill today to designate a great new lake now being constructed on the Canadian River in Oklahoma, the "Lake of the Five Civilized Tribes." Since this lake will be located in the very heart of the country occupied by the five civilized tribes in eastern Oklahoma prior to statehood, no more appropriate name could be proposed for it than the "Lake of the Five Civilized Tribes." This lake will be one of the largest manmade lakes in the world. Probably no other manmade monument of equal dimension ever will be constructed in Oklahoma. There does not now exist an adequate monument to the five civilized tribes whose contributions have been indispensable to the life and character of Oklahoma. The lake will become one of the great playgrounds of the Nation. It deserves a name which will be an attraction to tourists from all parts of the country, many of whom still identify Oklahoma in terms of its Indian heritage.

COMMITTEE ON APPROPRIATIONS, PUBLIC WORKS APPROPRIATION BILL

Mr. CANNON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on the public works appropriation bill.

Mr. HALLECK. Mr. Speaker, reserving the right to object, I would like to inquire of either the chairman of the Appropriations Committee or the acting majority leader as to when it is expected this bill will be taken up. If I remember correctly, the chairman of the Appropriations Committee obtained consent for the consideration of the bill tomorrow, and in connection with that indicated that the vote would go over until Friday. I have now been informed that it is proposed to delay the consideration longer. If that is the plan, and I certainly hope it is not the plan, but if it is, I do not know what all the rush is about regarding the filing of the report. I would hope that the matter could be taken up tomorrow as was originally planned and programed for action by the House. That measure has to be acted on so that we may adjourn sine die. I see no reason why it should not be called up tomorrow as originally planned. It is one of the last obstacles to a sine die adjournment, and I would express the hope under this reservation that it could be called up tomorrow.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Of course the leadership is anxious in connection with this matter to cooperate with the House membership and with the Committee on Appropriations. The leadership will only change the date on which the bill is programed if the chairman and members of the Committee on Appropriations desire a change to be made.

Mr. HALLECK. I would like to inquire of the chairman of the committee if this request is granted when do you propose to call up the bill, and if it is not called up tomorrow, why?

Mr. CANNON. That is a matter which rests with the majority leader.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. HALLECK. Mr. Speaker, further reserving the right to object, if I am in error about my recollection that this measure was programed for tomorrow, I would like to have someone so inform me.

Mr. ALBERT. The chairman of the Committee on Appropriations has advised me, and he is here, that the committee will not be ready tomorrow. It is only on that basis that we have considered postponing consideration of this bill.

Mr. HALLECK. Mr. Speaker, the committee could be ready tomorrow, without any question. This matter has been before the committee for a long, long time. I fail to see any real reason why it could not have been brought to the floor of the House a long time ago, unless there were some extraneous matters under consideration.

I am constrained to believe that is the real reason, but I want the Members of the House generally to know, those who hope for an early sine die adjournment, that this sort of delay only postpones the date of adjournment and, in my opinion, is not right. Of course there is nothing further I can do about it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. JENSEN reserved all points of order against the bill.

CALL OF THE HOUSE

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 186]

Alger	Davis, Tenn.	McSween
Ashley	Diggs	Milliken
Baker	Evins	Pilcher
Bell	Gubser	Rabaut
Boykin	Hall	Reece
Brooks, La.	Hébert	Santangelo
Broyhill	Holland	Siler
Buckley	Johnson, Md	Van Pelt
Cramer	Kilburn	Westland
Dague	McDowell	

The SPEAKER pro tempore. On this rollcall, 406 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERSONAL ANNOUNCEMENT

Mr. BONNER. Mr. Speaker, on rollcall No. 180, I was unavoidably absent from the House on official business. Had I been present, I would have voted for the resolution prohibiting the entry of Red China into the United Nations.

THERE SHOULD BE NO PENALTY FOR DELAYED FILING FOR OLD-AGE INSURANCE BENEFITS

Mr. YATES. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. YATES. Mr. Speaker, I am today introducing a bill which will correct a gross inequity in the social security law. In the spring of 1952 a resident of my district called at his local social security office in Chicago to inquire whether he would be eligible for benefits at age 65 and was told that he was not fully insured. When he reached 65 years of age in 1954, he again called at the social security local office and was once more informed that he was not fully insured, and no application for benefits was taken.

In 1961 this gentleman attended a meeting where a representative of the Social Security Administration spoke, and he was advised at that time to file a claim inasmuch as the speaker believed he was qualified for benefits. His claim was filed in February 1961, at which time his earnings record was obtained and he was found to have been fully insured as of the month in which he became 65 years of age in 1954. Under the law, since no written claim for benefits was filed, his social security annuity payments could be retroactive only to February 1960.

Mr. Speaker, it seems to me that this is a very unfair situation and I believe the law should be amended. Certainly, this is not an isolated case. I have, therefore, introduced a bill to amend title II of the Social Security Act to provide that an individual who is otherwise qualified but delays filing his application for old-age insurance benefits—or for wife's, husband's, or child's benefits in certain cases—should be entitled to such benefits from the time he originally became so qualified.

THE CONSENT CALENDAR

The SPEAKER pro tempore. This is Consent Calendar Day. The Clerk will call the first bill on the calendar.

PRACTICABILITY OF ADOPTING THE METRIC SYSTEM

The Clerk called the bill (H.R. 2049) to provide that the National Bureau of Standards shall conduct a program of investigation, research, and survey to determine the practicability of the adoption by the United States of the metric system of weights and measures.

Mr. GROSS. Mr. Speaker, reserving the right to object——

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. FULTON. May I ask the gentleman what is his particular objection to the bill? Is it because two investigations will be going on at the same time, each of which will be expensive? If so, I would like to take up that matter with the committee and eliminate his objection.

Mr. GROSS. My objection to the bill is that it provides half a million dollars for a study of the metric system. I am not opposed to the establishment of the metric system as the standard of weights and measures for the country, but I know of no reason why we should spend half a million dollars for a study. As I have said before, if it is decided that we should go to the metric system, then let a firm date be fixed, say 5, 7, or 10 years hence; let the children be educated in the metric system and information about it disseminated throughout the country.

Mr. FULTON. Would the gentleman object to the sum of $50,000 for an information program to promote the changeover to the metric system?

Mr. GROSS. I would not object to an appropriation of $50,000 for that purpose, but I think it ought to be provided in a different bill. This bill calls for an investigation and study, which in my opinion are unnecessary.

Mr. GEORGE P. MILLER. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from California.

Mr. GEORGE P. MILLER. May I point out to the gentleman that this changeover to the metric system would create a great impact upon American industry. Desirable as the metric system is, it is something that is going to cause a great deal of confusion and expense. The best way of approaching it is to let those who are competent in this field make this study and report back to the House.

I am convinced in my own mind that the metric system is very desirable, but who am I to tell the automobile industry, or the aircraft industry, that the great changeover that must take place is going to be made upon my judgment? I do not think anyone can question the competency of the Bureau of Standards to do this work.

May I point out to the gentleman that whereas there is a money factor in this bill, it does provide for this investigation by the Bureau of Standards; but they would have to come to the Appropriations Committee next year and ask for money and justify the way they would spend it. I feel we are generous in providing $500,000, but on the other hand I do not want this thing put over under any false pretenses.

Mr. GROSS. Mr. Speaker, I have no doubt that the Bureau of Standards can give us the answer to this question today. It is unnecessary to spend half a million dollars for a study.

Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

ISSUE CERTIFICATES OF HONORABLE DISCHARGE

The Clerk called the bill (H.R. 2292) to authorize the Secretary of the Treasury to issue certificates of honorable discharge in lieu of certificates of disenrollment to certain persons who served as temporary members of the U.S. Coast Guard Reserve during World War II.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 21 of title 14, United States Code, be amended by inserting therein after section 762 the following new section:

"§ 763. Honorable discharge of temporary members

"In recognition of the service of temporary members of the Reserve during World War II, the Secretary may upon request issue a certificate of honorable discharge in lieu of a certificate of disenrollment issued to any person following disenrollment under honorable conditions from service as a temporary member during the period from December 7, 1941, to July 1, 1946, both dates inclusive. Issuance of a certificate of honorable discharge to any person under this section does not entitle him to any rights, privileges, or benefits under any law of the United States."

(b) The analysis of chapter 21 of title 14, United States Code, is amended by inserting following

"762. Women's Reserve"

the following:

"763. Honorable discharge of temporary members."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONVEYANCE OF REVERSIONARY RIGHTS TO JASPER COUNTY, GA.

The Clerk called the bill (H.R. 4939) to provide for the conveyance of all right, title, and interest of the United States in a certain tract of land in Jasper County, Ga., to the Jasper County Board of Education.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object——

Mr. VINSON. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Georgia.

Mr. VINSON. I may say to the gentleman from Iowa if there is no objection, I propose to offer an amendment on page 2, line 1, inserting the words "at fair market value." The bill would then read in part:

The Farmers Home Administration, is authorized and directed to convey by quitclaim deed to the Board of Education of Jasper County, State of Georgia, its successors and assigns, at fair market value, all of the right, title, and interest retained by the United States of America.

Mr. GROSS. In other words, the gentleman's amendment would provide that the county in Georgia would pay the fair market value for the property to be conveyed, as well as for the improvements, whatever they may be.

Mr. VINSON. Yes, whatever the fair market value would be for the interest the Government has, and that will have to be paid before the county gets the property.

Mr. GROSS. I thank the gentleman for offering the amendment, and I regret that I had to ask that the bill be passed over last time.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That upon the written consent of the assistant secretary of the Georgia Development Authority, a public corporation organized and existing under the laws of the State of Georgia, the United States of America, acting through the Administrator of the Farmers Home Administration, is authorized and directed to convey by quitclaim deed to the Board of Education of Jasper County, State of Georgia, its successors and assigns, all of the right, title, and interest retained by the United States of America in its quitclaim deed to the Board of Education of Jasper County, Georgia, dated the 26th day of April 1940, and recorded on the 18th day of June 1940, in deed recorded in book A–6, pages 160, 161, and 162, in the office of the clerk of the superior court of Jasper County, Georgia, covering a tract of land containing 42.65 acres, more or less, in Jasper County, Georgia, and more particularly described as follows:

Beginning at the point of intersection of the northern right-of-way line of Benton Road with the eastern right-of-way line of road "A" and running along the eastern right-of-way line of said road "A" north 44 degrees 52 minutes east 1,384.33 feet to the point of curvature of a curve to the right having a degree of curvature of 22 degrees 00 minutes;

Thence, along the said curve through the arc whose chord is north 55 degrees 40 minutes 30 seconds east 99.22 feet to a point of tangency; thence along said eastern right-of-way line north 66 degrees 37 minutes east 632.90 feet; thence, leaving said right-of-way line south 12 degrees 05 minutes for a distance of 891.10 feet; thence south 34 degrees 28 minutes west 1,290.76 feet to a point on the northern right-of-way line of Benton Road;

Thence along said northern right-of-way line north 63 degrees 28 minutes west 271.25 feet to the point of curvature of a curve to the right, having a degree of curvature of 04 degrees 04 minutes; thence along said curve through the arc whose chord is north 61 degrees 57 minutes west 74.52 feet to a point of tangency; thence north 60 degrees 26 minutes west 392.32 feet to the point of curvature of a curve to the right, having a degree of curvature of 04 degrees 04 minutes;

Thence along said curve through the arc whose chord is north 58 degrees 13 minutes west 108.90 feet to a point of tangency; thence north 56 degrees 00 minutes 426.48 feet to the point of beginning; all of which is more clearly shown on a plat thereof prepared by the United States Department of Agriculture, Farm Security Administration, dated March 17, 1938, together with all buildings and other improvements thereon, including all equipment of whatsoever nature therein.

With the following committee amendments:

Page 1, line 3, strike out "of the Assistant Secretary".

Page 2, line 21, after the word "minutes" insert "east".

Page 3, line 9, after the word "minutes" insert "west".

Page 3, line 13, after "1938" insert "and revised November 14, 1939, and designated as plan numbered 3003–PP,".

The committee amendments were agreed to.

Mr. VINSON. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VINSON: On page 2, line 1, after the word "assigns," insert the words "at fair market value".

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RECOGNIZING OFFICIALLY SAN DIEGO AS THE BIRTHPLACE OF NAVAL AVIATION

The Clerk called House Resolution 208.

The SPEAKER pro tempore. Is there objection to the present consideration of House Concurrent Resolution 208?

Mr. STRATTON. Mr. Speaker, reserving the right to object, this is a relatively innocent looking bill that provides for designating a historical site; namely, the birthplace of naval aviation. This bill would put the House in the position of writing history. If this legislation were to be passed, we would in fact be rewriting history and indeed distorting it. The bill passed the Committee on Armed Services on the basis of inadequate information. I voted against the bill at the time, and one other member of the committee, if my recollection is correct, voted against it also.

The bill was based on the basis of a letter from the Navy Department which agreed that some early flight of the first naval aviator had taken place in San Diego, Calif. But, as a matter of fact, Mr. Speaker, as the RECORD for August 23 will disclose, there are two important bits of information bearing on this subject which the Navy did not disclose in its letter to the committee that which I uncovered later on through careful investigation.

One of them is that the first aircraft ever owned by the Navy first flew on the 1st of July 1911, not in San Diego, Calif., but in the great Empire State of New York at Hammondsport. The second fact that the Navy did not disclose to the committee at the time this legislation was under consideration was the fact that way back in 1948 the Navy had already officially designated the birthday of naval aviation as May 8, 1911. Now that day happens to be the day when Glen Curtiss was conducting his flying operations in the great Empire State of New York at Hammondsport, not at San Diego. It was in fact the day on which the first naval plane was requisitioned by the Navy, the famous A–1, built and flown in New York State, not California.

So it is quite clear, Mr. Speaker, that the birthplace of naval aviation is not San Diego but is in New York State, at Hammondsport, to be exact, and I think we would be making a great mistake if we were to pass this bill today and thereby to distort the actual record of our Nation's history.

Mr. ROBISON. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from New York.

Mr. ROBISON. Mr. Speaker, I would like to join with the gentleman from New York [Mr. STRATTON] in behalf of the good people of Hammondsport, N.Y.,

which is located in my congressional district, and who have, I think, a sound and responsible claim for being recognized as the birthplace of naval aviation. In fact, they are planning to commemorate that occasion this October.

Mr. STRATTON. I think there may be some confusion here, because there were, of course, a number of birth pangs of naval aviation that took place in other locations around the country. But it is quite clear, as I have shown, that the actual birth itself took place in New York State.

Mr. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from California.

Mr. WILSON of California. Mr. Speaker, I would point out that many sections of the country contributed to the birth pangs of naval aviation. There is no question about that. But in California—and I really hate to bring this up—the fact that Glen Curtiss came out to San Diego in January to conduct his first flight experiments with a seaplane is obvious; he could fly in January there, whereas he could not fly in New York in January. So, climate became a very important factor in the fact that the very first birthplace of aviation was in San Diego.

Mr. Speaker, we have the best place for it, the Armed Services Committee considered this carefully and passed it, with only two votes against it. It is obvious, Mr. Speaker, that we are backing up the Navy's position that San Diego is truly the birthplace of naval aviation. I would ask the House to support the Navy's point of view in this regard.

Mr. GEORGE P. MILLER. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from California.

Mr. GEORGE P. MILLER. Mr. Speaker, I want to get into this birth pang business, too; after all, the first airplane to fly off the deck of a battleship took place in San Francisco Harbor when the U.S.S. *Pennsylvania* was anchored in battleship row, if I am not mistaken, this took place in the portion of the bay that lies in Alameda County.

Mr. SIKES. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Florida.

Mr. SIKES. Mr. Speaker, I do not want this occasion to get by without associating Pensacola with all of this activity. After all, the Navy's air arm did not amount to anything until it got down to Pensacola and started making Pensacola its principal training area.

Mr. BONNER. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from North Carolina.

Mr. BONNER. Mr. Speaker, with reference to all of this discussion about the birthplace of aviation of the Army, the Navy, and so forth, I want to call to the attention of the House again, lest it be overlooked and forgotten in this turmoil, that the Wright brothers were the first aviators to fly, at Kitty Hawk on the coast of North Carolina.

Mr. LANKFORD. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Maryland.

Mr. LANKFORD. Mr. Speaker, may I add one word to this? There are many places that are the birthplace of naval aviation. I would like to add Annapolis, Md., to these claims, because the first naval aviation camp ever established was established on Greenbury Point just across the Severn River in Anne Arundel County.

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HARDY. Mr. Speaker, reserving the right to object, let me make a few observations. I have listened intently to these claims of my colleagues from widely separated localities, and I must observe that the mother of naval aviation must have been extremely ubiquitous. I do not contest the statement of my friend from California [Mr. WILSON] that the first naval aviator training was conducted in San Diego. Likewise, I would concede the contention of my friend from New York [Mr. STRATTON] that naval aviator No. 1 was so designated in Hammondsport, and perhaps my colleagues who have participated in this discussion can support their claims if we let each of them provide a separate definition of what the term "birthplace" connotes.

But now let me put all of these claims to rest. History accurately records that the Navy's early interest in aviation prompted the construction of a 57-foot platform on the deck of the U.S.S. *Birmingham*. By my definition it was here that naval aviation was born on November 14, 1910, for that was the date on which the Navy arranged for the takeoff of an aircraft from this platform on the U.S.S. *Birmingham* while she was in Hampton Roads, 2½ miles from the shore of what is now the city of Norfolk. The record of this historic flight indicates that the plane dipped dangerously close to the water, but the pilot had made a successful takeoff and landed safely on the Norfolk shore.

Mr. Speaker, since this was the first actual naval flight from a Navy ship, and since it predates all of these claims of my colleagues, the Members will understand why I must object both to the request that the bill be passed over without prejudice and to the consideration of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HARDY. Mr. Speaker, I object.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HARDY. Mr. Speaker, I object.

THE JOHN A. BLATNIK LOCK IN MICHIGAN

The Clerk called the bill (H.R. 947) to designate the new lock on the St. Mary's River at Sault Ste. Marie, Mich., as the John A. Blatnik lock.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. PELLY. Mr. Speaker, at the request of another Member I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

NATIONAL BOTANIC GARDEN, HAWAII

The Clerk called the bill (H.R. 5628) to provide for a study and investigation of the desirability and feasibility of establishing and maintaining a National Tropical Botanic Garden.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

PROTECTION OF CERTAIN COMMUNICATIONS FACILITIES

The Clerk called the bill (S. 1990) to amend section 1362 of title 18 of the United States Code so as to further protect the internal security of the United States by providing penalties for malicious damage to certain communications facilities.

Mr. CELLER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DOWDY. Mr. Speaker, I ask unanimous consent to extend by remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DOWDY. Mr. Speaker, I support this legislation, and urge that it be given serious consideration by the House.

The bill S. 1990 was passed by the other body on June 29, 1961. The House Judiciary Committee, at my request reported the Senate bill as a substitute for my bill, H.R. 3749, on the same subject. I preferred my own proposal, but, realizing the immediate need for legislation, was and am willing to accept this.

Its purpose is to correct certain deficiencies in section 1362 of title 18 of the United States Code to provide more adequate penalties for willful and malicious damage to or interference with communication facilities of the United States, and extends the coverage of the statute to include communication facilities used or intended to be used for military or civilian defense functions of the United States.

When we discuss war, we immediately associate tanks, planes, guns, and ships; men, materiel, transport, and production. All of these are essential elements of waging war. All are vital to the outcome of a battle. So indeed, are generals

and admirals, vital to the outcome of a military operation. Yet none of these essential elements of defense or combat could be utilized to fulfill its assigned mission without adequate, available, and efficient communications. Military strategists from Von Clausewitz to MacArthur have made particular note of the overriding importance of communications in military operations. Field commanders consider personnel, intelligence, operational plan, logistics, and communications in that order because the success or failure of their mission ultimately rests on their communications capability.

Even at the risk of being dubbed an armchair tactician, I urge we do not overlook the possibility that should war again be our fate, it may well be fought here in these United States, and should that war come, communication facilities, as we know and enjoy them, will be our most precious asset. Nothing is more vital to our modern defense effort.

Section 1362 of title 18 United States Code currently provides that the willful or malicious injury to or destruction of communication facilities operated or controlled by the United States, is a criminal offense. The bill under consideration would extend this definitive coverage to include communication facilities used or intended for use in military or civilian defense functions of the United States.

The current statutes provide maximum penalties on conviction under this statute of a fine of $1,000, or imprisonment for not more than 3 years, or both. The bill under consideration would impose a maximum fine of $10,000, or imprisonment for not more than 10 years, or both. I would have welcomed objection on the basis these penalties were insufficient for the enormity of the crime, however, a step in the right direction is a constructive step.

Mr. Speaker, there is no question this legislation is needed and warranted. The Defense Department has this to say on the issue:

> The Defense Department is one of the largest users of commercial communications in the United States. Commercial circuits are utilized for the aircraft and warning network, ground observer telephone system, military air raid warning system, Strategic Air Command communication network, and other systems and networks necessary for weather reporting, command and logistical support. In view of the responsibility of the Department of Defense, the disruption, by willful or malicious acts, of any commercial communications system so employed, could gravely endanger the national existence.
>
> The Department of Defense feels that enactment (of this legislation) would establish a deterrent which would do much to protect the integrity of commercial communications systems utilized by the military departments.

I submit that Congress must afford the safeguard of Federal criminal sanctions against willful and malicious disruption and destruction of these facilities, without which, the core of our defense effort would be paralyzed. In the past, the Congress has seen fit, and I believe wisely, to extend the protection of a Federal criminal law to include the major commercial modes of transportation. Today, when time is expressed in microseconds, when a delay or even a second's pause might spell the difference between the destruction of an enemy missile or the destruction of an American city and its entire population, we would be negligent to our responsibility were we to fail to afford protection to this vulnerable facet of our defense system. In taking final action on the bill before us, we are faced with the choice of protecting our defense communications system, or inviting espionage, sabotage and the possible defeat of this Nation by an invader. There is no other consideration or deliberation germane to this issue.

Let us therefore think long and hard on the consequences before objecting to or passing over this proposal. Should it fall by the wayside, our very lives may well fall with it. Adjournment may likely foreclose possibility of another opportunity to consider the bill during this session.

Mr. Speaker, this bill should pass.

RECREATION FACILITIES IN RESERVOIR AREAS

The Clerk called the bill (S. 48) to authorize the Secretary of the Army to modify certain leases entered into for the provision of recreation facilities in reservoir areas.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Chief of Engineers, under the supervision of the Secretary of the Army, is authorized to amend any lease entered into before November 1, 1956, providing for the construction, maintenance, and operation of commercial recreational facilities at a water resource development project under the jurisdiction of the Secretary of the Army so as to provide for the adjustment, either by increase or decrease, from time to time during the term of such lease of the amount of rental or other consideration payable to the United States under such lease, when and to the extent he determines such adjustment or extension to be necessary or advisable in the public interest. No adjustment shall be made under the authority of this Act so as to increase or decrease the amount of rental or other consideration payable under such lease for any period prior to the date of such adjustment.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FUNDS OF CONFEDERATED TRIBES OF COLVILLE RESERVATION

The Clerk called the bill (H.R. 8236) to authorize the use of funds arising from judgments in favor of any of the Confederated Tribes of the Colville Reservation.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the funds on deposit in the Treasury of the United States to the credit of the Colville Tribe, San Poells-Nespelem Tribe, Okanogan Tribe, Methow Tribe, and Lake Tribe (certain constituent groups of the Confederated Tribes of the Colville Reservation) that were appropriated to pay a judgment of the Indian Claims Commission dated March 1, 1960, in docket numbered 181, and the funds which may be deposited in the Treasury of the United States to the credit of the said constituent groups or any other constituent groups of the Confederated Tribes of the Colville Reservation to pay any judgments arising out of proceedings presently pending before the Indian Claims Commission in dockets numbered 161, 179, 181–A, 181–B, 181–C, 222, and 224, and the interest on said judgments, after payment of attorney fees and expenses, shall be credited to the account of the Confederated Tribes of the Colville Reservation, and may be advanced or expended for any purpose that is authorized by the tribal governing body of the Confederated Tribes of the Colville Reservation and approved by the Secretary of the Interior. Any part of such funds that may be distributed per capita to the members of the tribes shall not be subject to Federal or State income tax.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FUNDS TO THE NEZ PERCE TRIBE OF IDAHO

The Clerk called the bill (S. 322) to make certain funds available to the Nez Perce Tribe of Idaho.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, I should like to ask a question about this bill. Is it true that this provides for a payment of $6,455 to the Nez Perce Indians, money that has been due them for 60 years?

Mr. HALEY. Mr. Speaker, if the gentleman will yield, that is correct.

Mr. ASPINALL. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am happy to yield.

Mr. ASPINALL. These are moneys which under previous commitments have gone to individuals of the tribe and they were never picked up. These are interest moneys. They have been held in this account.

Mr. GROSS. Mr. Speaker, all I want to say is, having established that fact, if these were a bunch of foreigners they would have been paid $6,455,000, and in 60 minutes, not 60 years.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. HALEY. Mr. Speaker, I would like to say to the gentleman from Iowa [Mr. GROSS] that I was trying to get these moneys disbursed to the Indians of the United States before they paid out those billions of dollars abroad. I wanted to get this money to them before the Treasury was completely cleaned out because of spending on the foreigners.

Mr. GROSS. Mr. Speaker, I compliment the gentleman in his efforts to provide justice for these Indians; I withdraw my reservation of objection.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That the Secretary of the Interior make available the unexpended balances of funds in the Treasury of the United States under the following symbols and titles:

(1) 14X7063 Nez Perces of Idaho fund;

(2) 14X7563 interests and accruals on interest, Nez Perces of Idaho fund;

to the Nez Perce Tribe of Idaho for purposes the tribe requests and approved by the Secretary of the Interior.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE SENECA LEASING ACT

The Clerk called the bill (S. 344) to amend the Seneca Leasing Act of August 14, 1950 (64 Stat. 442).

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Act of August 14, 1950 (64 Stat. 442), be, and hereby is, amended to read as follows: "The money so received shall be available for disposal and expenditure by the council of the Seneca Nation in accordance with the constitution and laws of the nation. The council of the Seneca Nation shall keep complete and detailed records of all payments and disbursements from the funds under its control, and shall make such records available for inspection by members of the Seneca Nation at all reasonable times."

SEC. 2. Section 5 of the Act of August 14, 1950 (64 Stat. 442), is amended by inserting after "to lease" the last time the verb appears the words "or grant easements or rights-of-way on".

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. FORD. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. GOODELL], may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. GOODELL. Mr. Speaker, the purpose of S. 344 is to amend the act of August 14, 1950 (64 Stat. 442) by allowing the Seneca Nation more discretion in the handling of its affairs. The bill would remove the limitation of $5,000 on the amount of expenditures from lease income, permitting the nation to use all or part of that income for expenditures, for accumulation or for per capita distribution.

The bill is similar to H.R. 6298 which I introduced on April 13, 1961. The Senate bill was introduced by Senator KENNETH B. KEATING, of New York.

The Council of the Seneca Nation, by formal resolutions dated December 8, 1959, and again in December 1960, supported the removal of the expenditure limitation.

At the suggestion of the Department of the Interior, the respective committees in the House and Senate amended the respective bills to eliminate the original provision which would have required the per capita distribution of those amounts of lease income not actually expended. In addition and again at the suggestion of the Department, the bills were amended to permit the Senecas to grant easements and rights-of-way without prior departmental approval. By resolution dated June 9, 1961, the Seneca Council endorsed both these amendments.

As amended the bills have the support of the Bureau of Indian Affairs of the Department of the Interior.

Passage of this measure will do much to aid the Seneca Nation which has been sorely beset with tribulation caused by the violation of its treaty with the United States and the flooding of its lands by the Allegheny River project.

DISPOSITION OF JUDGMENT FUNDS OF OMAHA INDIANS

The Clerk called the bill (S. 1518) providing for the disposition of judgment funds of the Omaha Tribe of Indians.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized and directed, pursuant to such regulations as may be issued by him, to prepare a roll of Omaha Indians whose names appear on the Omaha allotment rolls finally approved pursuant to the Acts of Congress of August 7, 1882 (22 Stat. 341) and March 3, 1893 (27 Stat. 612), and who are living on the date of this Act, and the descendants of such allottees who are born and living on the date of this Act and who possess Omaha blood of the degree of one-fourth or more regardless of whether such allottees are living or deceased: *Provided,* That no person who is enrolled with any other tribe of Indians or who has received an allotment of land on any other reservation shall be enrolled under the provisions of this Act unless the application for enrollment by such person is approved by a two-thirds vote of the governing body of the Omaha Tribe of Nebraska. Applications for enrollment must be filed with the area director of the Bureau of Indian Affairs, Aberdeen, South Dakota, within four months after the date of this Act. For a period of three months thereafter, the Secretary shall permit the examination of the applications by the governing body of the Omaha Tribe of Nebraska for the purpose of lodging protests against any application. The determination of the Secretary regarding the eligibility of an applicant shall be final.

SEC. 2. The roll prepared pursuant to section 1 of this Act shall constitute the membership roll of the Omaha Tribe of Nebraska as of the date of this Act, notwithstanding the provisions of article II, section 1 of the tribal constitution, and children who are born after the date of this Act may be enrolled if they meet the requirements of section 1(b) of article II of the tribal constitution, applicable to children born after the date that amendment I to said constitution was approved, or any amendment thereof.

SEC. 3. Of the funds on deposit in the Treasury of the United States to the credit of the Omaha Tribe of Nebraska that were appropriated to pay a judgment by the Indian Claims Commission dated February 11, 1960, and the interest thereon, after payment of attorneys' fees and expenses, the Secretary of the Interior shall make a per capita distribution of a sum up to a maximum of $750, to the extent available, to each person whose name appears on the roll prepared pursuant to section 1 of this Act; and the balance of such funds after making payment of or provision for such per capita distribution and accrued and accruing interest, if any, may be advanced or expended for any purpose that is authorized by the tribal governing body and approved in writing by the Secretary. The funds so distributed shall not be subject to Federal or State income taxes.

SEC. 4. (a) Except as provided in subsection (b) of this section, the Secretary shall distribute a per capita share payable to a living enrollee directly to such enrollee, and the Secretary shall distribute a per capita share payable to a deceased enrollee directed to his next of kin or legatees as determined by the laws of the place of domicile of the decedent upon proof of death and inheritance satisfactory to the Secretary, whose findings upon such proof shall be final and conclusive.

(b) A share payable to a person under twenty-one years of age or to a person under a legal disability shall be paid in accordance with such procedures as the Secretary determines will adequately protect the best interests of such persons.

SEC. 5. No part of any of the funds which may be so distributed shall be subject to any lien, debt, or claim of any nature whatsoever against the tribe or individual Indians except delinquent debts owed by the tribe to the United States or owed by individual Indians to the tribe or to the United States.

SEC. 6. All costs incurred by the Secretary in the preparation of the roll and in the payment of the per capita shares in accordance with provisions of this Act shall be paid by appropriate withdrawals from the judgment fund.

SEC. 7. The Secretary is authorized to prescribe rules and regulations to carry out the provisions of this Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RESTORATION TO TRIBES OF CERTAIN TRUST FUNDS

The Clerk called the bill (S. 1768) to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That unless otherwise specifically provided by law, the share of an individual member of an Indian tribe or group in a per capita or other distribution, individualization, segregation, or proration of Indian tribal or group funds held in trust by the United States, or in an annuity payment under a treaty, heretofore or hereafter authorized by law, shall be restored to tribal ownership if for any reason such share cannot be paid to the individual entitled thereto and remains unclaimed for a period of six years from the date of the administrative directive to make the payment, or one year from the date of this Act, whichever occurs later: *Provided,* That if such individual is a member of an Indian tribe or group that has no governing body recognized by the Secretary of the Interior as authorized to act on behalf of the tribe or group, such unpaid share shall be regarded as not

capable of restoration to a tribal or group entity and shall be deposited in the general fund of the Treasury of the United States.

With the following committee amendments:

Page 1, line 8, after the word "law," insert the following: "and any interest earned on such share that is properly creditable to the individual".

Page 2, line 6, after the word "share" insert "and interest".

Page 2, after line 8, add a new section to read as follows:

"SEC. 2. The Secretary shall not restore to tribal ownership or deposit in the general fund of the Treasury any funds pursuant to this Act until 60 calendar days (exclusive of days on which either the Senate or the House of Representatives is not in session because of an adjournment of more than three days to a day certain) after he has submitted notice of his proposed action to the Committees on Interior and Insular Affairs of the Senate and House of Representatives unless each of said Committees has theretofore notified him that it has no objection to the proposed action."

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CRIMINAL OFFENSES NOT COMMITTED IN ANY DISTRICT

The Clerk called the bill (H.R. 7037) to amend section 3238 of title 18, United States Code.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3238 of title 18, United States Code, is amended to read as follows:

"§ 3238. Offenses not committed in any district

"The trial of all offenses begun or committed upon the high seas, or elsewhere out of the jurisdiction of any particular State or district, shall be in the district in which the offender, or any one of two or more joint offenders, is arrested or is first brought; but if such offender or offenders are not so arrested or brought into any district, an indictment or information may be filed in the district of the last known residence of the offender or of any one of two or more joint offenders, or if no such residence is known the indictment or information may be filed in the District of Columbia."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BAR TRANSPORTATION OF FRAUDULENT STATE TAX STAMPS

The Clerk called the bill (H.R. 1777) to amend title 18 of the United States Code to prohibit the counterfeiting of State obligations in certain cases, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 25 of title 18 of the United States Code is amended by adding at the end thereof the following new section:

"§ 510. Obligations of States

"(a) Whoever makes any thing which appears or is intended to appear to be an obligation of any State, with reasonable grounds for belief that such thing will be used for a fraudulent purpose, and with reasonable grounds for belief that such thing will be transported in interstate commerce, shall be fined not more than $5,000, or imprisoned not more than five years, or both.

"(b) Whoever makes any thing which appears or is intended to appear to be an obligation of any State, and which shows on its face the probable nature of such obligation and the identity of such State, in any other State, without lawful authorization by the apparent issuer, shall be presumed to have done so with reasonable grounds for belief that it would be used for a fraudulent purpose and that it would be transported in interstate commerce.

"(c) Whoever willfully makes or possesses any plate, die, stone, or other thing used or intended to be used in the commission of a violation of subsection (a) of this section, shall be fined not more than $5,000, or imprisoned not more than five years, or both.

"(d) For the purposes of this section—

"(1) The term 'obligation' includes a bond, note, certificate of indebtedness, tax stamp, tax token, or other similar evidence of an obligation running to or from a State, or evidence of the discharge thereof.

"The term 'an obligation of any State' includes an obligation of the District of Columbia, the Commonwealth of Puerto Rico, and the several territories and possessions of the United States, and any political subdivision of any of them."

SEC. 2. The analysis at the beginning of chapter 25 of title 18 of the United States Code is amended by adding at the end thereof the following:

"510. Obligations of States."

Amend the title so as to read: "A bill to amend title 18 of the United States Code to prohibit the transportation of fraudulent State tax stamps in interstate and foreign commerce, and for other purposes."

With the following committee amendment:

Strike all after the enacting clause and insert:

"That section 2311 of title 18 of the United States Code is amended by inserting, immediately before the last paragraph, the following new paragraph:

" ' "Tax Stamp" includes any tax stamp, tax token, tax meter imprint, or any other form of evidence of an obligation running to a State, or evidence of the discharge thereof;'

"SEC. 2. Section 2314 of title 18 of the United States Code is amended as follows:

"(a) by inserting after the word 'securities' in the third paragraph thereof, the words 'or tax stamps', and

"(b) by inserting after the word 'security' in the fourth paragraph thereof, the words 'or tax stamp', and

"(c) by amending the heading of section 2314 to read as follows:

" '§ 2314. Transportation of stolen goods, securities, monies, fraudulent State tax stamps, or articles used in counterfeiting.'

"SEC. 3. Section 2315 of title 18 of the United States Code is amended as follows:

"(a) by inserting after the word 'securities' wherever it appears in the second paragraph thereof, the words 'or tax stamps', and

"(b) by inserting after the word 'security' wherever it appears in the third paragraph thereof, the words 'or tax stamp', and

"(c) by amending the heading of section 2315 to read as follows:

" '§ 2315. Sale or receipt of stolen goods, securities, monies, or fraudulent State tax stamps.'

"SEC. 4. The section analysis of chapter 113 of title 18 of the United States Code is amended to read as follows:

" 'CHAPTER 113.—STOLEN PROPERTY

" 'Sec.
" '2311. Definitions.
" '2312. Transportation of stolen vehicles.
" '2313. Sale or receipt of stolen vehicles.
" '2314. Transportation of stolen goods, securities, monies, fraudulent State tax stamps, or articles used in counterfeiting.
" '2315. Sale or receipt of stolen goods, securities, monies or fraudulent State tax stamps.
" '2316. Transportation of cattle.
" '2317. Sale or receipt of cattle.' "

The committee amendment was agreed to.

Mr. McCULLOCH. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. McCULLOCH. Mr. Speaker, I rise to support H.R. 1777 as amended by the Committee on the Judiciary. As amended this bill will permit Federal authorities to be of assistance to State and local officials in apprehending the counterfeiters of State tax stamps and other State obligations.

Very exhaustive hearings were held before Subcommittee No. 2 of the Judiciary Committee. Many State tax officials including the tax commissioner of the State of Ohio, testified concerning the need to strengthen criminal law enforcement in the field of forged and counterfeited State obligations.

The States are able to cope with this problem in those instances in which the entire illegal operation is carried out within the jurisdiction of the State. But, as with some of the other criminal activities with which the Judiciary Committee has concerned itself this year, these operations often are conducted across State boundaries. Therefore, State officials acting alone are under a great handicap in apprehending and arresting the individuals who are principally responsible.

H.R. 1777, as amended by the Judiciary Committee, will be of great assistance to State officials. It will add a new classification, that of counterfeited State tax stamps and other counterfeited obligations of the States, to the offenses specified in title 18 of the United States Code. The bill will make knowingly transporting or knowingly concealing, storing or selling counterfeited State tax stamps or other counterfeited State obligations which have been transported across a State line a Federal offense. The bill will also make transportation of equipment used in counterfeiting a Federal offense.

Again referring to my own State of Ohio, the evidence before the subcommittee revealed that Ohio sustained a

loss approximating a million and a half dollars on counterfeit cigarette tax stamps and that the State has also sustained a loss, the full extent of which has not been yet determined, on forged bonds of the Ohio Turnpike Authority.

The enactment of H.R. 1777 would be at least a deterrent to this type of operation and would be of great assistance to local authorities in seeking and obtaining the cooperation of Federal authorities.

I, therefore, urge the House to pass the bill as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend title 18 of the United States Code to prohibit the transportation of fraudulent State tax stamps in interstate and foreign commerce, and for other purposes."

A motion to reconsider was laid on the table.

RELIEF OF MEMBERS OF THE NATIONAL GUARD

The Clerk called the bill (S. 935) for the relief of certain members of the Army National Guard of the United States and the Air National Guard of the United States.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That sections 15 through 20, inclusive, of the Federal Employees' Compensation Act, as amended (U.S.C., title 5, secs. 765–770), are hereby waived with respect to cases involving those members of the Army National Guard and the Air National Guard of the United States alleged to have suffered disability or death from compensable causes which arose during the period from August 7, 1947, to December 31, 1956, inclusive, and their claims or the claims of their dependents for compensation by reason of the Act of July 15, 1939 (5 U.S.C. 797, 797a), are authorized and directed to be considered and acted upon under the remaining provisions of the Federal Employees' Compensation Act, as amended and extended to members of military reserve components, if filed with the Department of Labor (Bureau of Employees' Compensation) within one year from the date of enactment of this Act.

SEC. 2. Notwithstanding the provisions of section 206(b)(1) of the Servicemen's and Veterans' Survivor Benefits Act any person whose rights may be affected by section 1 of this Act may receive any benefits to which he should be found eligible under the Federal Employees' Compensation Act provided he makes the election required under section 7 thereof. In the event of such an election, any benefit amounts received under any other Act for the same death shall be deducted from amounts payable for similar purposes under the Federal Employees' Compensation Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the bill, S. 935 would, by a waiver of applicable time limitations, extend to members of the Army National Guard and the Air National Guard of the United States alleged to have suffered disability or death from compensable causes which arose in the scope of their duty during the period from August 7, 1947, to December 31, 1956, authority to file their claims or the claims of their dependents for compensation under the Federal Employees' Compensation Act, as amended and extended to members of military Reserve components, provided that the claim is filed within 1 year from the date of enactment of this act.

S. 935 was originally introduced in the Senate as a private bill for the relief of Lillian Frank Sclavi, to permit her to file under the Federal Employees' Compensation Act for benefits arising out of the death of her husband, Lt. William Joseph Frank, on April 8, 1951, while serving on active Federal duty as a member of the Air National Guard.

The bill was amended in the Senate to grant general relief to similarly situated persons by providing for a waiver of applicable time limitations as to claims under the Federal Employees' Compensation Act.

The compensation provided for in the Federal Employees' Compensation Act is paid for disability or death of an employee resulting from injury sustained while in the performance of his duty as an employee of the United States. The committee in reporting this bill noted that the claims filed in accordance with the waiver of limitations contained therein are to be considered under the otherwise applicable provisions of the Federal Employees' Compensation Act. It is therefore clear that this bill merely provides for a waiver of the time requirements relating to such claims, and each of such claims must be established in accordance with the same provisions of the law that would have been applicable had the claims been filed in time.

The benefits of the Federal Employees' Compensation Act were extended by the act of July 15, 1939, to include "members of the Officers' Reserve Corps and the Enlisted Reserve Corps of the Army." Commissioned officers and enlisted men in the Air Force Reserve received derivative coverage of the act by operation of the various statutes concerning the Air Force. From the period August 7, 1947, to December 1955, the Bureau of Employees' Compensation ruled that National Guard officers were not members of the Officers' Reserve Corps and, consequently, not entitled to the benefits of the Federal Employees' Compensation Act. In December 1955 the Employees' Compensation Appeals Board set aside this long-established rule and held that Air National Guard officers, when on active Federal duty, were Reserve officers within the meaning of the Federal Employees' Compensation Act and therefore entitled to its benefits.

The Secretary of Labor suggested in his transmittal to the Senate committee that although no statistics are available, that it is a safe assumption there are numbers of instances involving National Guard officers and their survivors who were precluded from filing a timely claim because of this prior ruling of the Bureau. It was the Secretary's feeling that legislation covering all cases similar to that covered by the private bill before it would be preferable to a bill which would provide relief merely in an individual case. He therefore recommended the substitute language which is now incorporated in S. 935.

The committee was of the opinion that members or survivors of members of the Army National Guard and the Air National Guard of the United States who would have been entitled to assert their claims for benefits during the time period involved should now be given the opportunity so to do. The method suggested by the Secretary of Labor in the proposed bill is the fairest and most equitable way in which this purpose can be achieved. It is, therefore, recommended that S. 935 be favorably considered.

In addition, I think that it should be made clear that coverage extended to these officers by this bill is intended to extend only to those cases where the disabilities or deaths for which claims are filed under the act are alleged to have been caused by service on active Federal duty.

VALIDATING CERTAIN SALARY OVERPAYMENTS

The Clerk called the bill (H.R. 6535) to validate the salary overpayments made to certain officers and employees incident to the salary adjustment provisions of the Federal Employees Salary Increase Act of 1955, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the payments of compensation, including overtime, holiday, and other compensation, heretofore received by any officer or employee of the United States or the District of Columbia for the period beginning with the first day of the first pay period which began after February 28, 1955, and ending on June 28, 1955, and which were based upon erroneously retroactive wage increases administratively granted in addition to the retroactive salary adjustments authorized by section 2(c) of the Federal Employees Salary Increase Act of 1955, are hereby validated. In any case in which the amount of any such payment has heretofore been refunded to the United States, the head of the agency concerned, upon application therefor filed within two years after the enactment of this Act, shall pay out of any money currently available for the payment of compensation of employees to the officer or employee making the refund, or in the event of his death to the person entitled thereto in accordance with section 1 of the Act of August 3, 1950 (5 U.S.C. 61F), an amount equal to the amount so refunded. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States or of the municipal government of the District of Columbia, full credit shall be given for the amount of any payments validated by this Act.

With the following committee amendment:

Page 2, line 11, strike out "61F" and insert "61f".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE ACT OF SEPTEMBER 2, 1958

The Clerk called the bill (H.R. 8490) to amend the act of September 2, 1958, establishing a Commission and Advisory Committee on International Rules of Judicial Procedure, as amended.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to know from someone on the committee whether this is going to cost us any money in the future.

Mr. WALTER. I think the gentleman will be very pleased to know that this will not cost the United States a single penny. It is being financed by various foundations. This is an effort on the part of lawyers throughout the world to devise means of settling matters like decedents' estates, procurement of evidence, and so forth. It is not costing the taxpayer a penny.

Mr. GROSS. I thank the gentleman. I withdraw my reservation of the right to object, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the second paragraph of subsection (b) of section 7 of the Act of September 2, 1958, "An Act to establish a Commission and Advisory Committee on International Rules of Judicial Procedure" (72 Stat. 1743, 1745), as amended by the Act of September 16, 1959 (73 Stat. 567), is further amended to read as follows:

"The Commission shall submit its final report and the Commission and the Advisory Committee shall terminate prior to December 31, 1963."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CENTENNIAL OF ENACTMENT OF HOMESTEAD ACT

The Clerk called the joint resolution (S.J. Res. 98) to provide for the observance of the centennial of the enactment of the Homestead Act.

There being no objection, the Clerk read the joint resolution as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is requested (1) to issue a proclamation designating the calendar year 1962 as the centennial of the enactment of the Homestead Act, and calling upon the Governors of the States, mayors of cities, and other public officials, as well as other persons, organizations, and groups, particularly in the States most directly affected by the Homestead Act, to observe such centennial by appropriate celebrations and ceremonies; and (2) to provide, in such manner as he deems appropriate, for participation by Federal agencies and officials in such observance.

Mr. WEAVER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. WEAVER. Mr. Speaker, I welcome this opportunity to express my support and urge passage of Senate Joint Resolution 98, a bill to authorize and request the President to proclaim 1962 Homestead Act Centennial Year. This resolution is identical with one I introduced in the House, House Joint Resolution 442 but to save time and expedite matters, it was felt by the Committee on the Judiciary that the Senate resolution should be taken up at this time instead of my bill. I would like to say that I worked closely with those interested in the Homestead Act celebration and that the two bills were introduced the same day.

The need for passage during this session of Congress stems from two facts. First of all, the centennial celebration would be proclaimed for the entire year, 1962, and this session will be our last opportunity to request this proclamation. Second, I know there are yearlong celebrations planned to commemorate this historic event and enactment of this resolution must come now in order to lend the support of the Congress, the Executive, and the American people to these celebrations.

Mr. Speaker, I have a special interest in this legislation because the first homestead patent was issued to one Daniel Freeman, a Union soldier on leave, in Gage County which lies within the First Congressional District of Nebraska. However, this matter goes far beyond sectionalism of any kind. The significance of the Homestead Act is that, by all standards, it was one of the most forward-looking, far-reaching pieces of legislation enacted by any parliamentary body in the civilized world.

For instance, it is significant that the first patent, issued to Daniel Freeman, went to a soldier serving his Nation. Freeman was the forerunner of thousands upon thousands of veterans who have been rewarded by their country for the services they rendered in time of war. To these veterans acceptance of a land patent under the Homestead Act meant the beginning of a new life, a life of freedom which gave them full opportunity to express their individualism and to develop to their fullest potential.

Between issuance of that first patent to Daniel Freeman in Gage County and June 30, 1960, 1,466,033 patents were issued. They cover some 248,015,473 acres. The significant figure here is not the vast acreage covered but rather the tremendous number of patents issued. The million and more Americans who received these patents were the men and women who became the backbone of our American development, economically, socially, and to a great extent, morally, during the decades which followed.

During the past 100 years there has been a great deal of talk about land reform. It has been the slogan of revolutionary parties in all parts of the world. And yet, right here in America there developed quietly but effectively—without slogan—the greatest, most magnificent and lasting land reform in the history of mankind.

The Homestead Act was no mere means of disposing of land. It was a vehicle by which our Congress and Government provided new hope, new inspiration to the artisan and laborer faced with the devastating effects of the industrial revolution. It provided hope and inspiration for the small landholder deeply concerned by the trend to plantation and absentee landlord agriculture.

The Homestead Act fulfilled that hope and promise. For those who availed themselves of the opportunity, a new life opened. This new life not only benefited them; it led in large part to the greatness of our land.

Mr. Speaker, I do not believe that many persons in the uncommitted and backward nations of the world fully comprehend the significance of this act of greatness. I doubt seriously if many of their leaders even know that the Homestead Act was even written. They should know about it because it would, I think, give a real boost to the regard in which free institutions of our American society are held in these areas.

The operation of the Homestead Act which provided homes and farms for over a million Americans provides a clear contrast between democracy at work and the brutal collectivization which is presented as land reform by the Communist world.

This resolution, if enacted, would provide our country with a dramatic, effective method to bring home to these uncommitted millions the difference in approach between free men and totalitarians.

For these reasons, Mr. Speaker, I most respectfully urge prompt and favorable action on Senate Joint Resolution 98.

The joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RESIDUAL RIGHTS IN LAND IN FLORIDA

The Clerk called the bill (H.R. 7932) to amend the act of July 2, 1948, so as to repeal portions thereof relating to residual rights in certain land on Santa Rosa Island, Fla.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subparagraph e of the first section and the first sentence of section 3 of the Act entitled "An Act to authorize the Secretary of the Army to sell and convey to Okaloosa County,

State of Florida, all the right, title, and interest of the United States in and to a portion of Santa Rosa Island, Florida, and for other purposes", approved July 2, 1948 (62 Stat. 1229), are hereby repealed.

(b) The Secretary of the Army shall issue such written instruments as may be necessary to bring the conveyance made to Okaloosa County, Florida, on May 22, 1950, under authority of the Act of July 2, 1948, into conformity with the amendment made by subsection (a) of this section.

SEC. 2. The first section of this Act shall take effect on the date the county of Okaloosa, Florida, shall pay to the Secretary of the Army the fair market value, as of May 22, 1950 (as determined by the Secretary), of the property interest authorized to be conveyed to such county under the first section of this Act.

With the following committee amendment:

Page 1, strike out all of lines 3 through 9 and insert in lieu thereof the following:

"That (a) the first sentence in the first section of the Act entitled 'An Act to authorize the Secretary of the Army to sell and convey to Okaloosa County, State of Florida, all the right, title, and interest of the United States, including any restriction on use thereof, in and to a portion of Santa Rosa Island, Florida, and for other purposes', approved July 2, 1948 (62 Stat. 1229), is hereby amended by striking the words 'for recreational purposes'. Subparagraphs a, e, and g of the first section, and all of sections 2 and 3 of the Act are thereby repealed."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE NATIONAL SCIENCE FOUNDATION ACT

The Clerk called the bill (H.R. 8556) to amend the National Science Foundation Act of 1950 to require certain additional information to be filed by an applicant for a scholarship or fellowship, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FORD. Reserving the right to object, Mr. Speaker, I would like to ask the author of the bill or some other member of the committee why in this proposal we are abolishing or limiting the non-Communist declaimer affidavit whereas in another bill that is to be before us this afternoon to extend the Defense Education Act we are retaining such a provision?

Mr. GEORGE P. MILLER. The only reason is that this bill arises from an unfortunate incident where a young man was awarded a scholarship, but without the knowledge of the National Science Foundation had been in contempt of Congress and had been convicted. The committee worked very hard and very long and worked out a plan whereby it would be a felony to withhold any information of this nature including any previous convictions. In this case we have eliminated misdemeanors where fines of less than $25 were involved where there was no penalty invoked. It is ironclad now. Under provision of the bill we cannot have a repetition of this case. It was established by the committee that the oath is not necessary.

Mr. FORD. I would like to ask two questions: One, Will the provision that is included in the proposed legisation permit the remedial action against the young man who was involved in this instance mentioned by the gentleman from California?

Mr. GEORGE P. MILLER. It was already revoked. The scholarship was revoked before it went into effect.

Mr. FORD. But this legislation will not in any way whatsoever impede executive action against incidents of this kind?

Mr. GEORGE P. MILLER. In no way that I know of.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I have asked the National Science Foundation to bring to the attention of the Justice Department that this Edward Yellin, at the time that he applied for a job with the steel corporation, had said he was a mechanic's assistant in Lansing, Mich. When he applied for a National Science Foundation scholarship, he swore he was then attending the College of the City of New York in New York in the same period, which would seem on its face to be a violation of our statutes and he is guilty of perjury. There has been no action taken on that yet by the Justice Department. I hope there is.

In answer to the gentleman's first question, I would like to refer him to page 2 of the report, which says under "section I" that we have substituted a new provision, subsection (d)(2), "which would make it a crime punishable by a fine of not more than $10,000, or imprisonment not more than 5 years, or both, for any member of any organization registered or ordered to register under section 3 of the Subversive Activities Control Act of 1950, with knowledge or notice of such registration or order, to apply for, use, or attempt to use any National Science Foundation scholarship or fellowship award."

We have made specific provision that if even the application is made, let alone the scholarship be granted or used, there is this criminal penalty.

Mr. FORD. My second question is whether this new provision conforms to the amendment which was made in the Taft-Hartley Act in 1959.

Mr. GEORGE P. MILLER. Yes, it does.

Mr. FORD. It is identical.

Mr. GEORGE P. MILLER. The precedent for this provision of criminal penalties for an affidavit is contained in the provisions of the 1959 amendments to the Taft-Hartley Act, after which it is patterned.

Mr. FULTON. It is the 1959 amendments and not the Taft-Hartley Act.

Mr. GEORGE P. MILLER. Yes, as I said, it is contained in the provisions of the 1959 amendments to the Taft-Hartley Act.

Mr. FORD. Mr. Speaker, I withdraw my reservation of objection.

Mr. GROSS. Mr. Speaker, further reserving the right to object, in reading the report, I was shocked by the language of the telegram which the National Science Foundation sent to this man, in view of his record, in which the National Science Foundation said, "We regret to advise you that your scholarship has been revoked." That is strange language to a man who is in contempt of the Congress, and who refused to answer questions with respect to whether he is a Communist or associated with subversives.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. WALTER. I think if the gentleman would read the hearings conducted by the Committee on Un-American Activities concerning the manner in which the National Science Foundation operates, he will conclude, as I have, that the National Science Foundation just does not care whom they select or what the background of the selected individual is. They take the position that this man's "politics" is none of their concern.

Mr. GROSS. I certainly appreciate the statement of the gentleman.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. FULTON. It must be said that the National Science Foundation does not favor the passage of this bill. The Science and Astronautics Committee drew up the bill without, shall we say, the concurrence of the National Science Foundation.

When questioning the Director of the National Science Foundation, I asked him if, under present law, the Foundation knew that Edward Yellin had been convicted of refusing to answer the House Committee on Un-American Activities whether he was a Communist and was later convicted of contempt of Congress, would they again give him a fellowship? The answer was, "Yes, we would give him the fellowship."

My comment was that we must then change the statutory provisions to make clear the intent of the Congress. We must make it clear that people of this type are not to get such awards. In fact, the National Science Foundation said at the time that the only reason Edward Yellin was not getting the fellowship, after being convicted of contempt of Congress and sentenced to the Federal penitentiary for a year, is not the fact that he was convicted, it was because he could not serve out the fellowship at the same time that he was serving time in the Federal penitentiary.

That is quite a remarkable statement. It was because of the man's inability to take the fellowship because he might be confined, that the National Science Foundation revoked the fellowship. It was not revoked because it was wrong to be held in contempt of Congress. I asked was it not prima facie that a man, held to be in contempt of Congress and sentenced to the Federal penitentiary for a year, should be denied the right to receive a Federal grant or fellowship of

$3,800. The National Science Foundation could not answer that question. I should like to ask the gentleman from Pennsylvania, my good friend, Mr. WALTER, if he agrees with me on this unfortunate attitude of the National Science Foundation?

Mr. WALTER. I do not think the gentleman from Pennsylvania has gone as far as I would go as to their attitude, if having had these people before you, you had the opportunity to deal adequately with, shall we say, the lax attitude that they showed toward people who are undoubtedly card-carrying, hard-boiled Communists. This fellow, Yellin, was not one of those frustrated idealists. He was an agent of Soviet Russia.

Mr. FULTON. So far as I know, the Department of Justice has taken no action against this man by bringing charges against him, even though the National Science Foundation, at our prodding, called the case to the attention of the Department some weeks ago.

I have one other question I would like to ask the gentleman from Pennsylvania.

How many other people, such as Edward Yellin, who belong to subversive organizations listed by the Attorney General, to your knowledge as chairman of the House Committee on Un-American Activities, have been considered or have received fellowships or scholarships from the National Science Foundation?

Mr. WALTER. Our inquiry has not been completed, but there are others, I think three, that we have discovered, and we are going to continue to find out who they are.

Mr. FULTON. Therefore, in addition to Edward Yellin, there are still pending three cases of people belonging to subversive organizations, who have received fellowships from the National Science Foundation; is that correct?

Mr. WALTER. That is correct.

Mr. ROUDEBUSH. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Indiana.

Mr. ROUDEBUSH. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. ROUDEBUSH. Mr. Speaker, I rise in support of H.R. 8556, a bill to amend the National Science Foundation Act of 1950. The provisions of this bill will tighten controls against Communists and assorted fellow travelers who apply for scholarship and fellowship scientific study grants.

Members of this body are well aware of the openly announced Communist objective of internal subversion and infiltration of our youth centers and organizations. America's college and university campuses are a prime target of these Red advances.

H.R. 8556 will give the National Science Foundation the legislative tools it requires to weed out these students before they can infect our schools while at the same time receive extraordinary scientific educations from our best schools at taxpayer expense.

This bill provides a severe criminal fine and penal sentence for any Communist who applies for a fellowship or scholarship award from the National Science Foundation. A prison term of not more than 5 years and a fine up to $10,000 or both can result for a Communist who makes an unlawful application for an award.

Another provision of this bill to amend the 1950 act gives the National Science Foundation the needed authority to reject any application it deems not in the best interests of the United States.

The bill provides, furthermore, that every scientific award applicant swear allegiance to the United States and the Constitution. Persons seeking awards also will be required to furnish full statements on past criminal convictions punishable by 30 days or more imprisonment, and any information on any criminal charges pending at the time of the application.

When it is realized that, since 1950, a total of 18,000 National Science Foundation grants costing the taxpayers of this country $54 million have been parceled out, we readily realize what a tremendous weapon this gives the Communists if they can deflect some of these scholarships to their coconspirators.

The dire need for this legislation was shockingly proved recently when it was disclosed that one Edward Yellin, a graduate student at the University of Illinois, had received a National Science Foundation grant of $3,800 for 2 years' advanced engineering study.

I am most familiar with Mr. Yellin's record in the State of Indiana. Yellin was summoned as a witness by the House Un-American Activities Committee during hearings at Gary, Ind., in February 1958. Yellin refused to answer whether he belonged to the Communist Party and was later convicted of contempt of Congress. These hearings were designed to investigate Communist infiltration and colonization in the highly industrialized northern Indiana steel mill area.

Following Yellin's conviction by the Federal court in Hammond, Ind., the conviction was upheld by the U.S. circuit court of appeals.

Nearly 2 years after this episode in Indiana, which received widespread publicity during 1958, Mr. Yellin's name turned up again on June 8 of this year.

That was the date I learned from the House Un-American Activities Committee that this same Mr. Yellin, whose background and court record was so widely known, had been awarded a $3,800 grant to continue his higher education at taxpayer expense.

I immediately brought this shocking situation to the attention of the House Committee on Science and Astronautics, and hearings were instituted as a result. The committee was just as appalled as myself to learn of this highly undesirable award to a person of questionable loyalty.

Two days of hearings on the Yellin grant exhibited a most urgent need for remedial legislation to give the National Science Foundation Board unquestioned authority to refuse grants to persons whose faith and allegiance to the United States are questionable.

There was an expression from National Science Foundation officials during the hearing that under the present law their authority to reject applicants is limited, and their selections are based solely on merit and ability without reference to criminal or subversive background. This body, I am sure, is cognizant of the need to preserve intellectual freedom and furtherance of our scientific endeavors through the advanced education of our best young scientific minds. However, I do not subscribe to the proposition that men of science constitute some special or privileged class.

By the same token Members of this body are equally aware that there is an internal danger that rivals our security as surely as foreign military might. Without proper safeguards at the academic and scientific levels, we not only risk the loss of valuable secrets vital to our security but the more far-reaching danger of Communist infiltration and subversion on our college campuses where young, pliable minds may fall victim to insidious propaganda efforts of the enemy.

By enactment of this bill, we can give the National Science Foundation the tools to implement an anti-Communist award program that will forestall further cases of the Yellin type and insure that tax money goes to students of not only outstanding scientific ability and promise but of unquestioned loyalty to the United States of America.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

Mr. SIKES. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

CAPE HATTERAS RECREATIONAL AREA, N.C.

The Clerk called the bill (H.R. 6729) to provide for the disposal of certain lands held for inclusion in the Cape Hatteras National Seashore Recreational Area, N.C., and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object, could the gentleman from North Carolina, the author of the bill, tell me whether or not in the disposition of this land currently owned by the Federal Government there is a safeguard that this land will only be sold at a fair market value?

Mr. RUTHERFORD. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Texas.

Mr. RUTHERFORD. In response to the gentleman's question, this bill only encompasses releasing the Secretary of the Interior of ownership in this land

and reverting it to the General Services Administration, and they will, in turn, dispose of it in the normal procedure.

Mr. FORD. I notice in the summary of the legislation which I have before me that the land will be disposed of in accordance with the Federal Property and Administrative Services Act. I do not have a copy of that act before me. I only raise the question under that act, if this land is sold, will it be sold at the fair market value to the highest competitive bidder?

Mr. RUTHERFORD. I presume it will, but the purpose of this bill is not to sell or dispose of the land. It is to dispossess the Secretary of the Interior from further operation of the land. This is to release the land from ownership by the Secretary of the Interior and turn it over to the General Services Administration. They can either retain it or sell it, but the purpose of this bill is not to sell the land.

Mr. FORD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the tract of Federal property comprising eight and one-tenth acres of land situated in Dare County, North Carolina, approximately two miles north of Kitty Hawk, which was transferred to the administrative jurisdiction of the Department of the Interior by the Act of June 3, 1948 (62 Stat. 301; 16 U.S.C. 459a–4), to be administered as a part of the Cape Hatteras National Seashore Recreational Area, may be disposed of by the Administrator of General Services in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TEMPORARY APPOINTMENTS IN U.S. COAST GUARD

The Clerk called the bill (H.R. 8719) to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 16 of the Act of July 23, 1947, chapter 301 (61 Stat. 413; 14 U.S.C. 435, note), as amended, is amended, to read as follows:

"SEC. 16. Nothwithstanding the limitations contained in subsection (a) of section 435, and subsection (a) of section 436, of title 14, United States Code, the authority granted by those sections may be exercised until—

"(1) such time as the Secretary of the Treasury determines that the number of officers holding permanent appointments on the active list of the Coast Guard is equal to 95 per centum of the number of such officers authorized by law, exclusive of extra numbers; or

"(2) January 1, 1964;

whichever occurs earlier."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REPEALING PART OF THE ACT OF MARCH 2, 1889

The Clerk called the bill (S. 931) to repeal that part of the act of March 2, 1889, as amended, which requires that grantors furnish, free of all expenses to the Government, all requisite abstracts, official certifications and evidences of title.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the proviso in the third full paragraph on page 941 of volume 25 of the Statutes at Large, in the Act of March 2, 1889, as amended (40 U.S.C. 256), is hereby repealed.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING EASEMENTS IN REAL PROPERTY OF THE UNITED STATES

The Clerk called the bill (H.R. 8355), to authorize executive agencies to grant easements in, over, or upon real property of the United States under the control of such agencies, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. McINTIRE. Mr. Speaker, reserving the right to object, this bill is one of which there are a number of bills before our House Subcommittee on Forestry, and because of the fact that there are some areas here in which there is some common interest, I ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maine?

There was no objection.

GOVERNMENT-OWNED ELECTRIC AND TELEPHONE LINES

The Clerk called the bill (S. 1501) to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, except for electric utility systems constructed and operated as a part of an irrigation system, the Secretary of the Interior is authorized to contract under such terms and conditions as he considers to be in the best interest of the Federal Government for the sale, operation, maintenance, repairs, or relocation of Government-owned utilities and utility systems and appurtenances used in the administration of the Bureau of Indian Affairs. The Secretary shall not execute a contract pursuant to this Act until he has submitted to the Committees on Interior and Insular Affairs of the Senate and the House of Representatives a copy of the contract and a statement of his reasons for proposing the contract, and until such materials have lain before the committees for sixty days (excluding the time during which either House is in recess for more than three days) unless prior thereto the Secretary is notified that neither committee has any objection to the proposed contract.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LAND OF CHILOCCO INDIAN INDUSTRIAL SCHOOL, OKLAHOMA

The Clerk called the bill (S. 1807) to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any part of the lands that were reserved by section 10 of the Act of March 3, 1893 (27 Stat. 640), for the Chilocco Indian Industrial School until further action by Congress, and the improvements thereon, that become excess to the needs of the Bureau of Indian Affairs may be transferred or disposed of in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended or supplemented.

SEC. 2. The Secretary of the Interior is authorized to convey, without consideration, to Charlie Gray, his successors or assigns, and to Esau Greenwood, his successors or assigns, respectively, title to the homestead sites within the Chilocco Indian Industrial School Reserve that are described below when all payments required by their homestead agreements have been paid:

(a) Charlie Gray homestead: Beginning at a point 39 rods south of the northeast corner of the northeast quarter section 17, township 29 north, range 2 east, Indian meridian; thence 24 rods south, thence 33⅓ rods west, thence 24 rods north, thence 33⅓ rods east to point of beginning, containing 5 acres.

(b) Esau Greenwood homestead: Beginning at a point 67 rods north of southeast corner of the northeast quarter section 20, township 29 north, range 2 east, Indian meridian, thence north 20 rods, thence west 50 rods, thence south 10 rods, thence east 20 rods, thence south 10 rods, thence east 30 rods to point of beginning, containing 5 acres.

With the following committee amendments:

Page 1, lines 3 through 10, strike out all of section 1.

Page 1, line 11, strike out "SEC. 2. The" and insert in lieu thereof the words "That the".

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GIVING RESERVED MINERALS TO WALKER RIVER PAIUTE TRIBE

The Clerk called the bill (S. 2016) to give to the Walker River Paiute Tribe the reserved minerals underlying its reservation.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all lands set aside and added to the Walker River Indian Reservation, Nevada, by the Secretary of the Interior under the authority of section 2 of the Act of June 22, 1936 (49 Stat. 1806), are hereby withdrawn from all forms of exploration, location, and entry under the public land mining laws and the minerals underlying such lands are hereby made a part of the reservation to be held in trust by the United States of America subject to valid existing rights, and such minerals shall be subject to lease for mining purposes pursuant to the provisions of the Act of May 11, 1938 (52 Stat. 347; 25 U.S.C. 396a–g) as amended or supplemented.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FORT BELKNAP INDIAN IRRIGATION PROJECT

The Clerk called the bill (S. 2216) to authorize the transfer of three units of the Fort Belknap Indian irrigation project to the landowners within the project.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to transfer to an association or organization of the landowners whose lands are served by the following units of the Fort Belknap Indian irrigation project all of the right, title, and interest of the United States in the irrigation project works of each unit:

(1) Upper Peoples Creek (Hays) unit, located in township 26 north, ranges 23 and 24 east, P.M.M., about 24 miles south of the Fort Belknap agency headquarters.

(2) Big Warm unit, located along the east boundary of the Fort Belknap Reservation in township 27 north, range 26 east, P.M.M., about 36 airline miles from the Fort Belknap agency headquarters.

(3) Lower Peoples Creek (Ereaux) unit, located in the northeast corner of the Fort Belknap Reservation in townships 30 and 31, range 26 east, P.M.M., about 21 airline miles from the Fort Belknap agency headquarters.

The transferees shall thereafter have sole responsibility for the care, operation, and maintenance of the irrigation works of the units, and the United States shall have no responsibility therefor. The transfer of each unit shall be made in such form and under such conditions as the Secretary deems adequate to protect the interests of each landowner served by the unit, and shall include the rights-of-way for canals, laterals, and other project works that are transferred.

SEC. 2. The Secretary of the Interior is authorized to cancel all accrued operation and maintenance charges at the time a transfer authorized by section 1 of this Act is made.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE FREEPORT HARBOR PROJECT, TEXAS

The Clerk called the bill (H.R. 8320) to amend the Freeport Harbor project, Texas.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the existing project for Freeport Harbor, Texas, is hereby modified by revoking the provision of local cooperation set forth at paragraph 12(a) of the report of the Board of Engineers for Rivers and Harbors as contained in House Document Numbered 1469, Sixty-third Congress, insofar as it requires the town of Freeport to own in perpetuity the strip of land specifically referred to therein and to maintain a dock thereon. The assurance heretofore furnished by the town in compliance with this requirement is hereby nullified.

SEC. 2. The Freeport Harbor project shall be subject to a condition that local interests shall maintain adequate public terminal facilities at the harbor.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MODIFY PROJECT FOR DULUTH-SUPERIOR HARBOR

The Clerk called the bill (H.R. 7854) to modify the project for the Duluth-Superior Harbor, Minn. and Wis., to provide for the abandonment of the 21st Avenue West Channel, and for other purposes.

There being no objection the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled, That the project for the Duluth-Superior Harbor, Minnesota and Wisconsin, authorized by the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved August 30, 1935 (49 Stat. 1028, 1035), and the project for such harbor authorized by the River and Harbor Act of 1960, are each modified to abandon those portions of the Twenty-first Avenue West Channel more particularly described in section 2 of this Act, and that portion of the Duluth-Superior Harbor in the Twenty-first Avenue West Channel area bounded by harbor lines as approved by the Secretary of War on November 17, 1899, more particularly described in section 2 of this Act, is hereby declared to be a nonnavigable water of the United States within the meaning of the Constitution and laws of the United States. The right to alter, amend, or repeal this section is expressly reserved.

SEC. 2. The area to be abandoned referred to in the first section of this Act is more particularly described as follows:

About the northerly 1,250 feet of the 3,300-foot-long Twenty-first Avenue West Channel authorized by the Act of August 30, 1935, as described in House Document Numbered 482, Seventy-second Congress, second session, 1932; and about the northerly 500 feet of the 2,500-foot-long Twenty-first Avenue West Channel authorized by the River and Harbor Act of 1960, as described in House Document Numbered 196, Eighty-sixth Congress, first session, 1960; and the harbor area beginning at harbor line point 40, situated south 62 degrees 25 minutes 49 seconds west, 1,375.00 feet from a point on city monument line of Garfield Avenue produced 1,462.50 feet northerly from a granite city monument, situated 25 feet southerly from centerline of Ash Avenue and 25 feet easterly of centerline of Garfield Avenue;

thence south 62 degrees 25 minutes 49 seconds west, a distance of 793.40 feet to harbor line point 42;

thence south 27 degrees 34 minutes 11 seconds east, parallel with city monument line of Garfield Avenue and 2,168.40 feet therefrom, a distance of 654.00 feet to harbor line point 42a, to be established;

thence south 56 degrees 28 minutes 40 seconds east, a distance of 620.60 feet to harbor line point 40b, to be established;

thence south 49 degrees 52 minutes 29 seconds east, a distance of 1,300.00 feet to harbor line point 40a; situated on the harbor line between points 38 and 40, as approved by Secretary of War, November 17, 1899;

thence on said approved harbor line north 27 degrees 34 minutes 11 seconds west, for a distance of 2,400.00 feet to harbor line point 40, the point of beginning.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHANGE NAME OF PLAYA DEL REY INLET, VENICE, CALIF.

The Clerk called the bill (H.R. 157) to change the name of the Playa del Rey Inlet and Harbor, Venice, Calif., to the Marina del Rey Small Craft Harbor, Los Angeles, Calif.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the body of water designated as the Playa del Rey Inlet and Harbor, Venice, California, by section 101 of the River and Harbor Act of 1954 (68 Stat. 1252; Public Law 780, Eighty-third Congress), shall be known and designated hereafter as the "Marina del Rey Small Craft Harbor, Los Angeles, California". Any law, regulation, map, document, record, or other paper of the United States in which such body of water is referred to shall be held to refer to it as the "Marina del Rey Small Craft Harbor, California".

With the following committee amendments:

Page 1, line 7, strike "Small Craft Harbor."
Page 2, line 1, strike "Small Craft Harbor."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed.

The title of the bill was amended to read: "A bill to change the name of the Playa del Rey Inlet and Harbor, Venice, California, to the 'Marina del Rey, Los Angeles, Calif'."

A motion to reconsider was laid on the table.

LANDS HELD IN TRUST FOR THE PUEBLOS

The Clerk called the bill (S. 203) to declare that the United States holds in trust for the pueblos of Santa Ana, Zia,

Jemez, San Felipe, Santo Domingo, Cochiti, Isleta, and San Ildefonso certain public domain lands.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title to the following public domain lands and improvements thereon, situated within Sandoval County in the State of New Mexico, is hereby declared to be held by the United States in trust for the pueblo of Santa Ana:

NEW MEXICO PRINCIPAL MERIDIAN

Township 13 north, range 3 east:
Section 5, that portion of the section situated west of New Mexico Highway 44;
Section 6, lots 4, 5, 6, 7, 11, 12, and 13, southeast quarter northwest quarter, south half northeast quarter east half southwest quarter, southeast quarter.
Township 14 north, range 3 east:
Section 1, lots 1, 2, 3, 4, 5, 6, and 7, south half north half, north half south half, southeast quarter southeast quarter;
Section 3, lots 1, 2, 3, 4, 5, 6, 7, and 8, south half north half, north half south half;
Section 4, lots 1, 2, 3, 4, 5, 6, 7, and 8, south half north half, north half south half;
Section 5, lots 1, 2, 3, 4, 5, 6, 7, and 8, south half north half, north half south half;
Section 6, lots 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10, south half northeast quarter, northeast quarter southeast quarter;
Section 7, lots 3, 4, 5, 6, 11, 12, 13, and 14;
Section 12, lots 1, 4, 5, and 8, east half east half;
Section 13, lots 1, 4, 5, and 8, east half east half;
Section 18, lots 2, 3, 4, 5, 8, 9, 10, and 11;
Section 19, lots 2, 3, 4, 5, 8, 9, 10, and 11;
Section 24, lots 1, 4, 5, and 8, east half east half;
Section 25, lots 1, 4, 5, and 9, east half east half;
Section 30, lots 2, 3, 4, 5, 8, 9, 10, and 11;
Section 31, lots 2, 3, 4, 5, 8, 9, 10, and 11.
Township 14 north, range 4 east:
Section 6, lots 3 and 4, south half northwest quarter, southwest quarter;
Section 7, west half;
Section 18, west half, west half east half;
Section 19, west half, west half east half;
Section 30, northwest quarter, west half northeast quarter, southwest quarter, west half southeast quarter;
Section 31, northwest quarter northeast quarter, northeast quarter northwest quarter.
Township 15 north, range 3 east:
Section 5, lots 7 and 8;
Section 10, lots 1, 3, and 4, southeast quarter southwest quarter;
Section 11, lots 1, 2, 3, and 4;
Section 12, lots 1, 2, 3, and 4;
Section 13, all;
Section 14, all;
Section 15, all;
Section 17, all;
Section 18, east half;
Section 19, east half;
Section 20, all;
Section 21, all;
Section 22, all;
Section 23, all;
Section 24, all;
Section 25, all;
Section 26, all;
Section 27, all;
Section 28, all;
Section 29, all;
Section 30, lot 4, east half, southeast quarter southwest quarter;
Section 31, all;
Section 33, all;
Section 34, all;
Section 35, all.
Township 15 north, range 4 east:
Section 7, lots 2 and 3;
Section 18, west half;
Section 19, west half;
Section 30, west half;
Section 31, west half; containing 22,975.87 acres, more or less.

SEC. 2. Title to the following described public domain lands and improvements thereon, situated within Sandoval County in the State of New Mexico, is hereby declared to be held by the United States in trust for the pueblo of Zia:

NEW MEXICO PRINCIPAL MERIDIAN

Township 14 north, range 1 east:
Section 11, west portion of section not included in Zia Pueblo trust land described in Act of August 13, 1949 (63 Stat. 604);
Section 12, all;
Section 14, all;
Section 15, all;
Section 22, all;
Section 23, west portion of section not included in Zia Pueblo trust land described in Act of August 13, 1949 (63 Stat. 604);
Section 24, all;
Section 26, all;
Section 27, all.
Township 14 north, range 2 east:
Section 1, lots 11, 12, 13, 14, 15, 16, and 17, south half southwest quarter, southwest quarter southeast quarter;
Section 4, lots 9, 10, 11, and 12, south half south half;
Section 6, lots 10, 11, 12, 13, 14, 15, 16, 17, and 18, south half southeast quarter, southeast quarter southwest quarter, northeast quarter southwest quarter, southeast quarter northwest quarter;
Section 8, all;
Section 10, all;
Section 11, east half east half;
Section 12, all;
Section 13, all;
Section 14, all;
Section 18, all;
Section 20, all;
Section 22, all;
Section 23, east half east half;

Section 27, lot 5;
Section 34, lots 1, 4, 5, and 8;
Section 35, lots 3, 4, 5, and 6, west half west half, containing 433.27 acres, more or less.

SEC. 9. Nothing in this Act shall affect valid rights existing at the date of approval of this Act.

SEC. 10. (a) For the purpose of improving the land tenure pattern and consolidating Pueblo Indian lands, the Secretary of the Interior is authorized, under such regulations as he may prescribe, to acquire by exchange any lands or interests therein, including improvements and water rights, within the Pueblo land consolidation areas, and to convey in exchange therefor not to exceed an equal value of unappropriated public lands within the State of New Mexico, or, with the consent of the Pueblo authorities any Pueblo tribal lands or interest therein, including improvements and water rights.

(b) Either party to an exchange under this section may reserve minerals, easements, or rights of use.

(c) The Secretary may execute any title documents necessary to effect the exchanges authorized by this section.

(d) Title to all lands acquired under the provisions of this section shall be taken in the name of the United States in trust for the respective Pueblo Indian tribes.

SEC. 11. The lands held or acquired for the pueblos pursuant to this Act shall be administered the same as other trust or restricted Indian lands subject to regulations prescribed by the Secretary of the Interior for the protection and conservation of the soil, proper utilization of the land, and other purposes, and shall be a part of the respective Pueblo reservations.

SEC. 12. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MINERAL DEPOSITS ON NORTHERN CHEYENNE RESERVATION

The Clerk called the bill (S. 2224) to grant minerals, including oil, gas, and other natural deposits, on certain lands in the Northern Cheyenne Indian Reservation, Mont., to certain Indians, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Act of June 3, 1926 (44 Stat. 690), as amended by the Act of July 24, 1947 (61 Stat. 418), is hereby amended to read as follows:

"SEC. 3. (a) The coal or other minerals, including oil, gas, and other natural deposits, on said reservation are hereby reserved for the benefit of the tribe and may be leased with the consent of the Indian council for mining purposes in accordance with the provisions of the Act of May 11, 1938 (52 Stat. 347; 25 U.S.C. 396 a-f), under such rules, regulations, and conditions as the Secretary of the Interior may prescribe: *Provided,* That at the expiration of fifty years from the date of the approval of this Act, the coal or other minerals, including oil, gas, and other natural deposits, of said allotments shall become the property of the respective allottees or their heirs or devisees, subject to any outstanding leases, regardless of any prior conveyance by such allottee, heirs, or devisees of the land overlying such minerals, oil, gas, or other natural deposits and regardless of the form of reference in such conveyance, or lack of reference, to the minerals, oil, gas, or other natural deposits reserved by this Act.

"(b) Title to the minerals so granted shall be held by the United States in trust for the Indian owners, except that if upon the expiration of said fifty years the entire Indian interests in the minerals within any allotment or parcel thereof is granted by this Act to a person or persons who at that time hold an unrestricted title to the lands overlying such minerals, oil, gas, or other natural deposits, then the Secretary of the Interior shall by fee patent transfer to such person or persons the unrestricted fee simple title to such minerals, oil, gas, or other natural deposits, which title shall vest in such person or persons as of the date of the patent.

"(c) The unallotted lands of said tribe of Indians shall be held in common, subject to the control and management thereof as Congress may deem expedient for the benefit of said Indians."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DONATE LAND TO THE JICARILLA APACHE TRIBE

The Clerk called the bill (S. 2241) to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned land.

Mr. LAIRD. Mr. Speaker, reserving the right to object, I would like to direct a question to the chairman of the Indian Affairs Subcommittee of the House Committee on Interior and Insular Affairs regarding another important piece of legislation which has to do with the Menominee Indian Tribe of Wisconsin. H.R. 4130, was discussed under a rule here on the floor in the House of Representatives. There was adequate discussion. Members of the House unanimously supported the approach recommended by the Interior and Insular Affairs Committee, a very fine approach in handling a tribe that has been terminated from Federal supervision, in that it continued the educational, health, and welfare aid on a 100 percent reimbursable basis for the first year, 80 percent for the second year—60, 40, 20, and 10 percent in each succeeding year.

The Menominee Indian Tribe was one of the first tribes to be terminated, and this termination took place in April of this year. This bill went to conference on June 13, and I would like to find out, if I could, the progress that has been made in the conference committee on this important piece of legislation.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield.

Mr. HALEY. The gentleman, of course, knows the attitude of the gentleman from Florida, chairman of the subcommittee. I think we worked out a very fine bill.

Mr. LAIRD. I agree with the gentleman that the House worked a fine bill and commend the gentleman and members of the Interior and Insular Affairs Committee for their outstanding work.

Mr. HALEY. I think the bill did justice to the Indians; I think it did justice to the taxpayers. In that conference I listened for 30 minutes to the conferees on the other side and the firm attitude they took on the position of the Senate. The bill has not got beyond that stage. I thought a conference was for the purpose of adjusting differences between the two Houses.

Mr. ASPINALL. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield to the gentleman from Colorado, the chairman of the Interior and Insular Affairs Committee.

Mr. ASPINALL. The gentleman from Wisconsin will remember that when we went to conference we had suggested to Members of the House that we would attempt to get agreement on the bill as it passed the House. The bill, as the gentleman knows, is really a termination, is a part of so-called termination legislation. But when we went to conference, the conferees of the other body wanted to treat it as a relief bill. The House conferees did not desire to treat it that way. So we reached a stalemate, we cannot get together. We feel that our approach is not only logical but will be effective. We are waiting for consideration by the other body.

Mr. LAIRD. I thank my friend from Colorado for his help. I hope the other body will give consideration to compromising their position. This is important legislation. I shall not object to this Senate bill presently before us. I have been assured that the other body will make an effort to compromise their differences with the House on the direct aid features contained in H.R. 4130.

Mr. REIFEL. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield to the gentleman from South Dakota.

Mr. REIFEL. Mr. Speaker, I have a bill similar to this one which was passed by unanimous consent by this body. The Senate added some general legislation to it. It came back to the Interior Committee. I wonder if some explanation might be given of that?

Mr. ASPINALL. We are in a somewhat similar situation as far as that legislation is concerned. We feel that the bill we have sent over to the other body will take care of a certain situation that should be taken care of at once. Then we could consider general legislation which has been introduced. We do not feel that a general rider on a House bill, which is sponsored to take care of a specific instance, should cause the House bill the burden of carrying the whole responsibility of an approach to a general problem.

Mr. REIFEL. I thank the gentleman. I wanted to have this information to inform my folks back home.

May I ask the gentleman, will this bill be considered further in the next session?

Mr. ASPINALL. It is our hope it will be. We have not thrown any particular blocks against the bill.

Mr. REIFEL. I appreciate the excellent consideration by the committee and what the chairman has given to this bill. The appropriate Indians back home are giving consideration to the bill.

Mr. ASPINALL. The committee feels that the U.S. Senate and the House of Representatives are coordinate bodies, that we in the House have certain responsibilities, and when we go to conference we are obliged to hold out for what we consider to be our authority and responsibilities.

Mr. REIFEL. I appreciate the gentleman's position, and I know he is going to maintain it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the right, title, and interest of the United States in the following described land containing 391.43 acres, more or less, situated in the State of New Mexico and now in use by the Jicarilla Apache Tribe of the Jicarilla Reservation—

Township 32 north, range 1 west, New Mexico principal meridian:

Section 31, lots 1, 2, 3, east half northwest quarter, northeast quarter southwest quarter, containing 234.38 acres, more or less;

Section 30, lot 4, northeast quarter southwest quarter, lot 3, southeast quarter southwest quarter, containing 156.20 acres, more or less;

Beginning at corner numbered 1, from which the northwest corner of section 30, township 32 north, range 1 west, New Mexico principal meridian, bears north 57 degrees 40 minutes west a distance of 2,676 feet;

Thence from corner numbered 1 south 53 degrees 33 minutes west a distance of 396 feet to corner numbered 2; thence south 36 degrees 27 minutes east a distance of 100 feet to corner numbered 3;

Thence north 53 degrees 33 minutes east, a distance of 352 feet to corner numbered 4; thence north 12 degrees 32 minutes west, a distance of 112 feet to point of beginning, containing 0.85 acres, more or less;

is hereby declared to be held by the United States in trust for the Jicarilla Apache Tribe of the Jicarilla Reservation, New Mexico, subject to a reservation of the right of the United States to use so much of said land, together with all facilities now thereon or hereafter installed by the United States, as shall in the opinion of the Secretary of the Interior be needed for the administration of the affairs of the tribe, and subject to a reservation in the United States of a right-of-way across any part of said land which the Secretary of the Interior deems desirable in connection with the administration of the affairs of the tribe.

With the following committee amendment:

Page 3, after line 4, add a new section to read:

"SEC. 2. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission."

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SALUTING "UNCLE SAM" WILSON, OF TROY, N.Y.

The Clerk called Senate Concurrent Resolution 14, saluting "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of America's national symbol of "Uncle Sam."

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. ADAIR. Mr. Speaker, because there is some controversy about the birthplace and place of death and burial of the man who was the progenitor of the figure we know as Uncle Sam, and because it is such an important matter to the Nation, I rise to ask some questions of the gentleman from New York [Mr. O'BRIEN].

By way of preface, let me say there are those, including myself, who believe that the "Uncle Sam" who was born in the State of Delaware, who lived for a period of time in Troy, N.Y., and is buried in Indiana, is the progenitor of "Uncle Sam." I know the gentleman from New York and many others like him, have a somewhat different point of view.

My first question, Mr. Speaker, is: Does the resolution, as now worded, fix a birthplace or a burial place for Samuel Wilson?

Mr. O'BRIEN of New York. Mr. Speaker, I may say the resolution before us now has nothing to do with the birthplace of Samuel Wilson. It falls squarely upon the one matter, on which the gentleman and I are in agreement, that the gentleman did live in Troy, N.Y. That is where he acquired the name "Uncle Sam."

I may say that the other matters on which we are in disagreement are still to be determined by the historians, and I would not suggest that the House try to decide them today.

Mr. ADAIR. No memorial is provided for in this resolution as now worded?

Mr. O'BRIEN of New York. I would say that all we do in this resolution is to tip our hat in the general direction of Samuel Wilson.

Mr. ADAIR. I thank the gentleman.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Iowa.

Mr. GROSS. I wondered if the gentleman from Indiana was going to let New York get away with a victory over Massachusetts, Delaware, and Indiana? Apparently that is about what would happen here.

Mr. ADAIR. We believe that Samuel Wilson, who is buried in Indiana, did for a time live in Troy, N.Y., as he was on

his way westward through Pennsylvania, and eventually into Indiana. I think we are in agreement on that point.

Mr. Speaker, I ask that all Members be permitted to extend their remarks on the resolution under present consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BASS of New Hampshire. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from New York why the committee struck out from Senate Concurrent Resolution 14 all reference to Uncle Sam's connection with New Hampshire, in particular, the fact that he spent 20 years of his younger life in Mason, N.H.

Mr. O'BRIEN of New York. I might say to the gentleman from New Hampshire that I personally agree that Samuel Wilson lived for a considerable period of time in Mason, N.H. I also felt if we attempted to argue at this time about where the gentleman lived before he went to Troy and where his bones rest now, we would get nothing, and the historians would have, not a field day, but a field year.

Mr. BASS of New Hampshire. If the gentleman will yield further, is there any chance that the committee would accept an amendment restoring that language which was put in by the Senate?

Mr. O'BRIEN of New York. May I say to the gentleman I would hope that the gentleman would be satisfied with the expression on my part that I am convinced that the progenitor of Uncle Sam did live in Mason, N.H. As long as the gentleman and I are trying to honor the same man, I think we can accomplish that by passing this resolution. At the same time, we will not be closing the door to Indiana or any place that might claim at some future time to be his final resting place.

Mr. GROSS. If the gentleman will yield, I cannot help but ask the gentleman from New York which Samuel Wilson he is referring to. There seems to be two or three of them.

Mr. O'BRIEN of New York. I think there were quite a number of them. I think one of the unfortunate things in those days was the multiplicity of Samuel Wilsons. I think that after one of them acquired the title of "Uncle Sam" many of the others thought it might impress their children or their grandchildren to say that they were really the one, just as some of us try to impress our grandchildren by telling them we were much better baseball players in our younger days than we really were.

Mr. BASS of New Hampshire. Mr. Speaker, reserving the right to object, I regret very much the parliamentary situation is such that an amendment to this resolution is not in order recognizing the fact that "Uncle Sam" Wilson spent 20 years as a young man in the town of Mason, N.H. The Wilson farm, including the original house, still remains in excellent condition and very little changed from the time it was "Uncle Sam" Wilson's boyhood home for over 20 years.

In the book "Uncle Sam, the Man and the Legend," by Alton Ketchum, published by Hill and Wang, New York, there is not only an account of Wilson's life in Mason, but on page 49 is a photograph of the Uncle Sam house in Mason Valley.

The family register of Edward Wilson, father of "Uncle Sam" Wilson, taken from the family Bible, passed down through his youngest son, Capt. Thomas Wilson, a lifetime resident of Mason, shows: Edward Wilson, father of "Uncle Sam," born July 6, 1734, West Cambridge, Mass., died June 17, 1816, Troy, N.Y., aged 82 years; Lucy Francis (mother of "Uncle Sam"), born March 21, 1739, Medford, Mass., died December 8, 1835, Mason, N.H., aged 97 years.

They were married in November 1757. The family moved to Mason in 1780, staying 20 years. The family moved to Troy in 1804.

Children of Edward and Lucy Wilson: Joseph, born October 9, 1759; Lucy, born January 12, 1761, died December 23, 1819; Edward, born April 4, 1762, died March 7, 1843, Milton, N.Y.; Ebenezer, born August 18, 1763, died July 1825; Rachel, born February 13, 1765, died October 16, 1846; Samuel, born September 16, 1766, died July 31, 1854; Nathaniel, born February 10, 1768, died August 19, 1854; William, born October 25, 1769; Aron, born March 10, 1771; Andrew, born January 1, 1777, died April 23, 1841; Thomas, born October 23, 1778.

Edward, Jr. and Samuel—"Uncle Sam"—went to Troy in 1800 and for many years were actively engaged in meat packing business there. Notice of the death of Sam Wilson and history of how the United States derived the name "Uncle Sam" is given in the New England Historical and Genealogical Register, volume 8, page 277, as well as in the History of Mason, published in 1858.

In view of these facts, I would like to have the comments of the gentleman from New York.

Mr. CONTE. Mr. Speaker, this country has many symbols that reflect portions of its national purpose, of its history, and of its traditions. Uncle Sam, however, is the only personification of the United States and it is fitting that the Congress should recognize Samuel Wilson of Troy, N.Y., as the progenitor of America's national symbol of "Uncle Sam."

Let us reflect for a moment on the characteristics that this figure embodies—Uncle Sam is of a Lincolnian stature and his garb is of the same basic design as the American flag. He radiates a certain superhuman power, a ruggedness of build and a sterness of face. Our conception of an individual largely self-sustaining and certainly self-made could not be better portrayed in any other figure. So I say that the image presented by Uncle Sam accurately corresponds to the history and development of our Nation, for we are proud that the individual man has stood as the cornerstone for America's strength.

Whether or not it was a coincidence that Samuel Wilson was called "Uncle Sam" is unimportant—it is, however, significant. Many nations have given their symbols a parental association. For instance, Mother India, Little Father of all the Russians and the jolly father figure of Great Britain, John Bull. Having certain difficulties with the system under which a monarch represented the benevolent father, Americans are not too anxious to acquire another powerful parent. It is significant, therefore, that we should adopt an uncle figure to personify our Nation. What does an uncle represent in an American family? An uncle to his nephews and nieces seems aloof, but nevertheless vitally concerned about their well-being. When all other sources have been tapped and run dry, an uncle is always there to provide. While he does not possess or exert the absolute authority of a parent, his influence over the young is considerable. In a word, his relationship is more genial and less strict than the parental association.

It is fair to compare this form of relationship with the attitude of Americans toward their Government. We have never wanted a government to bear down upon us, supervise our daily lives, or dictate our actions. Yet we have the security of the knowledge that a strong protecting national uncle keeps our freedom safe. Our people want their full rein of social and economic liberty although they fully expect to be reprimanded by their influential uncle when they overstep the bounds of law. It is this rather oblique and remote functioning of the Government that was built into our system by the Founding Fathers.

We should strive to establish and maintain a similar viewpoint of America by our friends abroad. If they look at us as an uncle in the background rather than as a dominant, know-all type of parent, our world respect will increase widely. We should aid them with sagacity and stand behind them protectively. So the uncle figure is indeed appropriate for the United States in her association with its citizens and with the people of other nations.

United States policy in all its aspects increasingly takes on more of the characteristics of the traditional uncle. Therefore, it is right that Samuel Wilson who began his early life in Arlington, Mass., but who spent the greater part of it in Troy, N.Y., should be officially recognized as the progenitor of America's national symbol of Uncle Sam.

Mr. BASS of New Hampshire. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Hampshire?

There was no objection.

CONVEYANCES OF RIGHTS-OF-WAY BY RAILROAD COMPANIES

The Clerk called the bill (H.R. 6630) to amend the act of May 25, 1920, relating to conveyances of certain parts of rights-of-way by railroad companies.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to ask if this is the bill that was recommended by the Department of the Interior, and does it meet the original objections of the Department of the Interior?

Mrs. PFOST. If the gentleman will yield to me——

Mr. GROSS. Yes; I am glad to yield to the gentlewoman.

Mrs. PFOST. The bill has been amended and does meet the objections of the Department of the Interior.

Mr. GROSS. Will the grantee pay the Federal Government the fair market value for any land it takes?

Mrs. PFOST. A fair market value is not provided in the legislation. As the gentleman knows, rights-of-way were granted, or given to the railroad companies many years ago, ranging in width from 60 feet to 400 feet. Where the rights-of-way are wide and there are no multitract installations, there are considerable areas within the rights-of-way which are not needed for railroad purposes.

Mr. GROSS. These lands were originally donated?

Mrs. PFOST. These lands were originally donated to the railroad companies to facilitate the settlement of the West.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

Mrs. PFOST. Mr. Speaker, in bringing H.R. 6630 to the floor today, the Committee on Interior and Insular Affairs has taken a large step toward clearing up a harassing problem that has been with us for many years.

The development of the West was materially assisted by the construction of railroads induced by land grants from Congress. These grants were of several kinds and I will not attempt to distinguish among them. It suffices to say at this time that the courts have found that the railroads do not have authority to convey good title to third parties.

This has meant, over the years, that when an occupant of railroad right-of-way land required a grant of title in order to qualify for a loan, or otherwise to permit productive use of the right-of-way, we have had to enact enabling legislation either to validate a group of conveyances or validate conveyances on a case-by-case basis. In either event it has been bothersome and time-consuming. In this Congress alone three bills were introduced and referred to the Committee on Interior and Insular Affairs for validation of conveyances made by the Central Pacific Railroad Co. and the Southern Pacific Railroad Co.

Enactment of H.R. 6630 with the committee amendment will eliminate the need to act on individual private bills now and in the future. In this connection I should like to call my colleagues' attention to the fact that, while three bills are pending in this Congress, we have been told that many more would probably be introduced in the near future if general legislation is not enacted.

Among the difficulties in considering general legislation were the conflicting views concerning the real estate interest or title held by the railroads and the extent of any reversionary interest of the United States. We have not solved this problem. Nonetheless, we have a bill that adequately safeguards the interests of the United States whatever those interests might be.

The Subcommittee on Public Lands, of which I have the honor to be chairman, held extensive hearings on this and related legislation concerned with railroad right-of-way grants. Despite the need for additional time in which to consider and solve the underlying problem, we were impressed with the fact that the United States had no need for the lands involved in the three private bills now pending and that Congress had in the past on several occasions been similarly impressed with specific situations and had enacted validating legislation. Accordingly, we concluded that it would be in the public interest, and an act of fairness to the individuals whose bills are pending, to develop a solution that will permit the individual cases to be handled expeditiously without requiring the fulfillment of the complete legislative process for each conveyance.

H.R. 6630 as amended and reported by the Committee on Interior and Insular Affairs authorizes a railroad company, with the concurrence of the Secretary of the Interior, to convey any portion of its right-of-way or station grounds previously granted to it by the United States subject to the reservation of oil, gas, and other minerals in the United States. Concurrence of the Secretary of the Interior would be withheld if the grantor railroad receives payment above reimbursement for administrative costs or if, in the judgment of the Secretary, the interests of the United States are adversely affected. These provisions, on the one hand, preclude any windfall to the railroads and at the same time protect the interests of the United States.

Because H.R. 6630 presents a reasonable approach to these problems I urge all Members to support its enactment.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of May 25, 1920 (ch. 197, 41 Stat. 621; 43 U.S.C. 913), is amended by the addition of the following new section:

"SEC. 2. Any railroad company to which a grant for a right-of-way through the public lands has been made by Congress, or its successor in interest or assign, is authorized to convey any portion of that right-of-way, except any right, title, and interest of the United States in and to the oil, gas, and other minerals underlying such right-of-way, which traverses or occupies a legal subdivision of the public land surveys, title to which is no longer in the United States except for a reversionary interest in the right-of-way, to the party holding title to the lands adjoining that portion or to the State or to the county, municipality, or other political subdivision containing that legal subdivision: *Provided,* That no conveyance under this section shall have the effect of decreasing the width of any right-of-way to less than fifty feet on each side of the centerline of the main track or tracks of railroad as established and maintained upon the date of approval of this section: *Provided further,* That any conveyance made under this section shall be subject to any right, title, and interest of the United States in and to the oil, gas, and other minerals in the land conveyed, with the right to prospect for, mine, and remove those minerals."

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following: "That the Act of May 25, 1920 (ch. 197, 41 Stat. 621; 43 U.S.C. 913), is amended by the addition of the following new section:

"'SEC. 2. Any railroad company to which a grant for a right-of-way through the public lands or a site for station grounds has been made by Congress, or its successor in interest or assign, may, with the concurrence of the Secretary of the Interior, convey any portion of that right-of-way or station grounds, except any right, title, or interest of the United States in and to the oil, gas, and other minerals underlying such right-of-way or station grounds, which traverses or occupies a legal subdivision of the public land surveys, title to which is no longer in the United States except for a reversionary interest in the right-of-way or station grounds, to the patentee or purported patentee of the portion of the legal subdivision occupied by such right-of-way or station grounds or to the patentee's successor in interest, or to the State, county, municipality, or other political subdivision containing that legal subdivision. No conveyance under this section shall have the effect of decreasing the width of any right-of-way to less than fifty feet on each side of the centerline of the main track or tracks of railroad as established and maintained upon the date of approval of this section, and every conveyance made under this section shall be subject to any right, title, or interest of the United States in and to the oil, gas, and other minerals in the land conveyed, with the right to prospect for, mine, and remove those minerals. A copy of each instrument of conveyance, other than for a public highway or street, proposed to be executed and delivered under authority of this section 2, and a verified statement of the amount of compensation which has been or will be paid to the railroad company for the same shall be filed in the Land Office of the United States in the district in which the land described in the conveyance is located. The Secretary shall not concur in any proposed conveyance with respect to which he concludes that the grantor has received or will receive compensation in excess of the administrative costs and expenses incurred in connection with the issuance of such conveyance nor shall he concur in any proposed conveyance which will, in his judgment, adversely affect the interests of the United States.'"

The committee amendment was agreed to.

Mr. CUNNINGHAM. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CUNNINGHAM. Mr. Speaker, I strongly support the bill H.R. 6630 and urge its immediate passage. This legislation is necessary and is long overdue. With the adoption of the committee amendment, H.R. 6630 will authorize railroad companies, subject to certain

limitations, to convey portions of rights-of-way, over, or station grounds on, public lands. However, conveyances could be made only with the concurrence of the Secretary of the Interior, and would be limited to those instances where the rights-of-way or station grounds are within surveyed areas where the United States does not have title to the underlying land, could be made only to the patentee of such underlying land or his successor in interest, and would be subject to a reservation in the United States of minerals.

Mr. Speaker, the Subcommittee on Public Lands of the Interior Committee of the House, of which I am the ranking minority member, has held extensive hearings on this legislation. We heard all interested parties and this bill is the result of those hearings. In addition to the bill before us, H.R. 6630, I introduced an identical bill, H.R. 6945 which is referred to in the committee report.

H.R. 6630, as amended, does not solve all of the problems in this complicated field of railroad rights-of-way but it is a long step in the right direction. I urge its adoption.

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. JOHNSON of California. Mr. Speaker, as author of H.R. 6630, I first would like to point out that the Committee on Interior and Insular Affairs and its Subcommittee on Public Lands reported this bill only after careful consideration of its importance and I would like to say here and now that I personally appreciate the attention given to this matter by the committee's distinguished chairman, the gentleman from Colorado [Mr. ASPINALL] and the gracious chairman of the subcommittee, the gentlewoman from Idaho [Mrs. PFOST].

H.R. 6630, as amended, adds another section to the act of May 25, 1920, 43 United States Code, section 913, providing that a railroad company holding such congressional grant right-of-way or station grounds may, with the concurrence of the Secretary of the Interior, convey a portion of that right-of-way or station grounds—except any oil, gas, and other mineral rights of the United States—to the patentee of the underlying subdivision or his successor, or to the State, county, or municipality in which the subdivision is located. H.R. 6630, as amended, is an additional provision allowing grants to patentees in cases where the Secretary of the Interior joins in the conveyance, and does not in any way affect or limit the right of the railroads to make conveyances of granted right-of-way for public highway or street purposes.

This bill includes several other provisions. The right-of-way may not be decreased below 100 feet in width, that is, 50 feet on either side of the centerline. Conveyances may be made only subject to any oil, gas, and other mineral rights of the United States. Also, a copy of the proposed conveyance is required to be filed in the U.S. Land Office together with a verified statement showing the compensation the railroad is receiving for the conveyance. The Secretary of the Interior is not authorized to concur in any proposed conveyance if the railroad, in his opinion, has received or will receive greater compensation than administrative costs and expenses. In addition, he is not authorized to concur in any conveyance he believes will adversely affect the interests of the United States.

This bill has been introduced as a general measure which would make unnecessary the introduction in Congress of numerous private bills. Such bills have been introduced from time to time to enable individual landowners to clear title to land owned by them but clouded by railroad right-of-way grants. These situations have arisen in a number of cases because owners of land adjoining railroad rights-of-way had inadvertently encroached on right-of-way or for some other reason needed their title cleared. In some such cases the railroads have given deeds to convey their interests to aid in clearing title for the owner. However, the people to whom such deeds were granted found in many cases that to secure a good title it was necessary also to have a release from the U.S. Government of any reversionary interest it might have. This arose from the fact that the U.S. Government might claim such an interest in the land underlying the right-of-way after its use for railroad purposes had ended.

There are several precedents for this bill. In addition to the act of May 25, 1920—43 United States Code, section 913—which I have mentioned, Congress provided in the act of March 8, 1922—43 United States Code, section 912—that whenever the use of public lands granted a railroad for railroad purposes ceased to be used for such purpose and a competent court or Congress declared a forfeiture or abandonment, then the interest of the United States in such land included in the right-of-way passed to the owner of the underlying subdivision, except for any oil, gas, or other minerals, and except when such land was in a municipality, in which case the title of the United States went to the municipality.

H.R. 6630, as amended, was favorably reported by the House Committee on Interior and Insular Affairs without dissent on August 23, 1961. I understand that the Interior Department and the Bureau of the Budget have no objection to the proposed legislation and have so indicated.

I hope that H.R. 6630 will be approved by this Congress and respectfully request your approval of this measure.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING FLOOD CONTROL ACT OF 1958

The Clerk called the bill (H.R. 7888) to amend the Flood Control Act of 1958 to extend the time within which land in certain reservoir projects in Texas may be reconveyed to the former owners thereof.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (i) of section 205 of the Flood Control Act of 1958 is amended by striking out "three" and inserting in lieu thereof "four".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONCERNING THE WHITE HOUSE AND ITS CONTENTS

The Clerk called the bill (H.R. 7997) to establish the White House as a national monument.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, I have read the report and I still do not understand the necessity for this legislation unless it is to be found on page 2 of the report, from which I quote:

> History records many examples of carelessness in the handling and disposition of such objects which ought not to be repeated.

Is that the reason for this legislation?

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am glad to yield.

Mr. KYL. Perhaps I should first say what this bill does not do. What we are actually considering is a substitute which was also presented to the committee by the able subcommittee chairman, the gentleman from Texas [Mr. RUTHERFORD]. This amendment does not designate the White House as a national monument. There is no money involved. There is no departmental jurisdiction which is altered at all. It does not alter the residential or business use by the President or his family of the White House. All it does, as the gentleman suggests, is provide that if White House furnishings are removed from use—these objects which are of historic interest shall be loaned to the Smithsonian Institution so that they will not be lost. There have been instances in which there have been such losses.

For instance, there is a President Madison table which was removed from the White House and put into the basement and was actually used as a sawhorse. This was a fine piece of furniture and it is presently being restored or resurrected. There was a set of dishes which had historic interest, which was put away in barrels in the basement of the White House. These would now be transferred to the Smithsonian Institution so that they would not be lost.

Mr. GROSS. Will this change the appropriations procedure?

Mr. KYL. It changes no appropriations procedure nor does it alter any jurisdiction of any department.

Mr. GROSS. I thought that under the provisions of this bill the Department

of the Interior would administer the property in the White House.

Mr. KYL. No. All we are actually considering is a substitute to the original bill, and the only purpose which is involved is indicated on page 1 of the report, in section 2, which says:

Articles of furniture, fixtures, and decorative objects of the White House, when declared by the President to be of historic or artistic interest—

And so on, shall be loaned to the Smithsonian Institution until such time as they will be returned to the White House.

Mr. GROSS. Mr. Speaker, I thank the gentleman and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that an identical Senate bill, S. 2422, be considered in lieu of the House bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all of that portion of reservation numbered 1 in the city of Washington, District of Columbia, which is within the President's park enclosure, comprising eighteen and seven one-hundredths acres, shall continue to be known as the White House and shall be administered pursuant to the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1–3), and Acts supplementary thereto and amendatory thereof. In carrying out this Act primary attention shall be given to the preservation and interpretation of the museum character of the principal corridor on the ground floor and the principal public rooms on the first floor of the White House, but nothing done under this Act shall conflict with the administration of the Executive offices of the President or with the use and occupancy of the buildings and grounds as the home of the President and his family and for his official purposes.

SEC. 2. Articles of furniture, fixtures, and decorative objects of the White House, when declared by the President to be of historic or artistic interest, together with such similar articles, fixtures, and objects as are acquired by the White House in the future when similarly so declared, shall thereafter be considered to be inalienable and the property of the White House. Any such article, fixture, or object when not in use or on display in the White House shall be transferred by direction of the President as a loan to the Smithsonian Institution for its care, study, and storage or exhibition, and such articles, fixtures, and objects shall be returned to the White House from the Smithsonian Institution on notice by the President.

SEC. 3. Nothing in this Act shall alter any privileges, powers, or duties vested in the White House Police and the United States Secret Service, Treasury Department, by section 202 of title 3, United States Code, and section 3056 of title 18, United States Code.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 7997) was laid on the table.

AUTHORIZING THE POSTMASTER GENERAL TO DISPOSE OF CERTAIN LAND

The Clerk called the bill (H.R. 7890) to authorize the Postmaster General to dispose of certain land, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 2103(b) of title 39, United States Code, the Postmaster General is authorized to dispose of the following described real property:

Beginning at the southwest corner of the intersection of West Lexington Avenue and South Osage Street; thence south 0 degrees 09 minutes 47 seconds east along the west side of South Osage Street 215.17 feet more or less to a point; thence south 90 degrees 00 minutes 00 seconds west 235.79 feet more or less to a point; thence north 0 degrees 06 minutes 46 seconds west 215.17 feet more or less to a point; thence north 90 degrees 00 minutes 00 seconds east 235.62 feet more or less to the place of beginning.

as provided in section 2103(a)(2)(B) of title 39, United States Code.

With the following committee amendments:

Page 1, line 5, strike out "of the following described real property" and insert in lieu thereof the following: "of, as provided in section 2103(a)(2)(B) of title 39, United States Code, the following-described real property situated in Independence, Jackson County, Missouri:".

Page 2, lines 11 and 12, strike out "as provided in section 2103(a)(2)(B) of title 39, United States Code.".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MIGRATION AND REFUGEE ASSISTANCE

The Clerk called the bill (H.R. 8291) to amend the act of July 14, 1960, enabling the United States to participate in the resettlement of certain refugees, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FASCELL. Reserving the right to object, Mr. Speaker, I should like to ask the distinguished chairman of the Subcommittee on Immigration and Nationality of the Committee on the Judiciary several questions. Under this legislation, would it be necessary that an individual determination be made before assistance could be provided?

Mr. WALTER. No, it would not be. We did, I think, develop in the course of the hearings and also indicated in the report that there should be a continuance of the present practice of obtaining all the information possible concerning the refugees that are coming from Cuba, their economic condition and, of course, the security aspects. Actually all this bill does is to restate three provisions of existing law that are contained in other statutes, which should have been within the jurisdiction of the Committee on the Judiciary, plus one novel matter in which the gentleman is interested, the assistance to the refugees from Cuba.

Mr. FASCELL. I appreciate that. Of course the legislation is highly essential and desirable. I just want to be sure we are not creating any administrative problems. That is the reason for my question.

A further question is, Does this legislation in any way make necessary assistance payments to an individual? I have in mind specifically the case of cooperative agreements with the county on matters of education and other matters, whereunder the present administrative arrangement a lump-sum payment is made by the Federal Government without the necessity for individual payments.

Mr. WALTER. If the gentleman will refer to the hearings he will see that the Secretary of Health, Education, and Welfare has indicated the system he will employ in the disbursement of funds to the several school districts in the State of Florida to relieve them, at least partially, from the burden created by the influx of the many refugee children of school age.

Mr. FASCELL. I thank the gentleman. Many of these refugees who came in subsequent to the Castro administration in January of 1959 under our policy at that time came in on visa. I just want to be sure that the language of the legislation does not preclude those people from receiving assistance because the present practice in many of the cases, as the chairman well knows, is to make payments to people coming in under visas. At the present time these people although they have visas are considered also refugees escaping from the Communist tyranny. I want to be certain the language of this bill does not preclude assistance to those who are in fact refugees from the Castro administration, but may have entered under visa for permanent residence.

Mr. WALTER. All they need to do is establish their status as refugees and apply for the appropriate type of assistance which could then be granted under the discretionary authority of the Secretary of Health, Education, and Welfare.

Mr. FASCELL. Notwithstanding the fact that they may have been admitted for permanent residence in the United States under a visa?

Mr. WALTER. Yes, that is correct, subject, of course, to the provisions of the bill which will have to be administered in conjunction with the permanent law.

Mr. FASCELL. I thank the gentleman very much. I withdraw my reservation of objection, Mr. Speaker.

Mr. WIDNALL. Reserving the right to object, Mr. Speaker, is this the bill that has to do with the Korean orphans, or is that bill coming up under suspension?

Mr. WALTER. No; that bill will come up under suspension.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1 of the Act of July 14, 1960 (74 Stat. 504) is hereby redesignated as section 1(a) and the following is added thereto:

"(b) The President is hereby authorized to continue membership for the United States in the Intergovernmental Committee for European Migration in accordance with its constitution approved in Venice, Italy, on October 19, 1953. For the purpose of assisting in the movement of refugees and migrants and to enhance the economic progress of the developing countries by providing for a coordinated supply of selected manpower, there is hereby authorized to be appropriated such amounts as may be necessary from time to time for the payment by the United States of its contributions to the Committee and all necessary salaries and expenses incident to United States participation in the Committee:

"(c) There is hereby authorized to be appropriated such amounts as may be necessary from time to time (1) for contributions to the activities of the United Nations High Commissioner for Refugees for assistance to refugees under his mandate or in behalf of whom he is exercising his good offices; (2) for assistance to or in behalf of refugees, escapees, and selected persons from Communist-dominated or Communist-occupied areas, or to or in behalf of refugees, escapees, and selected persons from other areas, except as may be otherwise provided for by the Act for International Development or other Acts, whenever the President shall determine that such assistance would be in the interest of the United States, or (3) for a special emergency fund to meet unexpected refugee and migration developments when the President shall determine that such assistance is in the interests of the United States. Funds appropriated for the purpose of this Act shall remain available until expended."

SEC. 2. The Act of July 14, 1960 (74 Stat. 504), is amended by adding a new section 12 to read as follows:

"SEC. 12. (a) Unobligated and unexpended balances of funds made available under authority of the Mutual Security Act of 1954, as amended, and allocated or transferred for the purpose of providing assistance to or in behalf of refugees, migrants, escapees, and selected persons are hereby authorized to be continued available for such purposes and may be consolidated with appropriations authorized by subsections (b) and (c) of section 1.

"(b) The President may exercise any functions or authority conferred upon him by subsections (b) and (c) of section 1 of this Act through such agency or officer of the United States Government as he shall direct. The head of any such agency or such officer may from time to time promulgate such rules and regulations as may be necessary to carry out such functions or authority, including, if he shall so specify, the authority to redelegate to any of his subordinates.

"(c) The President may allocate or transfer to any agency of the United States Government any part of any funds available for carrying out the purposes of subsections (b) and (c) of section 1 of this Act. Such funds shall be available for obligation and expenditure for the purposes for which authorized in accordance with authority granted in this Act or under authority governing the activities of the agencies of the United States Government to which such funds are allocated or transferred. Funds allocated or transferred pursuant to this subsection to any such agency may be established in separate appropriation accounts on the books of the Treasury.

"(d) Whenever the President determines it to be in furtherance of the purposes of this Act, the functions authorized under subsections (b) and (c) of section 1 of this Act may be performed without regard to such provisions of law (other than the Renegotiation Act of 1951 (65 Stat. 7), as amended), regulating the making, performance, amendment, or modification of contracts and the expenditure of funds of the United States Government as the President may specify.

"(e) Notwithstanding the provisions of title 10, United States Code, section 3544(b) and 8544(b), personnel of the Department of Defense may be assigned or detailed to any civil office for the purpose of enabling the President to furnish assistance under this Act.

"(f) Except as otherwise specifically provided in this Act, the President may make loans, advances and grants to, make and perform agreements and contracts with, or enter into other transactions with, any individual, corporation, or other body of persons, government or government agency, whether within or without the United States, and international and intergovernmental organizations in furtherance of the purposes of this Act.

"(g) The President may accept and use in furtherance of the purposes of subsections (b) and (c) of section 1 of this Act money, funds, property, and services of any kind made available by gift, devise, bequest, grant, or otherwise for such purpose.

"(h) Funds made available for the purposes of subsections (b) and (c) of section 1 of this Act shall be available for—

"(1) compensation, allowances, and travel of personnel, including Foreign Service personnel whose services are utilized primarily for the purpose of this Act, and without regard to the provisions of any other law, for printing and binding, and for expenditures outside the United States for the procurement of supplies and services and for other administrative and operating purposes (other than compensation of personnel) without regard to such laws and regulations governing the obligation and expenditures of Government funds as may be necessary to accomplish the purposes of this Act;

"(2) contracting with individuals for personal services abroad;

"(3) exchange of funds without regard to section 3651 of the Revised Statutes (31 U.S.C. 543), and loss by exchanges;

"(4) expenses authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801 et seq.), not otherwise provided for;

"(5) expenses authorized by the Act of August 1, 1956 (70 Stat. 890–892), as amended; and

"(6) all other expenses determined by the President to be necessary to carry out the purposes of this Act.

"(i) Except as may be expressly provided to the contrary in this Act, all determinations, authorizations, regulations, orders, contracts, agreements, and other actions issued, undertaken, or entered into under authority of any provision of law contained in the Mutual Security Act of 1954, as amended, whether repealed or not, shall continue in full force and effect until modified by appropriate authority."

With the following committee amendment:

Strike out all after the enacting clause and insert the following:

"That this Act may be cited as the 'Migration and Refugee Assistance Act of 1961'.

"SEC. 2. (a) The President is hereby authorized to continue membership for the United States in the Intergovernmental Committee for European Migration in accordance with its constitution approved in Venice, Italy, on October 19, 1953. For the purpose of assisting in the movement of refugees and migrants and to enhance the economic progress of the developing countries by providing for a coordinated supply of selected manpower, there are hereby authorized to be appropriated such amounts as may be necessary from time to time for the payment by the United States of its contributions to the Committee and all necessary salaries and expenses incident to United States participation in the Committee;

"(b) There are hereby authorized to be appropriated such amounts as may be necessary from time to time—

"(1) for contributions to the activities of the United Nations High Commissioner for Refugees for assistance to refugees under his mandate or in behalf of whom he is exercising his good offices;

"(2) for assistance to or in behalf of refugees in the United States whenever the President shall determine that such assistance would be in the interest of the United States: *Provided,* That the term 'refugees' as herein used means aliens who (A) because of persecution or fear of persecution on account of race, religion, or political opinion, fled from a country of the Western Hemisphere; (B) cannot return thereto because of fear of prosecution on account of race, religion, or political opinion; (C) have not been admitted for permanent residence under the Immigration and Nationality Act; and (D) are in urgent need of assistance for the essentials of life, or for education, or for transportation; and

"(3) for assistance to escapees from the Soviet Union, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, Albania, Lithuania, Latvia, and Estonia, or the Communist-dominated or Communist-occupied areas of Germany, or any Communist-dominated or Communist-occupied areas of Asia and any other countries absorbed by the Soviet Union, either to form such persons into elements of the military forces supporting the North Atlantic Treaty Organization or in furtherance of the objectives of the foreign policy of the United States when the President determines that such assistance will contribute to the defense of the North Atlantic area or to the security of the United States.

"Funds appropriated for the purposes of this subsection shall remain available until expended;

"(c) Of the funds made available for use under section 451 of the Act for International Development of 1961, not to exceed $10,000,000 may be used in any fiscal year in order to meet unexpected refugee and migration developments, when the President determines such use to be important to the national interest;

"(d) The President shall keep the appropriate committees of Congress currently informed of the use of funds and the exercise of functions authorized in this Act;

"(e) Unobligated and unexpended balances of funds made available under authority of the Mutual Security Act of 1954, as amended, and allocated or transferred for the purpose of providing assistance to or in behalf of refugees, migrants, escapees, and selected persons are hereby authorized to be continued available for the purposes of this section and may be consolidated with appropriations authorized by this section.

"SEC. 3. (a) In carrying out the purpose of this Act, the President is authorized—

"(1) to make loans, advances, and grants to, make and perform agreements and contracts with, or enter into other transactions with, any individual, corporation, or other body of persons, government or government agency, whether within or without the United States, and international and intergovernmental organizations;

"(2) to accept and use money, funds, property, and services of any kind made available by gift, devise, bequest, grant, or otherwise for such purposes;

"(b) Whenever the President determines it to be in furtherance of the purposes of this Act, the functions authorized under this Act may be performed without regard to such provisions of law (other than the Renegotiation Act of 1951 (65 Stat. 7)), as amended, regulating the making, performance, amendment, or modification of contracts and the expenditure of funds of the United States Government as the President may specify.

"SEC. 4. (a) Subject to the provisions of section 301 of title 3, United States Code, the President is authorized to designate the head of any department or agency in the executive branch, or any official thereof who is required to be appointed by the President by and with the advice and consent of the Senate, to perform any functions conferred upon the President by this Act. Any individual so designated by the President under this subsection shall prescribe such regulations as may be necessary to carry out such functions. If the President shall so specify, any individual so designated under this subsection is authorized to redelegate to any of his subordinates any functions authorized to be performed by him under this subsection, except the function of prescribing regulations or exercising any action or authority specified in section 3 of this Act.

"(b) The President may allocate or transfer to any agency of the United States Government any part of any funds available for carrying out the purposes of this Act. Such funds shall be available for obligation and expenditure for the purposes for which authorized in accordance with authority granted in this Act. Funds allocated or transferred pursuant to this subsection to any such agency may be established in separate appropriation accounts on the books of the Treasury.

"SEC. 5. (a) Funds made available for the purposes of this Act shall be available for—

"(1) compensation, allowances, and travel of personnel, including Foreign Service personnel whose services are utilized primarily for the purpose of this Act, and without regard to the provisions of any other law, for printing and binding, and for expenditures outside the United States for the procurement of supplies and services and for other administrative and operating purposes (other than compensation of personnel) without regard to such laws and regulations governing the obligation and expenditure of Government funds as may be necessary to accomplish the purposes of this Act;

"(2) employment or assignment of Foreign Service Reserve officers for the duration of operations under this Act;

"(3) exchange of funds without regard to section 3651 of the Revised Statutes (31 U.S.C. 543), and loss by exchanges;

"(4) expenses authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801 et seq.), not otherwise provided for;

"(5) expenses authorized by the Act of August 1, 1956 (70 Stat. 890–892), as amended; and

"(6) all other expenses determined by the President to be necessary to carry out the purposes of this Act.

"(b) Except as may be expressly provided to the contrary in this Act, all determinations, authorizations, regulations, orders, contracts, agreements and other actions issued, undertaken, or entered into under authority of any provision of law contained in the Mutual Security Act of 1954, as amended, whether repealed or not shall continue in full force and effect until modified by appropriate authority.

"SEC. 6. Subsections (a), (c), and (d) of section 405 of the Mutual Security Act of 1954, as amended, are hereby repealed."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to enable the United States to participate in the assistance rendered to certain migrants and refugees."

A motion to reconsider was laid on the table.

Mr. WALTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

Mr. SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, the bill H.R. 8291 proposes to enact the Migration and Refugee Assistance Act of 1961, recommended by the President in a message dated July 21, 1961.

The original bill, as introduced by myself, contained the language suggested by the administration. After an extensive hearing was held and the subject matter thoroughly examined, the committee proposed to amend the original version of the bill mainly for the purpose of clarification but also in order to use a more precise language of those provisions which refer to the administration of the various programs authorized under this legislation. The Committee on the Judiciary recommends unanimously that the House adopt the amendment in lieu of the language of the original bill.

The purpose of this legislation is, basically, to reenact three provisions of the old Mutual Security Act for which a substitute was approved last week in the form of the Foreign Assistance Act of 1961.

These provisions authorize the continuation of the participation by the United States in two internationally concerted programs administered by the Intergovernmental Committee for European Migration and the United Nations High Commissioner for Refugees, respectively. The third authorization relates to an assistance program administered unilaterally by the United States for the purpose of aiding the escapees from Communist-dominated or Communist-occupied countries.

The fourth assistance program authorized by this legislation—assistance to Cuban refugees in the United States—is a necessity which arises out of the fact that the United States has become a country of first asylum. Since the end of World War II this country has admitted close to 1 million displaced persons, refugees, and escapees from countries of first asylum. Now, we have not only opened the doors, but assumed heavy responsibilities in behalf of escapees from Cuba coming across that narrow body of water which, in fact, became an extension of the Iron Curtain established by international communism in the Western Hemisphere.

The President in requesting this legislation has stressed the necessity for the continuation of refugee and migration activities hitherto authorized and financed by the Congress through the mutual security program. The President has, however, deemed it necessary to recommend that these programs be eliminated from the recently reshaped foreign-aid legislation.

The main reason for this, as explained to us by the Deputy Under Secretary of State for Administration, Mr. Roger W. Jones, was to return to the jurisdiction of the Committee on the Judiciary matters which have traditionally been the concern of that committee, but which in recent years have been, for a variety of reasons, or as Mr. Jones put it—"as a matter of convenience," included in the mutual security legislation.

My colleagues on the Committee on the Judiciary appreciate the President's thoughtfulness in recommending that this legislation remain within the jurisdiction of the committee of the House which is responsible for legislation, and continuing supervision of problems, relating to migration, immigration, refugees, and escapees. The Committee on the Judiciary has, since 1947, remained in close touch with all the problems reflected in this legislation and it, therefore, is fully qualified to pass on the merits of it and make the proper recommendation to the House.

In that connection, it should be noted that H.R. 8291, as introduced, or as amended, is not an immigration bill. Not one additional person will be permitted to enter the United States under this legislation.

However, this legislation may permit a great many people fleeing their enslaved countries, or simply desiring to leave their native lands in quest for a better life, to reach countries other than the United States and find their new homes, new employment opportunities and a new chance to enjoy freedom and happiness.

Thus, the main purpose of the two principal programs authorized to be continued under this legislation is for the United States not to go it alone in the effort of solving the economic and social problems of manpower which is in surplus in one country and in demand in another. Similarly, the purpose of these provisions is to participate in an international—and not a unilateral—effort to provide relief and resettlement opportunities for refugees driven out of their abodes by the oppressive forces of tyranny. Our participation in existing, multilateral, successfully operating programs appears to be the most important and compelling feature of this legislation.

As far as the two unilateral programs are concerned, one of them—the problem of Cuban refugees—has been imposed upon this country practically overnight by the seizure of neighboring Cuba by Communist forces. The State of Florida, Dade County, and the city of Miami, have incurred heavy burdens and demonstrated magnificent generosity of their citizens in providing assistance to the needy Cuban refugees. Florida's activities in this field will for a long time remain not only an example of hospitality for a neighbor in need, but will shine as a beacon of hope and the monument of a big human heart which is a truly American characteristic.

However, Florida and its political and administrative subdivisions could not be expected to bear the burden alone. Shortly before the end of his term, President Eisenhower had allocated certain funds to relieve the suffering of Cuban refugees and to assist the citizens of Florida in their humanitarian task. Soon after his inauguration, President Kennedy has done likewise and placed the supervision of the program in the trusted hands of the distinguished Secretary of Health, Education, and Welfare, Mr. Ribicoff. The Committee on the Judiciary agrees fully with the President and with Secretary Ribicoff, that if further assistance is to be rendered to Cubans, funds for that purpose ought not to be taken from the President's emergency or contingency funds. We are of the opinion that it is much more preferable to have the financing of the assistance program for Cuban refugees placed under the regular congressional authorization and appropriations proceedings. This is precisely what this legislation will achieve.

The other unilaterally operated assistance program relates to escapees from countries whose misfortune it was to be enslaved by Communist tyranny. This provision of the instant legislation represents a continuation of the concept and the program first authorized under the Mutual Security Act of 1951 pursuant to a provision generally referred to as the Kersten amendment.

In authorizing the continuation of this program, the committee has included in the report—House Report No. 1066, pages 26 and 27—certain recommendations designed to prevent the further erosion, misconstruction, and misapplication of the program as originally conceived. We are convinced that political and defense aspects of the escapee program are the sole justification for its existence. If strictly humanitarian and social welfare aspects of the escapee program were to remain as manifest in its operations as they are evident now, the entire program could be placed in the hands of the United Nations High Commissioner for Refugees and the Intergovernmental Committee for European Migration operating jointly. The only reasons why the committee recommends that the program be continued, are considerations of the national interest in its political and defense aspects, not readily ascertainable within the last several years of the programs operations. The committee pledges to the House its continuous supervision of that particular program and wishes to serve notice that the tenor of further recommendations as to the continuation of this effort will depend on the results of an urgently needed full and complete review of the policies and operations.

The administrative provisions of this legislation follow closely the pattern of the Foreign Assistance Act of 1961, approved by the House and the Senate. The important difference, contained in section 4(a), relates to a limitation of the President's authority to delegate the powers vested in him. In view of the highly sensitive human, political, and financial elements involved in this legislation, the President would not be authorized to delegate his powers, as specified, below the level of an officer or officers appointed by him with the advice and consent of the Senate.

In the light of the committee's experience in observing and studying the operation of the programs authorized in this legislation, I feel fully justified to recommend that the bill, H.R. 8291, as amended, be approved.

EMPOWERING ADMINISTRATOR OF GENERAL SERVICES TO APPOINT NONUNIFORMED SPECIAL POLICEMEN

The Clerk called the bill (S. 541) to amend the act of June 1, 1948 (62 Stat. 281), to empower the Administrator of General Services to appoint nonuniformed special policemen.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, does not this create still another police force in the District of Columbia?

Mr. JONES of Alabama. No, it does not.

Mr. GROSS. Will it mean an increase in personnel?

Mr. JONES of Alabama. No, it is not anticipated that there will be additional employees.

Mr. GROSS. I understand.

Mr. JONES of Alabama. The reason for this request is, if the gentleman will recall, last year we had a numbers racket going on at the Pentagon, so it is to abate this kind of practice.

Mr. GROSS. Mr. Speaker, may I say to my colleague, I do not care to prolong this discussion. My questions have been answered, that it will not mean another police force or a substantial increase in personnel. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of June 1, 1948 (62 Stat. 281), is amended by adding at the end thereof the following new section:

"SEC. 5. Officials or employees of the General Services Administration who have been duly authorized to perform investigative functions may be empowered by the Administrator of General Services, or officials of General Services Administration duly authorized by him, to act as nonuniformed special policemen in order to protect property under the charge and control of the General Services Administration and to carry firearms, whether on Federal property or in travel status. Such officials or employees who are empowered to act as nonuniformed special policemen shall have, while on real property under the charge and control of the General Services Administration, the power to enforce Federal laws for the protection of persons and property and the power to enforce rules and regulations made and published for such purposes by the Administrator or duly authorized officials of the General Services Administration. Any such special policeman may make arrests without warrant for any offense committed upon such property if he has reasonable ground to believe (1) the offense constitutes a felony under the laws of the United States, and (2) that the person to be arrested is guilty of that offense."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ORGANIZATION OF BUREAU OF PUBLIC ROADS

The Clerk called the bill (H.R. 8558) to amend section 303(a) of title 23, United States Code, relating to the organization of the Bureau of Public Roads, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 303 of title 23, United States Code, is hereby amended to read as follows:

"(a) The Bureau of Public Roads shall be in the Department of Commerce as a primary unit administered by the Federal Highway Administrator, appointed by the President by and with the advice and consent of the Senate. The Administrator shall receive basic compensation at the rate prescribed by law for Assistant Secretaries of executive departments and shall perform such duties as the Secretary of Commerce may prescribe or as may be required by law. There shall be a Deputy Federal Highway Administrator, who shall be appointed by the Secretary and perform such duties as may be prescribed by the Federal Highway Administrator. The Deputy Federal Highway Administrator shall receive basic compensation at a rate $1,000 less than the rate provided for the Federal Highway Administrator."

SEC. 2. Section 107(a) of the Act approved July 31, 1956 (70 Stat. 739), is hereby amended by deleting the paragraph which reads:

"(16) Commissioner of Public Roads."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL POISON PREVENTION WEEK

The Clerk called the joint resolution (H.J. Res. 358) authorizing the President to issue annually a proclamation designating the third week in March as "National Poison Prevention Week," in order to aid in bringing to the American people the dangers of accidental poisoning.

There being no objection, the Clerk read the resolution as follows:

Whereas eight hundred and twenty-two thousand persons in all age groups are accidentally poisoned in the United States annually; and

Whereas daily almost one thousand five hundred children under the age of five years ingest products containing harmful chemicals; and

Whereas household products sometimes are not adequately marked so as to warn of their poisonous properties, with the result that

they sometimes are not stored out of the reach of children; and

Whereas there is a great need for the education of the American people as to the dangers of accidental poisonings, and of the need to keep from the reach of children all household products which contain harmful chemicals: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is hereby authorized and requested to issue annually a proclamation designating the third week in March as "National Poison Prevention Week," to aid in encouraging the American people to learn of the dangers of accidental poisoning and to take such preventive measures as are warranted by the seriousness of the danger.

With the following committee amendment:

On page 1 and 2 of the bill strike out all the whereas clauses.

The committee amendment was agreed to.

The join resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROHIBITING THE USE OF SLUGS AND SIMILAR DEVICES

The Clerk called the bill (H.R. 8038) to amend section 491 of title 18, United States Code, prohibiting certain acts involving the use of tokens, slugs, disks, devices, papers, or other things which are similar in size and shape to the lawful coins or other currency of the United States.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 491 of title 18, United States Code, is amended by striking out all of that section and inserting in lieu thereof the following:

"§ 491. Tokens or paper used as money

"(A) Whoever, not lawfully authorized, makes, issues, or passes any coin, card, token, or device in metal, or its compounds, which may be intended to be used as money, or whoever, with intent to defraud, makes, utters, inserts, or uses any card, token, slug, disk, device, paper, or other thing similar in size and shape to any of the lawful coins or other currency of the United States, or any coin or other currency not legal tender in the United States, to procure anything of value, or the use or enjoyment of any property or service from any automatic merchandise vending machine, postage-stamp machine, turnstile, fare box, coin-box telephone, parking meter, or other receptacle, depository, or contrivance designed to receive or to be operated by lawful coins or other currency of the United States, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"(B) Whoever manufactures, sells, offers, or advertises for sale, or exposes or keeps with intent to furnish or sell any token, slug, disk, device, paper, or other thing similar in size and shape to any of the lawful coins or other currency of the United States, or any token, disk, paper, or other device issued or authorized in connection with rationing or food and fiber distribution by any agency of the United States, with knowledge or reason to believe that such tokens, slugs, disks, devices, papers, or other things may be used unlawfully or fraudulently to procure anything of value, or the use or enjoyment of any property or service from any automatic merchandise vending machine, postage-stamp machine, turnstile, fare box, coin-box telephone, parking meter, or other receptacle, depository, or contrivance designed to receive or to be operated by lawful coins or other currency of the United States shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"(C) Knowledge or reason to believe, within the meaning of subsection (B) of this section, may be shown by proof that any law enforcement officer has, prior to the commission of the offense with which the defendant is charged, informed the defendant that tokens, slugs, disks, devices, papers, or other things of the kind manufactured, sold, offered, or advertised for sale by him or exposed or kept with intent to furnish or sell, are being used unlawfully or fraudulently to operate certain specified automatic merchandise vending machines, postage-stamp machines, turnstiles, fare boxes, coin-box telephone, parking meters, or other receptacles, depositories, or contrivances designed to receive or to be operated by lawful coins or other currency of the United States."

With the following committee amendments:

No. 1: On page 1, line 7, strike out "A" within the parentheses and insert instead "a".

No. 2: On page 2, line 1, strike out "which may be".

No. 3: On page 2, line 5, insert a "comma" after "United States".

No. 4: On page 2, line 10, after the word "other" insert "lawful".

No. 5: On page 2, line 12, insert a "comma" after "United States".

No. 6: On page 2, line 15, strike out "B" within the parentheses and insert instead "b".

No. 7: On page 2, line 23, strike out "may be" and insert instead "are intended to be".

No. 8: On page 3, line 3, after the word "other" insert "lawful".

No. 9: On page 3, strike out line 7 through line 20 and insert the following new subsection (c):

"(c) Nothing contained in this section shall create immunity from criminal prosecution under the laws of any State, Commonwealth of Puerto Rico, territory, possession, or the District of Columbia."

The committee amendments were agreed to.

Mrs. SULLIVAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Missouri?

There was no objection.

Mrs. SULLIVAN. Mr. Speaker, in the few minutes set aside for consideration of H.R. 8038 I want to briefly give the background of this legislation. I have received some inquiries as to why Congress should be worrying about slugs in automatic vending devices, and it is to that point I want to direct my remarks.

As the Members know—particularly those who have served with me for any length of time—I try to give every constituent of mine who has a problem involving Federal agencies or Federal law as much help as I can, and this sometimes gets me into issues far removed from my own committee work. This bill is a good illustration.

A firm in St. Louis with extensive interest in vending machines called my attention last year to the fact that it is—and has long been—a Federal crime to use counterfeit slugs or tokens intended to be used as money for any 1-cent, 2-cent, 3-cent, or 5-cent pieces, with a penalty of fines up to $1,000 and/or imprisonment up to 1 year. However, at the time this law was enacted in 1944, vending machines were not in very great use. The volume of business in coin-operated machines and devices of various kinds—excluding illicit ones, of course—was about $500 million a year. In 1960, it was estimated at $2.5 billion, or five times as much, and at the present rate of expansion and with the progress of automation, it is estimated that by 1965 this volume will reach $4 billion. And we are no longer dealing only with coin equivalents of 1-cent, 2-cent, 3-cent, or 5-cent pieces, but with dimes, quarters, half dollars, and currency up to $20.

Hence, while it is a Federal crime to use counterfeit coins or metal slugs to defraud these automatic devices of a penny, or 2 cents, or 3 cents, or a nickel, anything over that is all right as far as the Federal Government is concerned. Obviously, this is a situation which requires correction.

The telephone industry reported it loses $1 million a year in slugs. As more and more items are dispensed by machines, more and more industries are going to suffer substantial losses. Currency-changing machines now in use or coming into operation change bills up to $10 or $20, and while they are rather sophisticated devices and often able to reject counterfeit, nevertheless, it is strange that it is not a Federal crime to attempt to pass counterfeit paper for currency when the attempt involves feeding it into a machine rather than handing it to a person.

The Treasury had some reservations about the language in a few particulars of a similar bill which I introduced in the previous Congress. The bill as it now stands conforms to the Treasury Department's recommendations. The Justice Department, however, questions whether this kind of cheating should be a Federal offense.

The answer to that is twofold: first, it is now a Federal offense when it involves a token or slug used to obtain something of very small value—a penny, 2 cents, 3 cents, or a nickel—hence the principle of having cheating of larger proportion made a Federal offense is not out of line; second, the Congress and the Federal Government are traditionally concerned over the integrity of coins and currency and this is definitely part of that responsibility. As the committee report states, a slug designed to deceive a machine is as much a counterfeit as a device intended to deceive the eye. This bill merely brings existing law up to date with present day economic reality.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR CONVEYANCE OF A PORTION OF HENRY G. SHIRLEY MEMORIAL HIGHWAY AND OTHER HIGHWAYS ON PENTAGON ROAD NETWORK TO THE COMMONWEALTH OF VIRGINIA

The Clerk called the bill (H.R. 8678) to provide for the conveyance of a portion of the Henry G. Shirley Memorial Highway and other highways on the Pentagon road network to the Commonwealth of Virginia, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. PELLY. Mr. Speaker, reserving the right to object, could someone give us an explanation as to the cost of this bill. As Members know, the official Objectors Committee have a rule which sets a limit on the cost of any bill going through under this procedure. The limit is $1 million and I note that the cost involved in this bill is stated as $2,500,000.

Mr. BALDWIN. Mr. Speaker, will the gentleman yield?

Mr. PELLY. I yield to the gentleman from California.

Mr. BALDWIN. Actually, this will not involve any appropriations from the U.S. Treasury. The sum involved comes from the highway trust fund and, therefore, will not involve any new appropriations. This will actually save money to the Government of the United States because under the present circumstances, the Federal Government is responsible for the full maintenance and repair of all roads in the vicinity of the Pentagon network. This will authorize the State of Virginia to take over the responsibility, and in the long run it will be to the financial advantage of the Federal Government.

Mr. PELLY. Mr. Speaker, in view of the fact that this measure does not violate the rule of the Committee of Objectors on the Consent Calendar, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of Commerce may convey to the Commonwealth of Virginia all the right, title, and interest of the United States in and to that portion of the Henry G. Shirley Memorial Highway in Arlington County, Virginia, as described in subsection (b) of this section, if the Commonwealth of Virginia agrees to promptly undertake the necessary project or projects to bring such highway up to the standards of the National System of Interstate and Defense Highways. The Federal share payable on account of such project on the Interstate System shall be 95 per centum of the total cost of such project.

(b) That portion of the Henry G. Shirley Memorial Highway in Arlington County, Virginia, authorized to be conveyed to the Commonwealth of Virginia by subsection (a) of this section shall be deemed to include the following roads, together with such pertinent bridges, interchanges, approaches, connections, and other facilities as may be agreed upon by the Secretary of Commerce and the Secretary of the Army:

(1) United States Route 1 from the vicinity of bridge 21 as may be agreed upon by the District of Columbia Highway Department and the Secretary of Commerce to the present northerly limit of State maintenance on such route in the vicinity of Army and Navy Drive (G road), approximately seven-tenths mile (NS road);

(2) The Henry G. Shirley Memorial Highway (State Route 350) from United States Route 1 to State Route 7, approximately four miles (CD road); and

(3) Connecting road, between the Henry G. Shirley Memorial Highway and Arlington Ridge Road, approximately two-tenths mile (JK road).

SEC. 2. (a) The Secretary of Commerce may convey to the Commonwealth of Virginia, together with interchanges, frontage roads, structures, and other facilities appurtenant thereto, the following routes:

(1) Jefferson Davis Highway from United States Route 1 to the intersection with Arlington Ridge Road near Wilson Boulevard, approximately two and three-tenths miles (H. road);

(2) Connecting road, from the Henry G. Shirley Memorial Highway along the south boundary of Fort Myer, to a point near Arlington Boulevard, approximately one and three-tenths miles (AB road);

(3) Connecting road, from the Henry G. Shirley Memorial Highway to Columbia Island, approximately one mile (AB road); and

(4) Columbia Pike Extension, from old Arlington Ridge Road to connecting road between Henry G. Shirley Memorial Highway and Columbia Island, approximately four-tenths mile.

(b) There is hereby authorized to be appropriated to the Department of Commerce an amount not to exceed $2,500,000 to improve the routes authorized to be conveyed to the Commonwealth under subsection (a) of this section to adequate standards for current traffic. Such sums shall be available until expended for the purposes of this section: *Provided,* That no funds authorized under this section shall be used to improve the routes under subsection (a) of this section until the Commonwealth has agreed to accept the conveyance of these routes after the improvements herein authorized.

With the following committee amendments:

Page 2, strike out lines 13 through 18 and substitute in lieu thereof the following:

"(1) United States Route 1 from the boundary line between the District of Columbia and the Commonwealth of Virginia established by section 101 of the Act approved October 21, 1945 (59 Stat. 552; sec. 1–101 note, D.C. Code, 1951 ed.), to the present northerly limit of State maintenance on such route in the vicinity of Army and Navy Drive (G road), approximately one mile (NS road);".

Page 3, strike out line 19 and all that follows down through and including line 4 on page 4, and insert in lieu thereof the following:

"(b) There is authorized to be appropriated, out of the Highway Trust Fund created by the Highway Revenue Act of 1956, not to exceed $2,500,000 to be expended by the Secretary of Commerce without regard to sections 104 and 120 of title 23 of the United States Code to pay the full cost of improving to adequate standards for current traffic the routes authorized to be conveyed under subsection (a) of this section. Such sum shall be available until expended. No funds authorized by this subsection shall be used until the Commonwealth of Virginia has agreed to accept conveyance of these routes and until such routes shall have been selected and designated by the Commonwealth and approved by the Secretary of Commerce as part of one of the Federal-aid highway systems. Amounts authorized by this subsection shall be in addition to and not in lieu of any other amounts otherwise authorized to be appropriated for expenditure on such Federal-aid highway systems."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REQUIRING SUBMISSION OF A REPORT TO CONGRESS CONCERNING ELIGIBLE PUBLIC BUILDING PROJECTS

The Clerk called the bill (H.R. 7477) to repeal section 409 of the Public Buildings Act of 1949, requiring the submission of a report to the Congress concerning eligible public building projects.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, do I understand from reading the report that this would repeal the law which makes it necessary for the Committees on Public Works of the House and Senate to come in with resolutions, if the construction is to cost more than $100,000? In other words, if I read this proposal correctly, you are simply making it much easier to authorize more buildings in Washington and elsewhere.

Mr. JONES of Alabama. No, I will say to the gentleman from Iowa, it discontinues the reporting under the General Services Act of 1948, for the simple reason that under the Public Buildings Act of 1959 they are required to give more exact accounts to the Congress. It does not change any of the substantive law in regard to authorizations and appropriations for projects.

Mr. GROSS. This deals only with reporting; is that correct?

Mr. JONES of Alabama. That is correct. It just relieves the General Services Administration from reporting under the General Services Act but makes them report under the Public Buildings Act of 1959. That is the only change and the only thing that this bill accomplishes.

Mr. GROSS. Does this change the requirement that the Administrator of General Services provide a prospectus?

Mr. JONES of Alabama. It does not change in any respect the reporting to the Congress of the proceedings that GSA must follow under the law in reporting to the Congress.

Mr. GROSS. This does not change section 11(a)?

Mr. JONES of Alabama. No, it does not change anything except to discontinue the request of their reports under the 1948 act, since they report under the 1959 act.

Mr. GROSS. It does not make it any easier for the House Committee on Public Works or its counterpart in the other

body to come before the Congress to squeeze some more new Federal buildings?

Mr. JONES of Alabama. No, sir; there is no squeeze to it.

Mr. GROSS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 409 of the Public Buildings Act of 1949 (40 U.S.C. 355) is hereby repealed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SURVEYS OF WATERSHED AREAS FOR FLOOD PREVENTION

The Clerk called the bill (H.R. 3801) to authorize the Secretary of the Army and the Secretary of Agriculture to make joint investigations and surveys of watershed areas for flood prevention or the conservation, development, utilization, and disposal of water, and for flood control and allied purposes, and to prepare joint reports on such investigations and surveys for submission to the Congress, and for other purposes.

Mr. ANDERSEN of Minnesota. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

WAIVING SECTION 142, TITLE 28, UNITED STATES CODE

The Clerk called the bill (H.R. 7259) to waive section 142 of title 28, United States Code, with respect to the U.S. District Court for the Western District of Louisiana, Lafayette Division, holding court at Lafayette, La.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the limitations and restrictions contained in section 142 of title 28, United States Code, shall be waived with respect to the holding of court at Lafayette, Louisiana, by the United States District Court for the Western District of Louisiana.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONTINUING HOUSE RESOLUTION 190 AND HOUSE RESOLUTION 386, 83D CONGRESS

The Clerk called the resolution (H. Res. 417) to continue in effect House Resolution 190 and House Resolution 386, 83d Congress.

There being no objection, the Clerk read the resolution, as follows:

Resolved, That effective from January 3, 1961, the provisions of H. Res. 190, Eighty-third Congress, agreed to March 26, 1953, and H. Res. 386, Eighty-third Congress, agreed to August 1, 1953, are continued in effect.

The resolution was agreed to.

A motion to reconsider was laid on the table.

INCREASE UNDER WAR HAZARDS COMPENSATION ACT

The Clerk called the bill (H.R. 4357) to increase certain compensation benefits payable pursuant to the War Hazards Compensation Act.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law the disability and death compensation benefits payable pursuant to the War Hazards Compensation Act shall, with respect to injuries or deaths occurring prior to July 1, 1946, be increased by 15 per centum.

SEC. 2. The increase authorized by this Act shall be effective only with respect to disability and death compensation benefits payable on and after the date of enactment of this Act.

With the following committee amendments:

Page 1, line 3, after "the" insert "monthly".

Page 1, line 4, strike "benefits" and insert "section 101(a) of" following "to".

Page 1, line 6, strike "occurring" and insert "resulting from injury sustained".

Page 1, line 10, strike "benefits" and insert following "payable" the words "for periods commencing".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to increase monthly disability and death compensation payable pursuant to the War Hazards Compensation Act."

A motion to reconsider was laid on the table.

INDIAN RESERVATION ROADS

The Clerk called the bill (S. 1719) to amend title 23 of the United States Code with respect to Indian reservation roads.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 208 of title 23 of the United States Code is amended by adding at the end thereof the following new subsection:

"(d) Cooperation of States, counties, or other local subdivisions may be accepted in such construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for Indian reservation roads."

With the following committee amendment:

Page 1, line 10, after "roads" insert "and bridges".

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LICENSING INDEPENDENT OCEAN FREIGHT FORWARDERS

The Clerk called the bill (H.R. 2488) to amend the Shipping Act, 1916, to provide for licensing independent ocean freight forwarders, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. LENNON. Mr. Speaker, I ask unanimous consent that a similar Senate bill, S. 1368, be considered in lieu of the House bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the Shipping Act, 1916 (46 U.S.C. 801), is amended by adding at the end thereof the following new paragraphs:

"The term 'carrying on the business of forwarding' means the dispatching of shipments by any person on behalf of others, by oceangoing common carriers in commerce from the United States, its Territories, or possessions to foreign countries, or between the United States and its Territories or possessions, or between such Territories and possessions, and handling the formalities incident to such shipments.

"An 'independent ocean freight forwarder' is a person carrying on the business of forwarding for a consideration who is not a shipper or consignee or a seller or purchaser of shipments to foreign countries, nor has any beneficial interest therein, nor directly or indirectly controls or is controlled by such shipper or consignee or by any person having such a beneficial interest."

SEC. 2. The Shipping Act, 1916, is further amended by redesignating section 44 as section 45, and inserting immediately after section 43 the following new section:

"SEC. 44. (a) No person shall engage in carrying on the business of forwarding as defined in this Act unless such person holds a license issued by the Federal Maritime Commission to engage in such business: *Provided, however,* That a person whose primary business is the sale of merchandise may dispatch shipments of such merchandise without a license.

"(b) A forwarder's license shall be issued to any qualified applicant therefor if it is found by the Commission that the applicant is, or will be, an independent ocean freight forwarder as defined in this Act and is fit, willing, and able properly to carry on the business of forwarding and to conform to the provisions of this Act and the requirements, rules, and regulations of the Commission issued thereunder, and that the proposed forwarding business is, or will be, consistent with the national maritime policies declared in the Merchant Marine Act, 1936; otherwise such application shall be denied. Any independent ocean freight forwarder who, on the effective date of this Act, is carrying on the business of forwarding under a registration number issued by the Commission may continue such business for a period of one hundred and twenty days thereafter without a license, and if application for such license is made within such period, such forwarder may, under such regulations as the Commission shall prescribe, continue such business until otherwise ordered by the Commission.

"(c) The Commission shall prescribe reasonable rules and regulations to be observed by independent ocean freight forwarders and no such license shall be issued or remain in force unless such forwarder shall have furnished a bond or other security approved by the Commission in such form and amount as in the opinion of the Commission will insure financial responsibility and the supply of the services in accordance with contracts, agreements, or arrangements therefor.

"(d) Licenses shall be effective from the date specified therein, and shall remain in effect until suspended or terminated as herein provided. Any such license may, upon application of the holder thereof, in the discretion of the Commission, be amended or revoked, in whole or in part, or may upon complaint, or on the Commission's own initiative, after notice and hearing, be suspended or revoked for willful failure to comply with any provision of this Act, or with any lawful order, rule, or regulation of the Commission promulgated thereunder.

"(e) A common carrier by water may compensate a person carrying on the business of forwarding to the extent of the value rendered such carrier in connection with any shipment dispatched on behalf of others when, and only when, such person is licensed hereunder and has performed with respect to such shipment the solicitation and securing of the cargo for the ship or the booking of, or otherwise arranging for space for, such cargo, and at least two of the following services:

"(1) The coordination of the movement of the cargo to shipside;

"(2) The preparation and processing of the ocean bill of lading;

"(3) The preparation and processing of dock receipts or delivery orders;

"(4) The preparation and processing of consular documents or export declarations;

"(5) The payment of the ocean freight charges on such shipments:

Provided, however, That where a common carrier by water has paid, or has incurred an obligation to pay, either to an ocean freight broker or freight forwarder, separate compensation for the solicitation or securing of cargo for the ship or the booking of, or otherwise arranging for space for, such cargo, then such carrier shall not be obligated to pay additional compensation for any other forwarding services rendered on the same cargo. Before any such compensation is paid to or received by any person carrying on the business of forwarding, such person shall, if he is qualified under the provisions of this paragraph to receive such compensation, certify in writing to the common carrier by water by which the shipment was dispatched that he is licensed by the Federal Maritime Commission as an independent ocean freight forwarder and that he performed the above specified services with respect to such shipment. Such carrier shall be entitled to rely on such certification unless it knows that the certification is incorrect."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 2488) was laid on the table.

RELATING TO EXCHANGE OF VESSELS

The Clerk called the bill (H.R. 8632) to amend section 510(i) of the Merchant Marine Act, 1936, relating to the exchange of vessels.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of paragraph (3) of subsection (i) of section 510 of the Merchant Marine Act, 1936 (46 U.S.C. 1160), is amended to read as follows: "In determining said fair and reasonable value the Secretary shall consider the cost of placing the vessel in class with respect to hull and machinery."

With the following committee amendment:

On page 1, following line 8, add a new section 2 as follows:

"SEC. 2. The amendment made by this Act shall not affect applications for the exchange of vessels pursuant to subsection (i) of section 510 of the Merchant Marine Act, 1936, filed with the Secretary of Commerce prior to August 11, 1961."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER pro tempore. That concludes the call of the Consent Calendar.

AMENDING THE NATIONAL SCIENCE FOUNDATION ACT

Mr. GEORGE P. MILLER. Mr. Speaker, I ask unanimous consent to return for immediate consideration to Consent Calendar No. 282, the bill (H.R. 8556) to amend the National Science Foundation Act of 1950 to require certain additional information to be filed by an applicant for a scholarship or fellowship, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California [Mr. GEORGE P. MILLER]?

There was no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 16(d) of the National Science Foundation Act of 1950 is amended to read as follows:

"(d)(1) No part of any funds appropriated or otherwise made available for expenditure by the Foundation under authority of this Act shall be used to make payments under any scholarship or fellowship awarded to any individual under section 10, unless such individual—

"(A) has taken and subscribed to an oath or affirmation in the following form: 'I do solemnly swear (or affirm) that I bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic'; and

"(B) has provided the Foundation (in the case of applications made on or after October 1, 1961) with a full statement regarding any crimes of which he has ever been convicted (other than crimes committed before attaining sixteen years of age and minor traffic violations for which a fine of $25 or less was imposed) and regarding any criminal charges punishable by confinement of thirty days or more which may be pending against him at the time of his application for such scholarship or fellowship.

The provisions of section 1001 of title 18, United States Code, shall be applicable with respect to the oath or affirmation and statement herein required.

"(2)(A) When any Communist organization, as defined in paragraph (5) of section 3 of the Subversive Activities Control Act of 1950, is registered or there is in effect a final order of the Subversive Activities Control Board requiring such organization to register, it shall be unlawful for any member of such organization with knowledge or notice that such organization is so registered or that such order has become final (i) to make application for any scholarship or fellowship which is to be awarded from funds part or all of which are appropriated or otherwise made available for expenditure under the authority of section 10 of this Act, or (ii) to use or attempt to use any such award.

"(B) Whoever violates subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than five years, or both."

SEC. 2. Section 10 of the National Science Foundation Act of 1950 is amended by adding at the end thereof the following new sentence: "Nothing contained in this Act shall prohibit the Foundation from refusing or revoking a scholarship or fellowship award, in whole or in part, in the case of any applicant or recipient, if the Board is of the opinion that such award is not in the best interests of the United States."

Mr. CORMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. CORMAN. Mr. Speaker, I rise in support of H.R. 8556. When the circumstances of the Yellin case were brought to the attention of the Science and Astronautics Committee, it became apparent that the security or loyalty provisions of the National Science Foundation program warranted careful study and possible change. In my opinion, the proposed amendment substantially improves the existing law from two points of view:

The first purpose is the matter of security, or drafting an enforceable statute which prevents taxpayers' money being awarded to persons seeking to overthrow the U.S. Government. The second purpose of the proposed amendment is entirely separate from the matter of security, and concerns itself with the criminal record of applicants for Federal scholarships and fellowships. The two should be, and in the following are, dealt with separately.

We deal first with the matter of security, or an earnest effort on the part of the committee to make certain that federally subsidized scholarships or fellowships would not be awarded to Communists or others knowingly attempting to overthrow the constitutional form of government of this Nation. It seems to me that the first objective of legislation of this nature is to precisely define the persons whom we wish to eliminate from consideration. This precision is essential if prosecutors are to be able to prosecute those who violate the law. Second, the law should be so drafted that it constitutes a minimum imposition on the academic world, subject, of course, to the primary objective of safeguarding our security.

A strong case can be made for the fact that the disclaimer affidavit is an undue imposition on the academic world without being an effective tool to prevent Communists from receiving the benefits which we are attempting to deny them. A more practical, simple, and, I believe—after studying recent Supreme Court decisions—constitutional method of accomplishing the objective is to eliminate the disclaimer affidavit completely, providing that membership in a Communist organization, or any other organization required to register under the Subversive Activities Control Act, shall constitute ineligibility, and that the mere act of applying for fellowship or scholarship with knowledge that such organization is required to register shall constitute a felony.

For the loyal student, nothing other than a normal, affirmative declaration of loyalty to his country is required. For the Communist, the mere act of application shall constitute the crime and enable the prosecutor to proceed without the additional burden of making a case of perjury.

I believe this statute takes a long step forward, both in the area of enforcible security measures and in the protection of the civil liberties of the truly innocent. It would be my hope that the House and Senate Education Committees give careful consideration to amending the National Defense Education Act at their earliest opportunity, so that those Federal fellowships, scholarships and other academic subsidies may be administered under an identical security provision.

The second subject matter considered by the committee, and covered by the proposed amendment, has to do with the criminal record of an applicant. There was a strong feeling by all members of the committee that the National Science Foundation should take into account prior criminal convictions, in ascertaining the ability of an applicant to carry out scientific research. It is to be noted, however, that this portion of the amendment requires only disclosure, and—assuming one is honest in his application—he is not disqualified merely because of his criminal record.

At this point, I would call to the attention of the House the fact that there was much discussion concerning the kind of criminal record which would require disclosure. At one point, the committee considered the possibility of requiring only felonies to be disclosed by the applicant. The theory was that a felony was of such magnitude that the National Science Foundation would be obligated to take such conviction into consideration without inquiring further into the facts of the case. This is my own view, and I would say for the record that it would be difficult for me to imagine a convicted felon qualifying under the terms of the National Science Foundation fellowship or scholarship program.

However, the final determination was made by the committee that all crimes should be disclosed, down to but excluding those offenses committed prior to the 16th birthday, and those in which a fine of $25 or less was imposed. It seems to me that in the area of misdemeanors, the National Science Foundation is obligated to look beyond the mere conviction, to ascertain the gravity of the crime, the punishment which was inflicted, and make an independent determination as to whether this particular crime so affected the ability of the applicant that it would influence an award.

Witnesses testifying for the Foundation indicated great reluctance in having to undertake any kind of investigation, other than the rather broad one as to ability, which was to be indicated principally by those in the universities recommending the applicants. In my opinion, the Congress in adopting this amendment will place upon them the obligation to make an independent investigation as to convictions of misdemeanors as disclosed by the applicant. It is to be noted that the committee went one step beyond requiring disclosure of conviction of crime, and required the applicant to disclose pending criminal charges. In supporting this portion of the statute, I would like to make it crystal clear that I do not, and I believe the committee did not, intend to prejudge and punish one who is merely charged with an offense. However, the wisdom of requiring disclosure of pending criminal action is clear when it is realized that should that prosecution result in confinement the applicant is obviously in no position to take advantage of the fellowship or scholarship. In the event of disclosure of such pending prosecution, it would be incumbent, it seems to me, on the National Science Foundation to scrutinize the facts and without reaching a nonjudicial determination of guilt or innocence, accept the very practical fact that a conviction might lead to confinement, and thus the applicant should not be considered until the charge is determined judicially.

Again, Mr. Speaker, I commend this portion of the proposed amendment to the consideration of the House Education and Labor Committee, in conjunction with their review of similar provisions in the National Defense Education Act. I urge adoption of H.R. 8556.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENSION OF FEDERAL AIRPORT ACT GRANTS

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 8102) to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such act, and for other purposes, with Senate amendments thereto, disagree to the amendments of the Senate and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

The Chair hears none and appoints the following conferees: Messrs. HARRIS, WILLIAMS, FRIEDEL, JARMAN, BENNETT of Michigan, SPRINGER, and COLLIER.

COMMUNITY HEALTH SERVICES AND FACILITIES ACT OF 1961

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4998) to assist in expanding and improving community facilities and services for the health care of aged and other persons, and for other purposes, with Senate amendments thereto, disagree to the amendments of the Senate and request a conference with the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

The Chair hears none and appoints the following conferees: Messrs. HARRIS, ROBERTS, RHODES of Pennsylvania, O'BRIEN of New York, BENNETT of Michigan, SCHENCK, and NELSEN.

EXTENSION OF PUBLIC LAWS 815 AND 874 OF 81ST CONGRESS AND THE NATIONAL DEFENSE EDUCATION ACT OF 1958

Mr. POWELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 9000) to extend for 2 additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958, and for other purposes.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—EXTENSION OF PUBLIC LAWS 815 AND 874, EIGHTY-FIRST CONGRESS

Amendments to Public Law 815

SEC. 101. (a) The first sentence of section 3 of the Act of September 23, 1950, as amended (20 U.S.C. 633), is amended by striking out "1961" and inserting in lieu thereof "1963".

(b) Subsection (b) of section 14 of such Act is amended (1) by striking out "1961" each time it appears therein and inserting in lieu thereof "1963", and (2) by striking out "$40,000,000" and inserting in lieu thereof "$60,000,000".

(c) Paragraph (15) of section 15 of such Act is amended by striking out "1958–1959" and inserting in lieu thereof "1960–1961".

Amendments to Public Law 874

SEC. 102. (a) The Act of September 30, 1950, as amended (20 U.S.C. 236–244), is amended by striking out "1961" each place where it appears in sections 2(a), 3(b), and 4(a) and inserting "1963" in lieu thereof in each such place.

Effective date

SEC. 103. The amendments made by this title shall be effective for the period beginning July 1, 1961.

TITLE II—EXTENSION OF NATIONAL DEFENSE EDUCATION ACT OF 1958

Amendments to title II (loans to students in institutions of higher education)

SEC. 201. (a) Section 201 of the National Defense Education Act of 1958 is amended by striking out "for the fiscal year ending June 30, 1962, and such sums for the fiscal year ending June 30, 1963, and each of the three succeeding fiscal years as may be necessary to enable students who have received a loan for any school year ending prior to July 1, 1962" and inserting in lieu thereof the following: "each for the fiscal year ending June 30, 1962, and for the two succeeding fiscal years, and such sums for the fiscal

year ending June 30, 1965, and each of the three succeeding fiscal years as may be necessary to enable students who have received a loan for any school year ending prior to July 1, 1964".

(b) Section 202 of such Act is amended by striking out "1962" each place where it appears therein and inserting in lieu thereof "1964".

(c) Section 206 of such Act is amended by striking out "1966" each place where it appears therein and inserting in lieu thereof "1968".

Amendments to title III (financial assistance for strengthening science, mathematics, and modern foreign language instruction)

SEC. 202. (a) Section 301 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" both places where it appears therein and inserting in lieu thereof "five succeeding fiscal years".

(b) The last sentence of section 302(a)(2) of such Act is amended by striking out "two fiscal years in the period beginning July 1, 1960, and ending June 30, 1962" and inserting in lieu thereof the following: "four fiscal years in the period beginning July 1, 1960, and ending June 30, 1964".

(c) The second sentence of section 304(b) of such Act is amended by striking out "two succeeding fiscal years" and inserting in lieu thereof "four succeeding fiscal years".

Amendment to title IV (national defense fellowships)

SEC. 203. Section 402 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendments to title V (guidance, counseling, and testing; identification and encouragement of able students)

SEC. 204. (a) Section 501 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

(b) The second sentence of section 504(a) of such Act is amended by striking out "two succeeding fiscal years" and inserting in lieu thereof "four succeeding fiscal years".

(c) The first sentence of section 504(b) of such Act is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

(d) The first sentence of section 511 of such Act is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendments to Title VI (language development)

SEC. 205. (a) Section 601 of the National Defense Education Act of 1958 is amended by striking out "1962" both places where it appears therein and inserting in lieu thereof "1964".

(b) Section 611 of such Act is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendment to title VII (research and experimentation in more effective utilization of educational media)

SEC. 206. Section 763 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five suceeding fiscal years".

Amendment to title VIII (area vocational education programs)

SEC. 207. Section 301 of the Vocational Education Act of 1946 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendment to section 1009 (improvement of statistical services)

SEC. 208. Section 1009(a) of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

The SPEAKER pro tempore. Is a second demanded?

Mr. HIESTAND. Mr. Speaker, I demand a second.

Mr. ROOSEVELT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. ROOSEVELT. Is the gentleman entitled to demand a second if he is not opposed to the bill?

The SPEAKER pro tempore. Is the gentleman from California opposed to the bill?

Mr. HIESTAND. No, I am not.

Mr. ROOSEVELT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Is the gentleman from California opposed to the bill?

Mr. ROOSEVELT. I am opposed to the bill.

The SPEAKER pro tempore. The gentleman qualifies. Without objection a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York is recognized.

Mr. POWELL. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks following mine.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POWELL. Mr. Speaker, in presenting H.R. 9000 to you today, I am trying, as the chairman of the Committee on Education and Labor, to save minimal education for this year of Congress. In these last days when we are tired and tense, it is utterly impossible to bring before this body any piece of legislation that demands calm and measured judgment. It was a mistake to have pressed for the Federal aid to school construction last week, and I so conveyed my opinions concerning this to the proper individuals involved. I have been here for going on 18 years, and I know the climate of this House in the last days is not conducive to anything that borders on the controversial.

Now, what I am doing today is entirely on my own initiative. It is true that I have talked to most of the members of the Committee on Education and Labor, but there has been no formal action and this bill is being called up under suspension of the rules by me, on my own initiative, because I believe that this is the maximum we are going to be able to pass this year, 1961. I have conferred with the leadership on both sides of this House and they agree to go along with me.

In brief, we have before us a package containing two time-tested and proven education acts that have expired or will expire very shortly. Important provisions of Public Laws 815 and 874 expired on June 30, 1961; and the National Defense Education Act will expire on June 30, 1962.

Let me briefly trace Public Laws 815 and 874, authorized by that great pioneer in the field of Federal aid to education, my distinguished colleague, the gentleman from West Virginia [Mr. BAILEY]. Public Law 815, for the construction of minimum school facilities in impacted areas, was enacted in September 1950. From its enactment through the 1961 fiscal year, a total of $908,781,575 has been appropriated. Under my bill, an estimated additional appropriation of $37,150,000 will be required to take care of the extended portion of this public law for the fiscal year 1962. While there is no way of estimating fiscal year 1963 requirements at this time, at least the same amount and possibly more will be required, making an approximated estimated total for the 2 years of $74,300,000.

Public Law 874, authorizing cost of maintenance and operation, including teachers' salaries, in impacted areas, was also enacted in September 1950. The total amount expended from its enactment through June 30, 1961, is $1,162,551,312. Under H.R. 9000, an estimated additional appropriation of $164,346,000 will be required to take care of the extended portion of this public law for the fiscal year 1962. Here again, we cannot now estimate for the fiscal year 1963, but we do know that at least the same amount and possibly more will be needed, making an approximate estimated total for the 2 years of $328,692,000.

In connection with this, I wish to point out that approximately two-thirds of the expenditure under Public Law 874 has been spent for teachers' salaries, or a total of approximately $775 million. Now, all this hue and cry against teachers' salaries has been raised by many Members of this House on both sides of the aisle who have received tremendous sums from this legislation. While the money has been spent for teachers' salaries in their districts, they have never uttered one word of complaint. In fact, this is indisputable: not one single Member of Congress has complained, in the 11 years of operation of these two public laws, about Federal control or teachers' salaries.

CALL OF THE HOUSE

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 187]

Alger	Hall	Morrison
Anderson, Ill.	Hébert	O'Konski
Bolton	Holland	Pilcher
Boykin	Jarman	Rabaut
Broyhill	Johnson, Md.	Santangelo
Buckley	Keith	Siler
Carey	Kilburn	Thompson, La.
Coad	Landrum	Westland
Dague	McSween	Willis
Davis, Tenn.	Madden	
Evins	Milliken	

The SPEAKER pro tempore. On this rollcall 404 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

EXTENSION OF PUBLIC LAWS 815 AND 874 OF 81ST CONGRESS AND THE NATIONAL DEFENSE EDUCATION ACT OF 1958

The SPEAKER pro tempore. The gentleman from New York may proceed.

Mr. POWELL. Mr. Speaker, now, as regards the National Defense Education Act, authored by our distinguished colleague from Alabama, formerly a member of the committee of which I am the chairman, now a member of the Rules Committee, the Honorable CARL ELLIOTT, this is the extension of a very vital phase of our American educational life.

I would like to point out briefly what each title of this act has accomplished and what my proposed bill will do:

Title II—Loans to students in institutions of higher education: In the first 3 years, 1959, 1960, and 1961, 230,000 students received loans totaling $130,100,000; $75 million is being appropriated by this Congress for the fiscal year 1962, which should aid more than 100,000 additional students. My 2-year extension authorizes up to $180 million for 1963 and 1964 to continue this vital program, and should aid approximately 250,000 additional students.

Title III—Financial assistance for strengthening science, mathematics and modern foreign language instructions: The estimated total for the 4 years, 1959 through 1962, is $239,800,000. My bill would authorize an additional $150 million for 1963 and 1964.

Title IV—National defense fellowships: In the first 3 years, 4,000 graduate students have been aided; and another 1,500 are expected to be granted aid in 1962, and the total amount in fellowships through 1962 will be $61,500,000. My bill would authorize a continuation at the present level of 1,500 fellowships per year, at an estimated 2-year cost of $50 million.

Title V—Guidance, counseling, and testing; identification and encouragement of able secondary school students; and training of counselors: At the end of 4 years, approximately $74,900,000 will have been spent. My bill authorizes approximately $44,500,000 to continue the program at its present level for 2 years.

Title VI—Language development: We will have spent, in the 4 years 1959–62, approximately $44,700,000. An additional $30,500,000 is authorized by my bill to continue this program at its present level.

Title VII—Research and experimentation in more effective utilization of audiovisual media for educational purposes: In the first 4 years, approximately $14,200,000 will have been spent. My bill authorizes an additional $10 million for the next 2 years.

Title VIII—Area vocational educational programs: Approximately $31,600,000 will have been spent over the 4 years. My bill authorizes up to an additional $30 million for 1963 and 1964.

Section 1009 of title X—Improvement of statistical services: Over the 4 years, approximately $4,700,000 will have been spent. My bill authorizes continuation of this program at an estimated total of $5,200,000 for 1963 and 1964.

In summary, this package carries a total for education in the United States for the next 2 years of approximately $902,992,000.

I am extremely sorry that the Powell amendment banning funds to schools in defiance of the Supreme Court decision is not a part of the impacted areas portion of this legislation. Federal money is being spent for totally Federal projects in areas that have become impacted because of Federal work, most of them due to defense installations. It is shocking and totally inexcusable to have the children segregated in these schools. At the proper time next year, I shall press for action. I also believe that this entire phase should be carefully reexamined by my committee during the forthcoming year, because it is in danger of becoming an education pork barrel rather than really reaching the children who need this assistance; namely, school construction, maintenance, and teachers' salaries.

I regret, too, that the forgiveness clause, as written, is a part of the National Defense Education Act because I, for one, would like to see this forgiveness clause completely changed, so that all people who obtain loans under this act and who teach for 5 years in public or private schools shall be forgiven their loan. This would encourage more teachers to go into private and public teaching. The way it is now constituted, it waives 50 percent of the loan for those who go into public school teaching only.

Also, I believe that the disclaimer affidavit should be abolished; and here, the gentleman from California [Mr. HIESTAND] offered in committee an amendment which will take care of this problem without forcing our educators to be placed in an untenable position.

I promise that during the coming year proper study and consideration will be given to both of these important portions of NDEA.

As chairman of the Committee on Education and Labor, may I say that our sights for 1962 have been aimed at a tremendous increase of legislation in the field of higher education. I am not going to initiate any legislation in the field of school construction for elementary and secondary schools, nor teachers' salaries, unless I am directly requested by the President, as I was this time, or unless the majority of my colleagues of the committee so decide. It is my personal opinion, and I may be totally wrong, that the temper of this House is of such nature that Federal aid to school construction, per se, is dead for at least the next year. I think it is deplorable, but we must face the stark, brutal, and disheartening fact and not dissipate the energies of this committee nor this House on that which will bring no results whatsoever.

I do think the mood of this House, in this era of atomic energy and astronauts, is keyed to higher education. For this purpose, our committee has brought out several bills, especially the higher education bill of the gentlewoman from Oregon [Mrs. GREEN] which received bipartisan support. We intend to press for passage of this bill during the remaining days of this year or the early days of next year.

It is most important that we institute a crash program for training American young people in the sciences. Upon the basis of statistics prepared for me by the Department of Health, Education, and Welfare, and my very capable professional staff, I would like to announce the startling fact that by 1970, just 8 years from now, the Soviet bloc will have 15 million students enrolled in colleges and universities, and the free world will have only 7,500,000. They are outproducing us each year, and we will automatically become a second-class educational power.

I know what I am about to say will be heartbreaking to those who believe in the humanities and the liberal arts, but I believe we cannot afford to continue to spend money disproportionately in those fields. The crisis is one of science. We are rapidly being lost sight of in the technological race for world survival. Therefore, whether we like it or not, we must, for a while, emphasize the sciences, even if it means deemphasizing the humanities. Otherwise, we might wake up one day to find that we have no humanity.

In connection with this, a bipartisan study group of individual members is going to Soviet Russia as soon as Congress concludes, and they will bring back to our committee a detailed analysis of the Soviet system versus ours.

Also, I would like to announce that I am appointing the young members of the Committee on Education and Labor on both sides as a special task force to advise the chairman on new insights and new emphasis on the New Frontier of scientific education for the year 1962.

The great philosopher, Alfred North Whitehead, put it concisely when he said:

> In the conditions of modern life, the rule is absolute, the race which does not value trained intelligence is doomed. Not all your heroism, not all your social charm, not all your wit, not all your victories on land or at sea can move back the finger of Fate. Today we maintain ourselves. Tomorrow science will have moved forward yet one more step, and there will be no appeal from the judgment which will then be pronounced on the uneducated.

Mr. ROOSEVELT. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN. Mr. Speaker, I rise in support of this legislation.

Mr. Speaker, it may be recalled—and I am sure the gentleman from West Virginia [Mr. BAILEY], the legislative father of the so-called Federal impacted school district bills, Public Laws 815 and 874, will recall—that when the original legislation was enacted back in 1950

I joined in support of that measure as best I could, from this side of the aisle. These two laws were enacted.

I have supported extensions of these two public laws ever since, because in my opinion neither Public Law 815 nor 874 can in any way be termed Federal aid to education legislation. Instead, we are simply providing by law that the Central Government shall make payments, in lieu of taxes, to the school districts that are federally impacted, that is, where many additional children have been sent into existing schools as a result of the establishment of some Federal installation or military base within, or near a public school district. If any large privately owned industry should locate near or in any established school district, thus greatly increasing school enrollments, such industry would automatically be required to pay taxes in and to such affected school districts to help them meet the increased cost of operating such school. Therefore the enactment and extension of this legislation is amply justified in my opinion and I hope it will receive the full support of the House.

I also, of course, favor the extension of the National Defense Education Act, especially so far as the provisions that permit colleges and universities to make loans to students, loans that will be repaid by the students later, are concerned.

I appreciate fully the need for this legislation. I hope it will be enacted.

Mr. ROOSEVELT. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin [Mr. REUSS].

Mr. REUSS. Mr. Speaker, there is much that is good in this bill—for example, the renewal of the National Defense Education Act.

But there is also much which deserves very serious examination. I am particularly thinking of that part of the impacted areas aid which has gone way beyond the original concept of trying to help communities whose school systems are genuinely hurting because of the sudden influx of Federal employees who pay no local taxes.

Let us take the case of nearby Montgomery County, where I happen to live when Congress is in session, and where my children go to school. Montgomery County is filled with high-income white-collar workers for the Federal Government who live in the metropolitan area. They pay their full share of local taxes, and Montgomery County is delighted to have them. Yet Montgomery County receives Federal aid to education based upon the number of children in the Montgomery County schools whose parents are employed by the Federal Government.

There are some scores of communities like this around the country, receiving Federal aid to education without regard to need. But here is the pity—there are thousands of counties throughout the country whose school districts are desperately in need of help to fill a need the local real estate taxpayers, who pay the local school tax, cannot meet. They get no Federal aid to education.

The present system of aid to impacted areas has become capricious, whimsical, and arbitrary. The whole subject should be restudied and remedies applied to correct the inequities.

I also hope that when a properly drawn impacted areas bill comes to the floor, it will come under a parliamentary situation where it is capable of being amended, and that it will come accompanied by a report, as it is not accompanied today, so that we may be fully informed in the matter.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I agree, as a member of the Committee on Education and Labor, that a thorough examination should be made of this whole question regarding the scope of the impacted program. Unfortunately, the specific proposals along these lines which President Kennedy made earlier this year were not even considered by our committee. Neither, I might add, were earlier proposals previously made by President Eisenhower.

The SPEAKER pro tempore. The time of the gentleman from Wisconsin has expired.

Mr. POWELL. Mr. Speaker, I yield myself such time as I may consume. I stated in my prepared manuscript that a study would take place next January.

Mr. Speaker, I now yield 4 minutes to the gentleman from New Jersey [Mr. THOMPSON].

Mr. THOMPSON of New Jersey. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include an editorial.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. THOMPSON of New Jersey. Mr. Speaker, I am in the unhappy position today of finding myself in support of this bill in its present form. But I would like to call the attention of the House to certain facts.

First of all, Public Laws 815 and 874 are in fact, and to a very large extent, Federal aid to education. To the full extent to which the moneys received by impacted districts exceed the actual loss in ratables, you have Federal aid to education.

Incidentally, Public Laws 815 and 874 were amended 3 years ago, in a bill offered by myself, making permanent the putting of the Federal Government in the education business; the education of the category (a) children whose parents live and work on military establishments. There can be no other assumption, there can be no other hypothesis except to take this bill today as a proposition that this is Federal aid to education. No other equation or logic would be acceptable.

The vote will be interesting today, if there is one, for the House in its wisdom the other day rejected consideration of legislation which was identical except that it would have added one thing in addition to that which is in this legislation—it would have added a school construction section. The House exercised its will. As the author of the bill which was refused consideration, my initial reaction was one of anger and frustration, and I thought, "Well, I will oppose this," which I am not going to do today, not because of Public Laws 815 and 874 but because of title II of the National Defense Education Act. Under title II some 30,000 youngsters going to college would be unable to get loans in the next fiscal year. So that you see they are wrapped in here in such a way that either you support them and their desire for education, so badly needed, or else you prevent them, at least for the coming year, from realizing their aspirations.

The remainder of the National Defense Education Act could very well wait until it expires next year. I rather doubt that there will be much action on this next year, however, for reasons which are known to all of us.

We are in the unique position today of asking those of you who voted against consideration of an almost identical bill last Wednesday to vote for just a bit less of Federal aid this week. Many of you will, on this Wednesday avail yourselves of the opportunity to fatten up your own districts. I remind you that the impacted districts in this land are not confined by any means to those surrounding military establishments or Government agencies. I consider that a district is impacted if its children are on double or triple shifts, even if there is not a military establishment within 500 miles.

Education should be the principle busines of this body and of our great Nation, since our very survival depends upon it. The great classroom shortage has been established, as has the fact that the States and municipalities cannot keep up with it. Please consider these facts between now and the next time you have the opportunity to alleviate that shortage. Between now and that time we shall redouble our efforts to find a solution acceptable to a majority of you.

By this action today in extending for 2 years help to those now covered by Public Laws 815 and 874, we are discriminating against all of those not covered; those who must attend schools on part-time sessions in classrooms which are totally inadequate; those who are taught by poorly paid teachers.

Perhaps last week the vehicle was the excuse or the parliamentary situation was the excuse for your refusal to consider school construction legislation, but the fact is that the refusal of this body to consider a bill under circumstances which would have allowed it to come out with anything in the form of substitutes or amendments did a great, a permanent, and a terrible injustice to the schoolchildren of the United States, except those who benefit from this narrow piece of Federal aid to education.

I shall include, following these statements, an editorial from this morning's New York Times which I consider most worthy of your attention. Our situation here in the Congress appears to me to make impossible the Times' suggestion that a combination of impacted areas grants with general Federal aid to education be passed before we adjourn. Indeed, there is time remaining but the unhappy fact seems to me to be that we have not found a formula acceptable to

a majority of this House. The bill, H.R. 7300, contained such a formula but is hopelessly bogged down in the Committee on Rules. This is a tragic set of circumstances. The editorial follows:

SCHOOL AID: HYPOCRISY

Senator MCNAMARA, of Michigan, is quite correct in rebelling against the hypocrisy that has impelled Congress to turn its back on genuine and general Federal aid to education while it shows great eagerness to renew assistance to the local federally impacted areas.

The hypocrisy is documented by well over a hundred votes which are regularly cast for aid to the impacted areas by Members who, with equal regularity, help to defeat nationally distributed Federal aid to the schools. The impacted-area grants are based on the theory that school districts which feel the unusually heavy impact of children of parents working in defense establishments and other Federal projects need such help. They probably do, although it should not be overlooked that Federal projects, even though they take real estate off the local tax rolls, contribute heavily to the nearby communities' economic well-being. At any rate, there are many nonimpacted areas whose schools are in far greater need of help.

Congressmen, in the interest of legislative decency and national responsibility, ought to think of what they can do for the country, not merely what the country can do for them, by supporting their local vote-getting interests. Let the politically popular impacted-area grants be continued—provided that they can be made part and parcel of straightforward, nonpolitical, generalized Federal aid to education wherever it is needed. There is no satisfactory reason why this cannot be done in this session. If there is time to pass impacted-area aid, there is time to pass general aid to the public schools.

It is intolerable for legislators to cash in on their pseudo support of education when it suits local vote-getting expediency while they continue to block real aid to the public schools. The time to drive this home—by insisting on general public school aid, along with renewal of the grants to the impacted areas—is now. But the failure of leadership, in the White House, in the Department of Health, Education, and Welfare, and in the House of Representatives gives little cause for hope. Compromise has been the order of the day—and the result has been a fiasco for Federal aid to education and a disaster for the Nation's public schools.

Mr. ROOSEVELT. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. PUCINSKI].

Mr. PUCINSKI. Mr. Speaker, I rise in opposition to this legislation. I think it is bad in principle. I think it is bad in equity. It is tragic that this legislation comes before the House under the peculiar rule of suspension, where we are denied extensive debate, we are denied extensive amendments, and under which the House of Representatives of the United States is denied an opportunity to work its will in meeting the problems of all the children in this country in the field of education.

Mr. Speaker, Congress properly enacted legislation in 1950 to pay to local school communities an assistance from the Federal Treasury for children whose parents live and work on military installations. That law is on the books today and is in no way affected by the legislation now before us. Then, in 1958, Congress amended the original impacted areas bill to pay an additional sum to local communities for children who go to public schools and whose parents merely work on a Federal installation, but do not necessarily live on the Federal installation. That first part of the bill, that $100 million, I emphasize, will remain available to impacted areas regardless of what we do here today. What is in question here today is whether or not we want to make available an additional $200 million a year to those school districts who have youngsters who live off the installations and go to public schools. I say this legislation before us today is unfair. It discriminates against the overwhelming majority of American schoolchildren. I say federally employed parents of children in impacted areas are making a contribution to the local community. If we say to nonimpacted area taxpayers that they cannot get any Federal aid for education; that they should carry out their responsibility through local taxes, then, Mr. Speaker, I say this same principle should be applied to impacted areas whose economy is substantially improved on the presence of these Federal employees. Proponents of this legislation are in effect saying to local taxpayers that they must pay more for maintaining their school system out of their own pockets because they have no Federal employees in their community.

Mr. Speaker, this bill discriminates against large cities. We in Chicago must provide facilities for an additional 16,000 elementary grade students in public schools this year at a cost of several million additional dollars to my constituents. But because Chicago is not a federally impacted area, we will not get a penny under this bill. This is nothing more than a vast pork-barrel bill for those communities which already are getting the bulk of the Federal tax dollar.

Mr. Speaker, I regret this bill has tied into it continuation of the National Defense Education Act, which I consider to be one of the greatest pieces of legislation ever passed in this Congress. This is a most desirable law but since its enactment 3 years ago, experience has shown that several technical changes are necessary if it is to be applied with fairness to all who can benefit under it.

Because of the closed rule under which this legislation is being considered today, I regret that I will not be able to offer an amendment which would permit our private schools to obtain loans for 40 years instead, as the bill now provides, loans for only 10 years of science and mathematics. Private schools have not been able to benefit from this legislation because under the present law limiting loans to 10 years, most private schools can get better terms for similar loans from private banks. If we are to pass any legislation in the form of Federal aid to education, certainly this legislation should not discriminate against children attending private schools consistent with constitutional limitations. I regret also that I will not be permitted to offer an amendment which would permit teachers trained under the NDEA to have 50 percent of their loans written off if they go into teaching in private schools. The present bill permits teachers who go into public schools to write off 50 percent of their loans. Why should we discriminate against private schoolteachers who are also doing a magnificient job of training and educating young Americans. Yet, under the procedure here today, I am forbidden from offering an amendment to eliminate this inequity. Nor am I permitted, under the steamroller procedure being used here today, to offer an amendment which would permit a private schoolteacher to get the same stipend for postgraduate seminars that we now pay public schoolteachers. Under the NDEA which we are expected to continue today, a public schoolteacher gets $75 a week from the Federal Government while attending summer seminars but the private schoolteacher gets nothing. Is it not time we stopped treating our private schoolteachers like second-class citizens? Yet, you would expect me to vote for this bill today and perpetuate this brazen discrimination against the Nation's private schoolteachers who are doing such a magnificent job of training our youngsters.

Mr. Speaker, I say that this bill does not help the majority of the country. Based upon the figures at the committee table, this bill is going to help only 10 percent of the 38,000 school districts in America. Of that number, 3,800 school districts that do benefit under this legislation, 10 percent get 40 percent of all the money. I say that this is not fair; it is discriminatory. Take, for instance, the State of Illinois, with 94 school districts benefiting under this impacted-areas bill, they will get only $3 million under this bill. These same 94 school districts spend a total of $54 million annually for operating costs and facilities.

Mr. Speaker, if the legislation is defeated today we may then come back and try and bring to the Congress a bill that will help all of the youngsters in this country whether they live in impacted areas or not. I am confident that Congress can pass a bill based on the needs of the local school districts where the local school districts demonstrate they cannot meet these additional needs with local funds. These would include school districts that have children attending double-shift classes; where they have other problems that cannot be met with local tax resources.

Mr. Speaker, this present legislation will continue to discriminate against decent taxpayers all over America if it is renewed today. I say there are thousands of school districts in the country that have reached their saturation point on local taxes for school needs. If we are to help education let us help all the children who are today forced to get their education in substandard facilities and not only those who live in areas where there happens to be a concentration of Federal employees. I hope this bill will be rejected so Congress can then make a sincere effort toward meeting the problems of all the youngsters in this country in the educational field, both in public and, consistent with the Constitution, in private schools.

Mr. ROOSEVELT. Mr. Speaker, I yield 3 minutes to the distinguished

ranking minority member of the committee, the gentleman from Pennsylvania [Mr. KEARNS].

Mr. KEARNS. Mr. Speaker, I rise to urge that the House approve H.R. 9000. This body cannot afford to adjourn without keeping faith with all the school districts that are burdened because of Federal activities. Neither can we afford to let the National Defense Education Act expire. The NDEA programs initiated under the Eisenhower administration have been highly successful. Therefore, I think every Member in this Chamber knows that extension of this act is most essential to defense now and in the crucial times ahead.

This bill, Mr. Speaker, simply embodies titles I and II of the bill which I introduced on August 16, H.R. 8748. Unfortunately, it does not embody title III of my bill which would have authorized a program to help our colleges and universities build necessary academic facilities for the huge increase in college enrollment which we face. Therefore, I cannot understand why the Secretary of Health, Education, and Welfare, as well as the chairman of the Education and Labor Committee, the gentleman from New York [Mr. POWELL], did not incorporate title III of my bill, in H.R. 9000 and thus provide facilities for higher education at this critical period in our American life.

Then, too, I regret that the present bill does not provide for needed amendments to the NDEA which easily could have been made had the administration supported H.R. 4253, which I introduced back on February 3 of this year. In view of all the controversial issues injected into the administration's education proposals, however, it is obvious that justifiable action on such amendments had to be ruled out at this time.

May I remind my colleagues on the other side of the aisle that it will be wise henceforth to refrain from legislative maneuvering such as we have seen during the past 8 months, so that we can enact proper legislation that is clearly defined in the national interest.

We cannot delay longer, so I urge all the Members on my side of the aisle to join with me in supporting the bill which is now before us.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. KEARNS. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Speaker, I should like to commend the gentleman from Pennsylvania for his statement. He has made some sound comments. I regret there is not more time for more of us members of the Education and Labor Committee as well as others, to speak on this legislation.

Mr. Speaker, in my opinion it is essential that we pass this bill today. After 8 months, this session of Congress still has done nothing of consequence in the field of education. It is of crucial importance, at least, that we extend the impacted school program, as well as the various titles of the NDEA.

Why, several Members have asked, has no more been done? Why, apparently, is no aid to be given to colleges so they may expand their facilities? Why should we not be considering a possible expansion, rather than a simple extension of NDEA? Why, as others have suggested today, are we not considering, though not necessarily accepting a possible cutback in Public Laws 815 and 874?

Answers are not easy to give. Let me simply say that time is working against us. Months of inaction cannot be overcome by feverish last-minute efforts to develop legislation. At least in the field of education, legislative proposals all too often have a controversial flavor. Unless the ground is carefully prepared prior to their consideration, such bills face an uncertain fate.

Mr. Speaker, it may not be particularly tactful but I personally feel that the most glaring failure of the Kennedy administration, so far as legislative accomplishments are concerned, is in the field of education. The President himself has described education as "the most urgent domestic issue" facing Congress. Yet virtually nothing has been done during the past 8 months. The death knell of Democratic hopes was sounded when this body on August 30 decisively defeated a last-minute proposal, H.R. 8890, hastily put together in an effort to avoid disaster. This action by the House Mr. Kennedy described as a "clear defeat" for his administration.

Why have the Democrats failed so egregiously in an area which they feel to be so important? Is it true, as Mr. Kennedy asserts, that the real losers are the Nation's schoolchildren, "who need this assistance"? To what extent, if any, did the opposition of Republicans to Democratic efforts contribute to the lack of action?

First of all, the Democrats unquestionably bear the basic responsibility for action, controlling both the executive branch and the House and Senate. In my opinion they have failed miserably in their leadership responsibility. They have muffed their opportunities with astonishing ineptitude.

To begin with, President Kennedy asked for so much that his original proposals bogged down in Congress. Furthermore, the specific bills in each case contained very controversial features along with unobjectionable provisions. This set the stage for the stalemate which resulted. Then weeks were wasted in a futile search for compromise proposals. Belatedly there was brought up last week H.R. 8890, a bill of questionable value. To make matters worse, by highhanded tactics an attempt was made to ram this bill through the House, almost literally overnight. All this was attempted without any regard for regular legislative procedure. This effort deserved to fail. Indeed, it might be called more accurately merely a gesture.

Does failure to enact new programs deprive the schoolchildren of the Nation of assistance they need? I doubt it. The impact of new Federal programs would not have had any great significance, except insofar as they defined the Federal responsibilities. Certainly the bill rejected would have done very little. On the other hand, if Congress fails to authorize a program to help colleges build needed facilities, real hardships may result. Yet here again, apparently there is no plan to do anything.

It is perhaps unwise, if not impossible, to assess accurately who is to blame. Yet I do feel compelled to say that Republicans have sought consistently for enactment of essential educational programs, such as extension of aid to federally impacted areas. We have urged extension of the National Defense Education Act, and a broadening of Federal responsibility with respect to college facilities. Admittedly on controversial subjects, such as subsidies for teachers, we have not been enthusiastic. Understandably, opinion has been divided on issues such as the advisability of Federal scholarships, and the responsibility of the Federal Government for aid in construction of classrooms. At all times, however, we have sought to avoid developing issues at the expense of needed programs. The Democrats, on the other hand, while presumably not seeking issues, obviously have been unsuccessful in securing enactment of new programs. Now we have no choice but to undertake what is essentially a salvage operation.

Mr. ROOSEVELT. Mr. Speaker, will the gentleman yield?

Mr. KEARNS. I yield to the gentleman from California.

Mr. ROOSEVELT. Is it not true, however, that the committee did consider the NDEA bill and we did make certain amendments which at this time are completely ruled out; we are now being asked to pass for 2 years—not 1 year, but 2 years—without the amendments which everybody agrees are now necessary. Would it not be better for us to come back in January of next year and enact considered legislation?

Mr. KEARNS. Mr. Speaker, may I say to the gentleman from California, whom I thank for yielding me this time, that he will remember that we amended the National Defense Education Act, but the amendments were not agreeable to the committee.

Mr. POWELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to say to the gentleman from California that he knows full well that in January we are going to bring before the committee full consideration of higher education, amendments to NDEA, and a complete study of impacted areas.

Mr. Speaker, I now yield 2 minutes to the gentleman from West Virginia, the distinguished author of Public Laws 815 and 874.

Mr. BAILEY. Mr. Speaker, almost 2 months ago the majority of the House Committee on Rules in effect said they did not even wish to discuss education. Last week 241 of my colleagues agreed that they did not wish to discuss education. Without impugning the motives behind any one of the 8 members of the Committee on Rules or any one of my 241 colleagues, I say that these two actions were tragic. Had I voted against education I would dislike what I had to look at in the morning when I shave. Today we have a bill that keeps going

two programs with which all the Members of the House are familiar. I am speaking now to Public Law 815 and Public Law 874. I am also speaking of the extension of the National Defense Education Act.

It just so happened that I was the original author of Public Laws 815 and 874 and have been an ardent supporter of the program for 11 years. I also cosponsored the legislation, along with our distinguished Member of the House from Alabama, that set up the National Defense Education Act. It cleared through the joint action of the two subcommittees of the House.

Today, Mr. Speaker, the least we can do is to pass this bill. If we are not going to move education forward, for Heaven's sake do not let us send it backward. The time for talking is long since passed. The time for action is today. I am sure the House will approve this partial program for education.

Mr. ROOSEVELT. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. BALDWIN].

Mr. BALDWIN. Mr. Speaker, I rise in support of H.R. 9000. I think the principles on which the Congress passed Public Laws 815 and 874 quite a few years ago have quite definitely been established as needed and should be continued. In fact, I think it is unfortunate that we are this late in the session and this late in date in extending these two laws. Actually, many of the school districts have already begun sessions, and they have begun sessions in an uncertain atmosphere when they have not known whether the category (b) allocations would be available to them as they have been during the past 10 to 12 years.

I think this legislation merits passage on its own merits. I was one of those who voted last week for a broader bill, but I actually think we should have passed the extension of Public Laws 815 and 874 at a much earlier stage in this session so that the school districts throughout the country that have looked to these bills for support could have counted on them in planning their budgets for the school year 1961-62.

Mr. ROOSEVELT. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GOODELL].

Mr. GOODELL. Mr. Speaker, I rise reluctantly in support of this legislation. I want to make it clear that I enthusiastically am in favor of the National Defense Education Act, but I would have preferred that we had a revised bill expanding the present act. I would support with enthusiasm even a straight extension of the National Defense Education Act, but I want to make it clear that I am very much in opposition to the impacted areas program as it stands today. Because the two programs are combined in the same bill I must vote for both of them in order to support the NDEA program.

It should be pointed out that the impacted areas program started with a very simple formula which has now been made permanent law, providing aid where children's parents worked and lived on Federal property. If parents both worked and lived on federally owned property a payment was made, actually 90 percent of the average cost per pupil in that area. This legislation does not have anything to do with the situation where the parents live and work on the Federal installation. That is permanent law. This legislation does not even affect that. It refers to children whose parents either work or live on Federal property, and I emphasize the word "either." It also applies to children whose parents are employed by companies primarily engaged in defense contracts. In rare instances, such Federal aid might be justified, especially when a national emergency causes a sudden influx of defense workers into an area, thus overburdening the school system temporarily. Both the categories of aid covered by this bill are badly abused, however, and I cannot favor them in their present form.

I want to make it clear that I have no quarrel with the category (a), permanent impacted-areas program. I think it is justified. In that case there is a clear Federal impact and the Federal Government is responsible. As to category (b), we have departed far from the original purpose of the act. Parents may work in a Federal Army camp, for instance, and live in the town. In such a case they own houses or pay rent on property in the town and thus pay taxes to support the schools. In spite of this fact, full impacted-area aid is given to those school systems by the Federal Government. It is wrong. It is a boondoggle program in its present form. We badly need to revise it and I hope our committee can do so next year.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. POWELL. Mr. Speaker, I yield the balance of my time to the distinguished gentlewoman from Oregon [Mrs. GREEN], chairman of the Special Committee on Education.

Mrs. GREEN of Oregon. Mr. Speaker, it seems to be abundantly clear to the membership of the House that there must be something terribly wrong with this bill which is before us for consideration today. There has not been one speaker for this legislation who has given it his unqualified endorsement. The chairman of the Committee on Education and Labor, in presenting the bill, said he was very unhappy to be in this situation today. The gentleman from New Jersey [Mr. THOMPSON] expressed his regrets about the bill in every particular except with respect to continuing student loans under the National Defense Education Act. The ranking Republican member of the Committee on Education and Labor expressed his regrets that the bill does not contain any amendments to the National Defense Education Act or any additional provision for higher education. The gentleman from New York who just spoke said he was in favor of extending the National Defense Education Act, but that he was opposed to the section of the bill regarding federally impacted school districts. The gentleman from California [Mr. ROOSEVELT], who has always been a leader in the continuing fight for better schools, for Federal aid, now finds himself forced to oppose this inadequate bill.

Mr. Speaker, with everybody so unhappy about this legislation, it seems to me all of us would ask ourselves: Why, then, should we consider it? I would suggest that if there are so many Members who are so unhappy about this legislation, it would be most unwise to freeze in that unhappiness for a period of 2 years, and that we should at least consider the possibility of an extension of aid to federally impacted areas for only 1 year and thus give the subcommittees and the full committee time to really work on this bill. I wish every Member would read a recent report by the Comptroller General on the operation of the impacted areas program.

I most certainly am not suggesting, Mr. Speaker, that the members of the Committee on Education and Labor have not given many, many hours of serious consideration to legislation in this field. Certainly, the chairman of the committee has given excellent leadership on various bills that have been before us. He has shown untiring interest in the passage of educational legislation to meet the demands of our times. May I say, however, that the particular bill before us today never has been considered for one moment either by the subcommittees or by the full committee. This particular bill comes before you without any consideration by the committee designated and authorized by the House of Representatives to consider legislation in this vital area of Federal aid to education.

May I also say that the committee approved a number of amendments to the National Defense Education Act when that act was considered separately by the committee. This fact, certainly, should be given consideration by the House. There is a provision in the National Defense Education Act, which I am sure you all know about, that if a person who received a student loan goes into public school teaching, he is forgiven 50 percent of the loan that he obtained under the act. This could be a forgiveness of as much as $2,000. However, there is no such forgiveness of any part of the loan for those teachers who go into private schools. I submit that this is very unfair. This House should not continue such inequitable treatment to these teachers for 2 more years.

Mr. Speaker, I need not point out to anyone that the religious issue has been a major factor in the consideration of legislation affecting education. Everyone of us in the House of Representatives knows that that is true. But we are not avoiding the religious issue this year or next year by voting on this bill today.

In one part of the bill it says: We will forgive loans to teachers if they go into the public schools, but we will not forgive loans to teachers who go into private schools who are also desperately needed in the teaching profession. Then, we turn around and say in another provision in this bill: We will lend money to private schools for special equipment. I repeat, Mr. Speaker, the so-called religious issue is not being avoided by bringing this bill up under suspension and preventing any amendments or in fact even a full discussion of the issues involved.

Mr. Speaker, it seems to me we cannot act upon this bill today and claim, that by doing so, we are solving the problems of education; nor can we fool ourselves by thinking we have found an easy way out. Some argue for this 2-year extension to avoid considering an adequate educational program next year—election year. If this is the purpose, then the boys and girls of this country are the ones who are going to be shortchanged.

Mr. Speaker, I urge the defeat of this legislation, not because I am opposed to Federal aid for our schools—but rather because I am convinced of the desperate need of an adequate program, a better program, carefully worked out, carefully considered and designed to meet the challenges of the space age in a more comprehensive way.

Let me also say if this bill is defeated today, certainly the leadership of this House can make it possible for us to vote on a 1-year extension of the federally impacted area bill, but we do not need to vote for this 2-year extension which has never, I repeat, never been considered by the Education and Labor Committee and which really does not have the wholehearted support of a single person who has spoken.

May I conclude by inserting an editorial from today's New York Times:

SCHOOL AID: HYPOCRISY

Senator MCNAMARA of Michigan is quite correct in rebelling against the hypocrisy that has impelled Congress to turn its back on genuine and general Federal aid to education while it shows great eagerness to renew assistance to the local federally impacted areas.

The hypocrisy is documented by well over a hundred votes which are regularly cast for aid to the impacted areas by Members who, with equal regularity, help to defeat nationally distributed Federal aid to the schools. The impacted-area grants are based on the theory that school districts which feel the unusually heavy impact of children of parents working in defense establishments and other Federal projects need such help. They probably do, although it should not be overlooked that Federal projects, even though they take real estate off the local tax rolls, contribute heavily to the nearby communities' economic well-being. At any rate, there are many nonimpacted areas whose schools are in far greater need of help.

Congressmen, in the interest of legislative decency and national responsibility, ought to think of what they can do for the country, not merely what the country can do for them, by supporting their local vote-getting interests. Let the politically popular impacted-area grants be continued—provided that they can be made part and parcel of straightforward, nonpolitical, generalized Federal aid to education wherever it is needed. There is no satisfactory reason why this cannot be done in this session. If there is time to pass impacted-area aid, there is time to pass general aid to the public schools.

It is intolerable for legislators to cash in on their pseudosupport of education when it suits local vote-getting expediency while they continue to block real aid to the public schools. The time to drive this home—by insisting on general public school aid, along with renewal of the grants to the impacted areas—is now. But the failure of leadership, in the White House, in the Department of Health, Education, and Welfare and in the House of Representatives gives little cause for hope. "Compromise" has been the order of the day—and the result has been a fiasco for Federal aid to education and a disaster for the Nation's public schools.

Mr. ROOSEVELT. Mr. Speaker, I yield 2 minutes to my colleague, the gentleman from California [Mr. HIESTAND].

Mr. HIESTAND. Mr. Speaker, I rise in support of this bill. I am opposed to Federal aid to education, promiscuously, universally, and in principle. Here, however, we have a real issue before us. Education of children in federally impacted areas is clearly a Federal responsibility. The Federal Government has moved into these areas, taken large acreage off the tax rolls, and simultaneously multiplied the school population. As I say, this is a Federal responsibility, and therefore I feel that we are justified in supporting this bill because it is a Federal responsibility to help these children be educated. That, in my judgment, is the real issue.

Now, speaking generally, Mr. Speaker, I am convinced that the Nation as a whole does not want general Federal aid to education. The people have so demonstrated repeatedly. Likewise, they are now becoming conscious of the fact that the school districts have over the years done a perfectly magnificent job in building classrooms and in raising teachers' salaries. That is not a Federal matter. This is. And, I feel we are justified in supporting the renewal before us of Public Laws 815 and 874.

Some people have some objections to the operation of these two measures, and to a degree they undoubtedly are justified. May I suggest that they are justified by the administration of the measures which are, grantedly, quite difficult but not to the principle that the Federal Government has this responsibility.

Mr. Speaker, because so many Members are asking for time and would like to be heard on this subject, I ask unanimous consent that all Members be given permission to extend their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. ASHLEY], may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ASHLEY. Mr. Speaker, I will vote against the bill now under consideration because I think it is poor legislation on its merits and because I disapprove of the manner in which it is being considered.

The bill, which involves an expenditure of some $1 billion, lumps together the extension of two very different programs, each of which is subject to considerable question as far as their details are concerned. Yet under the procedure of suspending the rules as we are being asked to do today, neither is subject to amendment and the entire bill is limited to 40 minutes debate. This simply does not meet even the shabbiest test of a sound legislative process.

As far as the substantive aspects of the bill are concerned, I find myself in substantial agreement with the statement of President Eisenhower in 1959 with respect to Federal assistance to schools in federally impacted areas. He stated at that time:

The substantial increase in Federal employment during World War II, which led to the enactment of this legislation in 1950, has been superseded by a relatively stable Federal establishment. In many cases, the presence of Federal installations in the communities adds to rather than detracts from the revenue base for the support of schools. * * * The pressing need now is not for aid to federally affected districts on the basis initiated in 1950 but for general aid to help localities with limited resources to build public schools.

In short, I feel the formula by which Federal funds are distributed to impacted areas is in need of a complete overhauling and I think a thoroughly wrong result will be achieved if we extend the program 2 years on its present basis. Certainly consideration should be given communities where the Federal Government has come in and established a base or facility, thereby eliminating valuable land from the tax roles. Generally speaking, however, I would say that any assistance which goes beyond compensating for the loss of tax revenue from such land gives these so-called impacted areas a form of Federal aid which is not available to other communities, many of which may actually have a far greater need.

I believe strongly in the need for a general aid to education program but this is not the right approach. The right approach was contained in the education bill which came before the House last week and which was defeated by the votes of Members who today will vote for funds for their own particular district.

The record will show, Mr. Speaker, that I have always been a strong supporter of the National Defense Education Act. However, this program, too, needs reconsideration to make it more responsive to the national interest. In my view, it, too, deserves a better fate than to be considered under a procedure which allows only the briefest discussion and no possibility of refinement—especially since it does not expire until 1962.

Mr. DELANEY. Mr. Speaker, the impacted areas bill and the National Defense Education Act, which are combined in the bill H.R. 9000, have many worthwhile features. This bill merely provides an extension of both acts as they are now written into law.

In the NDEA we have discriminatory legislation, with one very discriminatory clause.

For example, take two students who are making teaching a career. They could even be classmates in college and graduate together. If one should teach in a public school he would be granted forgiveness of 50 percent of the amount he borrowed. If the other one taught in a nonpublic school, he would not receive this benefit. This should not be.

Not only are these features discriminatory, but they are not compatible with

the national interest, which is to stimulate education in the subjects of mathematics, science, and languages. Since we are dealing with people rather than schools, there should be nothing that precludes participation by all teachers.

We are considering this bill under suspension of rules, so it is not possible to offer amendments. We have the choice of taking the bill as written or voting against it.

With this explanation I shall vote for the bill, and it is my hope that this discrimination can be eliminated.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Rhode Island [Mr. FOGARTY], may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. FOGARTY. Mr. Speaker, I rise in support of H.R. 9000, a bill to extend for 2 additional years the programs of Federal assistance to school districts burdened by Federal activities and the program of loans to needy college students.

This bill, if enacted, will provide urgently needed relief to 3,800 school districts for the school year which is now beginning throughout the country. These districts educate 12.5 million schoolchildren including 1.8 million of whose parents are employed in Federal projects. The districts depend on Federal payments for the normal operation and construction of school facilities which have been provided by Federal appropriations since 1950. Unless the bill is enacted in this session, school programs in these districts will be curtailed and hundreds of thousands of children will receive a diluted education program.

In my home State of Rhode Island some 21 federally impacted school districts received approximately $1,117,000 in the 1960 fiscal year on account of some 7,851 children residing with a parent employed on Federal property—the so-called B category of Federal impact, now expired, but which H.R. 9000 would extend for 2 additional years. These districts would be unable at this late date to raise the additional revenues to make up this loss—and as a result, unless the Congress acts promptly, would be under the necessity of curtailing the school program, increasing the size of classes, and in other ways restricting necessary school expenditures at a time when enrollments are continuing to increase because of the presence nearby of major Federal projects vital to the national defense:

Public Law 874 entitlements, State of Rhode Island, fiscal year 1961 [1]

Project No.	Applicant	Pupils in attendance		Entitlements paid		Total entitlements [2]
		Permanent provisions	Temporary provisions	Permanent provisions	Temporary provisions

[1] Data based on initial processing of fiscal year 1961 applications.

[2] Based on estimated data for the Nation as a whole, it is estimated that school districts in the State of Rhode Island will receive under Public Law 874, for fiscal year 1962, $732,110 for A category children (permanent provisions of the act) and $1,353,890 for the B category children (if temporary provisions of the act are extended). This makes for a combined estimated total of $2,086,000.

As the Members of Congress know, I have been a consistent supporter of this Federal impact legislation in the past because I believe it is right in principle. It is based on the concept that the Federal Government as the Nation's largest real property owner—over 750 million acres of tax-exempt property—should make payments, in the nature of in-lieu-of-tax payments, for the support of free public education in those school districts in or near which its property holdings are located—thus accepting the role of a local property taxpayer in support of these essential educational services. In so doing the Federal Government has only accepted and discharged its equitable obligation. I believe that it should continue to do so.

This program has received the enthusiastic bipartisan support of the Congress for the past 10 years and is fully justified as a Federal contribution reimbursing communities who are deprived of local revenues by the tax-exempt status of Federal property.

As in the past, I will give my full support to the appropriation of supplemental funds needed to support this program for the fiscal year 1962 totaling $201 million.

Another emergency need met by the bill is the 2-year extension of the popular program of Federal assistance to student loan programs aiding needy college students, along with all other titles of the National Defense Education Act. Some 1,500 colleges and universities participate in this program and 220,000 college students are continuing their college education with the Federal support given under the National Defense Education Act. With this extension, the Congress could appropriate funds to enable the colleges to plan programs of assistance for some 36,000 high school students who will graduate next spring and who will need loans to enroll in college in the fall of next year. I will support appropriation requests needed to bring the program up to its full authorized strength of $90 million in fiscal year 1962 and again in fiscal year 1963.

Mr. GEORGE P. MILLER. Mr. Speaker, I shall vote for H.R. 9000, a bill to extend for 2 additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958.

My vote will be a matter of expediency because most of the school districts in my area are greatly dependent on this Federal aid for their respective programs. The public laws have been on the statute books for many years and it would be deleterious to public schools throughout the Nation to see the financial provisions lapse at this time.

Naturally, I was hopeful that Congress would pass a comprehensive Federal aid program for schools. Since this is not possible in the current session, we must endeavor to take minimal action now, to extend existing aid provisions and at the same time continue our efforts to realize a more complete aid-to-education plan in the near future.

With the Soviet Union offering renewed challenges to the United States in every facet of our way of life, we can ill afford to weaken our educational institutions by depriving them of financial support. Also, with property owners straining under increasing local tax rates and assessments, it would be disastrous to place extra burdens on them to fill the revenue vacuum which would be created if Public Laws 815 and 874 funds were not available.

Mr. Speaker, these are the reasons which motivate my vote for H.R. 9000.

Mr. RIVERS of Alaska. Mr. Speaker, I rise in support of H.R. 9000 introduced by the distinguished gentleman from New York [Mr. POWELL]. Inasmuch as the administration's general program for Federal aid to education has become so controversial as to preclude legislative action thereon during the short remaining period of the present session, I see no alternative other than to extend the federally impacted school area laws, Public Laws 815 and 874, and the National Defense Education Act.

In greater or less degree 319 of the Nation's 437 congressional districts contain impacted school areas, and the schools involved throughout the country

have already budgeted for the newly commencing school year in reliance upon an extension of Public Laws 815 and 874. To do other than to pass the legislation now before us would create a fiscal fiasco in school districts all over America. Neither do we wish to disappoint several thousand college students counting on the availability of student loans for this school year which phase is also provided for in H.R. 9000. I urge passage of this legislation.

Mr. DOMINICK. Mr. Speaker, I rise in support of H.R. 9000, not because I think that this is the best bill that could be put together, but because I believe that it is the best bill which can be passed at this late date in the session when schools all over the country have already reopened and have included in their operating budgets sums which they reasonably and confidently expected to receive under proposed extension of Public Law 815, Public Law 874, and NDEA introduced as early as January of this year.

All other school proposals have been beaten down either in committee or in the newly reorganized Rules Committee or on the floor of the House. They have been poorly drawn or have become embroiled in religious controversy or have simply been unacceptable to the majority of the Members of this great body, but the basic question of the degree of responsibility of the Federal Government for local education has neither been determined by this Congress or even thoroughly debated. The bill before us at least provides a measure of Federal responsibility for Federal activities; namely, payments to public school districts providing education for children of Federal employees. Furthermore, the provisions of this bill extending these activities for 2 years instead of one should reduce election pressures in later consideration of education legislation.

Finally, passage of this Act extending relatively noncontroversial programs should eliminate the practice of using them as sweetners for other legislation which might be otherwise unacceptable to many Members.

For all these reasons, Mr. Speaker, I urge the adoption of H.R. 9000.

Mr. HAGEN of California. Mr. Speaker, I rise in support of H.R. 9000, to extend the expiring portions of the Federal impactment school assistance program and to continue in effect the National Defense Education Act.

I am certain that a majority of the Members of the House agree with me as to the value of these two programs and the necessity for their continuation.

Should the impactment provisions not be extended, thousands of school districts which have been swollen populationwise due to the proximity of Federal activity will face disastrous budgetary problems. There are at least 12 affected school districts in the 14th Congressional District, which I am privileged to represent, and I have been informed by officials of these districts of the great necessity for this legislation.

This bill affects only those children in impacted areas who reside off the Federal installation on which their parents are employed. Those who reside on Federal facilities are taken care of in permanent legislation. Since the same classroom facilities and teachers are required for students in both categories it is only equitable that the pending legislation to extend the expiring portion of the program for 2 years be enacted.

We are all aware that the Congress recognized in 1950 the need for Federal aid to impacted areas when it enacted Public Laws 815 and 874, the basic Federal impactment laws. H.R. 9000 merely extends expiring portions of this program, for which there is ample precedent and justification, and I urge that the bill be approved.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. BOLAND], may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. BOLAND. Mr. Speaker, I rise in support of H.R. 9000, a bill providing for a 2-year extension of so-called federally impacted school aid laws, Public Law 874 and Public Law 815; and a 2-year extension of titles II, III, IV, V, VII, and VIII of the National Defense Education Act.

The extension of the federally impacted school aid laws is vital not only to 11 school districts in my Second Congressional District of Massachusetts, but to thousands of other school districts in some 315 congressional districts in the United States.

These school districts are planning their local budgets for the current 1961–62 school year, starting today. These budgets are being based in part on estimates the school districts will receive under Public Laws 874 and 815 because of the number of pupils whose parents work and live on a military installation or Federal reservation; are employed at the military base or reservation but live in a nearby community; or have moved into the community because of employment in a strategic defense industry.

Mr. Speaker, the Federal Government has been making payments for 12 years under Public Law 874 to school districts to defray the cost of educating these students. The Government has been giving grants, under Public Law 815, over the same number of years to these school districts, toward the cost of constructing new schools because of the influx of these pupils. Many of the school districts are planning new school construction now and financing is based on Public Law 815 grants. Only last week School Supt. John Fitzpatrick, of Chicopee, Mass., in my district, came to Washington to tell me how important it is to his school district that these laws be extended. He was also representing the Massachusetts Superintendents Association. Chicopee is the home of Westover Air Force Base, headquarters of the 8th Air Force, Strategic Air Command. Mayor Edward Lysek, of Chicopee, also came down here earlier this summer to appeal for the extension of these laws, which have actually already expired, as of June 30, 1961. Today I received the following telegram from Springfield:

> Urgently request your support to extend Public Laws 874 and 815 for new 2 years.
>
> JOSEPH E. BUCKLEY,
> *Assistant Superintendent of Schools.*

Mr. Speaker, the Chicopee School District received $623,217 in Public Law 874 funds during the last school year, 1960–61, and $483,322 in Public Law 815 funds for the construction of a new comprehensive high school. Superintendent Fitzpatrick told me Chicopee will have to begin planning for another new elementary school within the next 2 years and Public Law 815 funds will be sought.

The Springfield school district received $299,580 in Public Law 874 funds during the 1960–61 school year. Other school departments in my district and the amounts received during the law year under this law are: Ludlow, $34,505; Wilbraham, $8,908; Hampden-Wilbraham, $3,421; Northampton, $52,631; Granby, $19,892; South Hadley, $42,254; Hatfield, $4,169; Hadley, $6,430; and Amherst, $5,419. These communities are all depending on Congress extending these laws so that they can plan budgets for the current school year.

Mr. Speaker, it is also very important that Congress extend provisions of the National Defense Education Act before it adjourns, so as to insure continuity of its programs and to allow young people completing their high school education to plan for college training. I would like to include with my remarks a letter I received from President John W. Lederle of the University of Massachusetts on this subject. President Lederle also refers to the need for Federal assistance in construction of academic facilities—classrooms, laboratories, and libraries. The letter follows:

> COMMONWEALTH OF MASSACHUSETTS,
> UNIVERSITY OF MASSACHUSETTS,
> *Amherst, August 31, 1961.*
>
> Hon. EDWARD P. BOLAND,
> *House Office Building,*
> *Washington, D.C.*
>
> MY DEAR REPRESENTATIVE BOLAND: As president of the University of Massachusetts I am writing to express our deep concern about the widely accepted belief that Congress may adjourn this year without approving either of the two major items of legislation affecting higher education. We are convinced that if this happens, at least three serious results may be expected to follow:
>
> 1. Many of our young men and women will be deprived of opportunities for college or university education which rightfully are theirs, and which are essential to the strength and continuing leadership of the United States.
>
> 2. The colleges and universities, struggling to meet demands for a higher standard of education for greater numbers of students, will have to face a responsibility for which they simply do not have the resources.
>
> 3. A world convinced that the future lies with the best educated peoples will wonder about the vision, the wisdom, and the determination of the people of the United States.
>
> Knowing that you share our concern in this matter, I am writing to set forth the position of the American Council on the

two major items of legislation affecting higher education:

Higher education bill: By consensus in higher education, a program of Federal assistance in construction of academic facilities—classrooms, laboratories, and libraries—should have a top priority. Even when all potential private, State, and local support is taken into account, these capital needs cannot be met by the institutions. The American Council for several years has advocated optional Federal grants or loans for this purpose. We have recommended a Federal program of about $1 billion a year, based on a 1960 council survey of demand among its member institutions. While legislation now before Congress provides only $300 million annually, this amount with required matching funds would provide tremendous stimulus and encouragement to the institutions. Postponement of action for at least another year will mean delay at a critical time for the Nation's educational and scientific progress.

Scholarships provided by the higher education bill are also strongly supported by the council. The loss of student talent for lack of educational opportunity, by reason of financial inadequacy, can no longer be afforded by this country. With college costs rising rapidly, the loan program under the NDEA has helped many families in the middle-income brackets, but qualified students at the very low income levels are finding the financing of college more and more difficult.

Now that hearings have been concluded on this legislation we urge the Congress to give it early and favorable consideration.

National Defense Education Act: There can be no question as to the substantial contribution the programs under the NDEA have made in the last 3 years to the improved quality of education, and the broadened opportunity for education, in the United States. The American Council strongly recommends extension during the 1st session of the 87th Congress of a revised and strengthened NDEA. Careful study by educational organizations and by committees of Congress over many months has resulted in approval of two bills by the responsible Senate and House committees. These bills contain all the essential elements for a fully acceptable piece of legislation.

It is of the greatest urgency that action be taken in this first session not only to make appropriate changes in the NDEA, but also to insure that programs now successfully under way will suffer no loss of continuity or momentum. If action on a revised and expanded NDEA is finally determined by congressional leadership to be impossible the council will support in the emergency a 1-year extension of the existing programs. In any event, we urge that action be taken this year. Delay will be costly to the Nation.

We are encouraged to read in the papers that a new effort is under way toward passage of educational legislation. Your personal interest and assistance will be greatly appreciated.

Sincerely yours,

JOHN W. LEDERLE,
President.

Mr. Speaker, I also ask permission to have included with my remarks a letter from the Citizens Committee for Extension of the National Defense Education Act, signed by Chairman George J. Hecht, an identification list of eminent American scientists headed by Dr. James B. Conant, president emeritus of Harvard University, and the statement of the scientists. The letter and statement follow:

CITIZENS COMMITTEE
FOR EXTENSION OF THE
NATIONAL DEFENSE EDUCATION ACT,
Washington, D.C., August 25, 1961.

Hon. EDWARD P. BOLAND,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN BOLAND: It is imperative, we believe, that you consider carefully the enclosed statement about the National Defense Education Act issued by a group of our Nation's most distinguished scientists headed by Dr. James B. Conant, president emeritus, of Harvard University.

Their statement points to the "confusion, uncertainty, and partial loss of the gains already made" under the NDEA which they feel will result if the Congress fails to extend the act before adjournment of the 1961 session.

For our Citizens Committee, may I stress that it is extremely alarming that measures are being introduced to single out one title of the NDEA for renewal while abandoning the other nine titles for this year. This act is actually an interdependent series of programs which were carefully balanced to produce the essential scientific and technical manpower our Nation needs.

School superintendents, teachers of science, mathematics and foreign languages, vocational guidance personnel, college presidents, vocational educational teachers, and heads of State departments of education—those who bear grassroots responsibility for carrying out the objectives of the NDEA—assure us that no valid educational purpose is served by this proposed piecemeal approach which they feel would scuttle the most successful and crucial weapon in the educational arsenal of the United States.

We urge you to extend every power and influence at your command to prevent the dismemberment of the NDEA and to support, at the very least, a simple 1-year extension of the entire act this year.

May we have your reassurance?

Cordially,

GEORGE J. HECHT, *Chairman.*

P.S.—The scientists issuing the enclosed statement made their statement as individuals and not in affiliation with any organization. You may, however, wish to have the attached page of indentification notes.

Members of Citizens Committee for extension of the National Defense Education Act: William Benton, A. B. Bonds, James B. Conant, Arthur S. Flemming, Marion B. Folsom, Richard G. Folsom, John W. Gardner, George J. Hecht, Gaylord P. Harnwell, Frederick L. Hovde, Bernard Locker, Earl J. McGrath, M. D. Mobley, Elmo Roper, Anna M. Rosenberg, George N. Shuster, and Charles P. Taft.

A STATEMENT TO THE AMERICAN PEOPLE AND TO THE U.S. CONGRESS URGING IMMEDIATE EXTENSION OF THE NATIONAL DEFENSE EDUCATION ACT

We, the undersigned, are disturbed by the serious damage which will be done to the vital program of the National Defense Education Act if the Congress fails to extend that act before adjournment of the 1961 session. If action is delayed until 1962, State legislatures which must appropriate matching funds, school and university officials who must now plan for the 1962–63 academic year, and students whose educational plans are in part dependent on NDEA programs will be unable to plan with confidence. Unless the act is extended now, the school year of 1961–62 will inevitably be one of confusion, uncertainty, and partial loss of the gains already made.

The National Defense Education Act, enacted by Congress in 1958, provided major help toward the improvement of science and mathematics instruction in the Nation's schools and colleges. Specifically it has:

1. Enabled thousands of high schools to secure laboratory equipment, libarary books, and teaching facilities in science and mathematics that they would not otherwise have obtained.

2. Enabled many States to engage the services of science and mathematics supervisors or scientific consultants to help classroom teachers improve their teaching of science and mathematics. These supervisors and consultants have been particularly helpful in introducing new and improved texts and teaching materials in science and mathematics.

3. Offered financial help to high school graduates who have the desire and ability, but not the money, to go to college. Among these students, preference has been given to those who want to specialize in science, mathematics, engineering, or foreign languages.

4. Helped universities—widely scattered over the United States—to develop new or improved programs for graduate students.

5. Aided graduate students who want to become college teachers, and who will be needed for the much larger college enrollment that must be expected in the next few years.

6. Provided similar improvements in the teaching of foreign languages.

These results of the National Defense Education Act have benefited students who wish to become scientists, mathematicians, or engineers. They have benefited students who plan on careers in other fields but to whom a knowledge of science is an essential part of education for intelligent participation in the affairs of a scientific and technically oriented world. In benefiting these two groups the National Defense Education Act has started to make an important contribution toward strengthening the Nation that both groups will serve.

The job is well started, but far from complete. The National Defense Education Act has been in effect for only 3 years. The first year was largely one of tooling up. The second and third were years of growth and improvement. There is good momentum now. However, failure to extend the National Defense Education Act this year will bring many of the gains to a halt. Extending the act this year will enable the Nation to continue to build upon the improvements that have already been started. These improvements in science education are too vital to the welfare of the Nation to allow the act to be weakened.

Detlev W. Bronk, James B. Conant, Lee A. Du Bridge, Frederick L. Hovde, James R. Killian, George B. Kistiakowsky, W. A. Noyes, Thomas Park, J. A. Stratton.

IDENTIFICATION NOTES

Detlev W. Bronk, president, National Academy of Sciences; president, Rockefeller Institute; formerly, president, Johns Hopkins University.

James B. Conant, presently engaged in a study of the American public schools under a grant from the Carnegie Corp. of New York; president emeritus, Harvard University formerly, U.S. Ambassador to the Federal Republic of Germany.

Lee A. DuBridge, president, California Institute of Technology; formerly, member of the President's Scientific Advisory Committee.

Frederick L. Hovde, president, Purdue Univeristy; Chairman of the Task Force Commit-

tee on Education for President-elect Kennedy.

James R. Killian, chairman of the corporation of the Massachusetts Institute of Technology; formerly, Special Assistant to the President of the United States for Science and Technology; formerly, Chairman, President's Scientific Advisory Committee.

George B. Kistiakowsky, professor of chemistry, Harvard University; formerly, Special Assistant to the President of the United States for Science and Technology; formerly, Chairman, President's Scientific Advisory Committee.

W. A. Noyes, chairman of the department of chemistry and dean of the graduate school, University of Rochester.

Thomas Park, president, American Association for the Advancement of Science; professor of zoology, University of Chicago.

J. A. Stratton, president, Massachusetts Institute of Technology.

Mr. ELLIOTT. Mr. Speaker, this is a great day for American education when we propose to extend the National Defense Education Act for 2 years, and when we propose to extend Public Laws 815 and 874 for the benefit of schools and schoolchildren in areas that are affected by or "impacted" by the activities of the Federal Government.

The National Defense Education Act, passed just 3 years ago, has already become a landmark in the field of education. Its extension here, for 2 full years, without changing a word, is a great testimonial to the good it has done.

I am proud to have been the author in the House of the National Defense Education Act in 1958. I worked nearly 10 years working with my colleagues, staff members, and other interested parties in fashioning this act. I am proud of the good the act has done. I continue to be thrilled at the prospect of all the good that it can do in the future.

I like to think of the National Defense Education Act as a reservoir of needed educational opportunities for America's young people. More than 230,000 young people have received loans with which to attend college. Thousands of science laboratories in America's high schools have been greatly improved. About 3,000 fellowships have been granted to train needed college teachers. There are several other programs. I wish I had time to discuss them all.

I urge the adoption of this bill. I hope we can give it an overwhelming vote. This is an opportunity for the Congress to reaffirm its interest in these two great educational laws.

Mr. CORMAN. Mr. Speaker, I rise in opposition to H.R. 9000. If I may paraphrase an old saying, a Member's stand on this bill may well depend on whose taxpayers are being gored. In this instance, the taxpayers of the 22d District of California, whom I represent, are being gored unreasonably by H.R. 9000, and thus I vigorously object.

I would hasten to point out that I have never attempted to evaluate legislation based solely on the effect of that legislation in my own district. I have supported a great number of legislative proposals designed to strengthen this Nation, to promote the general welfare, to deal with specific problems in specific areas of the Nation—all of which were remotely, or not at all, to the direct benefit of my district.

This legislation I oppose because it purports to solve a problem which is an acute problem in the 22d District of California but which it does not solve at all so far as my district is concerned. The distinguished gentleman from Ohio [Mr. BROWN] pointed out very candidly that Public Laws 815 and 874, which are to be perpetuated for 2 years by H.R. 9000 are not, and are not intended to be, Federal aid to education. They purport to be in lieu of taxes to be paid to that branch of government providing education which has lost a portion of its tax base because of Federal activity. Parenthetically, I would like to state that I favor the principle of Federal participation in the cost of education on the condition that such legislation is drafted to raise the general level of education in this Nation, gives consideration to the burden being borne by the local taxpayers and gives equitable assistance to the real property taxpayer by shifting a portion of the high cost of education to the broader base of Federal taxes.

Second, I favor the general theory that the Federal Government should pay in lieu taxes to compensate local governments when tax base is lost because of Federal activity. It is to be noted that the only in lieu taxes contemplated by this bill are to offset the cost of education. I know from experience, as do the real property taxpayers in my district, that this is only one of a great number of municipal services which must be performed, which are very expensive, and which become unbearably expensive in a community which has lost a substantial part of its tax base because of the tax exemption of federally owned property.

Now to my specific objection to Public Laws 815 and 874 the impacted areas statute which would be continued for 2 additional years. It purports to be both Federal aid to education and in lieu taxes and so far as my district is concerned, it is neither, because of the manner in which the legislation has been drafted. Every taxpayer in the county of Los Angeles is acutely aware of the tax burden which falls on him as a homeowner caused in part by the fact that a substantial portion of the industrial community is not subjected to ad valorem taxes because it is held in Federal ownership. This problem has been wrestled with by the State of California for a number of years but has not been resolved. At one point the Los Angeles County Board of Supervisors assumed it had the capacity to tax Federal properties held in ownership by the Federal Government but used by private industry. When the Supreme Court determined to the contrary, it became necessary to refund collected taxes well in excess of $20 million. The impact on the taxpayers of the 22d District was cruel. Briefly, I would call to your attention that in my congressional district 13 percent of the students educated in the public schools are within the definition of "impacted students." The tax rate for public education is extremely high. We have a very high bonded indebtedness, and we have 22,000 schoolchildren in the Los Angeles School District who will be on half-day sessions starting next Monday morning.

With all this, because of the formula set up in this statute, the Los Angeles School District, of which the 22d Congressional District is a part, gets not one penny under this bill. It is to be noted that other school districts within this same county, because of their size, get substantial assistance under Public Law 874, even though their loss of tax base is substantially less, their tax rate is less, their comparative bonded indebtedness is less, and they have had no children on half-day sessions during their history. A Federal proposal so drafted that it creates this kind of inequity within a single county is in my opinion indefensible.

Others who have spoken before me have pointed out that normal procedure has not been followed in bringing H.R. 9000 to the floor. On studying this matter, I became aware of the serious inequities. I discussed with the chairman of the committee and a number of other members the possibility of appearing and offering proposed changes which would at least make this bill a true in-lieu tax bill. Unfortunately, no such opportunity was presented. Should this bill fail of adoption, I would hope that those of us whose districts are so adversely affected might have an opportunity to appear before the committee and discuss this dilemma.

Should H.R. 9000 fail of adoption, I would be willing to concede to continuation of Public Laws 815 and 874 for 1 year to permit careful review of proposed changes plus a consideration of a more direct and honest approach of providing in lieu taxes to finance all of the services provided by local governments including education. So far as the NDEA provisions which would be continued under H.R. 9000, I certainly support them in principle. As has been pointed out by the distinguished Congresswoman from Oregon, the committee itself recognizes the necessity for substantial changes in the present law. As I had occasion to point out earlier today, in discussing the National Science Foundation statute, it seems to me that the security provisions of the existing NDEA are far from satisfactory. This is only one of many changes which this Congress should be permitted to review. Again should H.R. 9000 fail, I would be pleased to support the continuation of the existing NDEA for 1 year. This the House can easily do, and considering the fine record of the Education Committee during this first session, it is more than obvious that constructive legislative proposals would be before this Congress during the second session. I do not wish, and I am certain no Member of this House wishes, to cut off from an honestly impacted school district funds to which they are entitled, nor do we wish for a semester, a month or a day to interrupt those portions of the National Defense Education Act which are

so essential to higher education, but passage of H.R. 9000 clearly is not necessary to avoid these perils. When it is demanded of me to vote to continue for 2 years a so-called Federal-aid bill, sole justification for which is correction of a local tax inequity, when that tax inequity is as severe in my district as in any district in this land, and when the taxpayers I represent are cut off without one cent, I say too much is demanded. So that the record may be perfectly clear, I would observe that there is one tiny school district within my congressional district, which lies outside the Los Angeles City School District, which does qualify for assistance—assistance in the sum of $3,300 per year. If the Los Angeles City School District were treated similarly, the Federal payments would be something in excess of $5 million a year. I am hardly persuaded by the argument that so little help to so few warrants my support of a bill so patently unfair to so many in my congressional district.

I urge the defeat of H.R. 9000.

Mr. QUIE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. QUIE. Mr. Speaker, I rise in support of H.R. 9000. It is extremely important that we extend Public Law 815 and Public Law 874, which expired on June 30 of this year. It is under these laws that the Federal Government fulfills its obligation to help finance the education of children whose parents either work in establishments owned by the Federal Government or live on Federal property.

The other part of H.R. 9000 would be extension for 2 years of the present National Defense Education Act. Title II is of greatest importance because it is necessary to program longer than 1 year in advance in order to provide the monies for student loans.

It is advisable also that the remainder of the National Defense Education Act be extended in order that those who administer these programs might be insured of their continuance. It is unfortunate that the House has been placed in the position that we are forced to legislate in this manner. If it had not been that efforts all through this session were being made by the majority to: First, use impacted school districts' extension as a "gimmick" to force the more than 300 Members of Congress, who have impacted school districts within their congressional districts, to vote for the unwise and unnecessary general aid to elementary and secondary schools bill, H.R. 7300, which was earlier reported by our committee but stopped in the Rules Committee; and, second, use the National Defense Education Act as a legislative vehicle to promote Federal aid for private and parochial schools in the amendments in that act, this would never have happened.

Last week both laws were again used to force consideration of a completely unacceptable Federal aid to school construction bill. This is a deplorable way to legislate. However, it is my hope that next year we will immediately give further study to these two operating programs and consider amendments which are greatly needed.

I might point out one statement made by Secretary Ribicoff on page 16 of the hearings entitled "Federal Aid to Schools," stating that, "The draft bill would repeal categories of Federal payments under both Public Law 815 and Public Law 874 which are not based on the school attendance of children whose parents live or work on Federal property." As it has been stated by others, this and other amendments have been recommended by both President Kennedy and former President Eisenhower. This law should definitely receive thorough study. It is unfortunate that our committee neglected to do so this year. Amendments should be considered on their own merits in order that proper continuance of this program be insured for future years.

The National Defense Education Act received thorough study this year, and had it not been for the attempt to add a section providing for aid to private and parochial schools without similar aid to public schools, I believe that the many beneficial amendments, which were thoroughly discussed, would have been adopted with the extension of this law.

Two points I would mention today which I hope will receive serious thought by all of my colleagues as we look forward to the day that this program will be considered on the floor again are these: First, the present division under student loans in title II providing for forgiveness up to 50 percent of the loan for students who go into teaching should be repealed. The reason for this is that many of the students, whose advisers recommend they not go into teaching, have chosen that profession because it gives them an opportunity to receive the 50 percent forgiveness on their loans. If this is continued, it may influence more teachers to go into the profession, but not necessarily the high-quality teachers which we are looking for.

Present statistics point to the fact that during this decade there will be an adequate supply of teachers due to the fact that the huge increase in birth rate after World War II will be hitting the colleges during the 1960's while the rate of increase in elementary and secondary schools will drop from 1,400,000 during the first 5 years to 655,000 in the last 5 years of this decade. If college graduates continue to go into the teaching profession at the present rate of 31 percent, quite a surplus of teachers will develop.

Of the students who now receive loans under the National Defense Education Act, 47 percent have indicated they will go into the teaching profession. This means approximately 24 percent of the loan made is actually a grant while 76 percent is repaid.

I believe it would be a wise change in the law so the moneys provided for financial assistance to needy students will be made available, 25 percent for grants and 75 percent for loans, no matter which profession a student pursues.

I believe the entire program should be administered exactly the way the National Defense Education Act loans are presently administered through the colleges. This would keep the administrative costs low, and from present experience, we know that most colleges and universities are now quite expert in choosing the able and needy student.

It is significant to note that in the bill considered last week, only title II of the National Defense Education Act was to be extended. However, the forgiveness was to be broadened rather than reduced.

Second, the special assistance given for math, science, and modern foreign languages may eventually lead to overemphasis in these subjects.

Either much of these special programs should eventually be phased out or else it will be necessary to give assistance to other languages and other courses of study. It is true that in prior years, there was considerable lack of emphasis given to science, math, and modern foreign languages. I believe it would be equally undesirable if overemphasis were given to these subjects in our schools.

In conclusion, I believe that both laws, the one providing Federal aid to impacted school districts, and the National Defense Education Act are basically good pieces of legislation, and I am looking forward to working with the other members of the committee and our colleagues to perfect these laws in order that we might accomplish the work that they were set out to do.

Congress should consider future Federal aid to federally impacted school areas and changes in the National Defense Education Act on their own merits.

Mr. BERRY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. BERRY. Mr. Speaker, I rise in support of this bill providing an extension of the impacted areas laws and the National Defense Education Act.

I dislike the method by which these extensions come to the floor. Public Laws 815 and 874 should be amended. As presently written there are many inequities in these two laws. There is, for instance, no logical reason why school districts in the District of Columbia or the adjoining counties in Maryland or Virginia should be benefiting from these laws.

By the same token, however, where there is actual impaction of school districts created by the Federal Government through defense installations or through Government construction contracts where the impaction is of short duration or with no definite period of termination, there the Federal Government has a definite responsibility to assist local school districts in the education of the children of families who move into these areas for short periods.

In spite of the fact that the present law should be amended there is no opportunity to do so under the present

procedure and the law must be extended in its present form, until such time as Congress has an opportunity to correct these laws at a later date.

Likewise I do not approve of the NDEA provisions, but because of the fact the extension of this act is attached to the impacted areas bills there is no opportunity to make any change in this law. We must take both without change and live with them during this session of Congress.

I trust Members of the House will join me in extending these laws now and then correct them at a later date.

Mr. JOELSON. Mr. Speaker, H.R. 9000 will provide hundreds of millions of dollars in Federal aid in the form of funds for both school construction and teachers' salaries in federally impacted school districts. By the device of tying to the bill the extension of the valuable National Defense Education Act containing a scholarship loan program for college students, its sponsors have made opposition most difficult. Furthermore, by a parliamentary maneuver, the offer of amendments has been made impossible.

It is interesting to examine the position of Congressmen who only a week ago voted against even considering a bill to provide Federal aid merely for school construction in overcrowded areas. These same gentlemen now urge millions in expenditures for federally impacted areas. Absent are the anguished cries that such aid will result in the destruction of local school systems, Federal interference with local education, and all the other dire eventualities heretofore predicted concerning Federal aid generally.

It is also interesting to hear the gentlemen talk about the hardships caused to their districts by Federal installations. Nowhere was mention made of the fact that Army bases and Federal installations greatly stimulate local economies, and that any attempt to pry loose a Federal installation invariably results in violent protests from local residents and their representatives.

Finally, there was a deafening silence from those so-called friends of civil rights who originally advocated tacking on nonsegregation provisions to a general aid to education bill in order to insure its ultimate defeat. How strangely silent they were on segregated schools in federally impacted areas. Although it is the policy of our Armed Forces that military personnel be racially integrated, no protest has been heard against educational segregation for the children of our soldiers, sailors, and airmen. No attention was given to the fact that many of these children who must move from integrated sections of our country are required to take a humiliating step backwards in attending segregated schools.

Mr. ROSTENKOWSKI. Mr. Speaker, it is most unfortunate that the membership of this House has been subjected to make a decision on a measure that was put together during the waning days of this session of the 87th Congress—a time when expediency takes precedence over genuine principle. I refer to H.R. 9000, a bill to extend Public Laws 815 and 874, which provide Federal funds for the construction of minimum school facilities in impacted areas and authorizing cost of maintenance and operation, including teachers' salaries; and extends the National Defense Education Act of 1958 for 2 years.

The haste in bringing these measures to the floor of the House as one package under suspension has resulted, I believe, in poor legislation with no opportunity for improvement at this time.

The two programs condensed in this bill are vastly different, and yet, we are asked to submit to acceptance of the impacted area program if we favor the National Defense Education Act, for there is no choice under the rules of suspension. Proponents of the sport of boxing would agree this to be the best one-two punch ever delivered because the defense of extended debate and amendments are overruled.

The New York Times eloquently revealed the true nature of this proposal when they titled it "Hypocrisy." For, in analyzing the course of events regarding Federal aid to education in this Congress, how else can we describe what has happened in this Chamber? If there is such overwhelming support to assist impacted areas, then this same support should be given to nationally distributed Federal aid to schools, for there are many nonimpacted areas whose schools are in far greater need of help.

I have publicly announced my support for a general aid to education program and I strongly favor it. There is a great need for advancing our educational programs at all levels, which has been revealed by many surveys that have been taken.

But I object to H.R. 9000, for we sacrifice those amenities which spell civilized living for local vote-getting interests. The defeat of this bill would not impair the National Defense Education Act, which I fully support, since it does not expire until 1962. The impacted area provision of H.R. 9000 turned me against the bill. Federal aid to education is needed nationally, not only in impacted areas. Refusing to support those select areas may result in the needed support of a national program. Expediency can work both ways.

Mr. COHELAN. Mr. Speaker, I will vote for H.R. 9000—which will extend the expired provisions of Public Law 815 and 874, and the National Defense Education Act for another two years—but I will do so with great reluctance. In fact, if this legislation were not of such great financial importance to my district, I would vote against it.

Let me make it clear that I fully recognize the importance of this legislation in its own right. I believe, however, that it is a sad commentary on our perception of the crucial problems confronting us nationally in the field of education today when legislation as limited as this is the maximum effort which can be brought before the Congress. To be blunt, Mr. Speaker, I am sorely disappointed that the constructive proposals for dealing with our serious shortage of classrooms and qualified teachers—have been sidetracked.

I can only say that I am very hopeful that legislation of a similar magnitude will be brought before the House in the second session of this Congress, and that it will be passed.

Mr. Speaker, it is my best judgment that legislation of this nature is absolutely essential if we are to meet one of our fundamental commitments as a Nation—a commitment of insuring every child the opportunity for an education that will develop him to the fullest of his abilities. These are crucial times in which we live and nothing short of such an effort will enable us to remain strong and free as a nation—nothing short of such an effort will enable us to remain the leader of the free world in these troubled and difficult times.

Mr. ROOSEVELT. Mr. Speaker, I yield myself such time as I may consume.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ROOSEVELT. I will be happy to yield to the gentleman from Iowa.

Mr. GROSS. I have tried to get a copy of the report here at the desk, and I find no copy of the report. Can the gentleman tell me why there is no report on this bill?

Mr. ROOSEVELT. The gentleman has asked me why he could not get a report on this bill. May I make very clear to the Members of this House that the reason for that is that this bill was never considered by the committee in any way, shape, or form. There have been various elements of it that have been considered, but this bill, a 2-year extension, was never considered by the committee, I have to tell the gentleman. And, as far as I am concerned, I think it is rather unfortunate that we have to proceed with legislation on suspension day when the committee has never even been presented with an opportunity to work its will and to offer amendments to the bill.

I think, too, it is important to point out, as has been pointed out many times today, that there can be no question with respect to the NDEA, which is the National Defense Education Act; that with respect to the National Defense Education Act the committee did consider it. It was widely recognized that it needed amendments. The committee adopted amendments, and yet today we are being asked to freeze this act, with all its imperfections, not for 1 year but for 2 years. And, I do not see how anybody, in the interest of good legislation, can want to do that, particularly when this NDEA Act does not expire until the 1st of July next year.

If my good friend the gentleman from New York, chairman of the committee, says his committee is going to consider these things next year, why then do we now have to get into the business of freezing it for 2 years? It is not logical, it does not make any sense.

Mr. CURTIS of Missouri. If the gentleman will yield, has the committee voted the bill out?

Mr. ROOSEVELT. The committee never considered the bill.

Mr. CURTIS of Missouri. What was the reason it was not acted on? It was referred to your committee.

Mr. ROOSEVELT. It has not been voted out; it has not been before the committee even for discussion, and I think the gentleman will agree that is not a very wise way to legislate.

Mr. CURTIS of Missouri. With that I agree.

Mr. ROOSEVELT. May I just say that speaking for myself, I would be for an extension of 1 year for the impacted areas bill in spite of the fact—and I say this to my friends over on this side of the aisle, that both President Eisenhower and President Kennedy have each said this act also needs amendment; yet here we are going ahead with the same bill exactly as it is. I say to my friend from California I am a little astonished by his point of view, because I know what a truly conservative gentleman he is, yet he would act in contravention both of the President of his party and the President of my party and freeze it for 2 years, not even limit it to a period of 1 year.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. ROOSEVELT. I yield.

Mr. HOFFMAN of Michigan. Who brings this bill here?

Mr. ROOSEVELT. The bill was introduced by the gentleman from New York [Mr. POWELL].

Mr. HOFFMAN of Michigan. But who brings it to the floor?

Mr. ROOSEVELT. The leadership, of course, has the right to bring it up for consideration, and it has done so. I do not argue with their right; I think it is not wise, but they certainly have the right.

Mr. HIESTAND. Mr. Speaker, will the gentleman yield since he has mentioned my name?

Mr. ROOSEVELT. I yield.

Mr. HEISTAND. Does not the gentleman agree that the most important issue is whether the Federal Government has a responsibility or not?

Mr. ROOSEVELT. I certainly do, but the gentleman and I know in our hearts that the Federal Government's responsibility no longer exists in many areas. That has been pointed out by President Eisenhower and President Kennedy. The gentleman would carry it out where it no longer exists, not for 1 year but for 2 years. My good friend, how can you do that?

Mr. HEISTAND. But the gentleman says that nationally we do have that responsibility.

Mr. ROOSEVELT. I did not say that. I say we have a responsibility in those impacted areas where the need is demonstrated, not in those areas where the need no longer exists or which are no longer impacted. We should be given a reasonable opportunity to legislate properly.

The SPEAKER pro tempore. The time of the gentleman from California has expired. All time has expired.

The question is, Will the House suspend the rules and pass the bill H.R. 9000?

Mr. THOMPSON of New Jersey. Mr. Speaker on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 378, nays 32, not voting 27, as follows:

[Roll No. 188]

NOT VOTING—27

Alger	Evins	Milliken
Boykin	Hall	Montoya
Brooks, La.	Hébert	Pilcher
Broyhill	Holland	Rabaut
Buckley	Johnson, Md.	Santangelo
Celler	Kilburn	Sheppard
Coad	Landrum	Siler
Dague	McSween	Westland
Davis, Tenn.	Madden	

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Landrum and Mr. Pilcher for, with Mr. Hébert against.

Mr. Buckley and Mr. Santangelo for, with Mr. Brooks of Louisiana against.

Until further notice:

Mr. Johnson of Maryland with Mr. Hall.
Mr. Evins with Mr. Broyhill.
Mr. Rabaut with Mr. Alger.
Mr. Madden with Mr. Siler.
Mr. Coad with Mr. Westland.
Mr. McSween with Mr. Kilburn.

Mr. MACK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The Chair cannot recognize the gentleman for a parliamentary inquiry during a rollcall.

Mr. MACK. I am incorrectly recorded. I would like to be recorded as having voted "aye."

Mr. JENNINGS changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PARLIAMENTARY INQUIRY

Mr. MACK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. MACK. Mr. Speaker, I was incorrectly recorded on the last rollcall. I am wondering if the RECORD will show that I was incorrectly recorded or whether it will show that I changed my vote.

The SPEAKER pro tempore. All the Chair can state is that the RECORD will show what actually transpired.

Mr. MACK. Mr. Speaker, I ask unanimous consent that I be recorded as having voted "aye" on the last rollcall.

The SPEAKER pro tempore. The Chair will state that according to the information given the Chair the gentleman is recorded as voting "aye."

WELFARE AND PENSION PLAN AMENDMENTS OF 1961

Mr. POWELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8723) to amend the Welfare and Pension Plans Disclosure Act with respect to the method of enforcement and to provide certain additional sanctions, and for other purposes.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Welfare and Pension Plans Disclosure Act Amendments of 1961".

SEC. 2. The first line of section 3 of the Welfare and Pension Plans Disclosure Act is amended by striking out "(a)".

SEC. 3. Paragraph (1) of section 3 of such Act is amended by striking out the word "to" after the word "communicated".

SEC. 4. Paragraph (9) of section 3 of such Act is amended to read as follows:

"(9) The term 'State' includes any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act (43 U.S.C. 1331–1343)."

SEC. 5. Section 3 of such Act is further amended by striking out paragraph (11) and adding the following new paragraphs (11), (12), and (13):

"(11) The term 'industry or activity affecting commerce' means any activity, business, or industry in commerce or in which a labor dispute would hinder or obstruct commerce or the free flow of commerce and includes any activity or industry 'affecting commerce' within the meaning of the Labor-Management Relations Act, 1947, as amended, or the Railway Labor Act, as amended.

"(12) The term 'Secretary' means the Secretary of Labor.

"(13) The term 'party in interest' means any administrator, officer, trustee, custodian, counsel, or employee of any employee welfare benefit plan or employee pension benefit plan, or a person providing benefit plan services to any such plan, or an employer any of whose employees are covered by such a plan or officer or employee or agent of such employer, or an officer or agent or employee of an employee organization having members covered by such plan."

SEC. 6. Paragraphs (3) and (4) of subsection (b) of section 4 of such Act are amended to read as follows:

"(3) such plan is administered by an organization which is exempt from taxation under the provisions of section 501(a) of the Internal Revenue Code of 1954 and is administered as a corollary to membership in a fraternal benefit society described in section 501(c)(8) of such Code or by organizations described in sections 501(c)(3) and 501(c)(4) of such Code: *Provided*, That the provisions of this paragraph shall not exempt any fraternal benefit society or organization which represents its members for purposes of collective bargaining; or

"(4) such plan covers not more than twenty-five participants."

SEC. 7. Subsection (a) of section 5 of such Act is amended by striking out the last sentence thereof and inserting in lieu thereof the following: "Such description and such report shall contain the information required by sections 6 and 7 of this Act in such form and detail as the Secretary shall by regulations prescribe and copies thereof shall be executed, published, and filed in accordance with the provisions of this Act and the Secretary's regulations thereunder. No regulation shall be issued under the preceding sentence which relieves any administrator of the obligation to include in such description or report any information relative to his plan which is required by section 6 or 7. Notwithstanding the foregoing, if the Secretary finds, on the record after giving interested persons an opportunity to be heard, that specific information on plans of certain kinds or on any class or classes of benefits described in section 3(a) (1) and (2) which are provided by such plans cannot, in the normal method of operation of such plans, be practicably ascertained or made available for publication in the manner or for the period prescribed in any provision of this Act, or that the information if published in such manner or for such period would be duplicative or uninformative, the Secretary may by regulations prescribe such other manner or such other period for the publication of such information as he may determine to be necessary and appropriate to carry out the purposes of this Act."

SEC. 8. Subsection (b) of section 6 of such Act is amended by adding at the end thereof the following new sentence: "Any change in the information required by this subsection shall be reported to the Secretary within sixty days after the effective date of such change."

SEC. 9. (a) Section 7(a) of such Act is amended by striking out "twenty" and inserting in lieu thereof "fifty".

(b) Section 7(b) of such Act is amended by striking out the first sentence of the second paragraph and inserting in lieu thereof the following: "The amount contributed by each employer; the amount contributed by the employees; the amount of benefits paid or otherwise furnished; the number of employees covered; a statement of assets specifying the total amount in each of the following types of assets: cash, Government bonds, non-Government bonds, and debentures, common stocks, preferred stocks, common trust funds, real estate loans and mortgages, operated real estate, other real estate, and other assets; a statement of liabilities, receipts, and disbursements of the plan; a detailed statement of the salaries and fees and commissions charged to the plan, to whom paid, in what amount, and for what purposes. The Secretary, when he has determined that an investigation is necessary in accordance with section 9(d) of this Act, may require the filing of supporting schedules of assets and liabilities."

(c) Section 7(b) is further amended by adding at the end thereof the following new sentence: "In the case of reports sworn to, but not certified, the Secretary, when he determines that it may be necessary to investigate the plan in accordance with section 9(d) of this Act, shall, prior to investigation by the Department of Labor, require certification of the report by an independent certified or licensed public accountant."

SEC. 10. Subparagraph (B) of paragraph (1) of subsection (f) of section 7 of such Act is amended by striking out "summary" and by striking out "broken down by types, such as cash investments in governmental obligations, investments in nongovernmental bonds, and investments in corporate stocks" and inserting in lieu thereof the following: "as required by section 7(b)".

SEC. 11. Subparagraph (C) of paragraph (1) of subsection (f) of section 7 of such Act is amended by striking out "total fund" and inserting "total funds", by striking out "by reason of being an officer, trustee, or employee of such fund," and by striking out "listed at their aggregate cost or present value, whichever is lower" and inserting in lieu thereof "valued as provided in subparagraph (B)".

SEC. 12. Subparagraphs (D) of paragraph (1) of subsection (f) of section 7 of such Act is amended by striking out the words "by reason of being an officer, trustee, or employee of such fund".

SEC. 13. Section 7 of such Act is amended by adding thereto the following new subsection (g):

"(g) If some or all of the benefits under the plan are provided by an insurance carrier or service or other organization, such carrier or organization shall certify to the administrator of such plan, within one hundred and twenty days after the end of each policy year, such reasonable information determined by the Secretary to be necessary to enable such administrator to comply with the requirements of this Act."

SEC. 14. Section 8(a)(2) of such Act is amended by striking out "a summary" and inserting in lieu thereof "an adequate summary".

SEC. 15. (a) Section 9(a) of such Act is amended by striking out "of section 5 or 8".

(b) Section 9 of such Act is amended by striking out subsections (d) and (e) and inserting in lieu thereof the following new subsections:

"(d) The Secretary may, after first requiring certification in accordance with section 7(b), upon complaint of violation not satisfied by such certification, or on his own motion, when he continues to have reasonable cause to believe investigation may disclose violations of this Act, make such investigations as he deems necessary, and may require or permit any person to file with him a statement in writing, under oath or otherwise, as to all the facts and circumstances concerning the matter to be investigated.

"(e) For the purposes of any investigation provided for in this Act, the provisions of section 307 (relating to the attendance of witnesses and the production of books, records, and documents) of the Federal Power Act of June 10, 1920, as amended (16 U.S.C. 825f), are hereby made applicable to the jurisdiction, powers, and duties of the Secretary or any officers designated by him.

"(f) Whenever it shall appear to the Secretary that any person is engaged in any violation of the provisions of this Act, he may in his discretion bring an action in the proper district court of the United States or United States court of any place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted.

"(g) The United States district courts and the United States courts of any place subject to the jurisdiction of the United States shall have jurisdiction, for cause shown, to restrain violations of this Act.

"(h) Nothing contained in this Act shall be so construed or applied as to authorize the Secretary to regulate, or interfere in the management of, any employee welfare or pension benefit plan, except that the Secretary may inquire into the existence and amount of investments, actuarial assumptions, or accounting practices only when it has been determined that investigation is required in accordance with section 9(d) of this Act."

SEC. 16. (a) Such Act is further amended by renumbering sections 10, 11, and 12 as sections 16, 17, and 18, respectively, and by adding the following new sections to the Act:

"REPORTS MADE PUBLIC INFORMATION

"SEC. 10. The contents of the descriptions and reports filed with the Secretary pursuant to this Act shall be public information, and the Secretary may publish any information and data which he obtains pursuant to the provisions of this Act. The Secretary may use the information and data for statistical and research purposes, and compile and publish such studies, analyses, reports, and surveys based thereon as he may deem appropriate.

"RETENTION OF RECORDS

"SEC. 11. Every person required to file any description or report or to certify any information therefor under this Act shall maintain records on the matters of which disclosure is required which will provide in sufficient detail the necessary basic information and data from which the documents thus required may be verified, explained, or clarified, and checked for accuracy and completeness, and shall include vouchers, worksheets, receipts, and applicable resolutions, and shall keep such records available for examination for a period of not less than five years after the filing of the documents based on the information which they contain.

"RELIANCE ON ADMINISTRATIVE INTERPRETATIONS AND FORMS

"SEC. 12. In any action or proceeding based on any act or omission in alleged violation of this Act, no person shall be subject to any liability or punishment for or on account of the failure of such person to (1) comply with any provision of this Act if he pleads and proves that the act or omission complained of was in good faith, in conformity with, and in reliance on any written interpretation or opinion of the Secretary, or (2) publish and file any information required by any provision of this Act if he pleads and proves that he published and filed such information in good faith, on the description and annual report forms prepared by the Secretary and in conformity with the instructions of the Secretary issued under this Act regarding the filing of such forms. Such a defense, if established, shall be a bar to the action or proceeding, notwithstanding that (A) after such act or omission, such interpretation or opinion is modified or rescinded or is determined by judicial authority to be invalid or of no legal effect, or (B) after publishing or filing the description and annual reports, such publication or filing is determined by judicial authority not to be in conformity with the requirements of this Act.

"BONDING

"SEC. 13. (a) Every administrator, officer, and employee of any employee welfare benefit plan or of any employee pension benefit plan subject to this Act who handles funds or other property of such plan shall be bonded as herein provided; except that where such funds or property are not segregated for the purposes of such plan, the Secretary in his discretion may accept the filing of other security or certificate of insurance in lieu of the bonding requirements set out herein. The amount of such bond shall be fixed at the beginning of each calendar, policy, or other fiscal year, as the case may be, which constitutes the reporting year of such plan. Such amount shall be not less than 10 per centum of the amount of funds handled, determined as herein provided, except that any such bond shall be in at least the amount of $1,000 and no such bond shall be required in an amount in excess of $500,000: *Provided*, That the Secretary, after due notice and opportunity for hearing to all interested parties, and after consideration of the record, may prescribe an amount in excess of $500,000. For purposes of fixing the amount of such bond, the amount of funds handled shall be determined by the funds handled by such administrator, officer, or employee and their predecessor or predecessors, if any, during the preceding reporting year, or if the plan has no preceding reporting year, the amount of funds to be handled during the current reporting year by such administrator, officer, or employee, estimated as provided in regulations of the Secretary. Such bond or other security or insurance shall provide protection to the plan against loss by reason of acts of fraud or dishonesty on the part of any administrator, officer, or employee of such plan, directly or through connivance with others. Any bond shall have as surety thereon a corporate surety company which is an acceptable surety on Federal bonds of like amount under authority granted by the Secretary of the Treasury pursuant to the Act of July 30, 1947 (6 U.S.C. 6–13). Any bond, other security, or insurance shall be in a form or of a type approved by the Secretary. The Secretary may, in lieu of individual bonds, approve the use of schedule or blanket forms of bonds to cover individuals required to be bonded as herein provided.

"(b) It shall be unlawful for any administrator, officer, or employee to whom subsection (a) applies, to receive, handle, disburse, or otherwise exercise custody or control of any of the funds or other property of any employee welfare benefit plan or employee pension benefit plan, without being bonded as required by subsection (a), or without the Secretary having accepted other security or insurance under the provisions of subsection (a), and it shall be unlawful for any administrator, officer, and employee of such plan, or any other individual having authority to direct the performance of such functions, to permit such functions, or any of them, to be performed by any such individual, with respect to whom the requirements of subsection (a) have not been met.

"(c) It shall be unlawful for any person to procure any bond, other security, or insurance, required by subsection (a) for the protection of funds and property of any employee welfare benefit plan or of any employee pension benefit plan, from any surety, insurance, or other company or through any agent or broker in whose business operations such plan or any party in interest in such plan has any significant control or financial interest, direct or indirect.

"(d) Nothing in any other provision of law shall require any person, required to be bonded as provided in subsection (a) because he handles funds or other property of an employee welfare benefit plan or of an employee pension benefit plan, to be bonded insofar as the handling by such person of the funds or other property of such plan is concerned.

"(e) The Secretary shall from time to time issue such regulations as may be necessary to carry out the provisions of this section. When in the opinion of the Secretary other bonding arrangements covering the Administrator, officers, and employees, of a plan are adequate for the protection of the beneficiaries and participants, he may, in his discretion, exempt such Administrator, officers, and employees, from the bonding requirements of this section.

"ADVISORY COUNCIL

"SEC. 14. (a) There is hereby established an Advisory Council on Employee Welfare and Pension Benefit Plans (hereinafter referred to as the 'Council') which shall consist of thirteen members to be appointed in the following manner: One from the insurance field, one from the corporate trust field, two from management, four from labor, and two from other interested groups, all appointed by the Secretary from among persons recommended by organizations in the respective groups; and three representatives of the general public appointed by the Secretary.

"(b) It shall be the duty of the Council to advise the Secretary with respect to the carrying out of his functions under this Act, and to submit to the Secretary recommendations with respect thereto. The Council shall meet at least twice each year and at such other times as the Secretary requests. At the beginning of each regular session of the Congress, the Secretary shall transmit to the Senate and House of Representatives each recommendation which he has received from the Council during the preceding calendar year.

"(c) The Secretary shall furnish to the Advisory Council an executive secretary and such secretarial, clerical, and other services as are deemed necessary to the conduct of its business. The Secretary may call upon other agencies of the Government for statistical data, reports, and other information which will assist the Council in the performance of its duties.

"(d) Appointed members of the Council shall be paid compensation at the rate of $50 per diem when engaged in the work of the Council, including travel time, and shall be allowed travel expenses and per diem in lieu of subsistence as authorized by law (5 U.S.C. 73b–2) for persons in the Government service employed intermittently and receiving compensation on a per diem, when actually employed, basis.

"(e)(1) Any member of the Council is hereby exempted, with respect to such appointment, from the operations of sections 281, 283, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes (5 U.S.C. 99), except as otherwise specified in paragraph (2) of this subsection.

"(2) The exemption granted by paragraph (1) of this subsection shall not extend—

"(A) to the receipt or payment of salary in connection with the appointee's Government service from any source other than the private employer of the appointee at the time of his appointment, or

"(B) during the period of such appointment, to the prosecution or participation in the prosecution, by any person so appointed, of any claim against the Government involving any matter with which such person, during such period, is or was directly connected by reason of such appointment.

"ADMINISTRATIVE PROCEDURE ACT

"SEC. 15. The provisions of the Administrative Procedure Act shall be applicable to this Act."

(b) Subsection (b) of the section renumbered as section 16 by this Act, is amended by inserting after "of this section" the following: "and section 13".

(c) The table of contents of the first section of such Act is amended by striking out the last three lines and inserting in lieu thereof the following:

"Sec. 10. Reports made public information.
"Sec. 11. Retention of records.
"Sec. 12. Reliance on administrative interpretations and forms.
"Sec. 13. Bonding.
"Sec. 14. Advisory Council.
"Sec. 15. Administrative Procedure Act.
"Sec. 16. Effect of other laws.
"Sec. 17. Separability of provisions.
"Sec. 18. Effective date."

CRIMES

SEC. 17. (a) Chapter 11 of title 18, United States Code, as amended, is amended by adding a new section captioned and reading as follows:

"§ 224. Offer, acceptance, or solicitation to influence operations of employee benefit plan

"Whoever, being an administrator, officer, trustee, custodian, counsel, or employee of

any employee welfare benefit plan or employee pension benefit plan, or a person providing benefit plan services to any such plan, or an employer any of whose employees are covered by such a plan, or officer or employee or agent of such employee, or an officer or agent or employee of an employee organization having members covered by such a plan, receives or agrees to receive any money or thing of value because of, or with intent to be influenced with respect to, any of his actions, decisions, or other duties relating to any question or matter concerning such plan, or any person who directly or indirectly gives or offers, or promises to give or offer, any payment or delivery of money or other thing of value prohibited by this section, shall be fined not more than $10,000 or imprisoned not more than three years, or both: *Provided*, That this section shall not prohibit the payment to or acceptance by any person of bona fide salary, compensation, or other payments made for goods or facilities actually furnished or for services actually performed in the regular course of his duties as such administrator, officer, trustee, custodian, counsel, agent, or employee of such plan, employer, or employee organization, or person providing benefit plan services to such plan.

"As used in this section, the term 'any employee welfare benefit plan or employee pension benefit plan' means any such plan subject to the provisions of the Welfare and Pension Plans Disclosure Act.

"(b) Whenever in the judgment of a United States attorney the testimony of any witness, or the production of books, papers, or other evidence by any witness, in any case or proceeding before any grand jury or court of the United States involving any violation of this section, or any conspiracy to violate such section, is necessary to the public interest, he, upon the approval of the Attorney General, shall make application to the court that the witness shall be instructed to testify or produce evidence subject to the provisions of this subsection, and upon order of the court such witness shall not be excused from testifying or from producing books, papers, or other evidence on the ground that the testimony or evidence required of him may tend to incriminate him or subject him to a penalty or forfeiture. But no such witness shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, nor shall testimony so compelled be used as evidence in any criminal proceeding (except prosecution described in the next sentence) against him in any court. No witness shall be exempt under this subsection from prosecution for perjury or contempt committed while giving testimony or producing evidence under compulsion as provided in this subsection."

(b) The analysis of chapter 11, title 18, United States Code, immediately preceding section 201 thereof, is amended by adding at the end thereof the following new item:

"224. Offer, acceptance, or solicitation to influence operations of employee benefit plan."

(c) Chapter 31 of title 18, United States Code, as amended, is amended by adding a new section captioned and reading as follows:

"§ 664. Theft or embezzlement from employee benefit plan

"Any person who embezzles, steals, or unlawfully and willfully abstracts or converts to his own use or to the use of another, any of the moneys, funds, securities, premiums, credits, property, or other assets of any employee welfare benefit plan or employee pension benefit plan, or of any fund connected therewith, shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"As used in this section, the term 'any employee welfare benefit plan or employee pension benefit plan' means any such plan subject to the provisions of the Welfare and Pension Plans Disclosure Act."

(d) The analysis of chapter 31, title 18, United States Code, immediately preceding section 641 thereof, is amended by adding at the end thereof the following new item:

"664. Theft or embezzlement from employee benefit plan."

(e) Chapter 47 of title 18, United States Code, as amended, is amended by adding a new section captioned and reading as follows:

"§ 1027. False statements and concealment of facts in relation to documents required by the Welfare and Pension Plans Disclosure Act

"Whoever, in any document required by the Welfare and Pension Plans Disclosure Act (as amended from time to time) to be published, or kept as part of the records of any employee welfare benefit plan or employee pension benefit plan, or certified to the administrator of any such plan, makes any false statement or representation of fact, knowing it to be false, or knowingly conceals, covers up, or fails to disclose any fact the disclosure of which is required by such Act or is necessary to verify, explain, clarify or check for accuracy and completeness any report required by such Act to be published or any information required by such Act to be certified, shall be fined not more than $10,000, or imprisoned not more than five years, or both."

(f) The analysis of chapter 47, title 18, United States Code, immediately preceding section 1001, is amended by adding at the end thereof the following new item:

"1027. False statements and concealment of facts in relation to documents required by the Welfare and Pension Plans Disclosure Act."

SEC. 18. The Welfare and Pension Plans Disclosure Act is further amended by substituting the term "Secretary" for the term "Secretary of Labor" wherever the latter term appears in such Act.

SEC. 19. The amendments made by this Act shall take effect January 1, 1962, except that section 13 of the Welfare and Pension Plans Disclosure Act shall take effect July 1, 1962.

The SPEAKER pro tempore. Is a second demanded?

Mr. HIESTAND. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. HIESTAND. I am, Mr. Speaker.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. POWELL. Mr. Speaker, I yield myself such time as I may desire.

GENERAL LEAVE TO EXTEND

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POWELL. Mr. Speaker, before this Congress opened, when we were examining the tasks that lay ahead of the committee, one of the obvious tasks was the amendment of the Welfare and Pension Plans Disclosure Act. Just 2 years of experience with that statute confirmed what many of us knew when it was passed. The statute, as passed in 1958, was a misrepresentation and sham.

Former President Eisenhower and his Secretary of Labor had both asked the previous Congress to tighten this legislation to provide sorely needed protection. I would like to say that the gentleman from New Jersey [Mr. FRELINGHUYSEN] introduced a bill in the 86th Congress for that purpose. His bill was the model from which I drew my own legislative recommendations submitted as H.R. 4929 early in the year. The legislation before you today draws heavily upon those Frelinghuysen recommendations and also incorporates the best thinking of the executive branch of our Government on this subject.

I have been concerned for a number of years about the awesome responsibility placed in the hands of trustees of the pension and welfare funds which now cover over 85 million Americans. These funds have been growing at an astronomical rate. Today the annual payments into these funds, which are the subject matter of these amendments and the basic statute, exceed the budgets of the State of New York, the State of California, and 1 dozen other States combined. Annual payments into such funds exceed the amounts invested by individuals in all the corporate securities of the United States of America. These fund reserves now far exceed $50 billion and are increasing at the rate of well over $5 billion a year.

This Congress must assure the 85 million workingmen and women in the United States, who are the beneficiaries or covered by these plans, that their interests and benefits are properly handled and safeguarded. How the fiduciary relationship to these wage earners is carried out must be guided and scrutinized. This is not done by the present law. The present law is toothless. The 1958 statute merely makes the Secretary of Labor the depository for "summary" reports of plan operations. He may study these vague and concealing statements, but he can do nothing about abuses, even if he were to find them.

Before our committee embarked upon an inquiry on this subject this year, earlier legislative inquiries had disclosed flagrant disservice to the fiduciary relationship by fund trustees. Yet, not one single instance of prosecution has resulted under the present provisions of the law. We did not need further disclosures to underscore the need for amendment. Requiring an accounting from all types of plans, singly or jointly administered, level of benefit, insurance type, and so forth, will establish for the trustees and imbue in their operations a code of conduct which will act as a deterrent for those who require supervision lest they transgress.

Some confusion still exists about this type of legislation. It should be dispelled. It is not meant to regulate union-management relations. It is not a Taft-Hartley or a Landrum-Griffin Act. It is designed to protect a much broader public—all the policyholders, beneficiaries, and others who have a stake in receiving the full benefits from the funds

to which they and their employers have contributed.

During the course of the hearings on this bill, a very distinguished member of the other body came before our subcommittee to document a number of abuses in the operation of these funds which his own investigations had revealed. He was not able to report that any of these irregularities, to his knowledge, had been corrected since they were disclosed in a legislative hearing. An official of the New York State Welfare Fund Bureau also testified that under their law, which subjects these plans to a more detailed type of scrutiny than has been possible under our present law, abuses and irregularities have been found in the plans operating in that State. Some opponents of this legislation state that need for these amendments has not been shown because the Department of Labor has no mass of evidence indicating irregularities exist. What these opponents have not told you is that, under the present law—without these proposed amendments—there is no way in the world for the department to find out whether the funds are or are not properly administered.

This can truly be called a bipartisan measure. As I stated earlier in these remarks, former President Eisenhower and his Secretary of Labor requested such legislation from the last Congress and a distinguished member of our committee, from the minority, sponsored a bill for this purpose. The deliberations of our Special Subcommittee on Labor, under the very capable guidance of the gentleman from California [Mr. ROOSEVELT] took careful note and adopted many of the suggestions made by the minority members—and a majority, two out of three Republican members of this subcommittee, supported the measure as it was finally reported out. The third member was not recorded in subcommittee. The subcommittee also sought guidance and counsel from representatives of labor, industry, insurance companies, investment counselors, and pension and welfare plan experts. All of their meritorious suggestions and recommendations have been incorporated in the measure before you this afternoon.

Your vote for and support of H.R. 8723 is now solicited to close a glaring loophole in the present law.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. POWELL. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I would like to thank the gentleman from New York for his kind remarks about the bill which I introduced in the 86th Congress, providing him with what he charitably describes as a model for the bill which he introduced at this session. I should like also to say that I do support this bill, because I feel that this legislation is needed and will be beneficial.

I think it should be pointed out, however, that 3 years have elapsed since the legislation which we are now considering amending was first enacted. Actual experience during that period has not demonstrated any major or flagrant abuse or scandal. The gentleman from New York indicated that a major scandal might break at any time and, of course, with a toothless law that could be the case. I might say I am surprised, with the passage of time, that more abuses have not developed. At least there were very few that were called to the attention of the committee. For that reason I think this legislation is not so urgently needed, as I felt it was 2 years ago when I first introduced a bill along these lines. For some reason or other no action was taken at that time. Nonetheless, I should like to repeat once again that I do feel that this bill is a step in the right direction, Mr. Speaker.

Mr. HIESTAND. Mr. Speaker, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. KEARNS] ranking minority member of the committee.

Mr. KEARNS. Mr. Speaker, I would like to commend the gentleman from California [Mr. ROOSEVELT] and the members of his subcommittee, for the marvelous job they have done with respect to this bill, H.R. 8723.

CALL OF THE HOUSE

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore (Mr. WALTER). 156 Members are present, not a quorum.

Mr. BROOKS of Texas. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll and the following Members failed to answer to their names:

[Roll No. 189]

Alger	Diggs	Morrison
Anfuso	Evins	Pilcher
Arends	Hall	Rabaut
Auchincloss	Harding	Riehlman
Blatnik	Hébert	Rivers, S.C.
Boykin	Hemphill	Santangelo
Bray	Holland	Shelley
Brooks, La.	Johnson, Md.	Siler
Broyhill	Kelly	Teague, Tex.
Buckley	Kilburn	Thompson, La.
Celler	Landrum	Weaver
Coad	McSween	Westland
Curtis, Mass.	Madden	Wilson, Ind.
Dague	Martin, Nebr.	
Davis, Tenn.	Milliken	

The SPEAKER pro tempore (Mr. WALTER). On this rollcall, 390 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

WELFARE AND PENSION PLAN AMENDMENTS OF 1961

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. KEARNS] is recognized.

Mr. KEARNS. Mr. Speaker, I had just finished congratulating the gentleman from California [Mr. ROOSEVELT] on the fine work his committee had done on this bill, H.R. 8723, when we had the quorum call. I might say all interested parties were afforded an opportunity to appear and to testify.

At the conclusion of the hearings, a number of executive sessions were held and all of the provisions of this bill were carefully analyzed and considered.

As a result of the subcommittee work, many important amendments were made and the bill which is before us today is much superior to the bill which was first assigned to the subcommittee.

The growth of private welfare and pension benefit plans has been phenomenal. At the present time there are approximately 150,000 such plans which have assets totaling $50 billion. It is estimated that by 1970 there will be 300,000 such plans with assets totaling $100 billion. Certainly everyone is agreed that these plans must be adequately safeguarded so that the benefits which are so important to so many people can be fully realized.

In my opinion there are two very important provisions in this bill which merit special mention. The first provision, which is section 9(d), limits the Secretary of Labor's investigatory powers to those situations where there has been a complaint of violation or he has reasonable cause to believe investigation may disclose violations of the act. This means that the Secretary of Labor is prohibited from conducting fishing type investigations or investigations which are not supported by a valid complaint or a reasonable belief that a violation has occurred. Moreover, it is also my understanding that the investigations conducted by the Department of Labor will be only in the nature of preliminary inquiries and in the event there is any evidence of a violation of the criminal offenses or a willful violation of the reporting or publication provisions, the case will be forwarded to the FBI for final investigation. I believe that these restrictions on the investigatory power of the Secretary of Labor meet the honest criticism that this bill unjustifiably broadens the scope and investigatory power of the Secretary of Labor.

The second important provision is section 15(h) which provides that nothing in this act shall authorize the Secretary of Labor to regulate or interfere in the management of any plan. It is not the intent of this bill that the Secretary of Labor be given supervisory powers with respect to welfare and pension plans. This provision specifically states this fact and thus effectively meets the criticism that this legislation provides the Secretary of Labor with the power to regulate these plans.

Therefore, although I, too, am reluctant to see the powers of the Secretary of Labor expanded, even in this limited manner, whether it be a Republican or a Democratic administration, I believe that the need for this type of legislation has been demonstrated. Accordingly, I recommend its adoption.

Mr. POWELL. Mr. Speaker, I yield to the gentleman from California [Mr. ROOSEVELT], chairman of the subcommittee, such time as he may require.

Mr. ROOSEVELT. Mr. Speaker, may I first express my appreciation to the members of the subcommittee and particularly the ranking members, the gentleman from Ohio [Mr. AYRES], the gentleman from New York [Mr. GOODELL], and the gentleman from New Jersey [Mr. FRELINGHUYSEN], who joined the subcommittee in our endeavors to try to write as constructive a bill as we possibly could. I think it can be said that the majority and the minority did work

together, did accomplish its purpose, and that while the administration's original proposals were essentially the same as those of the prior administration, nevertheless the committee in its wisdom—and we were backed by the full committee with very few dissenting votes—made certain amendments which are not only necessary but which will definitely define the powers of the Secretary and limit him to doing the job which needs to be done without allowing any fishing expedition or any abuse of power.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. ROOSEVELT. I yield to the gentleman from West Virginia.

Mr. BAILEY. I would like to ask the gentleman from California if his subcommittee, in considering this legislation, heard the protests of the UMWA; what was the nature of that protest, and to what extent did your committee eliminate the objectionable features of the bill?

Mr. ROOSEVELT. I would say to the gentleman that there were two labor organizations which appeared against the bill. One was the United Mine Workers of America and the other was the Teamsters Union. In both instances they joined in saying that their primary purpose was not to destroy the bill but to demand that the Secretary only be allowed to act upon reasonable cause. And, we did write into the bill that he must have reasonable cause before he could launch any investigation. Upon general agreement among the members of the committee that this was proper, we wrote that specifically into the bill.

It was also stated, if my memory is correct, by a representative of the United Mine Workers that they felt we should specifically provide that the Secretary had no power to run the plan itself or to decide the investment of the plan.

Mr. BAILEY. Did you write that proviso in the bill?

Mr. ROOSEVELT. We wrote that in specifically, and I will refer to it at a later time. Perhaps the gentleman from New York has it. But, it was written in, in very precise form.

Mr. GOODELL. Mr. Speaker, will the gentleman yield?

Mr. ROOSEVELT. I yield to the gentleman from New York.

Mr. GOODELL. The gentleman is correct, and I think this is very clearly stated in the report. The whole record indicates that there was no intent here to have him have any say whatsoever about where these funds are invested. This is a disclosure act. It is to make sure that the investments are disclosed through the Secretary of Labor, and that is all.

Mr. ROOSEVELT. I thank the gentleman.

Mr. BAILEY. Mr. Speaker, if the gentleman will yield for one more question, was the action of the committee in any way indicated by advising these people who had testified of the changes made in the original bill as introduced?

Mr. ROOSEVELT. We made it known to every witness that the so-called blue sheet, describing the bill, would be available and was available. However, as far as I know, we did not send it to anybody who did not ask for it.

Mr. BAILEY. I thank the gentleman. I will not impose any more on your time.

Mr. ROOSEVELT. I thank the gentleman.

Mr. GOODELL. Mr. Speaker, if the gentleman will yield further, you mentioned the question of reasonable cause. I would be glad to have you explain that if you have sufficient time. I think that is a very vital part of this bill, and I would like to have it clarified. May I proceed now?

Mr. ROOSEVELT. Please.

Mr. GOODELL. Under 7(b) reports, as I understand, these are the annual reports that must be filed. Now, they may be sworn to but not necessarily certified by an accountant of some kind. It is my understanding that the Secretary of Labor, if he finds reasonable cause to believe there is something wrong with the annual report, must find that reasonable cause exists before he does anything, and he may then require the report to be certified; is that correct?

Mr. ROOSEVELT. That is absolutely correct.

Mr. GOODELL. He must have it certified before he takes any other action?

Mr. ROOSEVELT. If the report has not been certified, he must do that before he can make any investigation.

Mr. GOODELL. Going further, assuming that a report is filed and then the Secretary of Labor requires it be certified, if the Secretary of Labor then wants to subpena any documents, I understand, it is provided in section 9(e); he still, at that stage, must have a continuing reason, reasonable cause, to believe there is a violation; is that correct?

Mr. ROOSEVELT. That is correct, sir, and anybody would have that defense if he believed he did not so have reasonable cause.

Mr. GOODELL. On page 19 of the report, which is the text of the bill, there is the section giving the Secretary of Labor the power under sections 6 and 7 to require the filing in such form and detail as the Secretary shall by regulation prescribe. I would just like to clarify that by saying that this also requires that the Secretary make a determination that there is reasonable cause to believe there has been a violation before he makes this requirement upon the plan concerned.

Mr. ROOSEVELT. The gentleman is correct; and, if the gentleman will permit—and again it is suggestion—we wrote in the specifics of what could be required in any report in order again not to allow the Secretary to ask for extraneous matter.

Mr. GOODELL. The gentleman realizes I am asking these questions to establish a bona fide unquestionable legislative history as to what the Secretary's powers are. I appreciate the gentleman's yielding. These are mostly amendments I proposed in the subcommittee.

One other question: In the bill there is a provision giving the Secretary—it is on page 21 of the report:

> The Secretary when he has determined that an investigation is necessary in accordance with section 9(d) of this act may require the filing of supporting schedules of assets and liabilities.

Once again, this power in the Secretary's hands can be exercised only upon a determination that there is reasonable cause to believe a violation has occurred.

Mr. ROOSEVELT. The gentleman is correct; and we wrote it in there so there could be no misunderstanding on that point.

Mr. GOODELL. I appreciate the gentleman's responses and thank him.

Mr. ROOSEVELT. May I just say in the very few seconds I have left, that I will put into the RECORD a rather detailed description of the need. The immediate need arises largely from the New York law which covers 3,500 out of 17,000 cases and shows very clearly that there is an immediate need to protect these plans. I would refer to testimony before the subcommittee where facts show that in New York, which has a disclosure law, with the right of investigation, an examination of a welfare fund was begun on September 4, 1958. Subsequently, the fund bookkeeper was convicted on February 26, 1959, of grand larceny first degree. On March 4, 1960, she received a suspended sentence with probation. The union president and a fund trustee also were indicted on November 19, 1959, in connection with the receipt of payments and loans from the welfare fund. On November 18, 1960, he received a $500 fine or 30-day jail sentence, and both of these persons are no longer connected with the fund.

An examination of the reports filed with the Labor Department was made, and on their face, disclosed no information which would indicate larceny, forgery, or illegal loans. It was disclosed, however, that the report was verified by the administrator only of the fund, who was an employee of the fund, whereas regulations request that each member of the board of trustees attest to the D–1 report. Not only that, but there was a discrepancy in the figures on the reporting D–2 form. At one place, employer contributions were listed as $43,775; whereas in another place, contributions were put at $33,509.12.

I emphasize to the Members, that under present law, the Department has no right to inquire into these matters.

Another case investigated by the New York authorities, disclosed withdrawal of welfare funds, for the benefit of certain trustees and union officials. The grand jury on June 29, 1959, indicated the trustees on two counts, grand larceny, first degree, and forgery in the third degree.

An investigation of filings with the Labor Department disclosed no plan descriptions or annual reports made by this fund. Subsequent investigation has revealed some question concerning coverage of the Federal law of this plan.

The basic point in all this, is that even where the right of investigation is provided, abuses of the trust relationship continue to be uncovered. Under the present Federal law, there is no right of investigation, no protection for these 80 million participants, and their interests in this $50 billion in assets in these plans.

An analogy would be the provisions in Landrum-Griffin, dealing with unlawful trusteeships in title III, but providing no investigatory right to the Secretary; or those provisions relating to union elections.

The realistic fact, of course, is, as every single Member of this House knows, filing reports with the Department, without the right to make sure that the reports are accurate and honest, is an empty protection to the participants of these plans and to the public; or as former Secretary of Labor Mitchell stated, a "shameful illusion."

I would also note that those who say the aim of the bill is to control or regulate these plans, ignore the plain facts of the record. The bill itself in section 9(h) clearly states that nothing in the law shall authorize the Secretary to regulate, or interfere in the management of, any of these plans. The committee report on page 9 reiterates this clear statement of intention. And the Secretary himself in his testimony stated on page 18 of the printed record that:

> It is not the desire or the reach of this proposal to subject these plans to Federal control. These proposals have a very simple objective and that is to make known to the beneficiaries of these plans and to the public what the contents of these plans are and to give the Secretary the necessary authority to investigate the reports that the statute calls for.

I note that under the Landrum-Griffin law, the Secretary is given authority, but I don't recall the argument that he therefore, would be able to control or regulate union internal processes and business, or that of employers or labor relation consultants.

Similarly, the contention that these amendments would require a staff of 8,550 people and $45 million, is another illustration of flagrant disregard for the facts. The Secretary plainly testified an appropriation of $2,500,000 and a total staff of 290 would be adequate. I am now advised that because of the amendments made by the committee, the actual budget would be reduced to $1,500,000 and a total staff of 171—only 86 more than the present staff.

With respect to use of departmental forms, I have here two examples of reports received by the Department, and note that on the first there is no information filled in concerning the date of the plan year ending; or when the annual report is due; what kind of plan it is; or who is the administrator.

Looking at the second form, there is no information showing how the plan is financed; how much money goes into the plan; or even how many employees are covered by the plan.

The argument, therefore, that most plans use the Department forms, becomes meaningless, unless the information requested by the form is given; and the Department has the right to make sure that the information is accurate and honest.

Further along this line, the testimony before the subcommittee showed that over 12 percent of the forms received by the Department of Labor had deficiencies on their face; that is, there were omissions of such critical information as the name of the plan administrator, what type of workers were covered and information indicating when the annual report should be filed. As a matter of fact, a considerable number of reports were not even signed by the plan administrator and many others were not sworn to as required by the legislation.

In conclusion I would refer the Members to an editorial in the Washington Daily News, of May 26, 1961, dealing with the need for this legislation. It stated:

TEETH FOR PENSION FUND LAW

> Scandalous abuses of union pension funds, as revealed by the McClellan committee, inspired passage of a sham law which provides no real protection.
>
> Labor Secretary Goldberg used strong but well-justified language this week in discussing this law before a committee of Congress.
>
> It is, he said, confusing, toothless and widely ignored. It is a betrayal of the 85 to 100 million Americans who have money estimated at nearly $50 billion in these funds.
>
> He considers it likely that many of the abuses discovered before passage of the law, 2 years ago, still are taking place.
>
> Mr. Goldberg thus backs the criticism of President Eisenhower, when he signed the act, and of his Labor Secretary, James P. Mitchell.
>
> The law requires pension fund administrators to file reports showing sources of the funds and their uses; but the process stops there. The Labor Department, which receives the reports, can't do anything much about them. There are no effective criminal penalties in the law for such things as embezzlement and kickbacks.
>
> What Mr. Goldberg wants is power to subpena witnesses and seek injunctions to compel compliance with honest standards. For embezzlement he would fix a Federal penalty of $10,000 fine and 5 years imprisonment.
>
> These provisions—or even stiffer—should have been in the original law. Congress should not wait to act until there are new revelations of callous theft and misuse of these funds, accumulated from the dues of union members.

Mr. HIESTAND. Mr. Speaker, I yield 4 minutes to the gentleman from New York [Mr. GOODELL], a member of the committee.

Mr. GOODELL. Mr. Speaker, I rise in favor of this bill. I will try to clarify some further points with reference to its provisions.

I would like to point out first of all that the original Welfare Pension Plan Disclosure Act was passed in 1958. When President Eisenhower signed the bill, which was cut back considerably here in Congress, he made this statement. It was on August 29, 1958. He said he was approving the act, and I quote:

> Because it establishes a precedent for Federal responsibility in this area. It does little else. If the bill is to be at all effective, it will require extensive amendment at the next session of Congress.

It was not amended in the next session; it has gone to this time to be amended and have some teeth put into it so that the Secretary of Labor may require those who are administering the pension and welfare plans to file a report with him to make the disclosures. We wrote a provision in here that the Secretary of Labor may not use this subpena power or investigatory power without first having reasonable cause to believe there had been a violation. The violation is that they refuse to disclose in what categories their funds are invested.

We went further and wrote in a limitation in this bill that the Secretary could not explore the types of stock, the types of bonds, the kind of companies these funds are invested in except on reasonable cause to believe that the original filing was inaccurate. That means that the filing which is called for here is to inform beneficiaries of pension and welfare plans: How much money do you have invested in Government bonds? How much in corporate bonds? How much in common stocks? How much in preferred stocks? How much in real estate? The general categories are written right into the act to be sure that that is the power of the Secretary of Labor and no more. Then if the Secretary of Labor has reasonable cause to believe that that company is inaccurate in its report and has thus violated the law, then and only then may he request a filing of a full schedule of assets and liabilities in regard to the pension or welfare plan.

May I ask the gentleman from California if he will not confirm what I have said in this respect?

Mr. ROOSEVELT. Not only can I confirm it but I can specify exactly where it is. It is on page 5, line 17, where it is clearly stated:

> The Secretary, when he has determined that an investigation is necessary in accordance with section 9(d) of this act, may require the filing of supporting schedules of assets and liabilities.

Mr. GOODELL. One other point. In the early stages there was some suspicion that this was an attempt to control the investment of these funds, that maybe the Secretary of Labor or somebody else wants to tell the administrators where they can invest funds. Some union leaders appear to have such an objective, particularly one Mr. Carey, who was quoted in a newspaper as saying:

> It is our belief that the nature of the pension funds may yet require the establishment of rules by the Congress to govern the way such money is invested.

Does not the gentleman from California agree that we wrote specifically and clearly in this legislation that there is no power anywhere for anybody to tell the Administrator where he may invest these funds?

Mr. ROOSEVELT. May I read from page 8, line 19, where it is stated:

> Nothing contained in this act shall be so construed or applied as to authorize the Secretary to regulate, or interfere in the management of, any employee welfare or pension benefit plan, * * *

Mr. GOODELL. I have one other question. The Senate has passed a bill in this matter and its bill is generally

more favorable and more liberal in this respect than the bill that is now before us. The Senate made three major additions to this bill. One, they have exempted plans covering 100 or fewer employees, except under unusual circumstances. This will eliminate the filing of a great number of plans, and it will reduce the administrative burden considerably.

Another is to give the Secretary discretion to allow simplified reports where a detailed report would be unduly burdensome. This is in the same tradition as the Landrum-Griffin Act where a similar provision was made to cut down burdensome details. Is that correct, may I ask the gentleman from California? The Senate bill also would require full annual reports by the Secretary of Labor to the Congress. Does the gentleman have any comment on these amendments?

Mr. ROOSEVELT. If the Speaker would appoint me to the conference committee, I will join with my friends in hoping we can agree to those amendments.

Mr. HIESTAND. Mr. Speaker, I yield 4 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Speaker, I am glad that someone who is opposed to this can have an opportunity maybe of explaining in a few minutes why this is an inopportune time to present a matter of this depth to the House. The very fact the speaker just preceding me stating some amendments—I happen to have these amendments—will be adopted in conference demonstrates that the House cannot possibly understand this bill under suspension of the rules. The only way we could possibly debate is under a rule which would give us a chance of getting into this in depth.

I happen to think this is an area in which we need legislation, and we need it badly. I have read enough of the bill and of the report, some 35 pages, and the hearings consisting of some several hundred pages, and think that essentially this looks good, but we cannot legislate here in the House, or should not, on the basis of faith.

A committee has the responsibility to the House to come before us and give us the information.

Mr. Speaker, this matter which appears on page 4 of the committee report clearly shows it has become sizable because the Government tax structure made it possible to deduct contributions to pension plans and thus significantly minimize their cost.

Mr. Speaker, the Ways and Means Committee is very much concerned about this whole area of pension trusts and what has developed in their regulation to some degree. Essentially, the regulation must come under the Secretary of the Department of Labor, it is true. But in flipping through these hearings I have not noticed a single witness from the Bureau of Internal Revenue who was brought before this committee to gain an understanding of their requirements under the law now—the tax laws now, at any rate—as to what qualifications there are and how the pension plans have to continue to qualify. I again say that the bill itself, or the subject matter, is something we should legislate upon.

Mr. Speaker, I would like to ask the chairman of the committee who says it is so urgent, why have we not had a rule? This House has been sitting week after week, month after month, doing nothing. Why could we not have had this bill on the floor of the House under a rule where those who are interested in this subject could have developed the situation through questions, and possibly there should have been some amendments other than those which could have been accepted, possibly in conference? Why is it not better on a major thing like this, which is going to affect $50 billion of our people's investment, to have it brought out next year early in January when the House can really get into it and debate it?

Mr. POWELL. If the gentleman will yield, I should like to state that that question should be directed to the gentleman from Virginia [Mr. SMITH]. I am not a member of the Rules Committee. All I know is that for 7 weeks I have been asking the Rules Committee for a hearing.

Mr. JONAS. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from North Carolina.

Mr. JONAS. The date on the bill shows it was not even introduced until August 15.

Mr. CURTIS of Missouri. I know it does.

Mr. JONAS. I would like to congratulate the gentleman upon what he is saying. I think this bill is too important to be rushed through the House under suspension of the rules procedure which allows only 40 minutes for explanation debate and consideration. I have some questions I would like to ask, but I cannot get any time to ask them because time is simply unavailable under this procedure. I do not think this is a good way to legislate and it is not necessary in this instance because a rule should have been obtained to allow adequate time to consider this bill in detail.

Mr. CURTIS of Missouri. I think the Rules Committee has been unfairly accused of a lot of things. I notice the hearings concluded on June 28, 1961. It is true that the bill was introduced on August 15. Surely, the Rules Committee was not holding up this bill. What happened between the closing of the hearings and the executive session, I do not know. However, I suggest that we vote this down.

Mr. HIESTAND. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. ASHBROOK].

Mr. ASHBROOK. Mr. Speaker, I rise in opposition to this bill. Good reasons have already been given but two additional points need to be made. First, the proposed bill would provide, in section 9(e), the following subpena powers:

> For the purposes of any investigation provided for in this act, the provisions of section 307 (relating to the attendance of witnesses and the production of books, records, and documents) of the Federal Power Act of June 10, 1920, as amended (16 U.S.C. 825f), are hereby made applicable to the jurisdiction, powers, and duties of the Secretary or any officers designated by him.

On the other hand, section 601(b) of the Landrum-Griffin Act provides for the following subpena powers:

> For the purpose of any investigation provided for in this act, the provisions of sections 9 and 10 (relating to the attendance of witnesses and the production of books, papers, and documents) of the Federal Trade Commission Act of September 16, 1914, as amended (15 U.S.C. 49, 50), are hereby made applicable to the jurisdiction, powers, and duties of the Secretary or any officers designated by him.

The provision of the subpena powers under the Federal Power Act which are to be duplicated in the proposed bill are much broader than the provisions of the Federal Trade Commission Act which are incorporated in the Landrum-Griffin Act. For instance, under the FTC provisions the power of access shall be only at reasonable times and against any corporation being investigated or proceeded against. This could be interpreted to mean that the subpena powers would be valid only if there was a valid basis for investigation as provided in the bill.

The Federal Power Act provisions state the Commission may investigate any facts, conditions, practices, or matters which it may find necessary or proper in order to determine whether any person has violated or is about to violate any provision of this chapter or any rule, regulation, or order thereunder or to aid in the enforcement of the provisions of this chapter, or in prescribing rules or regulations thereunder, or in obtaining information to serve as a basis for recommending further legislation.

Mr. Speaker, it is obvious that this legislation very easily lends itself to any type of fishing expedition that the Secretary of Labor might wish to make. Much has been made of the word "reasonable" by the proponents of this bill. Let them try to define "reasonable" and I feel they will be forced to admit that as far as Washington bureaucracy is concerned, "reasonable" is synonymous to anything and everything.

While powers of subpena available to Secretary of Labor are more stringent on the one hand, the bonding provisions regarding unions are relaxed at the same time.

Section 13(a) of the bill provides:

> Such bond or other security or insurance shall provide protection to the plan against loss by reason of acts of fraud or dishonesty on the part of any administrator, officer, or employee of such plan directly or through connivance with others.

Section 13(d) of the bill provides:

> Nothing in any other provision of law shall require any person, required to be bonded as provided in subsection (a) because he handles funds or other property of an employee welfare benefit plan or of an employee pension benefit plan, to be bonded insofar as the handling by such person of the funds or other property of such plan is concerned.

The above provision therefore exempts the union officers and employees from the bonding provisions of section 502 of the Landrum-Griffin Act. In this

act these individuals are bonded for the faithful discharge of their duties.

Accordingly, union officers and employees are exempted from the more onerous bonding provisions of the Landrum-Griffin Act by the bonding provisions of the proposed bill.

Mr. HIESTAND. Mr. Speaker, I yield myself the remainder of the time on this side.

Mr. JONAS. Mr. Speaker, will the gentleman yield for a question?

Mr. HIESTAND. I yield.

Mr. JONAS. Is it true that this bill would cover all plans even though the employers pay all of the money that goes into the program?

Mr. HIESTAND. Certainly.

Mr. JONAS. And with no contributions from the employees?

Mr. HIESTAND. That is correct.

Mr. Speaker, in addition to the numerous ambiguities and technical points in the bill, pointed out by the gentleman from Missouri and others, I would like to direct the attention of the House to what I believe to be a flagrant bid for increased and unnecessary authority and power on the part of the Secretary of Labor. Despite the amendments that were put in, the bill still remains a bad bill and I oppose it.

The need for this bill, Mr. Speaker, has never been proven—indeed, cannot be proven. The Secretary in his testimony before the Education and Labor Committee stated:

> I think we can all assume that there are still areas where abuses are occurring.

There were some abuses 5 or 10 years ago. This need is based upon suspicion, this is assumption not based upon facts, because there are no such facts. The Secretary does not have any actual cases of abuses. What he wants, apparently, is a blank check to carry in his pocket.

Mr. Speaker, this blank check could cost the taxpayers of this country, already the overburdened taxpayers, anywhere from $42 million to $60 million a year. These figures are not just suspicion. They are based on facts. The experience of two States in administering similar laws would so show.

In New York, for instance, the cost of administering their State law runs $280 per fund, per year. In Wisconsin the costs runs $350 to $400 per fund per year. When it is estimated that we have 150,000 funds or plans operating in this country it is easy to see the cost runs up.

Mr. Speaker, our taxpayers do not want to spend that kind of money on suspicion. The need has not been shown.

Now, let us look at the other side of the coin. Are there presently laws on the books which could take care of these suspected abuses?

Indeed, there are. We have both Federal and State laws which govern operations of pension and welfare funds. The Congress itself passed one in 1958, and since that time 118,660 pension and welfare plans have filed annual reports. Here is the D–2 form. It is vast and it is complete. I see no reason for multiplying this a good many times. Beneficiaries of these plans were given authority by the Congress in 1958 to "self police" their funds. And, Mr. Speaker, one important fact about this new request for power on the part of the Secretary is that he is the only one complaining—the pension and welfare plan beneficiaries have not complained. They are satisfied. If they become dissatisfied, both the Congress and the States now have provided legal remedies.

Even in those States which do not have a State law specifically addressed to pension and welfare plans, they do have other laws which cover criminal fraud, larceny, embezzlement, even breach of contract, negligence, misrepresentation, or unlawful possession.

Mr. Speaker, we have the laws we need. We simply cannot further burden our people to give the Secretary of Labor this blank check, this power that even he says is needed only because of his suspicions.

There are a lot of things about this bill that are doubtful. I suggest the Members turn to pages 20 and 21 of the bill and try to make sense out of section 1027. It would make somebody apparently punishable for not doing what is not in the existing law, and that is rather vague.

I have read this thing many times and studied it. There are a good many weaknesses in this bill, including the fact that the vast majority of these funds, maybe up to 90 percent of them, are administered by private coverage companies, and so forth. They have good management. There has been no case yet brought of improper management on the part of a company. The only company that failed to live up to its obligation was a small company that failed years ago. This bill will not correct their situation. This is a bad bill, Mr. Speaker, and it should be defeated.

Mr. POWELL. Mr. Speaker, I yield 3 of the remaining 4 minutes to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. Mr. Speaker, I want to thank the chairman of the committee for referring this bill to me and permitting me to offer it. Before coming to Congress, I helped to develop some of these plans for joint committees and have been very interested in this field. I also want to thank the chairman of the subcommittee for the skillful manner in which he handled this bill in subcommittee, and all the people on both sides of the aisle who have very much helped in a very constructive manner to develop this bill to its present form.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I should like to commend the gentleman from Iowa for his contributions in developing this bill, and to reiterate what I said to the chairman of the committee, that there was strong bipartisan support in committee for the objectives of this bill. While there may have been minor differences as to the kind of power to be given to the Secretary, and so forth, really in substance there was a general agreement that a bill of this kind is desirable and should be adopted.

Mr. QUIE. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Minnesota.

Mr. QUIE. I support the bill, and did in committee. I want to commend the gentleman on his work, and the work of the gentleman from New York [Mr. GOODELL], on this subject. I think what will be worked out in connection with the Senate will be a very acceptable bill.

Mr. SMITH of Iowa. I thank the gentleman. I am grateful for the wide support this bill has received from almost all quarters. I know there are few in Congress who are very conscientiously against this bill but I do not think very many. As far as I can find out, the opposition from outside of Congress is largely limited to those people who do not want to be caught by the criminal provisions of this bill. Naturally, the thieves and cheaters do not like the criminal provisions of this bill. Naturally those who do not want to be subject to the bonding requirements and also the bribery requirements in the bill do not want this bill. That is only natural. But I think most people want the bill.

The bill gives authority to the Secretary to interpret the law. The bill makes it a crime to embezzle, bribe, file false statements and conceal facts. I think this bill merely seeks disclosure of information already that would be in the file of any competent administrator of any of these plans. It seeks to compel him to disclose this information so that those interested can see it.

I would like to emphasize what the gentleman from California has said, relating to the need for this legislation. The assets in pension and welfare benefit plans totals at present $50 billion, and is increasing at the rate of $4 to $5 billion annually. The number of persons having a direct interest in such funds approximates 80 million. It is clear therefore that these plans have become on the one hand a cornerstone of the protection of many millions of our citizens, and on the other a vast and continuously increasing body of funds which exercises a most significant effect upon our national economy.

The basic weakness in the present statute is that it makes the Department only a repository for the plan descriptions and annual reports. There is no authority for the Department to render authoritive interpretations of the provisions of even the present law. There is no authority for ascertaining the accuracy of the filed forms; nor is there any authority to prescribe uniform reporting forms. There is not even any bonding requirement, to protect the beneficiaries against theft or embezzlement.

Rather, the basic policing power rests upon suits by beneficiaries. Upon this point, the President's Commission on Money and Credit stated in its recent report:

> More effective safeguards also should be provided for the protection of beneficiaries of pension funds against mismanagement and maladministration. • • • The underlying premise of the Federal Welfare and Pension Plans Disclosure Act of 1958 is that the in-

dividual participant * * * is expected to detect maladministration and invoke legal remedies to protect his own interest, whereas experience has shown that employee suits alone are inadequate as enforcement remedies.

This Commission consisting of many who are considered conservative businessmen also recommended regulating these funds. We do not propose to go that far.

The weaknesses have been recognized by President Kennedy, former President Eisenhower, Secretary of Labor Goldberg, and former Secretary of Labor Mitchell.

I also would point out that in a recent report the Appropriations Committee in discussing the budget for the Bureau of Labor Standards which receives these reports, noted that:

Activities required of this Bureau by the * * * act costs approximately $500,000 per year. * * * The committee does not like to see funds wasted and hopes that legislative action will be taken.

I also would emphasize, Mr. Speaker, that under the proposed bill, the act would remain a disclosure law. These funds would not be regulated in any way; nor would they be controlled. Both the bill and the committee report so state. Nor would it infringe upon State action in this field. Facts show there are only five States which have any regulation; and in most of them the disclosure is limited. The record shows that the Federal and State authorities have worked harmoniously to cut costs of administration and repetitive filings. Indeed most of the States accept the Federal forms.

In conclusion I would point out that present Federal statutes are inadequate to provide needed protection in this field. The Internal Revenue Code deals mainly with income tax purposes, nor is there any provision against embezzlement or kickbacks. It is of interest that in 1958 upon this point, the Service testified that its procedures do not insure against abuse, or provide means for the disclosure of information to the participants or beneficiaries.

Regarding the Landrum-Griffin law, I note that this statute is concerned only with union funds, and approximately 90 percent of welfare and pension plans are employer-managed plans.

The bill merely seeks to remedy a disclosure statute regarded almost universally as inadequate in a very moderate and reasonable way.

It has been claimed by the minority views in the report, that there is no demonstration of need for further legislation—that is, no abuses. The fact is that the Douglas subcommittee indicated that because of lack of time it did not spend much time investigating level of benefit plans. Rather, its investigations were confined chiefly to jointly administered plans. It should be noted that in his testimony on S. 2888, Mr. Meany pointed out a number of level of benefit plans in which there were alleged abuses. Similarly, in the 1961 hearings before the Roosevelt subcommittee in the House, Mr. Carey pointed out a number of alleged abuses. Under the present law, however, it is almost impossible for the Department of Labor to uncover and bring to light such abuses.

It would appear that there has been little congressional investigation into employer-managed plans. The Senate committee report on S. 2888, stated, page 2, that the committee confined its field investigations to collectively bargained and jointly administered welfare funds. This is reiterated on page 11 of the same report where it is stated that most of the abuses were disclosed in jointly administered employer-union plans where most of the investigations were conducted, noting here that there was evidence of abuse in employer-administered plans. Again on page 12, it is said that most of the field investigations have been conducted on jointly administered employer-union plans. This all points to the fact that there was insufficient investigation of employer-run plans rather than a finding that there were no abuses in such plans.

It has been claimed by a few that the amendments contemplate the establishment of a vast bureaucracy, the cost of which would be exorbitant.

The problems of employee benefit plans are intimately connected to the responsibility the Federal Government has for the national welfare. The impact of these plans on the economy of this country is tremendous. The manner in which such plans supplement and are interrelated with the Government's social security programs, the billions of dollars in favorable tax treatment yearly accorded to such plans, the interstate and national character of so many plans plus the fact that powerful and frequently conflicting interests have created a variety of overwhelming problems in regard to welfare and pension programs, are all factors which indicate that the only practical means of affording adequate protection to plan participants and beneficiaries and to assure honest and effective administration of all such plans is to provide for a strengthened Federal reporting and disclosure act. The benefits derived by the country from this legislation are well worth the cost.

In addition, it is to be noted that the proposed bill is not a regulatory statute but retains the essential character of the present Act as a disclosure measure. Basically, all the bill does is add the teeth to make the Act enforcible and to discourage wrongdoing. The proposed legislation does not contemplate a gigantic bureaucracy. Most of the policing will still be done by employees, the public, and other parties in interest. More important, plan participants and beneficiaries would finally be afforded the rights and protections they are entitled to. Therefore, whatever the additional costs—and increased manpower—they would be greatly outweighed by the protection that would be afforded to participants and beneficiaries and by other benefits, direct and indirect, flowing out of the legislation.

It has been said that the costs and increased burdens to plan administrators which would result from passage of the amendments, especially in regard to administrators of small plans, are excessive; however, the proposed amendments would not unduly burden plan administrators since, for the most part, administrators already have available to them in the ordinary course of their operations the information required to be disclosed under the act. It may be noted that in this connection, the proposed bill would permit the Secretary of Labor to relieve plan administrators from unreasonable burdens which, in some instances, they must bear under the present act without relief. In regard to small plans it has been demonstrated that this is the area where the greatest lack of information exists. Certainly, the amendments would not be any more burdensome on small plans than the Landrum-Griffin Act was on small unions and there can be no doubt that any additional burdens or costs imposed by the amendments would be more than outweighed by the benefits derived from having such information reported.

It has also been said that the amendments infringe upon State laws; States are the proper authority to legislate in this area; the amendments impose multiple and duplicatory burdens on plans subject to both State and Federal laws; however, it is difficult to infringe upon State laws that do not exist. It should be pointed out that up to the present time, Federal and State authorities in this area have worked together on a mutually compatible basis to avoid duplication of reporting obligations insofar as the few States that have laws covering part of the subject matter is concerned. Most States have no legislation whatsoever in this area. There are only five States that do and many of these statutes are severely limited in their scope of coverage. For example, New York only requires disclosure from jointly administered funds. In addition, there are many multistate plans which would be burdened if required to report on a State-by-State basis. In this regard, it is to be noted that in an attempt to strike a balance between the interests of the Federal Government and the interests of the States, and in order to avoid duplication in reporting to the two governments, proposed section 13 of the amendments retains section 10 of the act. This section provides that in the case of an employee welfare or pension benefit plan providing benefits to employees employed in two or more States, no person shall be required by reason of any law of any such State to file with any State agency—other than an agency of the State in which such plan has its principal office—any information included within a description of the plan or an annual report published and filed pursuant to the provisions of the act, if copies of such description of the plan or annual report are filed with the State agency and are distributed to participants and beneficiaries in accordance with the requirements of such State law with respect to scope of distribution. It is also provided that this provision shall not be construed to prevent any State from obtaining such additional information relating to any such plan as it may desire or from otherwise regulating such plan. This provision would appear to

meet most of the objections regarding possible Federal-State problems in this area.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. CORMAN] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. CORMAN. Mr. Speaker, I support H.R. 8723.

It was about this time of year 3 years ago that the House was considering the problem of welfare and pension funds. At that time there were two principal bills which dealt with this subject, H.R. 13507 and S. 2888.

Congressional concern over this subject began in May 1954, when the Senate established a subcommittee to conduct studies and investigations of the management and operation of pension and welfare funds. The subcommittee held hearings and conducted extensive investigations and published a final 365-page report on April 6, 1956. The subcommittee report recommended congressional action in this area.

The Senate report accompanying S. 2888 stated, "numerous instances have been disclosed by previous investigations, ranging from outright looting of the funds of employee-benefit plans and corrupt administration on the part of the administrators or trustees of such plans, to waste, indifference, ineptness, lack of know-how, and downright disregard for the rights of employee beneficiaries"—85th Congress, Senate Report No. 1440, page 11.

The committee report accompanying H.R. 8723, which we are considering today, indicates the vast importance of these funds. The report states:

> Figures relating to pension plans show that their number grew from 7,400 in 1945 to an estimated 25,000 in 1960, while the number of persons covered moved from 5.6 million to approximately 80 million.
>
> Tabulations introduced into the record of the subcommittee hearings show that in 1959 the assets of both welfare and pension plans amounted to over $50 billion; and that they were growing at a rate of from $4 to $5 billion a year (87th Cong., H. Rept. 998, p. 4).

A brief comparison of the main differences of the two bills which were before the Congress in 1958 is helpful in analyzing the measure before us today.

The Senate bill, S. 2888, provided for registration with the Secretary of Labor of welfare and pension plans and for the filing of annual reports. The accuracy of these reports was to be certified by an independent accountant after an audit. The Secretary of Labor was given authority to issue regulations to implement the statutory provisions. He was also given the powers to investigate violations and to institute proceedings in the Federal court to enjoin violations. The bill declared unlawful such practices as embezzlement and kickbacks and provided for criminal penalties for these offenses.

The House bill, H.R. 13507, contained many of the reporting provisions of the Senate bill but eliminated the enforcement powers of the Secretary of Labor; and it did not contain the provisions concerning embezzlement and kickbacks. The House bill reduced the function of the Secretary of Labor to that of a custodian of reports. The Secretary had no power to investigate, examine, audit. The single most important omission in the House bill was that, unlike the Senate version, the Secretary was not empowered to institute judicial proceedings to compel compliance with the act. Instead, enforcement was primarily the responsibility of the employee participant.

In the House debate Mr. Teller, one of the principal architects of the House bill, after admitting that H.R. 13507 provided "solely for disclosure" attempted to justify the House version as follows:

> When we addressed our attention to the provisions of S. 2888, the bill of the other body, one of the things that concerned us was that under that bill vast delegations of power were given to the Secretary of Labor, subpoena powers, hearing powers, powers to make rules and regulations almost without limit, powers of enforcement and investigation. This was delegation running riot in which the Congress diminished its own sense of responsibility in favor of somebody else not a congressional officer or agent. Our special subcommittee felt, and the full committee felt, that the Secretary of Labor ought not to be given these broad and unspecified powers, but that such powers should reside in the Congress, and that the enforcement of the rights given to the employees under this proposed law should be left primarily to the employees who, after all, are the primary beneficiaries. In this bill we propose rights for employees, not for the Secretary of Labor or any other Government official. Throughout, the concept of H.R. 13507 provides for enforcement by the employees. They have a right to bring a private action in court if the administrator refuses to give the employee the information" (CONGRESSIONAL RECORD, vol. 104, pt. 13, p. 16421).

Instead of providing for the employee's protection by the Secretary of Labor, it left the employee to shift for himself.

The gentlewoman from Oregon, [Mrs. GREEN], was alert to this deficiency and brought it to the attention of the House. Mrs. GREEN stated during the debate:

> Mr. Chairman, it has been said that the enforcement provisions of this bill have been and should be left up to the employee—that if he is not satisfied, he can sue the employer.
>
> Let us see how real this remedy is.
>
> The employee can take it to court and advance the costs of the litigation—if he has the money to advance—in the hopes of winning the lawsuit and getting attorneys' fees and costs.
>
> On the other hand, as soon as he starts to sue, the employer can fire him—in which case he no longer has any standing to sue, since such legal actions can only be brought by one who is an employee. Or we have been told if the employee is afraid to ask the employer to see the plan, he can see the plan filed with the Secretary of Labor. I submit, Mr. Chairman, that according to the present language in the bill this means the employee must, at his own expense, take a trip to Washington to inspect the plan in the public document room of the Department of Labor. This is a ridiculous provision. The gentleman from New York argues that the Secretary of Labor could mail a copy of the plan and annual report to the employee. As to that, I point to the clear language of the bill which refers only to the Secretary of Labor making them available in the public document room of the Department of Labor.
>
> I submit, Mr. Chairman, that these are not effective enforcement provisions by any stretch of the imagination (CONGRESSIONAL RECORD, vol. 104, pt. 13, p. 16442).

The House passed its version, and the Senate passed S. 2888. When the bill came out of conference it closely resembled H.R. 13507.

Senator John F. Kennedy, one of the principal sponsors of the Senate bill, stated:

> Many Members of the other body preferred no bill at all to the bill which had been passed by the Senate. Therefore, the Senate conferees negotiated under considerable difficulties, for they recognized that if they did not agree to make substantial concessions, no bill at all would be enacted. Therefore, the Senate conferees gave way on substantial points in disagreement, although we greatly regretted the necessity to do so (CONGRESSIONAL RECORD, vol. 104, pt. 14, p. 17963).

The conference bill passed both Houses.. William J. Isaacson, a leading New York lawyer, commented on H.R. 13507 as follows:

> One need not be a cynic to suspect that strong political pressures, not wholly apparent in the debate, manifested themselves in the final results. These pressures did not eminate from labor unions. Labor unions were early on record in favor of welfare fund legislation at the Federal level, and the AFL–CIO had already expressly endorsed the Senate bill (William J. Isaacson, "Employee Welfare and Pension Plans," 59 Columbia Law Review 96, 121).

When President Eisenhower signed the law on August 29, 1958, he stated that he was approving the act "because it establishes a precedent of Federal responsibility in this area. It does little else. If the bill is to be at all effective, it will require extensive amendment at the next session of Congress—87th Congress, House Report No. 998, page 2.

President Kennedy, in a letter transmitting his proposed amendments to the House and Senate, stated:

> Since the enactment of the act in 1958 we have had an opportunity to observe its operation and effect. This has disclosed several serious deficiencies. The act is designed to prevent repetition of abuses and irregularities in the administration of employees' benefit plans. I believe these amendments are necessary to carry out that purpose (87th Cong., H. Rept. 998, p. 3).

In an accompanying letter Secretary of Labor Goldberg stated that the law's "reliance on the concept of self-policing" had proved unsuccessful and that the Labor Department is now "virtually powerless to uncover abuses"—New York Times, May 20, 1961, page 21.

According to the present committee report:

> Secretary of Labor Goldberg and other Department representatives in testimony on the administration bill before the Special Subcommittee on Labor, showed clearly that many thousands of covered plans had not been filed; that over 25,000 plans for both 1959 and 1960 were delinquent in reporting on their finances and operations; and that the lack of power to interpret the law left plan administrators with no authoritative agency to turn to for advice and assistance

upon which they could depend in the event of litigation (87th Cong., H. Rept. 998, p. 4).

If H.R. 8723 is enacted, the Welfare and Pension Plan Disclosure Act will bear a close resemblance to the Senate bill of 1958.

This measure puts teeth into the 1958 act by giving to the Secretary of Labor the power to investigate, make regulations, issue rulings, and bring violators to court. Section 15(b) of H.R. 8723 amends the act to include the following new section:

Whenever it shall appear to the Secretary that any person is engaged in any violation of the provisions of this act, he may in his discretion bring an action in the proper district court of the United States or U.S. court of any place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted.

The present measure provides for criminal penalties for kickbacks, embezzlement, theft, fraud, and false statements.

In 1958 the Congress attempted to protect the rights of employees through voluntary disclosure on the part of the administrators of welfare and pension plans. After 2½ years of nondisclosure and employee nonprotection, it is apparent that "to continue the law in its present form in the belief that it assures adequate protective safeguards is a shameful illusion"—former Secretary of Labor Mitchell, 87th Congress, House Report No. 998, page 3.

It is time to end the illusion and enact H.R. 8723.

Mr. POWELL. Mr. Speaker, in closing I should like to point out five inaccuracies.

In the first place, the gentleman from California said the States do have such laws now. Only 5 have these laws, and 45 do not.

The gentleman from Missouri said he would not vote for this bill because it had not been considered in committee. In his colloquy on the preceeding bill he made the same statement, but he voted for the impacted area bill.

There have been two convictions in New York, one on February 26, 1959, of a trade union trustee, and again on November 18, 1960, of the president of a trade union, both convicted of larceny.

The last thing I should like to refer to is that the gentleman referred to this as a blank check to the Secretary of Labor.

This is a blank check for dishonesty as long as you let this continue. Not one single organization opposed this bill. The President of the United States wants it. Former President of the United States, Mr. Eisenhower, wanted it. Former Secretary of Labor Mitchell wanted it. The present Secretary of Labor Goldberg wants it.

This bill came out of the subcommittee of the Committee on Education and Labor unanimously. It came out of the full committee on a voice vote with only one vote against it. I say this is the time now, to stop any further action that might lead to larceny or dishonesty. We are responsible for this today and what happens between now and January, if it happens, and we hope it does not happen, but if we do not pass this bill, the guilt will be in the hands of those who are here.

The SPEAKER pro tempore. The time of the gentleman from New York has expired. All time has expired.

The question is, Will the House suspend the rules and pass the bill, H.R. 8723.

The question was taken; and on a division (demanded by Mr. HIESTAND), there were—yeas 76, nays 52.

Mr. POWELL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently, a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 244, nays 161, not voting 31, as follows:

[Roll No. 190]

NOT VOTING—31

Alger	Hall	Milliken
Anfuso	Hébert	Morrison
Boykin	Holland	Pilcher
Brooks, La.	Johnson, Md.	Rabaut
Broyhill	Kelly	Santangelo
Buckley	Kilburn	Siler
Coad	Landrum	Taber
Dague	McSween	Thompson, La.
Davis, Tenn.	Madden	Westland
Evins	Miller, Clem	Williams

So (two-thirds not having voted in favor thereof) the motion was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert and Mr. Morrison for, with Mr. Pilcher against.

Mr. Buckley and Mr. Santangelo for, with Mr. Landrum against.

Mr. Madden and Mr. Rabaut for, with Mr. Hall against.

Mr. Anfuso and Mr. Johnson of Maryland for, with Mr. Kilburn against.

Mrs. Kelly and Mr. Thompson of Louisiana for, with Mr. Broyhill against.

Mr. McSween and Mr. Clem Miller for, with Mr. Holland against.

Mr. Evins and Mr. Coad for, with Mr. Alger against.

Until further notice:

Mr. Brooks of Louisiana with Mr. Westland.

Mr. Davis of Tennessee with Mr. Taber.

Mr. Williams with Mr. Siler.

Mr. GRAY, Mr. FENTON, and Mr. SCHERER changed their vote from "yea" to "nay."

Mr. WIDNALL, Mr. BOGGS, and Mr. WILLIS changed their vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The doors were opened.

PUBLIC WORKS APPROPRIATION BILL

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. HALLECK. Mr. Speaker, some days ago, at the request of the chairman of the Committee on Appropriations, permission was given for consideration on tomorrow of the public works appropriation bill. It was so listed on the whip notice we all received. Today permission was granted to the Committee on Appropriations to have until midnight tonight to file a report on the bill. Mr. Speaker, this is my parliamentary inquiry. Would it be in order on tomorrow for the chairman of the Committee on Appropriations to move for consideration of that appropriations bill as it was scheduled on the whip notice, and when we thought it would be considered?

The SPEAKER pro tempore. In reply to the parliamentary inquiry the present occupant of the Chair will say that if such a report is made on a privileged matter and if the chairman of the Committee on Appropriations sought recognition on such a privileged matter, the Chair would recognize the chairman of the Committee on Appropriations.

Mr. HALLECK. I certainly would express the hope that the chairman of the Appropriations Committee would so move tomorrow.

Mr. CELLER. Will there be a vote tomorrow, because the New York delegation has a very important primary.

Mr. HALLECK. May I say to the gentleman, further making a parliamentary inquiry, that when the chairman of the Appropriations Committee asked for the consideration of the bill on tomorrow, Thursday, he at that time said, if I remember correctly, and I am sure I so remember, that if there was a vote it would have to go over to Friday. It is all right with me, also.

The SPEAKER pro tempore. The Chair will state that the gentleman from Indiana answers his own parliamentary inquiry. Also, the majority whip made a unanimous-consent request that any rollcall tomorrow go over to Friday.

MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACT OF 1961

Mr. HAYS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8666) to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mutual Educational and Cultural Exchange Act of 1961".

SEC. 101. STATEMENT OF PURPOSE.—The purpose of this Act is to enable the Government of the United States to promote a better understanding of the United States in other countries; to increase mutual understanding between the people of the United States and the people of other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations, and the contributions being made toward a peaceful and more fruitful life for people throughout the world; to promote international cooperation for educational and cultural advancement; and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and the other countries of the world.

SEC. 102. (a) The President is authorized, when he considers that it would strengthen international cooperative relations, to provide, by grant, contract, or otherwise, for—

(1) educational exchanges, (i) by financing studies, research, instruction, and other educational activities—

(A) of or for American citizens and nationals in foreign countries, and

(B) of or for citizens and nationals of foreign countries in American schools and institutions of learning located in or outside the United States;

and (ii) by financing visits and interchanges between the United States and other countries of students, trainees, teachers, instructors, and professors;

(2) cultural exchanges, by financing—

(i) visits and interchanges between the United States and other countries of leaders, experts in fields of specialized knowledge or skill, and other influential or distinguished persons;

(ii) tours in countries abroad by creative and performing artists and athletes from the United States, individually and in groups, representing any field of the arts, sports, or any other form of cultural attainment;

(iii) United States representation in international artistic, dramatic, musical, sports, and other cultural festivals, competitions, meetings, and like exhibitions and assemblies;

(iv) participation by groups and individuals from other countries in nonprofit activities in the United States similar to those described in subparagraphs (ii) and (iii) of this paragraph, when the President determines that such participation is in the national interest.

(3) United States participation in international fairs and expositions, including trade and industrial fairs and other public or private demonstrations of United States economic accomplishments and cultural attainments.

(b) In furtherance of the purposes of this Act, the President is further authorized to provide for—

(1) interchanges between the United States and other countries of handicrafts, scientific, technical, and scholarly books, books of literature, periodicals, and Government publications, and the reproduction and translation of such writings, and the preparation, distribution, and interchange of other educational and research materials, including laboratory and technical equipment for education and research;

(2) establishing and operating in the United States and abroad centers for cultural and technical interchanges to promote better relations and understanding between the United States and other nations through cooperative study, training, and research;

(3) assistance in the establishment, expansion, maintenance, and operation of schools and institutions of learning abroad, founded, operated, or sponsored by citizens or nonprofit institutions of the United States, including such schools and institutions serving as demonstration centers for methods and practices employed in the United States;

(4) fostering and supporting American studies in foreign countries through professorships, lectureships, institutes, seminars, and courses in such subjects as American history, government, economics, language and literature, and other subjects related to American civilization and culture, including financing the attendance at such studies by persons from other countries;

(5) encouraging and promoting medical, scientific, cultural, and educational research and development;

(6) promoting modern foreign language training and area studies in United States schools, colleges, and universities by supporting visits and study in foreign countries by teachers and prospective teachers in such schools, colleges, and universities for the purpose of improving their skill in languages and their knowledge of the culture of the people of those countries, and by financing visits by teachers from those countries to the United States for the purpose of participating in foreign language training and area studies in United States schools, colleges, and universities;

(7) encouraging independent research into the problems of educational and cultural exchange.

SEC. 103. (a) The President is authorized to enter into agreements with foreign governments and international organizations, in furtherance of the purposes of this Act. In such agreements the President is authorized, when he deems it in the public interest, to seek the agreement of the other governments concerned to cooperate and assist, including making use of funds placed in special accounts pursuant to agreements concluded in accordance with section 115(b)(6) of the Economic Cooperation Act of 1948, or any similar agreements, in providing for the activities authorized in section 102, and particularly those authorized in subsection 102(a)(1), of this Act with respect to the expenses of international transportation of their own citizens and nationals and of activities in furtherance of the purposes of this Act carried on within the borders of such other nations.

(b) Such agreements may also provide for the creation or continuation of binational or multinational educational and cultural foundations and commissions for the purpose of administering programs in furtherance of the purposes of this Act.

(c) In such agreements with international organizations, the President may provide for equitable United States participation in and support for, including a reasonable share (not in excess of 25 percent) of the cost of, educational and cultural programs to be administered by such organizations.

SEC. 104. (a) The President may delegate, to such officers of the Government as he determines to be appropriate, any of the powers conferred upon him by this Act to the extent that he finds such delegation to be in the interest of the purposes expressed in this Act and the efficient administration of the programs undertaken pursuant to this Act: *Provided,* That where the President has delegated any of such powers to any officer, be-

fore the President implements any proposal for the delegation of any such powers to another officer, that proposal shall be submitted to the Speaker of the House of Representatives and to the Committee on Foreign Relations of the Senate, and thereafter a period of not less than sixty days shall have elapsed while Congress is in session. In computing such sixty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days.

(b) The President is authorized to employ such personnel as he deems necessary to carry out the provisions and purposes of this Act and fix their compensation in accordance with the Classification Act of 1949, as amended.

(c) For the purpose of performing functions under this Act outside the United States, including participation in binational or multinational foundations or commissions, the Secretary of State may employ or assign or authorize the employment or assignment for the duration of operations under this Act of persons in or to the Foreign Service Reserve or Foreign Service Staff and alien clerks and employees in accordance with applicable provisions of the Foreign Service Act of 1946, as amended (22 U.S.C. 801).

(d) For the purpose of performing functions under this Act outside the United States, the President is authorized to provide that any person employed or assigned by a United States Government agency shall be entitled, except to the extent that the President may specify otherwise in cases in which the period of employment or assignment exceeds thirty months, to the same benefits as are provided by section 528 of the Foreign Service Act of 1946, as amended (22 U.S.C. 928), for persons appointed to the Foreign Service Reserve and, except for policymaking officials, the provisions of section 1005 of the Foreign Service Act of 1949, as amended (22 U.S.C. 807), shall apply in the case of such persons.

(e)(1) In providing for the activities and interchanges authorized by section 102 of this Act, grants may be made to or for individuals, either directly or through foundations or educational or other institutions, which foundations or institutions are public or private nonprofit, and may include funds for tuition and other necessary incidental expenses, for travel expenses from their places of residence and return for themselves, and, whenever it would further the purposes of this Act, for the dependent members of their immediate families, for health and accident insurance premiums, emergency medical expenses, costs of preparing and transporting to their former homes the remains of any of such persons who may die while away from their homes as participants or dependents of participants in any program under this Act, and for per diem in lieu of subsistence at rates prescribed by the President, for all such persons, and for such other expenses as are necessary for the successful accomplishment of the purposes of this Act.

(2) Funds available for programs under this Act may be used (i) to provide for orientation courses, language training, intercultural seminars, counseling, or other appropriate services and materials for persons traveling out of the countries of their residence for educational and cultural purposes which further the purposes of this Act, whether or not they are receiving other financial support from the Government, and (ii) to provide or continue services to increase the effectiveness of such programs following the return of such persons to the countries of their residence.

(3) For the purpose of assisting foreign students in making the best use of their opportunities while attending colleges and universities in the United States, and assisting such students in directing their talents and initiative into channels which will make them more effective leaders upon return to their native lands, the President may make suitable arrangements, by contract or otherwise, for the establishment and maintenance at colleges and universities in the United States attended by foreign students of an adequate counseling service.

(4) The President is authorized to provide for publicity and promotion abroad of activities of the type provided for in this Act.

(f) All persons employed or assigned to duties under this Act shall be investigated with respect to loyalty and suitability in accordance with standards and procedures established by the President.

SEC. 105.(a) Appropriations to carry out the purposes of this Act, to remain available until expended, are hereby authorized, and this authorization includes the authority to grant, in any appropriation Act, the authority to enter into contracts, within the amounts so authorized, creating obligations in advance of appropriations.

(b) Funds appropriated for programs under this Act may, without regard to section 3651 of the Revised Statutes (31 U.S.C. 543), be used for the acquisition from any source of foreign currencies in such amounts as may be necessary for current expenditures and for grants, including grants to foundations and commissions in accordance with international agreements providing for the accomplishment of the purposes of this Act.

(c) The President is authorized—

(1) to reserve in such amounts and for such periods as he shall determine to be necessary to provide for the programs authorized by subsections 102(a)(1) and 102(a)(2)(i), and

(2) notwithstanding the provisions of any other law except the Mutual Defense Assistance Control Act of 1951, to use in such amounts as may from time to time be specified in appropriation Acts, to the extent that such use is not restricted by agreement with the foreign nations concerned, for any programs authorized by this Act,

any currencies of foreign nations received or to be received by the United States or any agency thereof—

(i) under agreements disposing of surplus property or settling lend-lease and other war accounts concluded after World War II;

(ii) as the proceeds of sales or loan repayments, including interest, for transactions heretofore or hereafter effected under the Agricultural Trade Development and Assistance Act of 1954, as amended;

(iii) in repayment of principal or interest on any other credit extended or loan heretofore or hereafter made by the United States or any agency thereof; or

(iv) as deposits to the account of the United States pursuant to section 115(b)(6) or section 115(h) of the Economic Cooperation Act of 1948, as amended, or any similar provision of any other law.

(d) The President is further authorized to reserve and use for educational and cultural exchange programs and other activities authorized in subsections 102 (a) and (b) of this Act, in relation to Finland and the people of Finland, all sums due or paid on and after August 24, 1949, by the Republic of Finland to the United States as interest on or in retirement of the principal of the debt incurred under the Act of February 25, 1919, as refunded by the agreement dated May 1, 1923, pursuant to the authority contained in the Act of February 9, 1922, or of any other indebtedness incurred by that Republic and owing to the United States as a result of World War I.

(e) Foreign governments, international organizations and private individuals, firms, associations, agencies, and other groups shall be encouraged to participate to the maximum extent feasible in carrying out this Act and to make contributions of funds, property, and services which the President is hereby authorized to accept, to be utilized to carry out the purposes of this Act. Funds made available for the purpose of this Act may be used to contribute toward meeting the expenses of activities carried out through normal private channels, by private means, and through foreign governments and international organizations.

SEC. 106. (a)(1) For the purpose of selecting students, scholars, teachers, trainees, and other persons to participate in the programs authorized under section 102(a)(1) of this Act, and of supervising such programs and the programs authorized under section 102(b) (4) and (6), there is hereby continued the authority of the President to appoint a Board of Foreign Scholarships (hereinafter referred to as the "Board") consisting of ten members. In connection with appointments to such Board, due consideration shall be given to the selection of distinguished representatives of cultural, educational, student advisory, and war veterans groups, and representatives of the United States Office of Education, the United States Veterans' Administration, public and private nonprofit educational institutions.

(2) In the selection of American citizens for participation in programs under this Act, preference shall be given to those who have served in the Armed Forces of the United States, and due consideration shall be given to applicants from all geographical areas of the United States.

(b)(1) The United States Advisory Commission on International Educational and Cultural Affairs (hereinafter referred to as the "Commission") is hereby established to replace the United States Advisory Commission on Educational Exchange. The Commission shall formulate and recommend to the President policies for exercising his authority under this Act and shall appraise the effectiveness of programs carried out pursuant to it. The Commission shall make a special study of the effectiveness of past programs with emphasis on the activities of a reasonably representative cross section of past recipients of aid and shall submit a report to the Congress not later than December 31, 1962.

(2) The Commission shall consist of nine members, who shall be appointed by the President, by and with the advice and consent of the Senate. Not more than five members of the Commission shall be from any one political party.

(3) The members of the Commission shall represent the public interest and shall be selected from a cross section of educational, cultural, scientific, technical, and public service backgrounds.

(4) The term of each member shall be three years except that, of the first nine appointments, three shall be for a term of one year and three shall be for a term of two years. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term. Upon the expiration of his term of office any member may continue to serve until his successor is appointed and has qualified.

(5) The President shall designate a Chairman from among members of the Commission.

(6) The Commission is authorized to adopt such rules and regulations as it may deem necessary to carry out the authority conferred upon it by this Act.

(c)(1) There is hereby continued the Advisory Committee on the Arts (hereinafter referred to as the "Committee") created under section 10 of the International Cultural Exchange and Trade Fair Participation Act of 1956, consisting of a Chairman and nine other members of whom at least one shall be a member of the Commission. Appointment of all members and selection of the Chairman of this Committee shall hereafter

be made by the Secretary of State. In making such appointments due consideration shall be given to the recommendations for nomination submitted by leading national organizations in the major art fields.

(2) The members of the Committee shall be individuals whose knowledge of or experience in, or whose profound interest in, one or more of the arts will enable them to assist the Commission, the President, and other officers of the Government in performing the functions described in paragraph (3) of this subsection.

(3) The Committee shall, in connection with activities authorized under subsection 102(a)(2) of this Act—

(A) advise and assist the Commission in the discharge of its responsibilities in the field of international educational exchange and cultural presentations with special reference to the role of the arts in such fields;

(B) advise other interested officers of the Government in the discharge of their responsibilities in connection with such activities and in connection with other international activities concerned with the arts;

(C) provide such other advice and assistance as may be necessary or appropriate.

(4) The term of office of each of the members of the Committee shall be three years.

(d) The President is authorized to create such interagency and other advisory committees as in his judgment may be of assistance in carrying out the purposes of this Act, and from time to time to convene conferences of persons interested in educational and cultural affairs to consider matters relating to the purposes of this Act.

(e) The provisions of section 214 of the Act of May 3, 1945 (59 Stat. 134; 31 U.S.C. 691), shall be applicable to any interagency committee created pursuant to the provisions of this Act. Members of the Board, the Commission, the Committee, and other committees provided for in this section shall receive no compensation for their services as such, but they shall be entitled to transportation expenses and per diem in lieu of subsistence at the rate prescribed by or established pursuant to section 5 of the Administrative Expense Act of 1946, as amended (5 U.S.C. 73b–2), while away from home in connection with attendance at meetings or in consultation with officials of the Government or otherwise carrying out duties as authorized.

(f) The President is authorized to provide for necessary secretarial and staff assistance for the Board, the Commission, and the Committee, and such other committees as may created under this section.

SEC. 107. The Board, the Commission, and the Committee shall submit annual reports to the Congress and such other reports to the Congress as they deem appropriate, and shall make reports to the public in the United States and abroad to develop a better understanding of and support for the programs authorized by this Act.

SEC. 108. (a) Whenever the President determines it to be in furtherance of this Act, the functions authorized in section 102(a)(2) and (3) may be performed without regard to such provisions of law or limitations of authority regulating or relating to the making, performance, amendment, or modification of contracts, the acquisition and disposition of property, and the expenditure of Government funds, as he may specify.

(b) The President shall submit annual reports to the Congress of activities carried on and expenditures made in furtherance of the purposes of this Act. Each such report shall include the texts of agreements made with other nations during the period covered by the report, a full description of the program and the funds expended with respect to each country in which activities have been carried on in furtherance of the purposes of this Act.

(c) In connection with activities authorized by section 102(a)(2) and (3) of this Act, the President is authorized to provide for all necessary expenditures involved in the selection, purchase, rental, construction, or other acquisition of exhibits and materials and equipment therefor, and the actual display thereof, including but not limited to costs of transportation, insurance, installation, safekeeping and storage, maintenance and operation, rental of space, and dismantling.

(d) The President is authorized to utilize the provisions of title VIII of the United States Information and Educational Exchange Act of 1948, as amended, to the extent he deems necessary in carrying out the provisions and purposes of this Act.

SEC. 109. The Immigration and Nationality Act, as amended, is hereby amended as follows:

(a) In section 101(a)(15)(I) change the period to a semicolon at the end thereof and add the following:

"(J) an alien having a residence in a foreign country which he has no intention of abandoning who is a bona fide student, scholar, trainee, teacher, professor, research assistant, specialist, or leader in a field of specialized knowledge or skill, or other person of similar description, who is coming temporarily to the United States as a participant in a program designated by the Secretary of State, pursuant to the Mutual Educational and Cultural Exchange Act of 1961, for the purpose of teaching, instructing or lecturing, or studying, observing or conducting research, or receiving training, and the alien spouse and minor children of any such alien if accompanying him or following to join him."

(b) In Section 212 redesignate subsection "(e)" to read "(f)" and add a new subsection "(e)" to read:

"(e) No person admitted under section 101(a)(15)(J) or acquiring such status after admission shall be eligible to apply for an immigrant visa, or for permanent residence, or for a nonimmigrant visa under section 101(a)(15)(H) until it is established that such person has resided and been physically present in the country of his nationality or his last residence, or in another foreign country for an aggregate of at least two years following departure from the United States: *Provided*, That such residence in another foreign country shall be considered to have satisfied the requirements of this subsection if the Secretary of State determines that it has served the purpose and the intent of the Mutual Educational and Cultural Exchange Act of 1961: *Provided further*, That upon the favorable recommendation of the Secretary of State, pursuant to the request of a Government agency desiring to obtain the alien's services for the prospective benefit to the national defense, economy, welfare, or cultural interest, or of the Commissioner of Immigration and Naturalization after he has determined that departure from the United States would impose exceptional hardship upon the alien's spouse or child (if such spouse or child is a citizen of the United States or a lawfully resident alien), the Attorney General may waive the requirement of such two-year foreign residence abroad in the case of any alien whose admission to the United States is found by the Attorney General to be in the public interest: *And provided further*, That the provisions of this paragraph shall apply only to those persons acquiring such status subsequent to June 4, 1956"; and

(c) In section 248, after the language "paragraph (15(C)", in both instances, add "or (J)".

SEC. 110. (a) There are hereby repealed—

(1) Section 32(b)(2) of the Surplus Property Act of 1944, as amended (60 Stat. 754, 50 U.S.C. App. Sec. 1641);

(2) Sections 2(2), 201, 203 insofar as it relates to schools, 601, 602 and 603 insofar as they relate to the Advisory Commission on Educational Exchange, 1001 insofar as it relates to persons employed or assigned to duties under this Act, and 1008 and 1009 insofar as they relate to educational exchange activities, of the United States Information and Educational Exchange Act of 1948, as amended (62 Stat. 6; 22 U.S.C. sections 1431(2); 1434, 1439, 1440, 1446, 1448, 1466, 1467, and 1468);

(3) The International Cultural Exchange and Trade Fair Participation Act of 1956 (70 Stat. 778; 22 U.S.C. 1991–2001);

(4) The joint resolution of August 24, 1949, authorizing the use of Finnish World War I debt payments available for educational and technical instruction, and so forth (63 Stat. 630; 20 U.S.C. 222–224).

(b) All Executive orders, agreements, determinations, regulations, contracts, appointments, and other actions issued, concluded, or taken under authority of any provisions of law repealed by subsection (a) of this section shall continue in full force and effect, and shall be applicable to the appropriate provisions of this Act until modified or superseded by appropriate authority.

(c) Any reference in any other Act to the provisions of law listed in subsection (a) shall hereafter be considered to be references to the appropriate provisions of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mrs. ST. GEORGE. Mr. Speaker, I demand a second.

Mr. GROSS. Mr. Speaker, is the gentlewoman opposed to the bill?

Mrs. ST. GEORGE. I am opposed to the bill, Mr. Speaker.

The SPEAKER pro tempore. The gentlewoman qualifies.

Mr. HAYS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. HAYS. Mr. Speaker, this bill, H.R. 8666, is essentially a codification of laws already on the books: The Fulbright amendment to the Surplus Property Act of 1944; the U.S. Information and Educational Exchange Act of 1948; the International Cultural Exchange and Fair Trade Participation Act of 1946; the Finnish Debt Payments Act of 1949; and parts of Public Law 480. The latter two, strange as it may seem, the Finnish Debt Payments Act and the parts involved of Public Law 480, are those which deal with the exchange of students and teachers.

The President has set up in the Department of State the Bureau of Educational and Cultural Affairs, headed by an Assistant Secretary. The administration of all of these laws is now under his jurisdiction. Pulling them together would not change his jurisdiction.

The bill does not set a ceiling on appropriations, it merely provides the authorization. Each year the Appropriations Committee and the Congress will determine how much is to be appropriated. In fiscal 1961 appropriations for various programs covered by this bill amounted to about $37 million.

I might say to you that I think this bill probably has more potential good in

it for the United States and its foreign policy than any particular piece of legislation we might consider. This bill gets at the young people by promoting exchanges, by permitting some of them to come to the United States to be educated, and by permitting our students and teachers to go abroad for language and other essential training.

I would point out to you, and I hope not to take too much time although I want to answer any questions if I can, that less than 10 percent of the foreign students in the United States come here under any kind of exchange program. The other 90 percent come under various private capacities, under grants from universities and colleges, under private foundations, and thousands of them come on their own. The only thing this bill does for the 90 percent that do not come under the Government program is to provide that there can be set up some counseling and guidance services, which I think are essential in order that we get the most good out of the 90 percent who are coming here under their own power.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Illinois.

Mr. DERWINSKI. If I understood the gentleman correctly, there are committee amendments that are going to be offered to the bill, as we now have it, in other words, perfecting amendments?

Mr. HAYS. That is correct. Most of those amendments I would say to the gentleman are technical amendments with the exception of one amendment which I discussed with the gentleman from Georgia [Mr. JAMES C. DAVIS]. The bill did have provision for 8 supergrades. Judge DAVIS tells me he is bringing a bill out of his committee to provide for a number of overall supergrades throughout the entire Government. Therefore, we have included the amendment striking out the supergrades involved in the bill with the exception of three that are already there that the State Department has, but which are not new positions but are only involved in the transfer under the present title under this particular piece of legislation.

Mr. DERWINSKI. I thank the gentleman.

Mr. THOMPSON of New Jersey. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from New Jersey.

Mr. THOMPSON of New Jersey. Mr. Speaker, I think the gentleman has done a great service in bringing this bill up in this form. One part of it is actually an extension of what was a temporary program initiated by President Eisenhower which was called the President's emergency fund for cultural exchange. This was made permanent. The rest of this legislation is, in my estimation, soundly conceived and is a great and permanent part of our foreign policy.

Mr. HAYS. I thank the gentleman from New Jersey for his contribution.

Mr. Speaker, in concluding my remarks at the moment, I would point out that this bill was considered and hearings were had before the subcommittee. I want to thank the members of the subcommittee for their good attendance at the hearings. We never failed to have a quorum and it was not difficult to get a quorum. No one appeared in opposition to the bill. The bill was read line by line and word by word by the subcommittee through five long sessions. Amendments were offered and discussed.

I would like to pay tribute to my colleagues on the minority side, the gentlewoman from Ohio [Mrs. BOLTON], the gentleman from Indiana [Mr. ADAIR], and the gentleman from Connecticut [Mr. SEELY-BROWN]. Amendments were offered in the subcommittee which it was thought would strengthen the bill, and they were adopted. My fellow members on the committee whom I have mentioned along with my colleagues on the Democratic side were unanimous in support of the bill. The bill was reported out of the full committee unanimously.

Mr. Speaker, there are two other matters I think I should touch upon. There was a provision in the bill for certain changes in the Immigration Act. We sent the language down to the Subcommittee on Immigration headed by the gentleman from Pennsylvania [Mr. WALTER]. His committee studied the language and rewrote the language and our committee adopted it in its entirety without any change whatever.

There were some changes in the Internal Revenue Act, but we were unable because of the limitations of time to work that out with the Committee on Ways and Means so we struck that out entirely.

Mr. Speaker, there has been a great deal of criticism around here about bills being sent up from downtown. This bill was not sent up from downtown. This bill was written here on the Hill, largely under the direction of Senator FULBRIGHT and the staff of the Foreign Relations Committee of the Senate. The bill came to the House from the other body. We changed it substantially in some respects. We have what we think is a sound bill, and one that anybody can conscientiously support.

Mr. COLLIER. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Illinois.

Mr. COLLIER. I notice in the report it says that 53,107 foreign students are in the United States plus 1,858 who are studying, I presume, under a Government-administered program. Has any survey or study been made of what these students do when they return to their respective countries? In other words, do they perform basically the function that the Peace Corps proposes to perform?

Mr. HAYS. I am glad the gentleman brought that point up because this is a matter that is of considerable concern to the committee. We have written in language to provide for exactly that, so that we can keep in contact with these people who come in, as to where they are when they go back home, so that they just do not disappear from sight forever.

We hope to think that of this number that the gentleman has read, the great majority that came here under private sponsorship, that they are a great potential source of good for our country. And, we have provided that the State Department can use some of their funds to keep in touch with them. They have the authority to send a year's subscription to one of our magazines or something of that kind and try to use this great potential source that we may have in any particular country.

Mr. COLLIER. I have no quarrel with that. I was simply curious to know. Let me say to the gentleman from Ohio, because I have had, as I think many Members of this House have had, these students come in, and after they have been here for a while ask for private bills so that they can stay here.

Mr. HAYS. We have taken care of that. The language is identical as it was; that they have to go back if they come in under Government auspices; they must return for 2 years before they can be eligible under any circumstances as permanent residents.

Mr. JONAS. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from North Carolina.

Mr. JONAS. Has the gentleman read the recent book entitled "A Nation of Sheep," by William J. Lederer, the man who wrote "The Ugly American"?

Mr. HAYS. No; I have not. I have heard of the book and I hope to get hold of it. I read "The Ugly American," and I have a good deal of regard for the author.

Mr. JONAS. I am moved to ask the question because the author of this book is quite critical of the way the exchange program operates. He charges that many of the exchange students brought to this country come from politically prominent families or people with influence, or from the so-called uppercrust of society and few, if any, from ordinary families from the rural communities, and therefore when they go back home they do not take the American story to the remote sections of their countries where the masses live.

Mr. HAYS. We have tried to write in the language of the bill language which would improve the selection. But, I would say to the gentleman as to the 90 percent who come here under their own power, there is no way in the world that we, as a government, can influence that selection. But, we certainly have tried to write in language which would impro.e our selection program.

Mr. SEELY-BROWN. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Connecticut.

Mr. SEELY-BROWN. I might point out that what the gentleman has said is very true, because 90 percent of our exchange students are privately financed and only 10 percent come here by way of outside governments and by ourselves.

Mrs. ST. GEORGE. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Speaker, 5 minutes is not a great deal of time to do very much with this bill.

According to the report, this bill claims to pull together existing laws that are primarily concerned with the educational

and cultural aspects of our exchange programs, and yet we find in the report and the same paragraph, that this bill does not touch many other exchange programs of Government agencies, such as ICA, AEC, and NIH.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. No, I cannot yield, because my understanding is that time for debate on this side is going to go to the proponents of the bill when it ought to go to the opposition.

Mr. HAYS. The gentleman is exactly right. We could not cover the waterfront.

Mr. GROSS. Why not cover the waterfront—I do not make that in the form of a question—if there is to be a revision, then it ought to cover the waterfront of all these cultural outfits. Here is a bill that calls for initial spending of $40 million. On page 2 of the bill the President is authorized to provide, by grant, contract, or otherwise, for cultural exchanges by financing:

> Visits and interchanges between the United States and other countries of leaders, experts in fields of specialized knowledge or skill, and other influential or distinguished persons.

Whoever they may be.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. No, I cannot yield.

Mr. HAYS. I will yield the gentleman an extra minute.

Mr. GROSS. Yes, I yield if you will give me an extra minute.

Mr. HAYS. I will say to the gentleman that all the things he has read are in present law.

Mr. GROSS. I do not care whether it is in law past, present, or future. What is important is what we vote on today.

And then the bill goes on to provide financing for "U.S. representation in international artistic, dramatic, musical, sports, and other cultural festivals, competitions, meetings, and like exhibitions and assemblies." This is unlimited.

Then on page 18 this shotgun provision. This is section 108(a) I am reading:

> SEC. 108.(a) Whenever the President determines it to be in furtherance of this act, the functions authorized in section 102(a)(2) and (3) may be performed without regard to such provisions of law or limitations of authority regulating or relating to the making, performance, amendment, or modification of contracts, the acquisition and disposition of property, and the expenditure of Government funds, as he may specify.

Mr. HAYS. Mr. Speaker, will the gentleman yield again?

Mr. GROSS. If you will give me another minute.

Mr. HAYS. I have already yielded you 1 minute and have used only 10 seconds.

Mr. GROSS. All right.

Mr. HAYS. I will say again that language is in the present Cultural Exchange Act; it only continues what is the present law.

Mr. GROSS. Also you provide for a board, a commission, and a committee——

Mr. HAYS. All of which are provided for already and are already permanent law.

Mr. GROSS. With unlimited authority to spend money on important people or prominent foreigners, whoever they may be. You not only bring thousands of foreigners to this country but you are going to transport them back home and give them money after they resume their residences in a foreign country.

The bill contains unlimited authority for the President to spend money. This entire $40 million scheme is unlimited. Do I understand that an amendment will be offered to strike just a few of the high-priced employees out of the bill?

Mr. HAYS. I said that in my opening remarks, that I had sent such an amendment to the desk and asked that it be included in the bill.

Mr. GROSS. The bill also provides for the hiring and transportation anywhere in the world of members of the creative arts, performing artists. This should take care of Tom Two Arrows and a host of other so-called performers.

Mr. HAYS. That is in the present law, too.

Mr. GROSS. What we need to do is get rid of the present law and also get rid of a few Tom Two Arrows, who have been chasing around all over the world at the taxpayers' expense. This bill is not going to do it. This bill simply perpetuates it with a shotgun proposal to give the President power to spend money any way he sees fit.

Then I note this little gem on page 5 of the report:

> As an assurance against indiscriminate use of this new authority, the committee has inserted language that the President must determine that the activities carried out under this subparagraph are in the national interest.

Now, that is just wonderful. Is there anything the President cannot determine to be in the national interest? Can you think of anything that he cannot or will not determine to be in the national interest?

Mr. BENNETT of Michigan. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. BENNETT of Michigan. If the things the gentleman is talking about are in present law what is the need of this legislation?

Mr. GROSS. You tell me; I do not know. The gentleman from Michigan has asked a most pertinent question and it will not be answered.

Mr. Speaker, this bill to promote one-worldism in the name of so-called culture, at a first cost of $40 million a year, will take us just that much deeper into the mire of deficit and debt. Where is it proposed to get the money to pay the bills for all these international tourists? Someday those who pay the bills in this country will rise up in their wrath and demand an end to some of this nonsense.

Mrs. ST. GEORGE. Mr. Speaker, I yield 5 minutes to the gentlewoman from Ohio [Mrs. BOLTON].

Mrs. BOLTON. Mr. Speaker, it is rather delightful to have the opportunity of speaking for a bill which does not try to engulf everything in the world.

We very purposely did not put in this bill great numbers of cultural activities. The distinguished gentleman from Iowa mentioned three that were not put in—the ICA, AEC, and NIH I believe. We did not attempt to put those in. They can be put in next year if this works out well, could they not?

I wonder so often, Mr. Speaker, are we never going to have the breadth of view and the intelligence to try a little of something before we endeavor to do it all at once? It seems to me that we would be very wise with a number of these bills that are being brought here in the last hot days of a weary summer, when there is very little opportunity and less inclination to do any deep thinking, why not have some delayed effort, some trial matters, instead of trying to do it all at once in a great big bang? So I am glad we have not done that with this bill.

Mr. HAYS. Mr. Speaker, will the gentlewoman yield?

Mrs. BOLTON. I yield to the distinguished gentleman from Ohio.

Mr. HAYS. I would like to point out that what the gentlewoman says is true, and it would be my guess if we had included the things which the gentleman from Iowa criticized us for not including, he would have criticized us for putting them in.

Mrs. BOLTON. That might be. In any event, the situation is as it is. But we do give in this bill clear and positive legislative support to an area that is relatively new in the foreign affairs field—all that is embraced within education, science, and culture.

The bill reduces the multiplicity of bureaucratic offices involved in one exchange program. It puts the direction of some of our most important educational and cultural programs under the jurisdiction of the Assistant Secretary of State for Educational and Cultural Affairs.

It effectively relates the efforts of our Government with those of private institutions and organizations in order that all of them may direct their resources toward a strengthening of our educational exchange programs.

One of the ironies of the present day is that the greater our understanding and learning, the poorer are the means by which we can share this enlarged knowledge with others. This bill will improve our communications, not with governments but with people.

Mr. Speaker, I would suggest this is one of the wisest of courses. It has its problems, and it has probably its mistakes, but it is an honest effort to simplify.

Mr. LINDSAY. Mr. Speaker, will the gentlewoman yield?

Mrs. BOLTON. I yield to the gentleman from New York.

Mr. LINDSAY. Mr. Speaker, I should like to compliment the gentlewoman from Ohio for her very fine statement. I have examined this bill, from the first day it was introduced in the other body, with great care. I know the history of it,

how carefully it has been drawn. In my judgment, it is the best bill that the Committee on Foreign Affairs has reported to the House up to this time.

Mr. Speaker, I rise today to commend to my colleagues the proposed Mutual Educational and Cultural Exchange Act of 1961. This excellent legislation has already been enacted by the other body. Its purpose is to consolidate, expand, and simplify both the scope and the administration of our international educational and cultural exchange program.

The significance and rationale of international education lie in the fact that its principal purpose is to enhance mutual understanding between peoples, which in turn is an overridingly important factor in our foreign relations. The importance of cultural exchange for our foreign policy is increasingly appreciated both within our Government and among the American people. This, however, has not always been so, and existing law in large measure reflects the inadequate attitudes and concepts of the 1940's.

Our approach to educational and cultural exchanges has been piecemeal and sporadic. Existing legislation has not been brought in line with the fact that these programs are an essential part of our foreign relations. Yet if the need for mutual understanding between peoples was great 15 years ago, it is immeasurably greater now when many new nations have emerged to self-awareness and the hostility of great powers armed with nuclear weapons threatens to end in the destruction of our civilization. It has been said—and there is more truth than ever in it today—that "civilization is a race between education and catastrophe."

Our Communist adversaries are vitally aware of the possibilities for advancing their foreign policy objectives through educational exchange. A rapidly expanding effort by the Communist bloc in the exchange field is being heavily concentrated on the underdeveloped countries, particularly those of Africa and Latin America. The activities of the Soviet bloc in the use of education as an instrument of foreign policy are certainly not a valid reason for the United States to embark upon a crash program. Our educational exchange policies must be wisely and deliberately designed to advance our own positive interest in mutual understanding and not as an arid and panic-stricken reaction to Communist initiative. Nontheless, Communist activities do serve as a reminder of the foreign policy significance of educational and cultural exchange.

Our objective is sharply to be distinguished from the Communist design of shaping men's minds by education, by which they mean rigorous training in the sciences coupled with indoctrination in the canons of a harsh and fanatical ideology. Our international education program must indeed emphasize the practical and scientific knowledge which is so urgently needed by the peoples of new and underdeveloped countries, but it is even more important that our educational program undertake to develop men's critical faculties, to nurture the spirit of free inquiry, to teach men how, not what to think. The basic goal of our education, in our international exchanges as at home, is the cultivation of the free mind—free of ignorance and taboos, free of narrow conditioning and rigid dogma, free of shibboleth and blind tradition.

We have as much to learn as to teach in our educational exchanges with foreign nations. Our own survival and well-being in an interdependent world require an intimate knowledge of the politics, the cultures, the history, and the peoples of hitherto strange and distant lands, now brought close by the worldwide political and scientific revolutions of the 20th century.

It is my firm belief that the programs consolidated in H.R. 8666, sponsored by the gentleman from Ohio [Mr. HAYS], and in H.R. 8363, sponsored by myself, are wisely rooted in the realities of our time, in a basic recognition of the foreign policy significance of educational and cultural exchanges and of the mutual understanding which they foster.

Both we and the world have come a long way in getting to know each other in the years since World War II. The educational exchange program launched by the Fulbright Act of 1946 has been a relatively small-scale but significant effort to open new and urgently needed channels of communication and understanding between our own and foreign peoples. We have come far but attainment of worldwide mutual understanding is still a vague and distant goal. Ignorance and misconceptions of the United States still prevail in many parts of the world. We in turn are still neophytes in the world and our attitudes retain much of arrogance and parochialism.

Our current cultural exchange program has been successful and rewarding but it was shaped in a world that seemed far safer and simpler for Americans than the world of the 1960's. The Fulbright program launched in 1946 has been an exemplary success but, as Senator FULBRIGHT himself has said:

> An educational exchange program that was adequate to the world of 1946 must be substantially revised to adjust to the realities of the 1960's.

The peoples of the world—especially those of the emergent nations of Asia, Africa, and Latin America—are demonstrating an unexampled hunger for knowledge, for understanding, and for spiritual fulfillment. Our national interests are as intimately related to the intellectual aspirations of these peoples as to their hopes for a better material life. It is not an oratorical flourish but an assertion of cold reality to stress the fact that education and cultural communication are as fundamental an instrument of our foreign policy as is our massive program of economic assistance.

Since the adoption of the Fulbright Act by Congress in 1946, our educational exchange program has made it possible for more than 40,000 people to study the arts, the sciences, the histories, the languages, and the cultures of foreign lands. The program now covers 40 countries where it has served both to cement bonds of historic friendships and to forge new bonds where none had existed.

The exchange program was launched in 1946 on a modest scale. Foreign currencies acquired by the United States by the sale of surplus American war equipment were made available to finance study by Americans in the countries where such funds were acquired, and also to pay travel costs—but only travel costs—for foreign students and scholars to visit the United States.

Congress strengthened the program greatly, and especially its mutual aspect, by the enactment of the Smith-Mundt Act of 1948. This legislation authorized the appropriation of dollars to provide funds for foreign students in the United States. Previously, with financing limited to foreign currencies under the Fulbright Act, only transportation costs could be provided for foreign scholars coming to this country. The program was further bolstered by the Agricultural Trade Development and Assistance Act of 1954, which authorized the use for exchange programs of local currencies accruing from sales of agricultural surpluses abroad.

The exchange program enables Americans to go abroad and foreigners to come to the United States to engage in study at the graduate level, to teach in elementary and secondary schools, to lecture in colleges and universities, and to conduct postdoctoral research. It also provides for study by foreign nationals in American-sponsored schools abroad.

The educational exchange program is a joint governmental and private effort. The financial support provided by nongovernmental organizations in 1958, for example, matched Government expenditures. Moreover, many universities have come to count on Fulbright travel grants as supplements to their own scholarship programs for foreign students. Fully three-fourths of the Department of State's grantees receive only travel grants and rely on private American scholarships for most of the funds needed for tuition payments and living costs. In addition, the administration of the program depends not only on Government organs but on a number of private organizations such as the Institute for International Education with its offices in New York City.

In terms of generating good will, knowledge, and understanding the exchange program has been a better than partial success. What is needed now is an expanded program that builds on the accomplishments made possible by the Fulbright Act of 1946 and by the Smith-Mundt Act of 1948. The necessity for a revised and expanded program rests on the enormous changes in the world which have occurred since the 1940's—the mounting conflict between the Communist powers and the free nations, the proliferation of new weapons and new delivery systems which pose the threat of destroying civilization and perhaps all life on this planet, and the explosive awakening of the long quiescent peoples of Asia, Africa, and Latin America.

Our cultural and educational programs must be increasingly reoriented to the peoples of these underdeveloped lands. They may very well hold the key to the future shape of the world and their desire for knowledge, for enlightenment, and for a better life is as powerful a force as exists in the world of the 1960's. We are provided thus with a formidable challenge—and an unexampled opportunity—to assist the emergent peoples in the attainment of their legitimate and worthy aspirations. It cannot be emphasized too strongly that our own interests are inseparable from their success.

It is thus imperative that we substantially revise and expand our educational exchange programs. Despite the dollar appropriations authorized by the Smith-Mundt Act, the programs are still forced to rely heavily on foreign currency holdings. The result of this has been a heavy emphasis on exchanges with Western European countries and insufficient programs for Asia, Africa, and Latin America. In the fiscal year 1960, for example, exchange programs were carried out with only 23 out of a total of 72 non-Communist countries outside Europe. There were no exchanges whatever with any of the independent countries of Africa south of the Sahara.

It is imperative that we act promptly to assist the countries in development in meeting their urgent needs for teachers, technicians, scientists, engineers, agronomists, and trained persons in many other fields. Without sacrificing valuable exchange programs with Western Europe and without cutting back the extremely important outflow of American students abroad, we must focus our exchange effort in the 1960's on bringing to the United States substantially greater numbers of qualified students and scholars from the developing countries of Asia, Africa, and Latin America.

For all of the compelling reasons that I have here attempted to set forth, I recommend strongly to my colleagues the prompt enactment of the new educational and cultural exchange legislation already adopted by the other body and sponsored in the House by the gentleman from Ohio [Mr. HAYS] and by myself. The purposes of this bill are to consolidate many disparate provisions of law governing the exchange program, to increase the size and scope of the program—especially with respect to the countries of Asia, Africa, and Latin America, and to provide means of financing the program that are both more flexible and more adequate. The bill will reinforce the reciprocal character of the exchange programs by encouraging financial contributions from prosperous friendly foreign nations. One of the most useful, and economical, provisions of the bill is its specific authorization of appropriations for long-term programs, thus overcoming the difficulties posed by the existing requirement that obligations be fulfilled during a single fiscal year. Another very constructive provision of the bill is the authorization of small additional expenditures for payments to educational institutions for assistance in language training, orientation, and counseling programs for foreign students. This provision will help to overcome the difficulties and hardships which many foreign students have encountered in adjusting to life in a strange land, in using English as a language of instruction, and in such problems as finding adequate housing at reasonable rentals.

Among other wise and significant provisions of this legislation is its recognition of the importance of the dramatic arts as an integral part of cultural exchange. The bill provides for the continuation of the existing Advisory Committee on the Arts, with the responsibility, among others, to advise on the role and use of the arts in cultural exchange programs. In addition, the President is authorized to provide for foreign tours by creative and performing artists and athletes, American participation in international artistic, dramatic, musical, sports and other cultural events abroad, and also for participation by foreigners in similar programs in the United States.

A particularly needed improvement in the exchange program is provided by the amendment of the Immigration and Nationality Act so as to allow the spouses and children of visiting students and scholars to come into the United States under visa provisions similar to those applying to the grantees themselves. Under existing law members of a grantee's family must enter on visitors', as distinguished from student, visas, which frequently means that they may not be admitted for periods of the same duration as the grantees. The act would be amended so as to remove this cause of hardship and thus permit grantees and their families to come and remain in the United States together.

Educational and cultural exchange is as fundamental—though far less costly—an instrument of foreign policy as our massive programs of defense and foreign aid. More perhaps than any other instrument of our foreign policy, educational exchange aims directly toward the realization of our highest purpose—the building of a community of free and enlightened nations.

Mr. HAYS. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. FARBSTEIN].

Mr. FARBSTEIN. Mr. Speaker, in listening to the debate here today it would seem because we are trying to show our way of life to some people in foreign countries, you would think that we were guilty of subversion.

What we are seeking to do here is best shown by a letter which was sent to the committee by the Secretary of State. I shall read a paragraph of this letter, which shows how necessary this legislation is:

> The legislative base on which these programs have been operating is a patchwork of laws passed at different times during the last 15 years to meet varying requirements. The need for a consolidation of these laws into an orderly rational pattern was never more urgent than now. H.R. 8666 will satisfy that need. It will strengthen existing programs and provide for flexibility in administration. It will also give the executive branch the additional authority it needs to maintain the advantage that the United States now has in this field, where competitive efforts by the adversaries of a free society are continually increasing.

Now, let me suggest to the House that there will be very little in the way of funds used. Counterpart funds which have been generated through the years will be used wherever possible. It will cost this government little in comparison to the monies that are expended in the normal course of events in foreign assistance. Let me repeat to the membership of the House that much of the money spent will be counterpart funds.

Mr. Speaker, we have heard a lot about checking on these people once they have returned to their native land. All we intend to do under those circumstances is to help one who has come here and has studied in this country and who has returned to his own home, to try to get together with others in his community who have done similar work so we can send them some of our periodicals in order that they may disseminate information about our way of life to those who reside in the nation where they live. All we are seeking to do is to advertise the fact that we in this country run a decent country, and that we live in as free a way as possible.

Mr. Speaker, it seems to me that this bill should pass unanimously.

Mrs. ST. GEORGE. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. DERWINSKI].

Mr. DERWINSKI. Mr. Speaker, since H.R. 8666, along with numerous other bills today, is being processed under suspension of the rules, an amendment would be out of order. I feel it necessary to call to the attention of the House certain inconsistencies in the operation of the cultural exchange program that I hope the committee will consider and I certainly hope will adopt in the coming years.

I wish to direct your attention to section 109, amending the Immigration and Nationality Act, and I call your particular attention to subsection (e) which provides that a foreign exchange student who acquires his training and skill in the United States may return to this country for admission as a permanent resident after spending 2 years out of the country upon his departure after completing his training program.

Mr. Speaker, we have been told on numerous occasions that the purpose of training foreign students here in the United States is that they will return to their native lands and use their newly acquired skills and knowledge to advance living standards in their native countries. Certainly, when they acquire permanent residence in the United States to practice their skill they in effect violate the intention of the cultural exchange and education program.

I am positive that many Members of the House have shared my experience in receiving requests to introduce private legislation to establish permanent residence for exchange students here in the United States. Many of them come to this country with no intention of returning to their native lands once educated here and use every conceivable gimmick to remain.

Mr. Speaker, had this bill been brought to the House under normal procedure, I was prepared to offer an amendment requiring that the student reside in his native country for at least 5 years following his departure from the United States so that for at least that nominal amount of time the people of his native land could benefit from his acquired skill.

I certainly hope the Foreign Affairs Committee will give this matter its earnest consideration so that a practical solution could be forthcoming to adjust the abuses now prevalent in this program.

Actually, Mr. Speaker, I support the bill, although I feel, in the spirit of constructive criticism, that some of the demerits or the weaknesses ought to be pointed out to the House in the hope that perhaps in years to come they might be perfected. For example, there is the question of exchanges of artists and the American performers. We could take the American Olympic track team and send it throughout the world. Their tour would be of benefit in creating good will of people toward our country. I am not so sure that sending a few of our eccentric artists or characters from the entertainment world around other parts of the world at Government expense is helpful to the image that we want people to have of the United States. I merely point that out as a constructive thought.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Ohio.

Mr. HAYS. I think there is room for debate about certain art exhibitions—I mean by that the theater arts and so on. I would say to the gentleman that we did put in the report the expression that the committee understands that when these are sent abroad the only expense the Government would pay would be the difference between the official fees and what it actually cost to send them. In other words, we are not going to subsidize them and have them make a lot of gravy on the side.

Mr. DERWINSKI. Mr. Speaker, I would like to point out on page 16 of the committee report the language wherein there is discussed the Immigration Act amendments. During the 3 years that I have served in the Congress, I have been requested on four occasions to introduce private bills to keep in this country doctors who have come from abroad, studied in American schools, and then decided they did not wish to go back to their native lands. I can understand if a man reaches this country and studies, for example, English, and then is offered a job as a professor teaching history in this country at one of the outstanding universities—I say this is fine, and he should stay here. But if he gets admitted into this country and we educate him in the humanitarian sciences such as medicine, dentistry, and so forth, I think we should write into the law sufficient safeguards so that he does return to his country and works in his particular field.

I see, for example, according to the committee report, that students from the Philippines, Iran, and Turkey go to Canada to serve their 2-year period rather than return to the United States.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman.

Mr. WALTER. The matter the gentleman mentions is adequately dealt with in this bill. The language employed was recommended by the Committee on the Judiciary for the purpose of eliminating the evasions of obligation to serve the basic aims of the program. The language of section 109 of this bill is consistent with the basic Immigration and Nationality Act. Under it an exchange student cannot have his immigration status adjusted, he cannot become a permanent resident until after he had returned to his own land and remained there for a period of 2 years thus complying with what we believe is his obligation freely assumed when he accepted assistance in order to come and study in this country. If he goes to some other land instead, this Government will determine, before readmitting him, whether that has served the purpose of the bill before us.

Mr. HAYS. Mr. Speaker, I yield myself 2 minutes to answer a question of the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. On page 10, line 22, there is the language:

> Appropriations to carry out the purposes of this Act, to remain available until expended, are hereby authorized—

Then I find in the report on page 3 that the estimate is $40 million. What appropriations are authorized?

Mr. HAYS. It is an open-end appropriation which is not unusual, and the Committee on Appropriations determines the amount. We just say appropriations are authorized to carry out the act. This year I do not know what they asked for, but what they got from the committee was $37 million. The $40 million figure is in there merely because that is what they told us they were going to ask for next year.

Mr. HOFFMAN of Michigan. But there is no limit in the bill?

Mr. HAYS. No; but I have every confidence in the gentleman from New York [Mr. ROONEY] and his committee, that they will not exceed the bounds of propriety.

Mr. COOLEY. Mr. Speaker, will the gentleman yield for a question?

Mr. HAYS. I yield to the gentleman.

Mr. COOLEY. We have had these exchange programs in operation for many years, as the gentleman has said. Reference has been made to the language in this bill. I would like to inquire whether or not we have had a program of exchange of legislators or parliamentarians?

Mr. HAYS. I would say that under the distinguished persons section as the gentleman knows, there are parliamentarians coming here all the time. I have them in my office every month, and sometimes it seems like every week.

Mr. COOLEY. I understand, then, the gentleman is saying that under this language in the bill it would be possible to have an exchange of parliamentarians between different countries?

Mr. HAYS. I think it would.

Mr. COOLEY. But have we ever had any parliamentarians abroad visit here? I know we have had some each year, but have we ever sent any group of parliamentarians from this country to other countries?

Mr. HAYS. We have sent them to meetings; for example, the British Commonwealth Association meeting. We have sent them unofficially from the Committee on Foreign Affairs, but not on an official basis.

Mr. COOLEY. I might say that I am prompted to ask this question because of correspondence I have had recently with a friend of mine in North Carolina who suggested that it would be well to have such a program of exchange of parliamentarians.

Mr. HAYS. I thank the gentleman for his suggestion.

Mrs. ST. GEORGE. Mr. Speaker, I yield 5 minutes to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Speaker, in my opinion, this is a good piece of legislation. In addition to the reasons which have heretofore been set forth in support of it there are some others that might be mentioned. In the first place, this does encourage person-to-person contacts which I happen to think are very valuable. This is one of the effective means by which we can establish understanding and good relations with other nations and their people.

Secondly, mention has been made of the fact that there has been an Assistant Secretary in the Department of State assigned to Educational and Cultural Affairs. He will bring together in his office most of the matters relating to this bill, so there will be one place to which people can turn for information in this respect.

Thirdly, it has been pointed out that we have extended services to students and other such persons who come to this country. An amendment offered in the committee provides that we give counseling and guidance service to students from foreign countries who come to our Nation. And not only that, but we will follow those students and try to maintain contact with them, when they return to their native lands, as a reservoir of people who understand our Nation, its philosophies, and our love of freedom.

Next, we have also written in an additional provision which would permit the sending of our teachers abroad to make studies of languages, and those studies which are grouped together under the term "area studies." This will permit them to return to this country qualified to be better and more proficient teachers and instructors.

Then, too, I think not sufficient mention has been made of the fact that in this legislation we do continue aid to American-sponsored schools abroad. Certainly those schools, of which the American University at Beirut is an outstanding example, have contributed notably to our foreign relations. They permit students there to get a feeling for American philosophy, the American way

of life. In many instances they permit the student to get information and education much nearer to his native land than would be possible if he had to travel to the United States.

So, Mr. Speaker, for these and other reasons I feel that this drawing together of several existing laws is a notable step in the right direction. It provides an excellent piece of legislation and should have our support.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Speaker, I would like to commend the gentleman from Indiana for a fine statement. I too would like to express my interest in, and support for, this bill. Serving as I do as with the Committee on Foreign Affairs, which considered the provisions of this bill in detail, and on the Committee on Education and Labor, I have a particular interest in the programs provided for under this bill.

As has already been said, this bill is essentially a certification of a variety of laws already on the books. As such, it should generate little opposition, for here is wide understanding of, and strong support for, the different kinds of person-to-person contacts envisaged. This codification of a number of these programs will facilitate better consideration and increase their effectiveness.

With the cold war apparently with us indefinitely, a greater understanding of the American way of life by citizens of other countries can be of real value. Even were international tension to relax—and I regret that this does not seem likely—it will be important for the United States to continue to provide educational opportunities for our young friends overseas, and to develop cultural exchanges between this country and others.

These programs, coupled with far more intensive efforts of a nongovernmental character, form part of an accepted and essentially constructive national tradition in which we all can take justifiable pride.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Ohio.

Mr. BOW. Can the gentleman tell us how much the cost of the program has been increased by this legislation?

Mr. ADAIR. The cost of the programs in the last years has been approximately $36 million.

Mr. BOW. The Subcommittee on Appropriations, of which the present occupant of the chair [Mr. ROONEY] is the chairman, and the gentleman from Ohio, the ranking minority member, have passed on these appropriations in the past, but does this add anything additional?

Mr. ADAIR. We have estimated that the cost of this program might be $40 million a year.

Mr. BOW. Where does that additional expenditure come in?

Mr. ADAIR. It could be spent anywhere within the provisions of the bill.

Mr. BOW. Have you any new programs?

Mr. ADAIR. There are some new programs.

Mr. BOW. That is what I want. What are the new programs?

Mr. ADAIR. I just pointed out some. For example, there is increased authority to send teachers abroad to further their education, particularly in the field of languages. I do not believe this bill appreciably, using that term in a comparative sense, will increase the cost of the programs. We are relying upon the gentleman's subcommittee to use its very sound discretion in the amount of money that is to be made available.

Mr. BOW. The gentleman has made some remarks about the Assistant Secretary of State. That is not under this bill, but that already is in existing law; is it not?

Mr. ADAIR. Yes.

Mr. HAYS. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALTER].

Mr. WALTER. Mr. Speaker, I wish to congratulate the Committee on Foreign Affairs and particularly the chairman of the subcommittee, the author of the bill, the gentleman from Ohio [Mr. HAYS] for an excellently done job.

It so happens that legislation pertaining to international educational exchange is within the jurisdiction of the Committee on Foreign Affairs. However, the Committee on the Judiciary continuously has private legislation before it affecting exchange students and exchange visitors admitted to this country under legislation of this type. It is most gratifying that the Committee on Foreign Affairs had found it appropriate to consult with the Committee on the Judiciary regarding the immigration provisions of this legislation as they are contained in section 109 of the bill before us. We were most happy to cooperate and we feel certain that the provisions of the House bill, free of the many deficiencies of the Senate companion bill, S. 1154, will be placed on the statute books. I wish to encourage my friends on the Committee on Foreign Affairs to insist in conference on the provisions of section 109 of this bill which will eventually, under the terms of this legislation, become a part of the Immigration and Nationality Act for which the Committee on the Judiciary is responsible.

Mr. COOLEY. Under the present program, if I understand it, they are not permitted to remain in this country. I had a case exactly in point recently of a young doctor who was educated here and wanted to remain here.

Mr. WALTER. Of course, the young doctor, the gentleman is speaking of came here at the expense of his own government or our Government, and was educated at the expense of his own government, or our public or private institutions and he certainly had an obligation to go back and serve his countrymen for at least 2 years.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mrs. ST. GEORGE. Mr. Speaker, I yield 1 minute to the gentleman from Connecticut [Mr. SEELY-BROWN].

Mr. SEELY-BROWN. Mr. Speaker, during my congressional service probably no bill has given me a greater sense of satisfaction than the mutual educational and cultural exchange bill now under consideration. I am a member of the subcommittee that heard the testimony of educators and members of the performing arts as well as executive branch personnel who handle the numerous administrative tasks connected with our exchange programs. This bill has had the unanimous endorsement of all these individuals. Those who could not appear submitted statements for the record. After the testimony was completed, the subcommittee considered the bill section by section. It is a carefully considered measure and merits the support of this House.

It was not alone the unanimity of expression by the witnesses that determined my support. My support stems in large part from my own experience. I grew up on a college campus where I had an opportunity to sense the quest for knowledge, the desire to sharpen thought through the exchange of ideas. Later, as a student and then as a teacher, I shared these attitudes that I had seen as a boy on a college campus.

As others have noted, this is a comprehensive bill. Much of existing legislation that is now scattered through numerous statutes is brought together. Some provisions are new; others are an expansion of authority to carry out particular programs.

One of the most important features is the coordination and responsibility it provides for our multiple exchange efforts. The bill does not disturb the many exchange relationships that our private institutions have developed. But it does offer the services of the Government, should they be desired, to make these relationships more effective and meaningful. Some may criticize the bill because it sets no dollar ceiling on the programs. I would only remind these critics that the money must be appropriated annually, thus assuring Congress control of the dimensions of the programs.

I think it important for the House to have some idea of the exchange programs in which we are presently engaged in order that there may be a better understanding of what this bill hopes to accomplish. The word "exchange" is one of convenience rather than of precision for the larger flow is to the United States. While there is an element of reciprocity, it is not a 1-for-1 arrangement. Last year about 54,000 foreign students came to the United States. They comprised about 1.5 percent of our college and university population. By way of comparison, foreign students in Britain and France made up 12 percent of the student body; in Switzerland and Austria the figure was 30 percent. The reverse flow saw about 16,000 Americans go abroad for university study, less than one-half of 1 percent of our students.

The foreign students came to the United States from 141 countries and political areas and attended more than 1,700 institutions in this country. The largest group, as might be expected,

came from Canada. But the next seven largest nationality groups came from Asia and the Middle East. At the bottom of the list was Africa. Engineering and the humanities were the principal fields of study, followed in order by the natural and physical sciences, social sciences, business administration, medical services, education, and agriculture.

One noticeable trend directly related to this bill is the decline in recent years of self-supporting foreign students. About 90 percent of those who came to the United States received no assistance from our Government. About one-third were fully self-supporting. The balance received their support from their own government, from private organizations and foundations and from our institutions that admit them. This is a serious situation if we believe that our exchange programs are important to our national interest. It becomes more so if we consider that the less-developed countries with limited or no foreign exchange will have to rely on external assistance to send abroad their promising youth. All of our technical assistance to these countries will be of little value if we do not provide the underpinning of education that will make their development effective.

Figures for American students abroad are more difficult to obtain. The most recent study shows that American students were in attendance at more than 500 institutions in 62 countries. But 70 percent were studying in Europe, 12 percent in Canada, and 10 percent in Latin America. Almost half were studying in some branch of the humanities.

No less significant is the exchange of advanced scholars—professors, lecturers, and researchers. More than 2,500 were in the United States last year affiliated with 278 colleges and universities. They came from 79 countries, but about half were Europeans. American scholars abroad totaled about 1,800 from 339 American institutions. They went to institutions in 87 countries, but again about half were in Europe.

A more recent exchange trend is that of teachers in primary and secondary schools. About 200 will teach in American schools across the country this year while an equal number of American teachers will teach abroad. This is a type of exchange that gives great promise not only in educational benefits but in community understanding. The bill we are considering will strengthen that particular program.

I have mentioned briefly only the larger and perhaps better known exchange activities. They are the ones that will be most affected by the provisions of H.R. 8666. But they do not exhaust the list of our Government's exchange programs. Last year, under the International Cooperation Administration's specialist and leader programs, about 6,800 foreigners came to the United States for travel and observation or study in a field of learning of immediate importance to them, for example, mining, agriculture, health, and public administration. On a more modest scale the Atomic Energy Commission, the Department of Health, Education, and Welfare, and the Federal Aviation Agency, to suggest a few, conduct programs for foreigners. Lastly, one must not overlook the role of the Department of Defense which has brought as many as 20,000 foreign military personnel to the United States in a single year. While their training is primarily military, many of the things they learn have an application in civilian life. Congress has recognized the role that the military can play. In the Mutual Security Act of 1959, it included this observation:

> Administrators of the military assistance program shall encourage the use of foreign military forces in underdeveloped countries in the construction of public works and other activities helpful to economic development.

In supporting this bill my major interest is not upon increasing the number of individuals we bring to the United States or that we send abroad. There will, of course, be some increment as the educational requirements of the outside world mount. But I do not believe that the mere migration of bodies will achieve our national objectives. My concern is with the quality of the individuals we bring here and the quality of the education they receive. The Assistant Commissioner of International Education recently stated:

> The success of exchanges, as an instrument of international policy, depends on many factors, including the kind of people selected, their orientation, and the programs planned for them.

I share these views.

English is a world language; this gives us an advantage over the Soviets who must first teach a language generally regarded as difficult and which does not have the currency of English. Many foreign students have a command of English sufficient for their daily life at home. But their competence is frequently insufficient for the level of instruction they seek in this country. Our first task then is to make certain that exchanges have a mastery of English. Where that it not readily available, it will be to our advantage to set up or strengthen existing programs of English instruction.

The newer countries can spare only a limited number of their best people for the educational experiences offered by the United States. We must, therefore, guide their choice of studies into areas that will give a sense of national rather than personal satisfaction. The individual who wants to study comparative literature may be far less essential to his country's development than the student of agriculture; the theoretical physicist must give way to the primary school teacher. These are problems that are complicated by the diversity of educational patterns in this country. For the foreigner they can be handled only through adequate counseling and guidance. One of the strongest features of this bill is the emphasis it gives to these essential services, not only for those coming under Government sponsorship but to those who come under auspices.

This bill is not a cure-all for the present shortcomings of the exchange programs. Our committee report makes this clear. But it is a necessary first and modest step toward strengthening them. It gives clear and positive responsibility and direction to them. After the program has had a chance to shake down, we will make an appraisal of its accomplishments. I know our subcommittee will follow closely its operations. Should further legislative action be necessary, the House may be assured that our subcommittee will make recommendations to that effect. We are determined that our exchange efforts will be responsive to our national objectives.

Mr. BARRY. Mr. Speaker, will the gentleman yield?

Mr. SEELY-BROWN. I yield to the gentleman from New York.

Mr. BARRY. Mr. Speaker, lack of understanding is the greatest threat to pacific relations among members of the human race. It is lack of understanding that creates fear, fear of the unpredictable. When we understand our fellow man fear gives way to concern.

The greatest impediments to understanding in the present world are lack of education and the existence of closed societies—societies which will not permit their educated members to learn to understand the rest of the world. Every ray of comprehension, every chink in the wall, should be expanded to the greatest possible extent. We must maximize every opportunity to get through to those who lack educational sophistication or contact with our way of life. If these impediments can be overcome, we will have a different and a much more quiet world.

It is lack of understanding, too, that causes a nation to fail to meet the challenge which the times present. We, too, must learn—we must learn so that we can better meet this challenge. If all of us would truly come to understand this world's problems, our efforts in the cold war would be more effective and crowned with more immediate success.

The basic purposes of this bill are to enable others to better understand us and to give us a better understanding of the needs and philosophies of other people. It is in most regards an improvement on the legislation that presently exists in this field. It simplifies that legislation and adapts it to better meet the present needs. It is another step along the path to mutual human understanding. It deserves our support.

Mrs. ST. GEORGE. Mr. Speaker, I yield 2 minutes to the distinguished majority leader, the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I have asked for this time to make a very brief statement about the remaining legislative business that is expected to be considered under suspension of the rules today. We have had very fine discussion of the measures that have been before us. One matter was objected to on the Consent Calendar, but I think we can dispose of that. There are five more bills, as I understand from the Members of their respective committees on our side of the aisle on which there is quite substantial agreement. One bill is from the Committee on the Judiciary having to do with the entry of eligible alien orphans. There are two bills from the

Committee on Banking and Currency which our people on the committee tell me should only take a few minutes to explain. There is one bill with reference to the education of war orphans on which I likewise understand there is substantial agreement. There is also a bill on railroad retirement which our people on the committee tell me should only take a little while to dispose of.

Mr. Speaker, I just mention this to indicate that we could get through within a reasonable time this evening and, of course, all these bills should be explained and understood by the membership. I do not know what further arrangements might be worked out with regard to suspension on other measures, but it would seem to me we could within a reasonable time this evening conclude action on at least the measures I have mentioned.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Florida.

Mr. HALEY. Did the gentleman include the bill, S. 200 in his statement? I think that bill could be disposed of very quickly.

Mr. HALLECK. So far as I am concerned, if we do not continue to too late an hour, I will say to the gentleman from Florida it is perfectly all right with me to consider a number of bills that could be disposed of quickly tonight. As I said, Mr. Speaker, I have not taken this time to shut off debate. Of course, no one has any such intention. I merely wish to indicate that on these matters on which there is substantial agreement where full explanation is made of the bills, if we could proceed with expedition, we could conclude our deliberations tonight at a fairly reasonable hour. Of course, it is not up to me to limit the list, but I just had some conversations and I have taken this time in the hope that we could get through here in a reasonable time tonight.

Mr. HALEY. I think if the gentleman will talk with members of the Subcommittee on Indian Affairs, he will find that this matter was unanimously reported out of the committee and was supported by the members on the gentleman's side.

Mr. HALLECK. They have spoken to me and I will say to the gentleman that I, for one, can see no reason why it could not be disposed of very quickly.

Mr. HALEY. I thank the gentleman.

Mr. HAYS. Mr. Speaker, I yield to the gentleman from Ohio [Mr. COOK].

Mr. COOK. Mr. Speaker, I rise in support of H.R. 8666, a bill designed to promote better mutual understanding among the peoples of the world through educational and cultural exchanges.

In the current struggle between the forces of democracy and communism throughout the world, no single instrument of foreign policy has as great a potential for good as does the educational and cultural exchange program. This program has promoted good will for the United States of America among those students who have visited our country and also among those abroad who have had occasion to meet the American exchange students who have visited their countries. Those in the State Department who have so efficiently carried out this program in the past are to be commended for the excellent job they have done.

However, the national interest now requires that the various programs, both public and private, be brought into a closer partnership. This bill will pull together the existing laws that are primarily concerned with the educational and cultural aspects of our various exchange programs. The result of this legislation should be a more effective program in this field of international relations and should continue to reap benefits for our country throughout the world.

Mr. HAYS. Mr. Speaker, I yield to the gentleman from Delaware [Mr. McDOWELL].

Mr. McDOWELL. Mr. Speaker, we note with especial satisfaction that the Department of State has lately been putting more emphasis in its program of the performing arts on academic groups. For experience has shown that our young university students can be among our best ambassadors. Not only can we astound the world with their cultural proficiency, which is a great gain in itself, but they are quick to make friends and give intelligent answers offstage.

In a little over a year, the State Department reported, they have sent academic groups to almost every part of the world, with tremendous results. One of our best choral groups, the Howard University Choir right here in Washington, went to 37 cities in Latin America and were hailed not only for their singing but for their splendid comportment and their lively interest in that continent. Other groups have gone to the Soviet Union and to the Far East, and another, the very professional Eastman Philharmonic of that famous School of Music at Rochester, will this fall begin a tour of Europe and we hope the U.S.S.R. that will extend for 14 weeks. Others have gone to the Far East, and everywhere we have sent our young athletes they have done us proud in all of their competitions and demonstrations.

This trend, the Department tells us, is increasing and many more will be fanning out in all directions in the year ahead. This is the way to show how democracy works, to send young America with its verve and skills and interest and intelligence. We applaud this trend, and think its volume must be increased.

In the field of the performing arts, which is one of the best ways to demonstrate abroad our cultural accomplishments, we have a huge potential which is just beginning to be recognized. That is the use of our academic groups—university students who excel as musicians, actors, and dancers.

We have tried groups like this, and have proof of their tremendous reception. When the Michigan University Symphonic Band went to Moscow last spring, young Russian students mobbed them with enthusiasm, standing late in the streets with them, asking questions about the United States. The Soviet papers reported that "the day the Michigan band spent at the Leningrad Conservatory will not soon be forgotten." The Russians were astounded at these representatives of young America, and could hardly believe their ears when they continued their triumphal tour of Minsk, Kiev, Odessa, and seven other Soviet cities—the most cities any sort of American group has ever played in. Our embassies in Moscow, in the satellites, in capitals of the Near East unanimously reported that these boys and girls were the best representatives, the best-disciplined, most courteous and most intelligent, of any performing arts group that had come their way.

Other groups have gone before, and their numbers are being stepped up for the year ahead. This is the way to reach the hearts and minds of the restless students of many doubtful lands. Let us be sure that we utilize our greatest natural resource—the leaders of tomorrow.

The State Department has long held the conviction that educational and cultural exchange is one of the most important and effective means available to this Nation in our continuing struggle to build a peaceful world in which freedom and justice under law will be the lot of all mankind.

I am proud to have been, together with the distinguished and able gentleman from Ohio [Mr. HAYS], one of the two House sponsors of this significant and enduring legislation.

My bill H.R. 5204, was identical to H.R. 5203 offered by our colleague from Ohio who has so splendidly and capably handled this legislation on the floor for the Committee on Foreign Affairs.

I include as part of my remarks a letter which a former colleague, now the Assistant Secretary of State, Brooks Hays, addressed to the chairman of our committee endorsing this legislation on behalf of the Department of State and the President:

DEPARTMENT OF STATE,
Washington, August 31, 1961.

Hon. THOMAS E. MORGAN,
Chairman, Committee on Foreign Affairs,
U.S. House of Representatives.

DEAR MR. CHAIRMAN: I have received your letter of August 29, 1961, requesting the views of the Department on H.R. 8666, to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges.

The Department has long had the conviction that educational and cultural exchange is one of the most important and effective means available to this Nation in our continuing struggle to build a peaceful world in which freedom and justice under law will be the lot of all mankind. This conviction is shared by the President and his administration. In order to carry out these programs effectively and to achieve the maximum impact, the executive branch must have a sound base of legislative authority from which to operate.

The legislative base on which these programs have been operating is a patchwork of laws passed at different times during the last 15 years to meet varying requirements. The need for a consolidation of these laws into an orderly, rational pattern was never more urgent than now. H.R. 8666 will satisfy that need. It will strengthen existing programs and provide for flexibility in administration. It will also give the executive

branch the additional authority it needs to maintain the advantage that the United States now has in this field, where competitive efforts by the adversaries of a free society are continually increasing.

In the Department's comments on earlier versions of the bill, H.R. 5203 and H.R. 5204, we recommended certain changes, many of which have been made in H.R. 8666. While in some respects H.R. 8666 in its present form does not fully accord with the views expressed by the Department, nonetheless it is a much-needed advance over existing law, and has our support.

On behalf of the State Department, I therefore strongly urge the enactment of H.R. 8666, whether or not the further adjustments favored by the Department are made, although we hope that in the course of the remaining consideration of the bill, the Congress will see fit to make these adjustments. I wish to take this opportunity to express the Department's appreciation and my own for the long and careful consideration which members of your committee have given to this most important legislation.

Time has not permitted us to obtain the advice of the Bureau of the Budget as to the relationship of the views expressed here to the President's program.

With high regards.

Sincerely,

BROOKS HAYS,
Assistant Secretary.

Mr. HAYS. Mr. Speaker, I yield to the gentleman from Connecticut [Mr. MONAGAN].

Mr. MONAGAN. Mr. Speaker, I rise in support of this legislation.

May I, at the beginning, congratulate the chairman of our subcommittee, the gentleman from Ohio [Mr. HAYS], for the skill with which he has brought this legislation through committee and to the floor. At the hearings and at the markup of the bill, he has been fair and tolerant and he has demonstrated a profound knowledge of this legislation and the foreign policy problems of the United States.

In the current contest with the Communists, guns and bombs are not the only weapons that are employed. We are also waging a war of ideas.

One of the insidious tactics of the Communist powers has been to create in the minds of uninformed people an image of the United States which portrays this Nation as a country of crass, worldly, and mercenary culture. In the struggle for survival, it is, therefore, our problem to dispel this misinformation and to make clear to the world the fundamentals upon which this Nation is based and to demonstrate the unique and profound culture that is characteristic of the United States.

It is just this sort of demonstration that will be brought about through the medium of this cultural and educational exchange program. There will be an exchange of teachers, of artists, of learned men, and of leaders. Through this exchange of culture and ideas, the people of the nations involved will get to know and appreciate one another better.

As an example of this exchange, I think of the tour which Hal Holbrook, the noted American actor and portrayer of Mark Twain, made through many of the countries in Europe and of the warm and enthusiastic response which his portrayal evoked in these countries, even in cases where the audience could not understand English.

I think also as another example, of a French schoolteacher from Paris who lived in Waterbury, Conn., for a year and taught in a high school in that city. She brought to Connecticut students a touch of the great culture of France and she, in turn, learned to know and appreciate American students and American families.

With a continuation of exchanges of this sort, the understanding between peoples will grow and the respect for one another will increase. And through this agency, the misrepresentation of our ideals and institutions which has been fostered by the Communists will lose its influence in the minds of other nations of the world.

Mr. KEARNS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KEARNS. Mr. Speaker, I would like to take this occasion to support the Department of State in its use of talented young people from our colleges and universities in our cultural exchange programs.

I was astounded to find that not a single leader from the music, drama, and other fine arts departments of our colleges and universities was recorded as testifying on this bill before the House Foreign Affairs Committee, or the Senate Committee on Foreign Relations.

Father Gilbert Hartke, of Catholic University's famed drama department; Prof. C. Robert Kase, of the University of Delaware's drama department; Dr. Jack Morrison, of the theater arts department of the University of California at Los Angeles; Dr. Howard Hanson, director of the famed Eastman School of Music at the University of Rochester; these and many other distinguished educators from the fine arts departments were either not invited, or no attempt was made by the committee to see that this important aspect of our Nation's educational life was heard. But what purpose did these committees have in hearing only from the professional aspects of the cultural exchange programs and in not hearing from a single great cultural leader who teaches in our colleges and universities?

We are fortunate, indeed, in having young people of great talent and ability in our leading educational institutions who can serve our country well in our cultural exchange programs—and we must use them.

Our Ambassadors report that these young Americans are the best representatives we have, that they are very well disciplined, that they are most courteous, and that they are unusually intelligent—that they do, in fact, compare most favorably with our great professional artists who are sent over at such expense by the Department of State.

Van Cliburn was the first young American artist who became an international celebrity by his prowess in taming the Soviet leaders with his music.

As Congreve once declared—

> Music hath charms to soothe a savage beast. To soften rocks, or bend a knotted oak.

The Howard University Choir traveled through South America, where Vice President Richard M. Nixon once was stoned, and was wildly acclaimed in concert appearances in 37 cities.

The University of Michigan Symphony Band was highly successful in its recent tour of the Soviet Union.

The Scarsdale, N.Y., school troupe was highly successful in its European tour and presented 18 performances of Thornton Wilder's "Our Town" in London, Amsterdam, West Berlin, Warsaw, and Oslo.

Dr. Howard Hanson, distinguished and brilliant president and chairman of the board of the congressionally chartered National Music Council has declared that student groups "contribute even more importantly to the cultural exchange program than the exchange of commercial professional groups."

President Eisenhower stated it best, I think, when he said, in an internationally acclaimed speech at the University of Delhi in December 1959:

> More enduringly than from the deliberations of high councils, I believe mankind will profit when young men and women of all nations and in great numbers study and learn together. In so doing, they will concern themselves with the problems, possibilities, resources, and rewards of their common destiny.
>
> Through the centuries nations have sent their youth armed for war to oppose their neighbors. Let us in this day look on our youth, eager for a larger and clearer knowledge, as forces for international understanding; and send them, one nation to another, on missions of peace.

I think it is most regrettable that so few groups from our educational life have been utilized in the important cultural exchange programs by the Department of State.

The cultural exchange program has had an overwhelming professional and Broadway bias and emphasis.

There has been extensive discussion and newspaper headlines about the high salaries paid by the State Department for some of the well-known professional artists who have been sent abroad by the State Department as part of its cultural exchange program.

There were several lengthy exchanges as to whether these well-known artists were paid $1,500 a week or $2,500 a week.

Some concern was expressed at the time by some of my colleagues on the Democratic side of the aisle.

Let us, for a moment, take the lower figure of $1,500 a week which comes out at $75,000 a year.

This is several times what our most distinguished and battle-scarred generals and admirals, Cabinet officers, Supreme Court Justices, and Members of the Senate and House make.

I think it is high time that some rationality was shown by the managers of this cultural exchange program at the State Department.

The argument has been advanced by some people in the theater that the Congress is not interested in the arts, that it does not understand the arts, and that, in any event, this matter of the cost of talent is not the proper business of Congress.

Some people in the theater, some even closely connected with the American National Theater and Academy, and with these State Department cultural exchange programs, argue in favor of these swollen salaries by declaring that the headline artists who are paid at the rate of $75,000 a year and more by the State Department could exceed this sum in private life.

Doubtless they could make more money in private life, for there are really some astounding salaries paid to some of our well-known artists.

Indeed, a few of these well-known artists, to show their appreciation for such affluence, live abroad, and make their movies abroad—for the purpose of escaping taxation at home in the United States altogether.

I suggest that U.S. artists, who are interested in participating in our Government's cultural programs, study the government-supported and government-aided art programs of Europe.

In European countries, when a well-known artist appears on a government-sponsored program it is considered a high honor both by the artist and by his friends.

In the government-supported and government-aided theaters and opera houses of Europe the greatest artists consider themselves privileged to appear.

They work for but a fraction of what they would make in commercial theaters, music halls, the movies, and on television.

What they get in exchange is the great honor of serving the government and all of the people.

Great restraint and intelligence must be displayed by our leading artists in their demands upon the Federal Government.

If they want the Government to establish meaningful art programs then they must exercise the same self-restraint that the great artists of Europe show in their relations with their national governments.

Perhaps as a result of the continuing public outrage at the high, and unjustified, salaries paid to headline artists by the Department of State in recent months more emphasis is now being put on young artists from our colleges and universities.

In recent months, under the brilliant leadership of the Assistant Secretary of State for Educational and Cultural Affairs, Philip H. Coombs, a new appreciation of these matters has been shown.

There is a new awareness of the contribution that our young unknown artists can make in reaching the young people of other countries—and we in the Congress must do all that we can to encourage and support these person-to-person contacts of the leaders of tomorrow's world.

Our young people are indeed our very best ambassadors.

All that is needed is the willingness by Government officials to give them the chance.

The President and the Secretary of Labor have recently been giving a great deal of attention to the problems of the Metropolitan Opera Co.

The musicians who play in the Metropolitan Opera orchestra are being criticized in some quarters for the wage demands which they are making.

Yet these musicians make under $10,000 a year.

Without them the Metropolitan Opera cannot continue, the great Met stars could not perform.

Let us be clear, there is a world of difference between the $10,000 a year which the members of the Metropolitan Opera orchestra are paid and the $75,000 a year some of our stars, and have-been stars, are paid by the State Department.

I have tried in the brief time at my disposal to shed some light on the subject of Government and the arts, and to take up briefly some of the facts which must be borne in mind in this connection.

The SPEAKER pro tempore. The question is, Will the House suspend the rules and pass the bill, H.R. 8666, as amended?

The question was taken.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently, a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 329, nays 66, not voting 52, as follows:

[Roll No. 191]

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert and Mr. Keogh for, with Mr. Hall against.

Mr. Broyhill and Mr. Anfuso for, with Mr. Alger against.

Mr. Powell and Mr. Buckley for, with Mr. Kilburn against.

Until further notice:

Mrs. Kelly with Mr. Westland.

Mr. Dent with Mr. Siler.

Mr. Evins with Mr. Minshall.

Mr. Morrison with Mr. Baker.

Mr. Thompson of Louisiana with Mr. Bruce.

Mr. TABER changed his vote from "yea" to "nay."

The vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

AMENDING THE IMMIGRATION AND NATIONALITY ACT

Mr. WALTER. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2237) to permit the entry of certain eligible alien orphans, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 101(b) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following new subparagraph (6):

"(6) The term 'eligible orphan' means any alien child under the age of fourteen at the time at which the visa petition is filed pursuant to section 205(b) who is an orphan because of the death or disappearance of both parents, or because of abandonment, or desertion by, or separation or loss from, both parents, or who has only one parent due to the death or disappearance of, abandonment, or desertion by, or separation or loss from the other parent, and the remaining parent is incapable of providing care for such orphan and has in writing irrevocably released him for emigration and adoption."

SEC. 2. Section 101(b)(1) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following:

"(F) a child who is an eligible orphan, adopted abroad by a United States citizen and spouse or coming to the United States for adoption by a United States citizen and spouse: *Provided,* That no natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage be accorded any right, privilege, or status under this Act."

SEC. 3. (a) Section 205(b) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended to read as follows:

"(b) Any citizen of the United States claiming that any immigrant is his spouse or child and that such immigrant is entitled to a nonquota immigrant status under section 101(a)(27)(A), or any citizen of the United States claiming that any immigrant is his parent or unmarried son or unmarried daughter and that such immigrant is entitled to a quota immigrant status under section 203(a)(2), or any alien lawfully admitted for permanent residence claiming that any immigrant is his spouse or his unmarried son or his unmarried daughter and that such immigrant is entitled to a quota immigrant status under section 203(a)(3), or any citizen of the United States claiming that any immigrant is his brother or sister or his married son or his married daughter and that such immigrant is entitled to a preference under section 203(a)(4) may file a petition with the Attorney General. No petition for quota immigrant status or a preference in behalf of a son or daughter under paragraph (2), (3), or (4) of section 203(a) of the Immigration and Nationality Act shall be approved by the Attorney General unless the petitioner establishes that he is a parent as defined in section 101(b)(2) of the Immigration and Nationality Act of the alien in respect to whom the petition is made, except that no such petition shall be approved if the beneficiary thereof is an alien defined in section 101(b)(1)(F). No petition for nonquota immigrant status in behalf of a child as defined in section 101(b)(1)(F) shall be approved by the Attorney General unless the petitioner establishes to the satisfaction of the Attorney General that the petitioner and spouse will care for such child properly if he is admitted to the United States, and (i) in the case of a child adopted abroad, that the petitioner and spouse personally saw and observed the child prior to or during the adoption proceedings, and (ii) in the case of a child coming to the United States for adoption, that the petitioner and spouse have complied with the preadoption requirements, if any, of the State of such child's proposed residence. The petition shall be in such form and shall contain such information and be supported by such documentary evidence as the Attorney General may by regulations prescribe. The petition shall be made under oath administered by any individual having authority to administer oaths, if executed in the United States, but, if executed outside the United States, administered by a consular officer."

(b) The second sentence of section 205(c) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended to read: "Not more than two such petitions may be approved for one petitioner in behalf of a child as defined in section 101(b)(1) (E) or (F), unless necessary to prevent the separation of brothers and sisters."

SEC. 4. The first sentence of section 221(c) of the Immigration and Nationality Act (8 U.S.C. 1201) is hereby amended to read: "An immigrant visa shall be valid for such period, not exceeding four months, as shall be by regulations prescribed, except that any visa issued to a child lawfully adopted by a United States citizen and spouse while such citizen is serving abroad in the United States Armed Forces, or is employed abroad by the United States Government, or is temporarily abroad on business, shall be valid until such time, for a period not to exceed three years, as the adoptive citizen parent returns to the United States in due course of his service, employment, or business."

SEC. 5. (a) Title I of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following:

"JUDICIAL REVIEW OF ORDERS OF DEPORTATION

"SEC. 106. (a) The procedure prescribed by, and all the provisions of the Act of December 29, 1950, as amended (64 Stat. 1129; 68 Stat. 961; 5 U.S.C. 1031 et seq.), shall apply to, and shall be the sole and exclusive procedure for, the judicial review of all final orders of deportation heretofore or hereafter made against aliens within the United States pursuant to administrative proceedings under section 242(b) of this Act or comparable provisions of any prior Act, except that—

"(1) a petition for review may be filed not later than six months from the date of the final deportation order or from the effective date of this section, whichever is the later.

"(2) the venue of any petition for review under this section shall be in the judicial circuit in which the administrative proceedings before a special inquiry officer were conducted in whole or in part, or in the judicial circuit wherein is the residence, as defined in this Act, of the petitioner, but not in more than one circuit;

"(3) the action shall be brought against the Immigration and Naturalization Service, as respondent. Service of the petition to review shall be made upon the Attorney General of the United States and upon the official of the Immigration and Naturalization Service in charge of the Service district in which the office of the clerk of the court is located. The service of the petition for review upon such official of the Service shall stay the deportation of the alien pending determination of the petition by the court, unless the court otherwise directs;

"(4) except as provided in clause (B) of paragraph (5) of this subsection, the petition shall be determined solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial, and probative evidence on the record considered as a whole, shall be conclusive;

"(5) whenever any petitioner, who seeks review of an order under this section, claims to be a national of the United States and makes a showing that his claim is not frivolous, the court shall (A) pass upon the issues presented when it appears from the pleadings and affidavits filed by the parties that no genuine issue of material fact is presented; or (B) where a genuine issue of material fact as to the petitioner's nationality is presented, transfer the proceedings to a United States district court for the district where the petitioner has his residence for hearing de novo of the nationality claim and determination as if such proceedings were originally initiated in the district court under the provisions of section 2201 of title 28, United States Code. Any such petitioner shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise;

"(6) if the validity of a deportation order has not been judicially determined, its validity may be challenged in a criminal proceeding against the alien for violation of subsection (d) or (e) of section 242 of this Act only by separate motion for judicial review before trial. Such motion shall be determined by the court without a jury and before the trial of the general issue. Whenever a claim to United States nationality is made in such motion, and in the opinion of the court, a genuine issue of material fact as to the alien's nationality is presented, the court shall accord him a hearing de novo on the nationality claim and determine that issue as if proceedings had been initiated under the provisions of section 2201 of title 28, United States Code. Any such alien shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise. If no such hearing de novo as to nationality is conducted, the determination shall be made solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial and probative evidence on the record considered as a whole, shall be conclusive. If the deportation order is held invalid, the court shall dismiss the indictment and the United States shall have the right to appeal to the court of appeals within thirty days. The procedure on such appeals shall be as provided in the Federal rules of criminal procedure. No petition for review under this section may be filed by any alien during the pendency of a criminal proceeding against such alien for violation of subsection (d) or (e) of section 242 of this Act; and

"(7) nothing in this section shall be construed to require the Attorney General to

defer deportation of an alien after the issuance of a deportation order because of the right of judicial review of the order granted by this section, or to relieve any alien from compliance with subsections (d) and (e) of section 242 of this Act. Nothing contained in this section shall be construed to preclude the Attorney General from detaining or continuing to detain an alien or from taking him into custody pursuant to subsection (c) of section 242 of this Act at any time after the issuance of a deportation order.

"(8) it shall not be necessary to print the record or any part thereof, or the briefs, and the court shall review the proceedings on a typewritten record and on typewritten briefs.

"(9) any alien held in custody pursuant to an order of deportation may obtain judicial review thereof by habeas corpus proceedings.

"(b) Notwithstanding the provisions of any other law, any alien against whom a final order of exclusion has been made heretofore or hereafter under the provisions of section 236 of this Act or comparable provisions of any prior Act may obtain judicial review of such order by habeas corpus proceedings and not otherwise.

"(c) An order of deportation or of exclusion shall not be reviewed by any court if the alien has not exhausted the administrative remedies available to him as of right under the immigration laws and regulations or if he has departed from the United States after the issuance of the order. Every petition for review or for habeas corpus shall state whether the validity of the order has been upheld in any prior judicial proceeding, and, if so, the nature and date thereof, and the court in which such proceeding took place. No petition for review or for habeas corpus shall be entertained if the validity of the order has been previously determined in any civil or criminal proceeding, unless the petition presents grounds which the court finds could not have been presented in such prior proceeding, or the court finds that the remedy provided by such prior proceeding was inadequate or ineffective to test the validity of the order."

(b) This section shall take effect on the thirtieth day after its approval and, notwithstanding the provisions of any other law, including section 405 of the Immigration and Nationality Act, shall then be applicable to all administrative proceedings involving deportation or exclusion of aliens notwithstanding (1) that the person involved entered the United States prior to the effective date of this section or of the Immigration and Nationality Act or (2) that the administrative proceeding was commenced or conducted prior to the effective date of this section or of the Immigration and Nationality Act. Any judicial proceeding to review an order of deportation which is pending unheard in any district court of the United States on the effective date of this section (other than a habeas corpus or criminal proceeding in which the validity of the deportation order has been challenged) shall be transferred for determination in accordance with this section to the court of appeals having jurisdiction to entertain a petition for review under this section. Any judicial proceeding to review an order of exclusion which is pending unheard on the effective date of this section shall be expedited in the same manner as is required in habeas corpus. All laws or parts of laws inconsistent with this section are, to the extent of such inconsistency, repealed. If any particular provision of this section, or the application thereof to any person or circumstance, is held invalid, the remainder of this section and the application of such provision to other persons or circumstances shall not be affected thereby.

SEC. 6. Section 222 of the Immigration and Nationality Act (8 U.S.C. 1202) is hereby amended by deleting from subsection (a) the language "race and ethnic classification;", and by deleting from subsection (c) the language "his race and ethnic classification;".

SEC. 7. (a) Section 101(d)(1) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by inserting immediately after "December 31, 1946," the following: "or from June 25, 1950, to July 1, 1955,".

(b) Section 101(d)(2) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended (1) by striking out "and (C)" and inserting in lieu thereof "(C)", and (2) by inserting immediately after "December 31, 1946" the following: "; and (D) the term 'Korean hostilities' relates to the period from June 25, 1950, to July 1, 1955".

SEC. 8. (a) Section 329(a) of the Immigration and Nationality Act (8 U.S.C. 1440) is amended by inserting after "December 31, 1946," the following: "or during a period beginning June 25, 1950, and ending July 1, 1955,".

(b) Section 329(b)(4) of the Immigration and Nationality Act (8 U.S.C. 1440) is hereby amended by inserting after "December 31, 1946," the following: "or during a period beginning June 25, 1950, and ending July 1, 1955,".

SEC. 9. Section 202(e) of the Immigration and Nationality Act (8 U.S.C. 1152) is hereby amended to read as follows:

"(e) After the determination of quotas has been made as provided in section 201, revision of the quotas shall be made by the Secretary of State, the Secretary of Commerce, and the Attorney General, jointly, whenever necessary, to provide for any change of boundaries resulting in transfer of territory from one sovereignty to another, a change of administrative arrangements of a colony or other dependent area, or any other political change, requiring a change in the list of quota areas or of the territorial limits thereof. In the case of any change in the territorial limits of quota areas, not requiring a change in the quotas for such areas, the Secretary of State shall, upon recognition of such change, issue appropriate instructions to all consular offices concerning the change in the territorial limits of the quota areas involved. Whenever one or more colonies or other component or dependent areas overseas from the governing country, or one or more quota areas have been subject to a change of administrative arrangements, a change of boundaries, or any other political change, the annual quota of the newly established quota area or the number of visas authorized to be issued under section 202(c)(1), notwithstanding any other provisions of this Act, shall not be less than the sum total of quotas in effect or number of visas authorized for the area immediately preceding the change of administrative arrangements, change of boundaries or other political change."

SEC. 10. Section 205(c) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended by adding at the end thereof the following new sentence: "Notwithstanding the provisions of this subsection, no petition shall be approved if the alien previously has been accorded, by reason of marriage determined by the Attorney General to have been entered into for the purpose of evading the immigration laws—

"(1) a nonquota status under section 101(a)(27)(A) as the spouse of a citizen of the United States, or

"(2) a preference quota status under section 203(a)(3) as the spouse of an alien lawfully admitted for permanent residence."

SEC. 11. Section 212(a)(6) of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended to read as follows:

"(6) Aliens who are afflicted with any dangerous contagious disease;".

SEC. 12. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"(f) Any alien afflicted with tuberculosis in any form who (A) is the spouse or the unmarried son or daughter, or the minor unmarried lawfully adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or of an alien who has been issued an immigrant visa, or (B) has a son or daughter who is a United States citizen, or an alien lawfully admitted for permanent residence or an alien who has been issued an immigrant visa, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence in accordance with such terms, conditions, and controls, if any, including the giving of a bond, as the Attorney General, in his discretion after consultation with the Surgeon General of the United States Public Health Service, may by regulations prescribe."

SEC. 13. Section 212(a)(9) of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by changing the semicolon at the end to a period, and adding thereafter the following: "Any alien who would be excludable because of the conviction of a misdemeanor classifiable as a petty offense under the provisions of section 1(3) of title 18, United States Code, by reason of the punishment actually imposed, or who would be excludable as one who admits the commission of an offense that is classifiable as a misdemeanor under the provisions of section 1(2) of title 18, United States Code, by reason of the punishment which might have been imposed upon him, may be granted a visa and admitted to the United States if otherwise admissible: *Provided*, That the alien has committed only one such offense, or admits the commission of acts which constitute the essential elements of only one such offense."

SEC. 14. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"(g) Any alien, who is excludable from the United States under paragraphs (9), (10), or (12) of this section, who (A) is the spouse or child, including a minor unmarried adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or (B) has a son or daughter who is a United States citizen or an alien lawfully admitted for permanent residence, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence (1) if it shall be established to the satisfaction of the Attorney General that (A) the alien's exclusion would result in extreme hardship to the United States citizen or lawfully resident spouse, parent, or son or daughter of such alien, and (B) the admission to the United States of such alien would not be contrary to the national welfare, safety, or security of the United States; and (2) if the Attorney General, in his discretion, and pursuant to such terms, conditions, and procedures as he may by regulations prescribe, has consented to the alien's applying or reapplying for a visa and for admission to the United States."

SEC. 15. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"(h) Any alien who is the spouse, parent, or child of a United States citizen or of an alien lawfully admitted for permanent residence and who is excludable because (1) he seeks, has sought to procure, or has procured, a visa or other documentation, or entry into the United States, by fraud or misrepresentation, or (2) he admits the commission of perjury in connection therewith, may be granted a visa and admitted to the United

States for permanent residence, if otherwise admissible, if the Attorney General in his discretion has consented to the alien's applying or reapplying for a visa and for admission to the United States."

SEC. 16. Section 241 of the Immigration and Nationality Act (8 U.S.C. 1251) is hereby amended by adding the following:

"(f) The provisions of this section relating to the deportation of aliens within the United States on the ground that they were excludable at the time of entry as aliens who have sought to procure, or have procured visas or other documentation, or entry into the United States by fraud or misrepresentation shall not apply to an alien otherwise admissible at the time of entry who is the spouse, parent, or a child of a United States citizen or of an alien lawfully admitted for permanent residence."

SEC. 17. Section 310 of the Immigration and Nationality Act (8 U.S.C. 1421) is hereby amended by adding the following additional subsection:

"(e) Notwithstanding the provisions of section 405(a), any petition for naturalization filed on or after the enactment of this subsection shall be heard and determined in accordance with the requirements of this title."

SEC. 18. (a) Section 340(a) of the Immigration and Nationality Act (66 Stat. 260; 8 U.S.C. 1451(a)) is hereby amended by inserting, following the language "that such order and certificate of naturalization" the language "were illegally procured or".

(b) Section 340(b) of the Immigration and Nationality Act (66 Stat. 260; 8 U.S.C. 1451(b)) is hereby amended by inserting, immediately preceding the word "procured", the language "illegally procured or".

SEC. 19. Section 349 of the Immigration and Nationality Act (8 U.S.C. 1481) is hereby amended by adding the following subsection:

"(c) Whenever the loss of United States nationality is put in issue in any action or proceeding commenced on or after the enactment of this subsection under, or by virtue of, the provisions of this or any other Act, the burden shall be upon the person or party claiming that such loss occurred, to establish such claim by a preponderance of the evidence. Except as otherwise provided in subsection (b), any person who commits or performs, or who has committed or performed, any act of expatriation under the provisions of this or any other Act shall be presumed to have done so voluntarily, but such presumption may be rebutted upon a showing, by a preponderance of the evidence, that the act or acts committed or performed were not done voluntarily."

SEC. 20. Section 354(4) of the Immigration and Nationality Act (8 U.S.C. 1486) is hereby amended to read as follows:

"(4) who has attained the age of sixty years, and has had a residence outside of the United States and its outlying possessions for not less than ten years, during all of which period he has been engaged in an occupation of the type designated in paragraphs (1), (2), or (4) of section 353, or paragraph (2) of this section, and who is in bona fide retirement from such occupation; or who is the spouse or child of the national described in this paragraph and who has his residence abroad for the purpose of being with such American citizen spouse or parent; or".

SEC. 21. The language "CHAPTER 3—ISSUANCE ON ENTRY DOCUMENTS" of the table of contents of the Immigration and Nationality Act, as amended, is hereby amended to read as follows:

"CHAPTER 3—ISSUANCE OF ENTRY DOCUMENTS"

SEC. 22. (a) The title preceding section 212 of the Immigration and Nationality Act, as amended, is hereby amended to read as follows:

"GENERAL CLASSES OF ALIENS INELIGIBLE TO RECEIVE VISAS AND EXCLUDED FROM ADMISSION; WAIVERS OF INADMISSIBILITY"

(b) The title preceding section 329 of the Immigration and Nationality Act, as amended, is amended to read as follows:

"NATURALIZATION THROUGH ACTIVE-DUTY SERVICE IN ARMED FORCES DURING WORLD WAR I OR WORLD WAR II OF THE KOREAN HOSTILITIES"

SEC. 23. (a) The table of contents (TITLE I—GENERAL) of the Immigration and Nationality Act is hereby amended by adding the following:

"SEC. 106. Judicial review of orders of deportation."

(b) Section 212 of the table of contents of the Immigration and Nationality Act is hereby amended to read as follows:

"SEC. 212. General classes of aliens ineligible to receive visas and excluded from admission; waivers of inadmissibility."

(c) Section 329 of the table of contents of the Immigration and Nationality Act, is hereby amended to read as follows:

"SEC. 329. Naturalization through active-duty service in Armed Forces during World War I or World War II or the Korean hostilities."

SEC. 24. (a) The following Acts and all amendments thereto and parts of Acts and all amendments thereto are repealed:

(1) Section 4 of the Act of September 3, 1954 (68 Stat. 1145; 8 U.S.C. 1182a);

(2) Section 4 of the Act of September 11, 1957 (71 Stat. 639-640; 8 U.S.C. 1205).

(3) Sections 5, 6, and 7 of the Act of September 11, 1957 (71 Stat. 640-641; 8 U.S.C. 1182b; 8 U.S.C. 1182c; 8 U.S.C. 1251a).

(4) Section 15 of the Act of September 11, 1957 (71 Stat. 643-644; 50 U.S.C. App. 1971a, note);

(5) Sections 9 and 12 of the Act of September 11, 1957 (71 Stat. 641-642; 8 U.S.C. 1255a; 8 U.S.C. 1153, note);

(6) Section 2 of the Act of August 21, 1958 (72 Stat. 699; 8 U.S.C. 1255; 8 U.S.C. 1153, note);

(7) Sections 4 and 6 of the Act of September 22, 1959 (73 Stat. 644-645; 8 U.S.C. 1153, note).

(b) Paragraphs (5), (6), and (7) of subsection (a) of this section shall take effect upon the expiration of the one hundred and eightieth day immediately following the date of enactment of this Act.

SEC. 25. (a) Any alien eligible for a quota immigrant status under the provisions of section 203(a) (2) or (3) of the Immigration and Nationality Act on the basis of a petition approved by the Attorney General prior to June 30, 1961, shall be held to be a nonquota immigrant and, if otherwise admissible under the provisions of that Act, shall be issued a nonquota immigrant visa: *Provided*, That, upon his application for an immigrant visa, and for admission to the United States, the alien is found to have retained his relationship to the petitioner, and status, as established in the approved petition.

(b) At any time prior to the expiration of the one hundred and eightieth day immediately following the enactment of this Act a special nonquota immigrant visa may be issued to an eligible orphan as defined in section 4 of the Act of September 11, 1957, as amended (8 U.S.C. 1205; 71 Stat. 639, 73 Stat. 490, 74 Stat. 505), if a visa petition filed in behalf of such eligible orphan was (A) approved by the Attorney General prior to June 30, 1961, or (B) pending before the Attorney General prior to June 30, 1961, and the Attorney General approves such petition.

The SPEAKER pro tempore. Is a second demanded?

Mr. POFF. I demand a second, Mr. Speaker.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. WALTER. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, this legislation grew out of the Judiciary Committee's continuous observation and studies of the administration of the basic immigration code, the Immigration and Nationality Act, enacted on June 27, 1952.

RESULTS OF EXPERIENCE

In the course of the 9 years which elapsed since the first codification of immigration and nationality laws in the history of the United States, several related laws were placed on the statute books. Most of those, beginning with the Refugee Relief Act of 1953, were temporary in nature and designed to meet events of an emergency nature. Other laws enacted in the field of immigration during that time were statutes providing relief for certain defined categories of U.S. citizens and aliens. Those laws stemmed from the rather exacting work which the Judiciary Committee has before it continuously in connection with private relief legislation. These, together with the special emergency laws I mentioned a while ago, served to test the effect of this type of legislation upon the individuals affected and upon the national interest, first and foremost in our minds.

The effects of these enactments—I can assure the House—were carefully observed, reviewed, and investigated by the committee.

Conclusions based on the experience gained over the years, were carefully drawn. The results of this labor are today before the House.

EXISTING LAWS CODIFIED

Several of the enactments, not originally included in the basic Walter-McCarran Act for the purpose of testing their effects as well as giving the administrators of the law the opportunity to develop proper practices and procedures, are now proposed to be made part of the permanent code.

Sections 11, 12, 13, 14, 15, and 16 contain provisions of the 1954 and 1957 statutes now proposed to be properly codified, with minor revisions fully explained in the rather extensive report—House Report No. 1086—accompanying this legislation.

ADOPTED ORPHANS

Another temporary statute, extended periodically in the last few years on an annual basis and now proposed to be made part of the permanent law is contained in sections 1, 2, 3, and 4 of the bill. These provisions are designed to facilitate the entry of alien orphans adopted by U.S. citizens.

The eligibility requirements would, under the proposed amendment, remain virtually unchanged except for the rules governing a carefully worked out petition procedure prescribed in section 3 of

the amendatory language. The purpose of the changes is to eliminate abuses and hardships resulting from the regrettable practice of adopting abroad a child, or children, never seen by the adoptive parents and heretofore coming to the United States on the strength of a "proxy" adoption secured in a foreign country through the intercession of agents without compliance with the applicable provisions of the adoption laws effective in the State of the child's future residence.

The procedure set forth in the bill clearly differentiates between (a) the alien child who, prior to the institution or during the pendency of adoption proceedings abroad, has been seen and observed by the adoptive parents, and (b) the child who may have been selected abroad, possibly through the good offices of a third party, and would be coming to the United States for adoption in accordance with applicable State statutes. A full and complete investigation conducted by the Immigration and Naturalization Service would be required in either case.

The Department of Health, Education, and Welfare has strongly recommended the enactment of this procedure. Obviously, the Department was prompted by the same experience which motivated the committee to recommend it. The principal reason for redesigning the admission procedures affecting adopted orphans was to eliminate the reprehensible practice which crept into the administration of the temporary statute. Instances of outright racketeering, including actual sale of alien children for adoption, were revealed in criminal proceedings where convictions occurred.

The credit for bringing to the attention of the Congress these and other similarly abhorrent practices goes to Hon. Janet Hill Gordon, member of the Senate of the State of New York and the chairman of the New York State Joint Legislative Committee on Matrimonial and Family Laws. We are indebted, indeed, to Senator Gordon and to her colleagues and staff assistants for bringing to our attention not only the practices of the shady dealers in proxy adoptions, but for submitting to our counterpart committee in the Senate the important information relating to the legal difficulties already visible in several States where lack of compliance with the applicable State law has caused untold hardship to the adoptive parents and to-be-adopted field.

I wish to include at this point a list of State departments of public welfare and many reputable public and private organizations fully endorsing the provisions of this bill as they relate to sight unseen adoptions:

1. Department of Public Welfare, State of Georgia.
2. Department of Public Welfare, Commonwealth of Massachusetts.
3. Department of Public Welfare, State of Wisconsin.
4. Department of Public Welfare, State of Delaware.
5. Department of Public Welfare, State of Minnesota.
6. Commission on Children and Youth, State of Iowa.
7. Department of Public Welfare, State of Maryland.
8. Division of Public Welfare, State of Nebraska.
9. General Assembly, State of Connecticut.
10. Department of Public Welfare, State of Pennsylvania.
11. Department of Public Welfare, State of Illinois.
12. Department of Public Welfare, State of Mississippi.
13. Department of Pensions and Security, State of Alabama.
14. Department of Welfare, State of Connecticut.

28. Family and Children's Service, Pittsburgh, Pa.
29. Children's Aid Association, Northampton, Mass.

And the Departments of State, Justice, and Health, Education, and Welfare.

JUDICIAL REVIEW

Section 5 of the bill contains provisions of legislation which the House is well familiar with, having approved it in the past on three separate occasions without, so far, having the benefit of concurrent action in the other body.

This section of the bill incorporates provisions relating to judicial review of orders of deportation and exclusion of aliens entered by the Attorney General. The purpose of this legislation is to put order in a field where the ability to pay high attorney's fees for thwarting the administration of our immigration laws has permitted the most undesirable alien element—the alien racketeer and the subversive—to remain in this country, in violation of the law, practically indefinitely by abusing judicial processes.

I have stated before, and I wish to restate my belief that the Congress owes the American people the enactment of this legislation simply as a measure of self-defense and a reassertion of the people's inherent right to refuse to extend our hospitality to those who skillfully use the American legal system for the very purpose of destroying it. The enactment of this law is a most urgent necessity.

CHANGE IN APPLICATION FORMS

Section 6 of the bill removes the designation of "race and ethnic classification" from visa applications. Inasmuch as race and ethnic classification have no bearing on admission into the United States, this language, apparently offensive to some of the aliens desiring to visit us, is proposed to be eliminated.

VETERANS OF KOREAN HOSTILITIES

The veterans of Korean hostilities are being granted, under sections 7 and 8 of the bill, the same naturalization rights as enjoyed under existing law by veterans of World War I and World War II. An identical bill, introduced by the gentleman from California [Mr. SHELLEY], passed the House more than a year ago but was not acted upon in the other body due to early adjournment.

NEW INDEPENDENT COUNTRIES

Section 9 of the bill proposes to bring the basic law in accordance with certain events which occurred since its enactment. This provision would permit the realinement of certain immigration quotas necessitated by the emergence of new, independent nations in the Western as well as in the Eastern Hemisphere.

Inasmuch as there are now 20 independent countries, recognized by the United States, in the geographical area described by law as the "Asia-Pacific triangle," the existing 2,000 quota ceiling imposed on that area as a whole, is proposed to be removed so that in the event that an additional independent country located in that area obtains U.S. recognition, a quota of 100 annually could be proclaimed for its nationals. The proclamation of independence of Western Samoa is expected in January 1962.

Similarly, anticipating the forthcoming assumption of an independent status by the West Indies Federation, this section of the bill proposes to assure to this, or similar new political entities, an immigration quota equal to the total of subquotas or quotas now available for each of the component parts of such a new entity.

To cite an example, upon the merger of Syria and Egypt into the United Arab Republic, the new entity was allocated only 100 quota numbers annually, while prior to the merger each of the two component parts had a 100 quota for itself. This situation will be corrected under section 9 of this legislation.

ELIMINATION OF ABUSES AND LAXITIES

Sections 10, 17, 18, and 19 are designed to correct (a) abuses resorted to by unscrupulous aliens who desire to obtain preferential status by resorting to fraudulent marriages and (b) to correct laxities stemming from judicial and administrative misrepresentations or misapplications of the spirit and the letter of title III of the Immigration and Nationality Act, the title related to nationality and naturalization.

The main purpose of the latter proposals—sections 17, 18, and 19—is to uphold and preserve the dignity and the priceless value of U.S. citizenship with all the attendant obligations incumbent upon a citizen of this country regardless of whether such citizenship was acquired at birth or by legal processes. The committee strongly recommends the enactment of these provisions as it sees in them a legal instrumentality designed to forestall the gradual erosion of our nationality laws.

REUNITING FAMILIES

Section 20 of the amended bill will serve to preserve family unity by permitting the spouse and the children of a naturalized, retired U.S. citizen over 60 years of age to remain with the spouse or parent, respectively, without losing U.S. citizenship, if such was acquired by naturalization.

Section 25, uncodified, consists of two subsections. Subsection (a) contains special relief provisions enabling nonquota entry of parents and unmarried sons and daughters of U.S. citizens, and spouse and the unmarried children of lawfully residing aliens where separation of families results in hardship. Subsection (b) authorizes the processing to completion within 6 months of those cases of adopted orphans in which applications for entry were filed with the Attorney General prior to the expiration of the temporary law on June 30, 1961.

TECHNICAL PROVISIONS

Sections 21, 22, 23, and 24 are strictly technical in nature. Their purpose is to incorporate new law into the proper titles, chapters, and sections of the basic act and to repeal laws now becoming obsolete or proposed to be made part of the Immigration and Nationality Act.

Mr. Speaker, I hope we may have unanimous action on this legislation.

Mr. ROOSEVELT. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from California.

Mr. ROOSEVELT. Mr. Speaker, I would like to say to the gentleman from Pennsylvania that I think this is a very fine bill in every respect. I congratulate the gentleman. This bill will serve many humanitarian purposes without in any way hurting the security of our country. Again, Mr. Speaker, I wish to congratulate my colleague.

Mr. WALTER. I thank the gentleman from California. We have spent several years on these amendments, and we believe we have met whatever legitimate criticism we have heard with respect to our immigration laws.

Mr. SHELLEY. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from California.

Mr. SHELLEY. With reference to the Korean war veterans, has the committee used the dates that were in the bill last year?

Mr. WALTER. Yes, I will say to the gentleman from California, we took his bill in toto and this language in sections 7 and 8 is exactly the same as the Shelley bill which passed the House the last Congress—by unanimous consent, I might add.

Mr. SHELLEY. I thank the chairman of my committee and extend my compliments and commendations to the gentleman and his committee for the way they have worked this bill out. I think it is an improvement in our immigration laws.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I want to commend the distinguished chairman of the Committee on Immigration, Mr. WALTER, for bringing this measure from his committee. It includes many facets of immigration legislation which I have long favored and advocated. Not only does this bill include a measure concerning alien orphans, but also it includes provisions for reuniting families long separated by residence in different nations.

If this body approves S. 2237, it will have taken a step in amending our immigration and naturalization laws which I have advocated for some time. I refer to section 2 of S. 2237 which incorporates as permanent law a provision of our immigration laws which in the past has been handled by temporary extensions enacted by the Congress. This is the provision dealing with the immigration and adoption of alien orphans.

For the past several years, the Congress has continued in force the alien orphan provisions of our immigration laws, but in all instances the provision was in effect for a period of not more than 2 years. Under this portion of the law, thousands of orphans have entered the United States having been adopted by American citizens. They have provided a home for these parentless children who, in many cases, would otherwise lead a life of despair, lacking the love and affection that only a parent can give. I am indeed happy that the Committee on the Judiciary has seen fit to recommend the passage of this piece of humanitarian legislation, and I hope that this great body, representing all the people of these United States of ours, will concur in the committee's recommendations. The lives of thousands of helpless little children, as well as many American couples, will be brightened by the enactment of S. 2237.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Speaker, I commend the gentleman from Pennsylvania and the members of the committee for bringing this bill in. I am particularly pleased that you kept the age at 14. I note that the other body had reduced the age to 10, which I think would have worked terrible hardships on families and would have split up families. I am delighted to see that you kept the age at 14.

Mr. WALTER. Of course, when we were studying this problem, we found that many of our military personnel who had been abroad for long periods of time had adopted children who had gotten older than 10 years, the age limit originally contemplated. We certainly did not want to exclude them and that is why we decided upon the age as it appears now in the bill. Section 4 of the bill provides further relief in this type of situations by extending the time of validity of the child's visa.

Mr. BOLAND. I thank the gentleman.

Mr. MAHON. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Texas.

Mr. MAHON. How many aliens or non-American citizens may probably be admitted under this provision to which the gentleman has referred? How big is this number of people involved?

Mr. WALTER. Except for the adopted orphans, this bill does not provide for the admission of one more person than would ultimately be admissible. It does not increase the total intake of aliens over the years.

Mr. MAHON. It would expedite the admission of probably how many people?

Mr. WALTER. I think it involves 11,000 people in second and third preference categories all over the world. These are spouses and unmarried children of lawfully admitted aliens and parents and unmarried sons, and daughters of U.S. citizens.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Minnesota.

Mr. JUDD. May I commend the gentleman from Pennsylvania for his leadership in this as well as in so many other important fields. I am gratified that he and the other members of his committee have brought out this bill. I, too, have introduced legislation on the orphan matter. But I want to speak, particularly, of the provision which will allow families to be united in cases where the spouses and dependent children would ultimately be admitted anyway because the alien now here has been lawfully admitted for permanent residence. This will remove a really terrible hardship in many, many cases, and will benefit, not injure, our country.

Mr. Speaker, this is a very meritorious bill and I am glad that the gentleman has taken this farsighted step in preparing and sponsoring it.

Mr. WIDNALL. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from New Jersey.

Mr. WIDNALL. Mr. Speaker, I, too, would like to commend the chairman of the committee for bringing out a very progressive bill and for taking several steps forward that are very badly needed in this field. I am disturbed about one section of the bill, and I would like to ask a few questions about it. I am particularly familiar with the program that has been carried on with Korean orphans through the Harry Holt Orphanage in Korea, and there are a number of people in my district that have adopted children through proxy adoptions from that orphanage. Would this bill kill that program?

Mr. WALTER. No; it would not. However, the adoptions must be made in accordance with the laws of the State of the child's future residence. In your instance, the adoption would have to be in accordance with the laws of the State of New Jersey.

Mr. WIDNALL. If it was to take effect, it would really kill the bill in New Jersey. What I am disturbed about is this: I have seen firsthand so many instances of fine little children brought in from Korea and a happy family life created for them; children of GI's over in Korea. They have been screened through the Harry Holt Orphanage over there. And, there has been a very real close community developed, such as the gathering they have every year on the Lehrke farm up in my district. This past year they had 200 parents and children, and it is really a people-to-people humanitarian effort, a voluntary effort, without any Government expense.

And, I do not know of any abuses in that program.

Mr. WALTER. Well, I could tell the gentleman about many abuses, but I will not. The good cases that you are talking about would not be affected by the new law. However, those cases where children have been brought to the United States that are imbeciles and insane and not placed in proper homes, and not subject to adoption in the State, which has happened, would not happen now because the State departments of welfare will have a voice in this matter together with State courts.

Mr. WIDNALL. Well, is it not true that under the current program they have to be screened as to health before they are admitted and also checked through the immigration authorities?

Mr. WALTER. That is fully covered in the bill and in the report on pages 7 and 8. It was also covered in my remarks explaining the bill.

Mr. BALDWIN. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from California.

Mr. BALDWIN. On this same point, there are a considerable number of families in my district that have adopted Korean orphans under this Harry Holt adoption program, and in practically every case it has worked out extremely well. If I understand correctly, I think the California laws are basically the same as the New Jersey laws. They cannot adopt them under California laws until they are actually in California.

Mr. WALTER. The gentleman is not correct. The child in category (ii) on page 6 of the bill does not have to be adopted by "proxy" in order to be brought here for adoption.

Mr. BALDWIN. I have received some wires on this bill, wires that imply that if this bill is passed it would be necessary for any future adoptive parents in California to fly over to Korea before they actually could carry through one of these Korean orphanage admissions; is that correct?

Mr. WALTER. That is either deliberate misinformation or ignorance of the bill, one or the other. It is entirely incorrect.

Mr. BALDWIN. In other words, then, the person desiring to adopt the orphan would not have to go to Korea but the orphan could come to the United States and then the person proceed to adopt under California law.

Mr. WALTER. That is right.

Mr. POFF. Mr. Speaker, I want to underscore the importance of section 5. The provisions of that section have heretofore on three separate occasions been approved by this House. That section would for the first time establish a single, specific statutory procedure for judicial review of orders of exclusion and deportation of ineligible and undesirable aliens.

A series of Federal court decisions has precipitated chaos in the channels of appellate procedure. This chaos has been skillfully exploited by astute lawyers employed by subversive and criminal aliens with funds acquired in criminal and un-American pursuits. By shopping about for legal forums with congested dockets, by filing frivolous and dilatory pleas, and by calculated abuse of the Habeas Corpus Act these undesirable aliens with ill-gotten gains have been able to delay and sometimes to thwart altogether the enforcement of lawful deportation and exclusion orders.

Section 5 of this bill confines venue to the jurisdiction in which the alien resides or in which the administrative order was entered. A petition for a review of such an order must be filed within 6 months of its entry in the circuit court of appeals serving that jurisdiction. The writ of habeas corpus is preserved specifically to an alien under an order of exclusion and to an alien held in custody under an order of deportation. However, a subsequent petition for habeas corpus will not be entertained unless the alien show, first, that he has exhausted all administrative remedies, and second, that the validity of the order of deportation has not previously been judicially determined. This is merely an affirmation of the time-honored doctrine of res judicata.

Mr. Speaker, the provisions of section 5 were recommended by former President Eisenhower in two separate messages. President Kennedy, speaking through the Deputy Attorney General, has also urged "the early enactment of the bill." In summary, I think it is fair to say that section 5 will adequately protect every legitimate right of every alien and most certainly will promote the legitimate interests and national security of the United States.

Mr. Speaker, I ask unanimous consent that all Members may have permission to insert their remarks in the RECORD at this point on this bill. I have no further requests for time.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. BOLAND] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. BOLAND. Mr. Speaker, I rise in support of S. 2237, as amended, to permit the entry into the United States of certain eligible alien orphans, and to provide legislation designed to facilitate the reunification of certain families of U.S. citizens and immigrants experiencing hardship due to separation.

I want to take this opportunity to compliment members of the Immigration Subcommittee, under the distinguished chairmanship of the gentleman from Pennsylvania, Congressman WALTER, for taking action and favorably reporting this legislation so that Members of the House can act in this session of Congress on these important and humane matters.

I am particularly pleased that the Walter amendment to the bill makes permanent the admittance of eligible alien orphans. The subcommittee members are to be commended for also providing for the 14-year-old age limit of eligible orphans rather than the previous age limit of 10 years.

Since 1948 Congress has provided for some form of orphan program. During this time some 17,000 orphaned or abandoned children have been able to acquire a home and proper care with American couples. The legislation makes the program permanent and provides that not more than two special nonquota immigrant visas may be issued to orphans adopted by any one U.S. citizen and spouse, unless necessary to prevent the separation of brothers and sisters. This is a sound program and it will mean much in the lives of the persons affected.

The legislation also authorizes the issuance of nonquota immigrant visas to aliens who have been accorded preferential status under the Immigration and Nationality Act pursuant to petitions filed by their relatives and approved by the Attorney General prior to last June 30. This provision is designed to expedite the reunification of certain families of citizens of the United States and immigrants admitted for permanent residence.

Aliens benefiting from the enactment of this proposal are the parents and unmarried sons and daughters of U.S. citizens; and spouses and unmarried sons and daughters of immigrants lawfully admitted for permanent residence. Some of the most heart rending appeals made to me as a Congressman are from constituents who are separated by oceans from their husbands or wives, parents, sons and daughters. Some of these people have been striving for years to have their family reunited, but their loved ones have had to remain overseas and await their turn on a quota list. Enactment of this bill will hasten the day when these relatives can come to American shores to take up permanent residence under the one roof where they ought to be.

Mr. Speaker, I urge that the legislation be enacted.

The SPEAKER pro tempore. The question is, Will the House suspend the rules and pass the bill S. 2237?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

The title of the bill was amended to read: "An Act to amend the Immigration and Nationality Act; and for other purposes."

AMENDMENT OF SMALL BUSINESS INVESTMENT ACT OF 1958

Mr. PATMAN. Mr. Speaker, I move to suspend the rules and pass the bill (S. 902) to amend the Small Business Investment Act of 1958, and for other purposes, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this

Act may be cited as the "Small Business Investment Act Amendments of 1961".

SEC. 2. Section 103 of the Small Business Investment Act of 1958 is amended—

(1) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) the terms 'small business investment company', 'company', and 'licensee' mean a company approved by the Administration to operate under the provisions of this Act and issued a license as provided in section 301 (c);"; and

(2) by striking out "and" at the end of paragraph (5), by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and by adding after paragraph (6) the following new paragraph:

"(7) the term 'license' means a license issued by the Administration as provided in section 301(c)."

SEC. 3. (a) Section 302(a) of the Small Business Investment Act of 1958 is amended by striking out the second sentence and inserting in lieu thereof the following: "In order to facilitate the formation and growth of small business investment companies, the Administration is hereby authorized, notwithstanding any other provisions of law (but only to the extent that the necessary funds are not available to the company involved from private sources), to purchase the debentures of any such company in an amount not to exceed the lesser of $500,000 or the amount of the paid-in capital and surplus of the company from other sources; but debentures of a small business investment company may be purchased by the Administration under this subsection only during such period (in no case ending more than three years after the date of the issuance of its license under section 301(c) or the date of the enactment of the Small Business Investment Act Amendments of 1961, whichever is later) as may be fixed by the Administration."

(b) Section 302(b) of such Act is amended by striking out "1 percent of its capital and surplus" and inserting in lieu thereof "2 percent of its capital and surplus".

SEC. 4. (a) The first sentence of section 303(b) of the Small Business Investment Act of 1958 is amended by inserting after "is authorized" the following: "(but only to the extent that the necessary funds are not available to the company involved from private sources)".

(b) The second sentence of section 303 (b) of such Act is amended to read as follows: "The total amount of obligations of any one company which may be purchased and outstanding at any one time by the Administration under this subsection (including commitments to purchase such obligations) shall not exceed 50 percent of the paid-in capital and surplus of such company or $5,000,000, whichever is less."

(c) Section 303(b) of such Act is further amended by adding at the end thereof the following new sentence: "All loans made by the Administration under this subsection shall be of such sound value as reasonably to assure repayment."

(d)(1) Section 303 of such Act is further amended by adding at the end thereof the following new subsection:

"(c) The proceeds of loans made by the Administration to small business investment companies under subsection (b) shall not be used by such companies for investments and loans aggregating more than $500,000 in the case of any single enterprise. Accordingly, so long as any portion of a loan made by the Administration to a small business investment company under subsection (b) remains unpaid, such company shall maintain assets consisting of cash, eligible Government obligations, and portfolio investments and loans which do not exceed $500,000 in the case of any single enterprise equal in total face value to no less than the unpaid principal amount of the loan under subsection (b)."

(2) The amendment made by paragraph (1) shall apply only with respect to loans disbursed by the Small Business Administration under section 303(b) of the Small Business Investment Act of 1958 on or after the date of the enactment of this Act; except that such amendment shall not apply with respect to any such loan disbursed pursuant to a commitment or loan authorization issued by the Administration before such date.

SEC. 5. Section 304 of the Small Business Investment Act of 1958 is amended by adding at the end thereof the following new subsection:

"(d) Equity capital provided to incorporated small business concerns under this section may be provided directly or in cooperation with other investors, incorporated or unincorporated, through agreements to participate on an immediate basis."

SEC. 6. Section 305(b) of the Small Business Investment Act of 1958 is amended by striking out "other lending institutions" and inserting in lieu thereof "other lenders, incorporated or unincorporated,".

SEC. 7. Section 308(a) of the Small Business Investment Act of 1958 is amended to read as follows:

"(a) Wherever practicable the operations of a small business investment company, including the generation of business, may be undertaken in cooperation with banks or other investors or lenders, incorporated or unincorporated, and any servicing or initial investigation required for loans or acquisitions of securities by the company under the provisions of this Act may be handled through such banks or other investors or lenders on a fee basis. Any small business investment company may receive fees for services rendered to such banks and other investors and lenders."

SEC. 8. Title III of the Small Business Investment Act of 1958 is amended by adding after section 308 the following new sections:

"ENFORCEMENT PROCEDURES

"SEC. 309. (a) A license may be revoked by the Administration—

"(1) for false statements knowingly made in any written statement required under this title, or under any regulation issued under this title by the Administration, for the purpose of obtaining the license;

"(2) because of facts coming to the attention of the Administration which existed prior to the time the license was issued and which, if known at that time, would have justified the Administration in refusing to issue the license;

"(3) for willful or repeated violation of, or willful or repeated failure to observe, any provision of this Act;

"(4) for willful or repeated violation of, or willful or repeated failure to observe, any rule or regulation of the Administration authorized by this Act; or

"(5) for violation of, or failure to observe, any cease and desist order issued by the Administration under this section.

"(b) Where a licensee has not complied with any provision of this Act, or of any regulation issued under this Act by the Administration, the Administration may order such licensee to cease and desist from such action or failure to act; and the Administration may further order such licensee to take such action or to refrain from such action as the Administration deems necessary to ensure compliance with the Act and the regulations. The Administration may also suspend the license of such licensee until the licensee has complied with such order.

"(c) Before revoking a license pursuant to subsection (a), or issuing a cease and desist order or suspending a license pursuant to subsection (b), the Administration shall serve upon the licensee involved an order to show cause why an order revoking the license or a cease and desist order or an order suspending the license should not be issued. Any such order to show cause shall contain a statement of the matters of fact and law asserted by the Administration and the legal authority and jurisdiction under which a hearing is to be held, and shall inform the licensee that a hearing will be held before the Administration at a time and place stated in the order. If after hearing, or a waiver thereof, the Administration determines on the record that an order revoking the license or a cease and desist order or an order suspending the license should issue, it shall issue such order, which shall include a statement of the findings of the Administration and the grounds and reasons therefor and specify the effective date of the order, and shall cause the order to be served on the licensee.

"(d) The Administration may require by subpena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to the hearing from any place in the United States. Witnesses summoned before the Administration shall be paid by the party at whose instance they were called the same fees and mileage that are paid witnesses in the courts of the United States. In case of disobedience to a subpena, the Administration, or any party to a proceeding before the Administration, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents.

"(e) An order issued by the Administration under this section shall be final and conclusive unless within thirty days after the service thereof the licensee appeals to the United States court of appeals for the circuit in which such licensee has its principal place of business by filing with the clerk of such court a petition praying that the Administration's order be set aside or modified in the manner stated in the petition. After the expiration of such thirty days, a petition may be filed only by leave of court on a showing of reasonable grounds for failure to file the petition theretofore. The clerk of the court shall immediately cause a copy of the petition to be delivered to the Administration, and the Administration shall thereupon certify and file in the court a transcript of the record upon which the order complained of was entered. If before such record is filed the Administration amends or sets aside its order, in whole or in part, the petitioner may amend the petition within such time as the court may determine, on notice to the Administration. The filing of a petition for review shall not of itself stay or suspend the operation of the order of the Administration, but the court of appeals in its discretion may restrain or suspend, in whole or in part, the operation of the order pending the final hearing and determination of the petition. The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way. The court may affirm, modify, or set aside the order of the Administration. If the court determines that the just and proper disposition of the case requires the taking of additional evidence, the court shall order the Administration to reopen the hearing for the taking of such evidence, in such manner and upon such terms and conditions as the court may deem proper. The Administration may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file its modified or new findings and the amendments, if any, of its order, with the record of such additional evidence. No objection to an order of the Administration shall be considered by the court unless such objection was urged before the Administration or, if it was not so urged, unless there

were reasonable grounds for failure to do so. The judgment and decree of the court affirming, modifying, or setting aside any such order of the Administration shall be subject only to review by the Supreme Court of the United States upon certification or certiorari as provided in section 1254 of title 28, United States Code.

"(f) If any licensee against which an order is issued under this section fails to obey the order, the Administration may apply to the United States court of appeals, within the circuit where the licensee has its principal place of business, for the enforcement of the order, and shall file a transcript of the record upon which the order complained of was entered. Upon the filing of the application the court shall cause notice thereof to be served on the licensee. The evidence to be considered, the procedure to be followed, and the jurisdiction of the court shall be the same as is provided in subsection (e) for applications to set aside or modify orders. The proceedings in such cases shall be made a preferred cause and shall be expedited in every way.

"INVESTIGATIONS

"SEC. 310. The Administration may make such investigations as it deems necessary to determine whether a licensee or any other person has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of any provision of this Act, or of any rule or regulation under this Act, or of any order issued under this Act. The Administration shall permit any person to file with it a statement in writing, under oath or otherwise as the Administration shall determine, as to all the facts and circumstances concerning the matter to be investigated. For the purpose of any investigation, the Administration is empowered to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents which are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpena issued to, any person, including a licensee, the Administration may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents; and such court may issue an order requiring such person to appear before the Administration, there to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever he may be found.

"INJUNCTIONS AND OTHER ORDERS

"SEC. 311. (a) Whenever, in the judgment of the Administration, a licensee or any other person has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of any provision of this Act, or of any rule or regulation under this Act, or of any order issued under this Act, the Administration may make application to the proper district court of the United States or a United States court of any place subject to the jurisdiction of the United States for an order enjoining such acts or practices, or for an order enforcing compliance with such provision, rule, regulation, or order, and such courts shall have jurisdiction of such actions and, upon a showing by the Administration of such licensee or other person has engaged or is about to engage in any such acts or practices, a permanent or temporary injunction, restraining order, or other order, shall be granted without bond. The proceedings in such a case shall be made a preferred cause and shall be expedited in every way.

"(b) In any such proceeding the court as a court of equity may, to such extent as it deems necessary, take exclusive jurisdiction of the licensee or licensees and the assets thereof, wherever located; and the court shall have jurisdiction in any such proceeding to appoint a trustee or receiver to hold or administer under the direction of the court the assets so possessed."

SEC. 9. Section 502 of the Small Business Investment Act of 1958 is amended—

(1) by striking out "$250,000" in paragraph (3) and inserting in lieu thereof "$350,000"; and

(2) by striking out "ten" where it first appears in paragraph (5) and inserting in lieu thereof "twenty-five".

SEC. 10. (a) Section 301(a) of the Small Business Investment Act of 1958 is amended to read as follows:

"(a) A small business investment company shall be an incorporated body, organized and chartered under State law solely for the purpose of performing the functions and conducting the activities contemplated under this title, which has succession for a period of not less than thirty years unless sooner dissolved by its shareholders and possesses the powers reasonably necessary to perform such functions and conduct such activities. The area in which the company is to conduct its operations, and the establishment of branch offices or agencies (if authorized by the articles of incorporation), shall be subject to the approval of the Administration."

(b)(1) The second sentence of section 301(c) of such Act is amended by striking out "In determining whether to approve the establishment of such a company and its proposed articles of incorporation" and inserting in lieu thereof "In determining whether to approve such a company's articles of incorporation and permit it to operate under the provisions of this Act".

(2) The last sentence of section 301(c) of such Act is amended to read as follows: "After consideration of all relevant factors, if it approves the company's articles of incorporation, the Administration may in its discretion approve the company to operate under the provisions of this Act and issue the company a license for such operation".

(3) Section 301 of such Act is further amended by striking out subsections (d) and (e).

(c) The second sentence of section 308(b) of such Act is amended by striking out "organized under this Act" and inserting in lieu thereof "operating under the provisions of this Act".

(d) Section 308 of such Act is amended by striking out subsections (d), (e), and (f) and redesignating subsection (g) as subsection (d), and by striking out "organized under this Act" in the subsection so redesignated and inserting in lieu thereof "operating under the provisions of this Act".

(e) Section 309 of such Act (relating to approval of State chartered companies for operations under this Act) is repealed.

(f) Title IV of such Act is repealed.

(g)(1) The table of contents of such Act is amended by striking out

"Sec. 309. Approving State chartered companies for operations under this Act."

and inserting in lieu thereof

"Sec. 309. Enforcement procedures.
"Sec. 310. Investigations.
"Sec. 311. Injunctions and other orders."

(2) The table of contents of such Act is further amended by striking out

"TITLE IV—CONVERSION OF STATE CHARTERED INVESTMENT COMPANIES AND STATE DEVELOPMENT COMPANIES."

(h)(1) Section 202 of such Act is amended by striking out subsection (b).

(2) Section 20 of the Small Business Act is repealed.

(3) The first sentence of section 4(c) of the Small Business Act is amended by inserting after "by law" the following: "(including the payment of administrative expenses)".

SEC. 11. Section 4(c) of the Small Business Act is amended—

(1) by striking out "$1,000,000,000" each place it appears and inserting in lieu thereof "$1,150,000,000"; and

(2) by striking out "$250,000,000" in the eighth sentence and inserting in lieu thereof "$400,000,000".

The SPEAKER pro tempore. Is a second demanded?

Mr. McDONOUGH. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection a second will be considered as ordered.

There was no objection.

Mr. PATMAN. Mr. Speaker, I yield myself such time as I may need.

Mr. Speaker, H.R. 8870 amends the Small Business Investment Act of 1958, to strengthen two programs established under that act to help small business concerns. The first program relates to small business investment companies, licensed under the 1958 act by the Small Business Administration to supply equity capital and long-term loans to small businesses. The second program is one under which the Small Business Administration makes loans to State and local development companies to finance plant construction for small business concerns.

H.R. 8870 is a clean bill, unanimously reported by the Banking and Currency Committee, after hearings on its predecessor, H.R. 6672, were held by Subcommittee No. 2, of which I serve as chairman. During our consideration of this legislation, figures were furnished to the subcommittee by the Small Business Administration showing that the number of small business investment companies licensed under the act has grown rapidly in recent months, and the capital attracted by the program for investment in small business concerns is now reaching sizable proportions. The first two companies were licensed in March of 1959. By June 30 of that year 16 licenses had been issued; by June 30, 1960, the number was 109; by June 30 of this year it had shot up to 303; at the time the committee reported this bill it was 354; and it seems that almost every day a new licensee is announced. Figures furnished for July 7 of this year show these companies were then capitalized at more than $232 million. As of July 31 of this year, public offerings of the stock of these companies were in progress which would bring in another $58 million, and notices had been filed with the Securities Exchange Commission for further stock offerings totaling $87 million.

To me, these are impressive figures, indicating that this new, experimental

program is well underway. At the same time, experience under the 1958 act, limited though it is, indicates that some changes are needed. Basically, the bill makes three changes in the program, to encourage increased capitalization of the minimum-size companies, place some limitations on operating loans made by the Small Business Administration to these companies under section 302 of the 1958 act, and strengthen enforcement procedures.

About 90 percent of the companies formed thus far are capitalized at the minimum amount required by the 1958 act—$300,000—or barely above this minimum. We need a certain amount of these minimum-size companies, but testimony during our hearings on this legislation indicated clearly that as a general rule small business investment companies will operate more economically and efficiently with a larger capital. Larger capital is needed to generate enough earnings to attract capable management. It is also needed because under the 1958 act a small business investment company cannot invest more than 20 percent of its capital and surplus in any one small business concern. With a capital and surplus of only $300,000, investments are therefore limited to $60,000, which is obviously not enough to meet the need in many cases.

To stimulate more capital for these minimum-size companies, the bill would authorize the Small Business Administration to invest up to $500,000, in any small business investment company, on a 50–50 matching basis; that is, SBA could supply a dollar of capital for each private dollar invested, up to the $500,000 limit.

This broadens the present authority in two respects. Today, the amount SBA may invest for this purpose is limited to $150,000, rather than $500,000. Also, the bill permits these investments to be made to encourage companies already in existence to increase their capital, whereas under present law this kind of SBA investment may be made only to provide the initial capital needed to form a company. Although this will undoubtedly mean more Government funds will be invested in SBIC's, it will also automatically mean an equal amount of private funds will be invested. This should produce better management, more efficient operations, and an increased ability to attract additional private investment. This in turn will protect the Government's investment, and should hasten the day it will be repaid. This process will benefit the Government, the companies, and, above all, the small business concerns this program is designed to help.

The bill contains another provision to help increase the flow of capital into small business investment companies. The 1958 act authorized commercial banks, to the extent they are subject to Federal law, to make limited investments in these small business investment companies. The existing limit is 1 percent of the bank's capital and surplus. This bill raises this limit to 2 percent, to encourage further participation by banks in this program, particularly smaller banks.

The second change the bill would make in the SBIC program relates to operating loans by the Small Business Administration to small business investment companies under section 303 of the 1958 act. Today, SBA is authorized to make such loans, in an amount not over 50 percent of the capital and surplus of the small business investment company concerned. As these companies have grown, it has become evident that a dollar limit on these loans is needed, as well as the present 50 percent limit. For example, one small business investment company today has reached a size where the 50 percent limit would permit a loan of $16 million. When this program was established, we had no intention of authorizing loans of such large amounts. Accordingly, the bill imposes a limit of $5 million on the amount of section 303 loans which may be outstanding to any one SBIC. This is the figure recommended by the Small Business Administrator during the hearings.

The bill also contains a provision designed to channel these section 303 loan funds into investments of $500,000 or under. This is desirable both from the standpoint of encouraging these companies to invest in the small business concerns that need them the most, and from the standpoint of spreading these funds out in a diversified portfolio. In order to avoid tracing problems, and to avoid undue restrictions on the use of funds obtained from other sources, the bill provides that an SBIC may satisfy this requirement by maintaining a portfolio of investments of $500,000 or under, plus cash and Government securities, equal to the outstanding balance of the section 303 loans.

The third principal change the bill makes in the SBIC program is to strengthen the procedures by which the Small Business Administration and the courts may enforce compliance with the 1958 act. The 1958 act now contains two enforcement provisions, both involving suits in the Federal district courts, one to revoke a license upon proof of violation and the other to enjoin existing or threatened violations. The bill provides for a wider range of enforcement procedures, administrative as well as judicial, to permit the Small Business Administration to ensure compliance with the act while preserving for all parties the safeguards provided in the Administrative Procedure Act, including proper notice and hearings and judicial review of any administrative orders issued under the new procedures.

The bill would also expand a second program established under the 1958 act, that of loans under section 502 of the act to State and local development companies. These section 502 loans are made by the Small Business Administration to development companies to finance plants and other facilities, where the loans will assist identifiable small business concerns in accomplishing sound business purposes. They cover construction, conversion, or expansion of plants and other facilities, including acquisition of land. During our hearings the Small Business Administrator supplied a table showing that through June 20, 124 of these loans had been made in 30 States, for projects costing a total of $21 million. The SBA share of the loans was $13 million. It is estimated that 7,400 jobs will be provided as a result of these loans.

These figures show this loan program has gotten off to a fine start. The bill would make two changes to make it even more useful. Today, loans are limited to $250,000 for each small business concern assisted; the bill would raise this limit to $350,000 to conform to the regular SBA business loan program. Section 502 now specifies a maximum term of 10 years for these loans; the bill would raise this to 25 years, which is geared to the depreciation period for the facilities involved, and approximates the maturities available on commercial loans of the same type.

Finally, the bill would increase the existing ceiling on loans which may be outstanding under the 1958 act, by $150 million. The present ceiling of $250 million will not be sufficient, according to SBA estimates, which indicate that if the bill is enacted, approximately $300 million will be outstanding at the end of this fiscal year. To insure that sufficient authorization will be available to continue these programs, the bill would raise the ceiling to $400 million.

Mr. McDONOUGH. Mr. Speaker, I rise in support of the explanation of the bill by the chairman of the Subcommittee on Banking and Currency. This is added authority to the Small Business Investment Corporation, which is an excellent institution. This supplies working capital to small industries and provides employment for many hundreds of people.

GENERAL LEAVE TO EXTEND REMARKS

Mr. McDONOUGH. Mr. Speaker, I ask unanimous consent that all Members of the House may have the privilege of extending their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ANTITRUST VIOLATIONS CAUSE ABSENTEE OWNERSHIP AND LEAD TO DEPRESSION, ACCORDING TO THURMAN ARNOLD

Mr. PATMAN. Mr. Speaker, a very interesting and significant article appeared in the Washington Post of September 3, 1961, on the subject of how our antitrust laws work. This article was in the form of a series of questions posed to Judge Thurman Arnold, who was responsible for putting life into antitrust enforcement in the 1930's.

I think this article should be read by businessmen throughout the Nation for it destroys some false notions that have been spread by certain groups that are really in favor of promoting business cartels in this country. Such groups cloud the issue and try to make people believe that antitrust enforcement promotes inefficiency. On the contrary, as Judge Arnold points out, the antitrust laws promote business efficiency and local enterprise. The antitrust laws are not designed to protect small businessmen at the expense of efficiency, but, on the contrary, hold the doors open to new business and "prevent the inevitable inefficiency which occurs in a big business which has taken over all or most of its competitors."

ANTITRUST PROMOTES NEW ENTERPRISE

Judge Arnold describes how price-fixing and market-sharing cartels, which are outlawed by the antitrust laws, are destructive of new business opportunities. The purpose of the antitrust laws, Judge Arnold says, "is to permit new enterprise freely to enter any field of production and distribution and to succeed if it is more efficient than those already in the industry."

This in the long run—

He points out—

tends to give the consumer a better deal but it does not protect inefficient small business. It was the cartel system that protected the small businesses already in the market by assuring them of the continuance of their limited share.

ANTITRUST A BARRIER TO ABSENTEE OWNERSHIP

One of Judge Arnold's most significant observations, it seems to me, is that monopoly destroys local enterprise and causes depressions. A common violation, he says, has been for big business to use a dominant position in one product to destroy local business which depends upon that product for its existence. This has created a system of absentee ownership of local industry, which, according to Judge Arnold, "was certainly one of the causes of the great depression." This point is so important that I wish to quote the entire passage from which it is taken:

ABSENTEE OWNERSHIP

Two of the most commonly occurring violations of the antitrust laws, apart from mergers, are the following: (1) Conspiracies to fix prices; (2) the use of a dominant position in the market for one product to destroy local business which depends upon that product for its existence.

The second is illustrated by the motion picture cases prosecuted before the last war. The major producers who controlled the feature films would not supply those films to independent theaters. Thus they got control over the purely local business of motion picture exhibitions.

This process, repeated in industry after industry during the period between World War I and the depression, created a system of absentee ownership of local industries which made industrial colonies out of the West and South, prevented the accumulation of local capital and siphoned the consumers' dollars to the few industrial centers like New York and Chicago.

CAUSE OF DEPRESSION

When big business is not restrained by antitrust enforcement, it expands not through efficiency but through the ruthless use of financial power. It wants to sell without buying; it thus destroys the purchasing power of its own customers. This absentee ownership of local industry was certainly one of the causes of the great depression.

I should like to offer the entire article by Judge Arnold for the RECORD:

[From the Washington Post, Sept. 3, 1961]

EXPERT EXPLAINS HOW ANTITRUST LAWS WORK

(By Thurman Arnold)

(Vigorous enforcement of the antitrust laws in recent years has brought considerable publicity to that highly complex area of the law. Some of the questions which occur to nonlawyers are seldom discussed and the laws are rarely explained. The Washington Post put a series of the questions which arise to Thurman Arnold, a renowned trustbuster in the Roosevelt days and a legal philosopher and practitioner in Washington ever since. Here are the questions and his answers.)

Question. To many persons, antitrust cases seem to have two basic purposes—to bring down prices (cases against price fixing) or to keep business small (cases against mergers and monopolies). If this is true, there seems to be a contradiction in the laws. Laws aimed at price fixing seem designed to protect the old capitalistic society in which the most efficient producer is rewarded. Laws which block mergers and monopolies seem to protect the little businessman at the expense of efficiency. Is there a contradiction? What kinds of business activity are the antitrust laws designed to control? How do they achieve that control?

THE LEGAL MONOPOLY

Answer. The purpose of the antitrust laws is to insure freedom of business opportunity. They are not designed to protect small business from larger and more efficient competitors. They are not designed to prevent the growth of nationwide business enterprises so long as that growth is a product of industrial efficiency.

Even if, through greater efficiency in operation and distribution, a corporation achieved a monopoly, that in itself would not violate the Sherman Act. But this has never yet happened. Monopolies have been built up by using financial strength to buy out competitors or to force them out of business. It is this sort of growth and only this sort that the antitrust laws are designed to penalize.

Take, for example, the prohibition against mergers. If a nationwide concern which dominated the market in a single product should choose to diversify and purchase a corporation which made some other product, there would not be the substantial lessening of competition required to make the merger illegal.

Thus Coca-Cola recently acquired the business of Minute Maid without objection from the Department of Justice. This was because the Department did not believe that in any real sense orange juice, predominantly a breakfast drink, competed with Coca-Cola. Had Coca-Cola acquired Pepsi-Cola, it is certain that the merger would have been attacked.

Thus the antimerger provisions are not designed to protect the small businessman at the expense of efficiency. Instead, they are to prevent the inevitable inefficiency which occurs in a big business which has taken over all or most of its competitors.

ABSENTEE OWNERSHIP

Two of the most commonly occurring violations of the antitrust laws, apart from mergers, are the following: (1) conspiracies to fix prices; (2) the use of a dominant position in the market for one product to destroy local business which depends upon that product for its existence.

The second is illustrated by the motion picture cases prosecuted before the last war. The major producers who controlled the feature films would not supply those films to independent theaters. Thus they got control over the purely local business of motion picture exhibitions.

This process, repeated in industry after industry during the period between World War I and the depression, created a system of absentee ownership of local industries which made industrial colonies out of the West and South, prevented the accumulation of local capital and siphoned the consumers' dollars to the few industrial centers like New York and Chicago.

CAUSE OF DEPRESSION

When big business is not restrained by antitrust enforcement, it expands not through efficiency but through the ruthless use of financial power. It wants to sell without buying; it thus destroys the purchasing power of its own customers. This absentee ownership of local industry was certainly one of the causes of the great depression.

In Europe, the result of the lack of an antitrust policy was the complete cartelization of industry. The markets were divided by international cartels. Hitler was able to manipulate the cartel system to his own advantage while the same system sapped the industrial vitality of England and France.

Even in America during the period of nonenforcement in the twenties, many of our great industrial concerns joined international cartels. An example of how this hurt us can be taken from the rubber industry.

One of our great oil companies entered into an agreement with our German cartel that it would not manufacture rubber if the German cartel would not compete in oil and gasoline. As a result, America entered the war far behind Germany in the production of a synthetic rubber.

The antitrust laws are not directly concerned with the lowering of consumers' prices. Their purpose is to permit new enterprise freely to enter any field of production and distribution and to succeed if it is more efficient than those already in the industry.

This in the long run tends to give the consumer a better deal but it does not protect inefficient small business. It was the cartel system that protected the small businesses already in the market by assuring them of the continuance of their limited share.

Concentration of economic power achieved by putting artificial restraints on new business, or by the purchase of competitors, or by division of the market, draws the vigor out of the industrial system. The excuse of the cartel system is always that it protects respectable industry from so-called ruinous competition. The United States has adopted that policy only once, and that was in the days of the NRA, and that did not last long.

To illustrate what happens in any field where the principles of the antitrust laws are abandoned, one needs only to look at Jimmy Hoffa and his Teamsters Union. Hoffa is able to control the bottleneck of transportation without effective deterrents from anyone. The result is what could have been expected in advance when labor was first freed by an unfortunate decision of the

Supreme Court from any restrictions under the Sherman Act.

Question. In recent months, there have been many criminal indictments for price-fixing, particularly in the consumer goods field. Will this affect the price which the consumer pays? How can prices on consumer goods be so consistently identical if they are not fixed? How deeply should the Government involve itself in pricing?

Answer. There have been probably more price-fixing cases than any other type of prosecution under the antitrust laws. Those prosecutions, however, have not prevented the administration of prices by large corporations through the device of price leadership in such commodities as steel.

The difficulty may be illustrated by the following example: When I was a member of President Roosevelt's Temporary National Economic Committee, we were examining an industry in which the prices were almost always identical. One of the presidents of a smaller concern was on the stand. I asked him why he invariably followed the prices of the large company in the field.

He explained that Mr. X of the large company had been to MIT. He had studied economics, he had vast experience in prices. "Therefore," said the president of the smaller company, "I have confidence in him and believe that the price he fixes after study is the price that I should use."

When the hearing was over I took him to one side and asked him what would happen if he didn't follow the price of the large company. "That, Mr. Arnold," he said, "is something which I never expect to learn from actual experience."

In such a situation, there need be no conspiracy in order to establish identical prices. The great problem of administered prices today in the United States is to this extent beyond the reach of the present antitrust laws. And for this reason, we can observe that in many of our great industries, prices remain the same or are even raised when demand is falling off.

Question. The first antitrust laws were passed late in the 19th century. Are they still valid for a 20th century economy. Do we need a wholesale revision of the antitrust laws?

Answer. If by "wholesale revision of the antitrust laws" you mean the abandonment of the principle of the act in favor of what is often called rationalized production and distribution, such an effort would be unmitigated evil. It is not true that the Sherman Act was designed for a 19th century economy. It did not become effective in the United States until the 20th century.

Today the principal policy of antitrust is spreading all over the world. Ehrhard, the German Minister of Finance, has a vigorous antitrust policy which succeeded because during the occupation the great German combinations that existed before the war were broken up by the American decartelization program.

In the long run, we have only two choices: either the curbing of restraints of trade and monopoly power, or the rejection of the cartel system whose evils are today belatedly recognized even in Europe.

AMENDMENT OF SMALL BUSINESS INVESTMENT ACT OF 1958

The SPEAKER pro tempore. The question is, Will the House suspend the rules and pass the bill S. 902, as amended?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

Mr. FULTON. Mr. Speaker, I object to the vote on the ground a quorum is not present, and I make the point of order that a quorum is not present.

Mr. HALLECK. Mr. Speaker, the point comes too late. The Chair had declared the bill passed by a two-thirds vote.

The SPEAKER pro tempore. The Chair did not hear the gentleman from Pennsylvania.

Mr. FULTON. I was on my feet, but I could not interrupt the Chair.

The SPEAKER pro tempore. Of course the Chair is not responsible for that.

Mr. FULTON. Mr. Speaker, I was on my feet.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas [Mr. PATMAN].

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. HARRIS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 192]

Alger	Healey	Peterson
Anfuso	Hébert	Pilcher
Ashley	Holland	Powell
Aspinall	Hosmer	Rabaut
Auchincloss	Johnson, Md.	Santangelo
Baker	Kearns	Siler
Bolling	Kelly	Steed
Brooks, La.	Kilburn	Tuck
Broyhill	Kirwan	Udall, Morris K.
Buckley	Kluczynski	Vinson
Dague	Landrum	Westland
Davis, Tenn.	Lindsay	Whitten
Dawson	McSween	Wickersham
Dent	Madden	Williams
Derwinski	Mason	Willis
Diggs	Miller, Clem	Winstead
Evins	Milliken	Zelenko
Green, Oreg.	Morrison	
Hall	O'Hara, Mich.	

The SPEAKER pro tempore. On this rollcall, 380 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

COMMITTEE ON RULES

Mr. SMITH of Virginia. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tomorrow to file certain privileged reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

AMENDING SMALL BUSINESS ACT TO INCREASE AMOUNT AVAILABLE FOR REGULAR BUSINESS LOANS

Mr. PATMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8762) to amend the Small Business Act to increase the amount available for regular business loans thereunder, with amendments.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(c) of the Small Business Act is amended—

(1) by striking out "$1,020,000,000" each place it appears and inserting in lieu thereof "$1,150,000,000"; and

(2) by striking out "$595,000,000" and inserting in lieu thereof "$725,000,000".

The SPEAKER pro tempore. Is a second demanded?

Mr. McDONOUGH. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. PATMAN. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. ALBERT].

Mr. ALBERT. Mr. Speaker, I take this time to advise that if Members can remain on the floor, we can expedite the business of the House today and adjourn at a reasonable hour. Most bills to be called up can be handled very quickly, I understand, provided we can keep a quorum on the floor. We would like to complete consideration of those bills that have been programed, and we would respectfully request the cooperation of all Members to that end.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from Indiana.

Mr. HALLECK. I would like to say so far as I am concerned, I trust we can keep our Members on the floor. These bills that ought to be considered should be properly considered, of course, and that is what we want to do and if a quorum will remain on the floor, in my opinion, the bills that need to be considered this evening can be disposed of very quickly.

Mr. PATMAN. Mr. Speaker, this bill would increase the Small Business Administration's authority to make regular business loans to small business concerns by $130 million, the amount estimated as necessary to carry this loan program through the current fiscal year.

President Kennedy today signed into law H.R. 8922, which provided an interim increase of $20 million in this loan authority, needed to keep the program in business this month. The current Small Business Administrator, John Horne, is doing a fine job for small business. He is vigorously promoting this program and I know the Members of the House will support this bill to give the Administrator the authority he needs.

This bill came out of the Banking and Currency Committee by a unanimous vote. It is absolutely essential that the SBA business loan authority be increased before this session ends, and this $130 million is the minimum needed, in my judgment, to keep the program going at a level that will truly meet the need.

Mr. McDONOUGH. Mr. Speaker, I rise in support of the statement made by the chairman of the Subcommittee on Small Business of the Committee on Banking and Currency.

There is only one point I would like to clear up, if possible. This is an authority for increasing funds for the operation of the Small Business Administration for the next year. The bill that is being considered by the Senate contains a controversial section that was a matter of discussion in the conference on this same bill a year ago, and that section has to do with the requirement that the Secretary of Defense submit to small business in the United States all contracts within a certain category, all moneys involved in the contracts, and there is a great deal of opposition to that section of the bill. Now, it is my hope, if the House passes this bill, that the Senate will accept it in its present form without the controversial section 7 of the Senate bill. I do not know whether the chairman of the committee can give me any assurance of that, but is it your hope that they will also concur?

Mr. PATMAN. Mr. Speaker, I share the views of the gentleman from California, and I, too, express the hope that this bill can go through as the House is expected to pass it, relating only to increasing the authorization.

Mr. McDONOUGH. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan [Mr. CHAMBERLAIN].

KIT CLARDY

Mr. CHAMBERLAIN. Mr. Speaker, I ask unanimous consent to speak out of order and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CHAMBERLAIN. Mr. Speaker, I am saddened, indeed, to report to my colleagues in the House who served during the 83d Congress that their friend and colleague in that Congress, Kit Clardy, died after an operation last night in California, where he had recently retired.

Mr. Clardy was elected to the 83d Congress from Michigan's Sixth District after an outstanding business and legal career. He received his law degree at the University of Michigan and was eminently successful in the practice of law before becoming assistant attorney general for the State of Michigan and subsequently a member and chairman of the Michigan Public Utilities Commission.

As a member of the House Un-American Activities Committee, Kit Clardy devoted himself to the bitter struggle against communism and his many friends in Washington will best remember him for his relentless efforts to protect and preserve our country from this insidious threat to our form of Government. He was a man of integrity, a true public servant and a loyal American.

I have known Mr. Clardy for many years and join his hosts of friends in Michigan, in California, and in Washington who mourn his passing today and convey to his wife my deepest sympathy and condolence.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield?

Mr. CHAMBERLAIN. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Speaker, not many days ago I had a very pleasant visit in my office with a former colleague who distinguished himself in the 83d Congress as a fearless foe of those who would undermine our system of Government.

On that visit, Kit Clardy evidenced the same vim and vigor that characterized his activities as a Member of this House. I shall not soon forget his cheerfulness on that occasion, though today the shadow of sorrow dims those memories as I received the word of his passing.

Kit Clardy and I came to Congress in the same year and we had many of the same legislative interests. As a member of the Michigan delegation, he made many valuable contributions to our discussions and activities. We developed a warm personal friendship that extended to his untimely death yesterday. Although he served but one term in the House, he proved himself a statesman through and through. He had a keen mind and was a talented lawyer.

During his career in Congress, his courage became known to all. His service on the House Committee on Un-American Activities was at a time when we were rooting out the Communists who had entrenched themselves in important places in and out of Government during the war years. Devoted as he was to the principles of our form of Government, he never faltered under enemy fire but struck forceful blows against those who had espoused alien ideologies contrary to ours.

He was admired and respected by those with whom he served and was held in profound esteem by members of his staff to whom he endeared himself as an associate in the daily routines of a congressional office.

Kit Clardy was born in Missouri and educated in the grade schools of that State. He received his law degree at the University of Michigan and began the practice of law in Ionia, Mich. Later he was chosen assistant attorney general for the State of Michigan. Subsequently he was made a member of the Michigan Public Utilities Commission and also served as its chairman. He served Michigan ably and with dignity.

I wish to extend my deep personal sympathy to Kit's devoted wife, Dorothy, in her bereavement.

Alexander Pope must have had in mind a man of Mr. Clardy's stature when he wrote:

Statesman, yet friend to truth, of soul sincere,
In action faithful, and in honor clear;
Who broke no promise, serv'd no private end,
Who gain'd no title, and who lost no friend.

Mr. CHAMBERLAIN. Mr. Speaker, I ask unanimous consent that all Members who so desire may extend their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, our former colleague, Kit Clardy, came to Congress in January of 1953, but my acquaintance with him, though we lived in different sections of the State, began when I was first a candidate in 1934.

A comparative stranger, he nevertheless volunteered to help. He spoke many times in my behalf and in behalf of the party. He held deep convictions and never failed to adhere to and support every move which tended to retain our constitutional Government.

He was an uncompromising advocate, always logical, always eloquent, and, understandable, a trait which some of us sometimes seem to lack.

Serving here, he never missed an opportunity to emphasize the necessity of retaining our form of government, fighting every move, no matter how insidious, to destroy us.

His services on the Committee on Un-American Activities were recognized as outstanding.

In his passing, our State and our country has lost an able, vigorous, uncompromising advocate of sound principle, clean thinking, and commonsense methods.

Mr. McDONOUGH. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Speaker, on these small business bills the question has come up as to the progress of the present Administrator of the Small Business Administration on his policies: Is he doing right when he has greatly expanded the number of loans and is giving out a greater percentage of the authorized funds?

In my view, and I believe in that of the Congress, it is wise that the Administrator, John Horne, go ahead and service small business as he is now doing. I want to put it on record that we in Congress feel that way and that we in Congress are passing this legislation for the purpose of having the authorized funds used; and I would like to ask the chairman of the subcommittee if that is not the case.

Mr. PATMAN. Yes, that is the intention, as I understand, for these funds to be used.

Mr. FULTON. And might I ask the minority senior member of the subcommittee if that is not his understanding as well.

Mr. McDONOUGH. It is.

Mr. FULTON. So Congress disagrees with the criticism that has been made in some quarters that the Small Business Administration is getting too big for its size, shall we call it; and, secondly, that it is not operating in accordance with congressional wishes.

Might I say that on a previous rollcall I felt we should put the House on record that we are unanimously in favor of this Small Business Administration. I shall, therefore, ask for a division when the vote is taken on this bill, and want to give notice to the Chair of my intention so I will not be overlooked.

Mr. McDONOUGH. Mr. Speaker, I ask unanimous consent that all Members may be permitted to insert their remarks in the RECORD at this point on this bill.

Mr. Speaker, I have no further requests for time and yield back the balance of my time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is, Will the House suspend the rules and pass the bill H.R. 8762 as amended?

The question was taken; and on a division (demanded by Mr. FULTON) there were—yeas 222, nays 0.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Without objection, H.R. 8870 will be laid on the table, a similar bill to the one just recently passed by the House.

There was no objection.

AFFORDING CHILDREN OF CERTAIN DECEASED VETERANS BENEFITS OF THE WAR ORPHANS EDUCATIONAL ASSISTANCE ACT OF 1956

Mr. TEAGUE of Texas. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2051) to afford children of certain deceased veterans who were eligible for the benefits of the War Orphans Educational Assistance Act of 1956 but who, because of residence in the Republic of the Philippines, were unable to receive such assistance prior to enactment of Public Law 85–460, additional time to complete their education, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the period referred to in section 1712 of title 38, United States Code, shall not end before June 18, 1963, with respect to pursuit of a program of education or special restorative training under chapter 35 of such title 38 by an eligible person who (1) had not reached his twenty-third birthday, on June 29, 1956, and (2) resided in the Republic of the Philippines during all, or part of the period June 29, 1956, through June 18, 1958.

SEC. 2. (a) Section 314 of title 38, United States Code, is amended—

(1) by striking out "$19" in subsection (a) and inserting in lieu thereof "$20";

(2) by striking out "$36" in subsection (b) and inserting in lieu thereof "$38";

(3) by striking out "$55" in subsection (c) and inserting in lieu thereof "$58";

(4) by striking out "$73" in subsection (d) and inserting in lieu thereof "$77";

(5) by striking out "$100" in subsection (e) and inserting in lieu thereof "$106";

(6) by striking out "$120" in subsection (f) and inserting in lieu thereof "$127";

(7) by striking out "$140" in subsection (g) and inserting in lieu thereof "$148";

(8) by striking out "$160" in subsection (h) and inserting in lieu thereof "$169";

(9) by striking out "$179" in subsection (i) and inserting in lieu thereof "$190";

(10) by striking out "$225" in subsection (j) and inserting in lieu thereof "$245";

(11) by striking out "$450" in subsections (k), (o), and (p) and inserting in lieu thereof "$500";

(12) by striking out "$309" in subsection (l) and inserting in lieu thereof "$335";

(13) by striking out "$359" in subsection (m) and inserting in lieu thereof "$385";

(14) by striking out "$401" in subsection (n) and inserting in lieu thereof "$435";

(15) by striking out "$150" in subsection (r) and inserting in lieu thereof "$200"; and

(16) by striking out "$265" in subsection (s) and inserting in lieu thereof "$285".

(b) The Administrator may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85–857 who are not in receipt of compensation pursuant to chapter 11 of title 38, United States Code.

SEC. 3. (a) Subsection (r) of section 314 of title 38, United States Code, is further amended by striking out "for all periods during which he is not hospitalized at Government expense" and inserting in lieu thereof the following: ", subject to the limitations of section 3203(f) of this title".

(b) Section 3203 of title 38, United States Code, is amended by adding at the end thereof the following:

"(f) Where any veteran in receipt of an aid and attendance allowance described in section 314(r) of this title is hospitalized at Government expense, such allowance shall be discontinued from the first day of the second calendar month which begins after the date of his admission for such hospitalization for so long as such hospitalization continues. In case a veteran covered by this subsection leaves a hospital against medical advice and is thereafter readmitted to hospitalization, such allowance shall be discontinued from the date of such readmission for so long as such hospitalization continues."

SEC. 4. Section 312(4) of title 38, United States Code, is amended by striking out "three" and inserting in lieu thereof "seven".

Sections 2, 3, and 4 of this Act shall take effect on the first day of the second calendar month which begins after the date of enactment of this Act, but no payments shall be made by reason of such sections for any period before such first day.

The SPEAKER pro tempore. Is a second demanded? If not, the question is, Will the House suspend the rules and pass the bill S. 2051, as amended?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

GENERAL LEAVE TO EXTEND REMARKS

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. TEAGUE of Texas. Mr. Speaker, the effect of this bill would be to afford all eligible persons under age 23 on June 29, 1956, the date of enactment of the War Orphans Educational Assistance Act, a full 5 years after the effective date of Public Law 85–460—June 18, 1958—in which to avail themselves of the benefits of this program. Thus, while under existing law the eligibility period for many trainees in the Philippines ended June 29, 1961, this bill would automatically extend this period to June 18, 1963.

The original act of 1956 did not authorize the taking of training in the Republic of the Philippines. Subsequently, Public Law 85–460, effective June 18, 1958, permitted such training. That law, however, did not make any exception to the deadlines for residents of the Philippines. Thus, a number of eligible persons who were within the age limits when the original law became effective had, in practical effect, only 3 years and 11 days instead of the intended 5 years in which they could use their 36 months' educational entitlement. This is due to the fact that the pursuit of training under the basic law is generally limited to the ages between 18 and 23.

After the enactment of Public Law 85–460, two other amendments to the basic law have been made extending the program to children of the veterans of the Spanish-American War and to children of certain peacetime veterans whose deaths resulted from service. In these two amendments, a provision was contained to the effect that persons under 23 years of age on the date of enactment and who first became eligible as the result of the amendment would have a full 5 years thereafter to pursue their program of education.

The Veterans' Administration reports that in 1962 there would be a monthly average of 1,730 trainees at a direct annual cost of $2,850,000 and that in 1963 the monthly average would drop to 570 at the annual cost of $940,000, or a total cost of $3,790,000.

Mr. Speaker, the amendment to this bill is the text of H.R. 879, without any change whatsoever, as passed by the House by unanimous vote on June 5, 1961, under suspension of the rules.

The amendment, as the original bill did, provides an increase in the rates of service-connected disability compensation to reflect changes which have occurred in the cost of living since the last increase in 1957. In addition, it will more adequately compensate the more severely disabled veteran. The minimum increase provided by this amendment is 5.3 percent increase and the highest increase is 16.7 percent increase, which applies to those veterans who are entitled today to the $450 a month rate, plus $150 while they are not being hospitalized at Government expense. Since the last compensation increase in 1957 there has been a 5.4 percent increase in the cost of living. The overall average increase provided by this amendment is 9.2 percent.

The exact effect of this amendment and the number of cases affected is shown in the table which I wish to include as a part of my remarks:

Degree and paragraph	Cases, wartime	Cases, peacetime	Current wartime rate	Amendment to S. 2051	Percent of increase, amendment over current rate	Current peacetime rate	As amendment, peacetime rate	Total costs of amendment
10(a)	752,739	47,724	$19	$20	5.3	$15	$16	$9,605,556
20(b)	285,824	14,410	36	38	5.6	29	30	7,032,696
30(c)	271,120	15,985	55	58	5.5	44	46	10,143,960
40(d)	157,989	6,866	73	77	5.5	58	62	7,913,040
50(e)	105,202	4,885	100	106	6.0	80	85	7,867,644
60(f)	82,416	4,090	120	127	5.8	96	102	7,217,424
70(g)	41,203	2,180	140	148	5.7	112	118	4,112,448
80(h)	25,261	1,010	160	169	5.6	128	135	2,813,028
90(i)	7,122	190	179	190	6.1	143	152	960,624
100(j)	74,987	9,626	225	245	8.9	180	196	19,845,072
(l)	2,775	292	309	335	8.4	247	268	939,384
(m)	2,094	295	359	385	7.2	287	308	727,668
(n)	377	16	401	435	8.5	321	348	159,000
(o)	142	45	450	500	11.1	360	400	106,800
(p)	2,194	160						1,393,200
(q)+(r)	3,085	705	150(600)	200(700)	16.7	480	560	4,378,800
(s)	10,600	900	265	285	7.5	212	228	2,716,800
Total								87,933,144

(k) Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or both buttocks, or blindness of 1 eye, having only light perception, rates (a) to (j) increased monthly by $47 additional to basic compensation paid monthly for veteran with these disabilities (this $47 rate unchanged).

Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or both buttocks, or blindness of 1 eye, having only light perception, in addition to requirement for any of rates in (l) to (n), rate increased monthly for each loss or loss of use by $47 additional to basic compensation paid monthly for veteran with these disabilities (this $47 rate unchanged).

(l) Anatomical loss, or loss of use of both hands, or both feet, or 1 hand and 1 foot, or blind both eyes with 5/200 visual acuity or less, or is permanently bedridden or so helpless as to be in need of regular aid and attendance, monthly compensation.

(m) Anatomical loss, or loss of use of 2 extremities at a level, or with complications, preventing natural elbow or knee action with prosthesis in place or has suffered blindness in both eyes having only light perception, or has suffered blindness in both eyes, rendering him so helpless as to be in need of regular aid and attendance, monthly compensation.

(n) Anatomical loss of 2 extremities so near shoulder or hip as to prevent use of prosthetic appliance, or suffered anatomical loss of both eyes, monthly compensation.

(o) Suffered disability under conditions which would entitle him to 2 or more rates in (l) to (n), no condition being considered twice, or suffered total deafness in combination with total blindness with 5/200 visual acuity or less, monthly compensation.

(p) In event disabled person's service-incurred disabilities exceed requirements for any of rates prescribed, Administrator, in his discretion, may allow next higher rate, or intermediate rate, but in no event in excess of $450.

(q) Minimum rate for arrested tuberculosis (this $67 monthly rate is unchanged).

(r) If entitled to compensation under (o), or the maximum rate under (p), and in need of regular aid and attendance, while not hospitalized at Government expense, additional monthly aid and attendance allowance.

(s) If totally disabled and (1) has additional disability independently rated at 60 percent or more, or, (2) is permanently housebound.

The amendment also provides that those veterans who are receiving the statutory award of $450 monthly, plus additional compensation of $150 while not in a hospital, will have their compensation continued until the first day of the second month which begins after they are hospitalized.

The amendment also provides for an increase for the presumptive period of multiple sclerosis from 3 to 7 years. This action was taken on the recommendation of the Director, National Institute of Neurological Diseases and Blindness, Dr. Richard L. Masland.

The action which I am taking today in offering this amendment is another effort to obtain a service-connected increase for those veterans and to avoid the parliamentary entanglements which have developed as a result of the action of the other body.

The first year cost of this amendment is $87,933,144.

AMENDMENT TO RAILROAD RETIREMENT ACT OF 1937

Mr. HARRIS. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2395) to amend the Railroad Retirement Act of 1937 to provide reduced annuities to male employees who have attained age 62, and for other purposes.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2(a)3 of the Railroad Retirement Act of 1937 is amended to read as follows:

"3. Men who will have attained the age of sixty and will have completed thirty years of service, or individuals who will have attained the age of sixty-two and will have completed less than thirty years of service, but the annuity of such men or such individuals shall be reduced by 1/180 for each calendar month that he or she is under age sixty-five when the annuity begins to accrue."

SEC. 2. Section 2(f) of the Railroad Retirement Act of 1937 is amended by striking "three years" and inserting in lieu thereof "one year" and by inserting after the word "filed" where it first appears the following: ", or in the month prior to her or his marriage to such annuitant or pensioner was eligible for an annuity under subsection (a) or (d) of section 5 of this Act or, on the basis of disability, under subsection (c) thereof".

SEC. 3. Section 5(1)(1) of the Railroad Retirement Act of 1937 is amended by inserting before the semicolon at the end thereof the following: ". Where a woman has qualified for an annuity under this section as a widow, and marries another employee who dies within one year after the marriage, she shall not be disqualified for an annuity under this section as the widow of the second employee by reason of not having been married to the employee for one year".

SEC. 4. The amendments made by this Act shall be effective with respect to annuities beginning to accrue in calendar months after the calendar month of enactment thereof.

The SPEAKER pro tempore. Is a second demanded?

Mr. SPRINGER. Mr. Speaker, I demand a second.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, the bill S. 2395 is identical to H.R. 8597, which was reported unanimously by the Committee on Interstate and Foreign Commerce to amend the Railroad Retirement Act.

Mr. Speaker, the purpose of H.R. 8597 as reported by the Committee on Interstate and Foreign Commerce is to make certain changes in the eligibility requirements for benefits under the railroad retirement system to bring them into line with recent changes in the eligibility requirements for benefits under the social security system in four areas:

First. Male employees with less than 30 years of creditable service would be permitted to retire at age 62 on a reduced annuity. Women employees already have this right.

Second. A spouse, if otherwise qualified, would become eligible for a spouse's benefit after being married only 1 year instead of 3 years under present law.

Third. A recipient of a survivor annuity who marries a retired railroad worker age 65 years or more would become entitled to a spouse's benefit immediately upon such remarriage if he or she is at least 62 years old.

Fourth. A woman who is qualified for an annuity as a widow and married another employee who dies within 1 year after the marriage would not be disqualified for an annuity as the widow of a second employee by reason of not having been married to him for 1 year.

H.R. 8597, as introduced, provided for the first three items enumerated above. It is supported by the Railway Labor Executives' Association and by the Railroad Retirement Board. The Association of American Railroads advised the committee that it interposes no objection to the enactment of the measure. At the conclusion of my remarks I am inserting a joint letter dated August 9, 1961, from these two associations explaining their positions on this bill.

The Bureau of the Budget filed a letter with the committee indicating that the bringing of early retirement benefits to railroad workers into line with those under the social security system was appropriate and desirable but suggested a change in the formula for providing the reduced benefits.

Item 4, above, is a committee amendment and consists of the provisions of H.R. 5027.

H.R. 5027 is supported by the Railway Labor Executives' Association and by one member of the Railroad Retirement Board. The other two members of the Board indicated recognition of the merit of the bill and of removing a discrimination but objected to it on the ground of cost.

BACKGROUND AND NEED FOR LEGISLATION

Over the years it has been general policy to provide that benefits accruing under the Railroad Retirement Act to a

railroad employee as a result of railroad service would be not less than those which would have been provided were railroad service to be covered by the Social Security Act. In 1959 we amended the Railroad Retirement Act to provide that railroad retirement benefits payable to a family should be not less than 110 percent of the benefits, or additional benefits, which would have been payable under the Social Security Act on the basis of railroad service involved. However, recent amendments to the Social Security Act have resulted in certain inequities and discrepancies in favor of the social security system as against the railroad retirement system.

There is need in certain areas, accordingly, for certain changes in the benefits provided by the Railroad Retirement Act to bring them into line with those provided by these amendments to the Social Security Act.

Under the Railroad Retirement Act at present, full retirement annuities are available to men and women at age 65. Reduced annuities are available to men between the ages of 60 and 65 if they have 30 years of service. These earlier accruing annuities are reduced by one one-hundred-and-eightieth for each calendar month the man is under age 65 when the annuity begins to accrue.

Women with 30 years of service may now receive an annuity at age 60 without a reduction because of age, and women with less than 30 years of service may retire on annuity as early as age 62, but such annuity will be reduced by one one-hundred-and-eightieth for each month the woman is under age 65.

The Social Security Act was recently amended—Public Law 87–64—to allow men to retire at age 62 with a reduced old-age insurance benefit. Section 1 of H.R. 8597 would permit railroadmen with less than 30 years of service to retire at age 62 with an annuity, reduced, as in the case of women, by one one-hundred-and-eightieth for each month the man is under age 65.

Under the Railroad Retirement Act at present, the wife—or husband—of a retirement annuitant or pensioner may qualify as a spouse if—among other requirements—she, or he, was married to such annuitant or pensioner for a period of not less than 3 years immediately preceding the day on which the application for a spouse's annuity is filed, or is the parent of such annuitant's or pensioner's son or daughter.

Section 2 of H.R. 8597 would change the alternative requirement first above described, of a marriage of 3 years' duration, to a requirement of a marriage of only 1 year's duration. H.R. 8597 would add another provision at this point; namely, a wife, or husband, could qualify as a spouse if, among other requirements, she, or he, although not married to the annuitant or pensioner for 1 year, and although not the parent of the annuitant's or pensioner's son or daughter, was eligible, in the month prior to the marriage, for a widow's annuity, a parent's annuity, or a child's disability annuity under the Railroad Retirement Act.

These changes conform with similar rights which the Social Security Act affords by provisions which were incorporated into subsections (b) and (f) of section 216 of that act by the 1958 amendments—Public Law 85–840—and the 1960 amendments—Public Law 86–778.

The following is quoted from pages 5 and 6 of House Report No. 216, the report of the Committee on Ways and Means, House of Representatives, to accompany H.R. 6027—which was enacted as Public Law 87–64, the Social Security Amendments of 1961:

> The provision of benefits at age 62 for men will help to alleviate the hardships faced by that group of men who, because of ill health, technological unemployment, or other reasons, find it impossible to continue working until they reach 65. It is well known that older workers who lose their jobs find it more difficult to get new jobs than do younger unemployed workers. The plight of the older unemployed man is particularly bad. It is, of course, worse during periods of recession and in areas of chronic unemployment. Even with relatively high employment there will always be individuals nearing age 65 who will lose their jobs and find it impossible to get new ones. Adoption of this amendment will make the program, to which these people have made contributions over the years in expectation of receiving benefits when they are too old to work, flexible enough to provide a degree of protection for them when they find themselves unable to get work because of conditions beyond their control when they are getting along in years, even though they have not reached the age of 65.
>
> Provisions for optional retirement before 65 are quite common in private pension plans. A study of the pension programs of 230 companies, made by the Bankers Trust Co. of New York in 1960, showed that among the collectively bargained plans 96 percent permitted early retirement and among the noncollectively bargained plans 88 percent permitted early retirement. In another 1960 study (by the Bureau of Labor Statistics) it was found that early retirement provisions were included in 224 of the 300 plans studied (75 percent), and covered about 3 million of the 4.6 million workers who were members of these plans (12 of these plans covering about 350,000 workers provided early retirement for women only). Moreover, it appears that the number of plans providing for optional early retirement is increasing; in a comparable 1952 study (by the Bureau of Labor Statistics) only 166 of the 300 plans which were included had early retirement provisions."

The same considerations which were applicable to the liberalization of the Social Security Act in respect of the time relative to marriage at which a wife's or husband's benefit may begin are applicable to the amendment provided in section 2 of the bill as to the time relative to marriage at which a spouse's annuity may begin.

As the Railroad Retirement Act stands today a widow's annuity is payable to the widow of a completely insured employee provided she has reached age 60 and has not remarried. To qualify as a widow she must have been living with the employee and have been married to him for at least 1 year before his death. If the widow marries another railroader she would lose her present pension upon remarriage. She would not become eligible for an annuity based on her second husband's earnings until they had been married 1 year. Thus, if he died within the first year of marriage she would be left without income.

On the other hand if the widow's first husband had been covered by social security instead of railroad retirement she would face no loss of protection upon remarriage to a railroad beneficiary. She would become eligible for a railroad annuity upon his death even if it occurred immediately after their marriage.

The committee amendment included as section 3 of the reported bill intends to correct this inequity in the Railroad Retirement Act. As now written, this act discriminates against a railroad worker's widow who remarries and whose new spouse is himself a retired railroad worker. The widow, in such a circumstance, loses retirement protection for a full year after her remarriage. This is inconsistent with the fact that a social security annuitant faces no such loss in protection in event of a remarriage with a man receiving railroad retirement benefits.

COSTS OF THE BILL

The costs of the amendments provided by section 1 of the bill to permit men without 30 years of service to receive reduced annuities upon attainment of age 62 are estimated to be about 0.04 percent of taxable payroll—assumed to be $4.3 billion a year—or about $2 million a year on a level basis.

As of the end of 1959, there were about 10,000 employees in the 62–64 age group with 10–29 years of service who had withdrawn from the railroad industry. How many of these people will apply for reduced annuities is hard to predict. The 1956–58 experience on withdrawals in this employee category was as follows: 850 withdrawals in 1956; 1,100 in 1957; and 1,300 in 1958. Except for those among them who died before 1960, these employees are included in the 10,000 figure previously cited.

The following is an estimate of the effect on the first year of the provisions for reduced annuities for men after age 62 who have less than 30 years of service:

Number to be awarded reduced annuity	5,000
Average reduced annuity on an annual basis	$1,000
Total to be paid in year	$5,000,000

Of the $5 million, the major part will be reimbursable under the financial interchange provisions of section 5(k)(2) of the Railroad Retirement Act.

The costs of the amendments provided by section 2 of the bill respecting the time relative to marriage at which a spouse's annuity could be payable would be insignificant. The reduction from 3 years to 1 year in the time which must elapse after marriage before a spouse's annuity can be paid would extend eligibility to a very small group of persons who have been denied spouse's annuities because they have been married less than 3 years.

The cost of the amendment provided by section 3 of the bill making inapplicable the 1-year requirement for a widow, if prior to her new marriage she had qualified for a widow's annuity, is

insignificant. One member of the Board put it at a few thousand dollars, and the Chairman of the Board indicated that at the outside it could not run over $100,000.

The estimated additional actuarial deficiency resulting from the provisions of H.R. 8597 to bring certain railroad retirement system benefits into line with those of the social security system would be 0.04 percent of payroll on a level premium basis or some $2 million per year.

This cost, however, must be considered in the light of the current actuarial deficiency of the system. This has risen from 0.61 percent of payroll in 1959 to 1.69 percent of payroll, or $73 million per year on a level basis, according to data from the Railroad Retirement Board's eighth actuarial valuation. The burden borne by the system can be illustrated by the fact that the number of people on the beneficiary rolls is some 825,000 as compared to recent covered employment of 831,000.

In connection with the cost of this bill, Howard W. Habermeyer, Chairman of the Railroad Retirement Board, testified:

The Board normally does not favor measures which would liberalize the benefit provisions without providing for the financing of the added costs. However, we understand that the Railway Labor Executives' Association which represents the employee group which pays one-half of the costs of the system favors the bill and the Association of American Railroads, which represents the employers who pay the other half do not object to it. In view of this fact, and because of the unquestioned good that would be done the Board urges that the bill be enacted.

In response to questions, Mr. Habermeyer further stated:

Let me assure you that the Board will take up its responsibilities, and if the additional financing is not provided within the very near future we will have a program to make that financing sound.

In this connection, Mr. Lester P. Schoene, counsel for the Railway Labor Executives' Association, testified:

We have a deficit problem on the order of $73 million now as compared with $2 million involved in this particular item.

Relating it another way, I think the estimate in terms of percentage of payroll is 0.04 percent of the payroll as against the 1.69 percent involved in the present deficit.

Unquestionably, the entire matter of the deficit financing we have been experiencing in recent years will require very serious attention. Both the railroads and the organizations for whom I am speaking this morning are committed to maintaining this fund on an overall long-range actuarially sound basis.

The Committee on Interstate and Foreign Commerce in its consideration of this proposed legislation cannot but be mindful of the fact that provision is not being made for financing the additional benefits here provided. The committee has ever been zealous as those who participate in and those who administer the railroad retirement fund in maintaining the financial soundness of that fund.

In this connection, it is appropriate to iterate what we said in connection with reporting an increase in benefits a few years ago:

In the consideration of all these bills, however, the committee has placed great emphasis on the effect of the proposed amendments on the financial soundness of the railroad retirement account. The committee is unanimously of the opinion that, regardless of the desirability of certain proposals for the liberalization of benefits under the Railroad Retirement Act, no amendments to the law should be made which would jeopardize the financial soundness of the railroad retirement system. The principle is accepted by all the standard railway labor organizations as well as railroad management.

This committee has every desire to be helpful to retired railroad workers and their dependents. We are also mindful of our grave responsibility toward the currently active railroad workers and those who will follow and who will retire in the future. We must make certain that when they retire from the railroad industry, the reserves in the railroad retirement account plus the income into the system will be adequate to pay the benefits due them (H. Rept. 2418, 84th Cong., 2d sess, June 25, 1956, H.R. 9065).

Early in 1959 the actuarial deficiency in the railroad retirement account was 3.81 percent of taxable payroll, or $213 million a year on a level cost basis. In March of 1959 the Committee on Interstate and Foreign Commerce reported a bill, H.R. 5610, which became Public Law 86–28 on May 19, 1959. This law made extensive revisions in the Railroad Retirement Act and the Railroad Retirement Tax Act, the net effect of which was to reduce the actuarial deficiency to 0.61 percent of payroll or $34 million a year. The changes in the Tax Act consisted of first, an increase in the maximum taxable compensation from $350 to $400 a month; second, an increase in the combined employer-employee tax rate from 12½ percent to 13½ percent from June 1959 through December 1961, and 14½ percent thereafter through 1964; and third, a further increase in the tax rate after 1964 equal to the number of percentage points by which the then current social security rate on employers and employees combined exceed 5½ percentage points.

The most recent—eighth—actuarial valuation of the railroad retirement system which was completed last July indicates that the actuarial deficiency has risen to 1.69 percent of taxable payroll, or $73 million a year on a level basis. The principal reason for this change in the deficiency is the continuous and substantial decrease in railroad employment in the last several years.

The estimate of a 0.61 percent deficiency made immediately after the enactment of Public Law 86–28 was based on an annual taxable payroll of $5.6 billion on a taxable base of $400 monthly limit per employee. Now, the chief actuary of the Railroad Retirement Board, has adopted, for the eighth actuarial valuation, an annual taxable payroll of $4.3 billion, a figure roughly corresponding to the actual experience during the last several months of 1960.

The cost of financing incurred by this bill, however, is relatively small and quite minor when considered in relation with the current actuarial deficiency of the railroad retirement system. The committee is of the opinion as stated by the witnesses quoted above that it is the problem of the current actuarial deficiency which requires serious attention.

I urge the passage of S. 2395.

The joint letter from the Railway Labor Executives' Association and the Association of American Railroads follows:

RAILWAY LABOR EXECUTIVES' ASSOCIATION,
Washington, D.C., August 9, 1961.

Hon. OREN HARRIS,
Chairman, Committee on Interstate and Foreign Commerce, House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: The Railway Labor Executives' Association favors H.R. 8597, a bill to amend the Railroad Retirement Act to permit male employees who have attained age 62 but have less than 30 years of service to receive a reduced annuity and to enable the payment of spouses' annuities within a shorter period after marriage than is at present possible. These amendments would bring the Railroad Retirement Act into accord with the 1961 amendments to the Social Security Act in the areas involved. The Association of American Railroads interposes no objection to enactment of the measure.

Section 1 of the bill would make men who have attained age 62 and who have less than 30, but at least 10, years of service, eligible for an annuity on an actuarially reduced basis. Women already have this right under the Railroad Retirement Act. Under the Social Security Act, men and women who have at least the minimum of service needed to qualify for old-age benefits can receive such benefits on a reduced basis after attainment of age 62.

The proposed amendments in section 2 would permit a spouse's annuity to begin at the same time, relative to marriage, as can a wife's or husband's benefit under the Social Security Act. Thus, section 2 of the bill would shorten from 3 years to 1 year the maximum time which must elapse after marriage before a spouse's annuity could be payable.

It would also permit a wife or dependent husband, if eligible in the month before marriage for a widow's, widower's, or parent's annuity, to receive a spouse's annuity immediately upon marriage if then of sufficient age or immediately upon attainment of the required age; and this would also be true of a spouse so eligible for a child's disability annuity. For example, if a women who was eligible for such an annuity in January marries an annuitant (who is 65 or more) in February and is then 65 or more years of age, she could receive a full spouse's annuity beginning in February.

If such a woman were only 64 in February, but became 65 in June, she could receive a full spouse's annuity beginning in June. In the first case, if she were 62 in February, she could receive a reduced spouse's annuity beginning in February. In the second case, if she were only 61 in February but became age 62 in June, she could receive a reduced spouse's annuity beginning in June.

The proposed amendments would affect the spouse's annuity only as to the time, relative to marriage, at which it could begin. The age of eligibility and other qualifying conditions would remain as they are now.

The proposed amendment in section 1 would result in a relatively small charge of approximately $2 million a year against the railroad retirement account.

The Railway Labor Executives' Association urges that the proposed bill be reported favorably by your committee at this session of

the Congress. The Association of American Railroads raises no objection to such action.

Sincerely yours,

ASSOCIATION OF AMERICAN RAILROADS,
By R. E. HOLLAR,
Vice President, Assistant to the President.

RAILWAY LABOR EXECUTIVES' ASSOCIATION,
By A. E. LYON, *Executive Secretary.*

RAILWAY LABOR EXECUTIVES' ASSOCIATION,
By A. E. LYON, *Executive Secretary.*

Mr. SPRINGER. Mr. Speaker, I have no objection to this bill. The committee held extensive hearings, everybody who appeared before the committee recommended the bill. The bill is in the public interest, I believe a good bill, and ought to be passed.

Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. BENNETT] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BENNETT of Michigan. Mr. Speaker, I urge the adoption of H.R. 8597.

This bill provides for amendments to the Railroad Retirement Act in three respects: First, male employees who do not have 30 years of service would be permitted to elect retirement at age 62 on a reduced annuity. Under present law, male employees with 30 years of service may retire at age 60 or any time subsequent thereto on a reduced annuity but those who do not have 30 years of service must wait until they are 65 years old. Female railroad employees already have the right to retire at age 62 on a reduced annuity.

Second, a spouse would become eligible for a spouse's annuity after 1 year of marriage instead of having to wait for 3 years under existing law.

Third, anyone entitled to a survivor benefit who marries a retired annuitant would immediately upon such marriage become entitled to a spouse's benefit, if then of sufficient age.

I understand that all the standard railway labor organizations, being represented here by the Railway Labor Executives' Association, heartily endorse this bill and will so testify. Also, I am advised that the railroads will not object to these amendments.

Mr. Speaker, having served on this great committee for many, many years I am well aware of the attitude of the committee toward liberalization of retirement benefits without provisions for the adequate financing of the costs of the proposed benefits. On many occasions the committee has expressed the view that in the consideration of all bills to amend the Railroad Retirement Act great emphasis would be placed on the effect of the proposed amendments on the financial soundness of the railroad retirement account. The Committee has stated that it was unanimously of the opinion that, regardless of the desirability of certain proposals for the liberalization of benefits under this act, no amendments should be made which would jeopardize the financial soundness of the railroad retirement system. A great number of people depend on their retirement and survivor benefits for a livelihood and many more who will retire in the future are counting on these benefits. Hence, the Congress must proceed with great caution in providing new benefits without adequate cost considerations.

I am advised that the cost of this legislation is approximately $2 million a year. The bill does not propose any change in the tax structure. Hence enactment of this legislation will increase the deficiency in the railroad retirement account by approximately $2 million a year.

This is not a large sum and it would not place the retirement system in jeopardy since the balance in the account exceeds $3.5 billion. Nevertheless at some time in the not too distant future the Congress will have to tackle this problem and make provision for additional financing of the system.

The benefits we are providing in this legislation are no more than what employees covered by the Social Security Act already have achieved under the 1961 and previous amendments to this act. In fairness and justice to the railroad workers we must meet these advances by the prompt enactment of H.R. 8597.

GENERAL LEAVE TO EXTEND REMARKS

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that all Members may have the privilege of extending their remarks in the RECORD at this point on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. POFF. Mr. Speaker, I will support H.R. 8597 for two reasons, namely, first, less than this Congress could not in conscience do; and, second, more than this Congress obviously will not do before adjournment.

Congress could not do less because Congress has already done as much for social security annuitants. That Congress will not do more is a reproach unto itself. Congress cannot excuse itself with the plea of a crowded schedule. This has been one of the longest sessions in peacetime history. Many weeks have passed with the House in session only 3 days. A host of bills to improve the Railroad Retirement Act has been pending since Congress convened in January.

This bill accomplishes little enough. It reduces the voluntary retirement age, but it also reduces the annuity. Already under the present law, a worker with more than 30 years' service can retire on a reduced annuity. All this bill does is to extend that privilge to workers at age 62 when they have worked less than 30 years and more than 10 years.

Those of us who are alarmed at the steady decline in employment on the Nation's railroads feel that something must be done to increase job opportunities for young people and promote job security for those who have already invested most of their productive years in the railroad industry. This can be done by making retirement more attractive. A worker with a tenure of 30 years or more has little incentive to retire before 65 on a reduced annuity. A full annuity at 60 or 62 would be a substantial inducement. Other inducements would be the establishment of the 5-best-years rule and the repeal of the "last employer" clause.

I repeat, I am going to support this bill, but only with the feeling that it is too little and too late and only with the determination to renew the demand for committee hearings and affirmative action on the other bills when Congress reconvenes next January.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. BOLAND], may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. BOLAND. Mr. Speaker, I rise in support of H.R. 8597 to amend the Railroad Retirement Act of 1937 to provide reduced annuities to male employees who have attained age 62. I filed a similar bill, H.R. 8843, which was also considered by the Committee on Interstate and Foreign Commerce before reporting favorably on the legislation.

The purpose of this legislation is to make changes in the eligibility requirements for benefits under the railroad retirement system to bring them into line with recent changes in the eligibility requirements for benefits under the social security system.

Mr. Speaker, I urge my colleagues in the House to pass this bill and give railroad employees the same opportunity for benefit eligibility as provided by the Social Security Act.

Mr. HARSHA. Mr. Speaker, I rise in support of S. 2395 and H.R. 8597, companion bills to amend the Railroad Retirement Act of 1937.

The purpose of these bills is to make changes in the eligibility requirements for benefits under the railroad retirement system to bring them into line with recent changes in the eligibility requirements for benefits under the social security system.

Over the years it has been general policy to provide that benefits accruing under the Railroad Retirement Act to a railroad employee as a result of railroad service would be not less than those which would have been provided, were railroad service to be covered by the Social Security Act. Recent amendments to the Social Security Act have resulted in certain inequities and discrepancies in favor of the social security system as against the railroad retirement system.

There is need in certain areas, accordingly, for certain changes in the benefits provided by the Railroad Retirement Act to bring them into line with those provided by these amendments to the Social Security Act.

The Social Security Act was recently amended—Public Law 87-64—to allow men to retire at age 62 with a reduced

old-age insurance benefit. H.R. 8597 and S. 2395 would permit railroadmen with less than 30 years of service to retire at age 62 with an annuity, reduced, as in the case of women, by one one-hundred-and-eightieth for each month the man is under age 65.

Under the Railroad Retirement Act at present, the wife, or husband, or a retirement annuitant or pensioner may qualify as a spouse if—among other requirements—she, or he, was married to such annuitant or pensioner for a period of not less than 3 years immediately preceding the day on which the application for a spouse's annuity is filed, or is the parent of such annuitant's or pensioner's son or daughter.

H.R. 8597 and S. 2395 would change the alternative requirement first above described, of a marriage of 3 years' duration, to a requirement of a marriage of only 1 year's duration. H.R. 8597 would add another provision at this point; namely, a wife, or husband, could qualify as a spouse if—among other requirements—she, or he, although not married to the annuitant or pensioner for 1 year, and although not the parent of the annuitant's or pensioner's son or daughter, was eligible, in the month prior to the marriage, for a widow's annuity, a parent's annuity, or a child's disability annuity under the Railroad Retirement Act.

The provision of benefits at age 62 for men will help to alleviate the hardships faced by that group of men who, because of ill health, technological unemployment, or other reasons, find it impossible to continue working until they reach 65. It is well known that older workers who lose their jobs find it more difficult to get new jobs than do younger unemployed workers.

The plight of the older unemployed man is particularly bad. It is, of course, worse during periods of recession and in areas of chronic unemployment, and in recent years there has been considerable furloughing of railroad employees in the 6th Congressional District of Ohio. This district has recently been designated by the Department of Commerce as an area of substantial and persistent unemployment. Contributing greatly to this status is the fact that many of our railroad workers have been furloughed. Even with relatively high employment there will always be individuals nearing age 65 who will lose their jobs and find it impossible to get new ones. Adoption of this legislation will make the program, to which these people have made contributions over the years in expectation of receving benefits when they are too old to work, flexible enough to provide a degree of protection for them when they find themselves unable to get work because of conditions beyond their control when they are getting along in years, even though they have not reached the age of 65.

It seems only fair to these men and women who have so much at stake that they be given the same consideration as those who are covered by the Social Security Act. I strongly recommend to my colleagues the passage of this legislation.

Mr. MACK. Mr. Speaker, I join with my distinguished chairman in support of this bill which would amend the Railroad Retirement Act to provide retirement at the age of 62 for male employees. This, of course, would be permitted on a reduced annuity basis.

I also support the other provisions of this bill which liberalize this retirement system, so that the provisions accruing under this act would not be less than those which are provided by the Social Security Act.

I am particularly interested in section 3 of this bill which is an amendment I offered when the bill was being considered by the Interstate and Foreign Commerce Committee. This amendment is in fact H.R. 5027 a bill which I introduced early this year. I testified in favor of this bill when the hearings were being held and because it is so closely related to the subject matter contained in this bill I felt it was important to have this provision included in this bill.

This amendment is designed to correct a glaring inequity in the remarriage provision of the Railroad Retirement Act. As now written, this act discriminates against a railroad worker's widow who remarries and whose new spouse is himself a retired railroad worker. The widow, in such a circumstance, loses retirement protection for a full year after her remarriage. This is inconsistent with the fact that a social security annuitant faces no such loss in protection in event of a remarriage with a man receiving railroad retirement benefits.

For example, I have an elderly constituent who is drawing railroad retirement benefits and who wants to marry the widow of another railroader. She would, of course, lose her present pension upon remarriage. She would not become eligible for an annuity based on her second husband's earnings until they had been married a year. Thus, if he died within the first year of marriage, she would be left without income. On the other hand, if her first husband had been covered by social security instead of railroad retirement, she would face no such loss of protection upon remarriage to a railroad retirement beneficiary. She would become eligible for a railroad retirement annuity upon his death, even if it occurred immediately after their marriage.

Mr. Speaker, my amendment does not liberalize the railroad retirement program but merely corrects a glaring inequity in the law. For this reason it is highly important that we include this provision in the bill.

The SPEAKER pro tempore. The question is, Will the House suspend the rules and pass the bill S. 2395?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The SPEAKER pro tempore. Without objection, a similar House bill (H.R. 8597) will be laid on the table.

There was no objection.

EMPLOYMENT FOR CERTAIN ADULT INDIANS

Mr. HALEY. Mr. Speaker, I move to suspend the rules and pass the bill (S. 200) to amend the act entitled "An act relative to employment for certain adult Indians on or near Indian reservations," approved August 3, 1956, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act entitled "An Act relative to employment for certain adult Indians on or near Indian reservations", approved August 3, 1956 (70 Stat. 986), is amended by striking out "$3,500,000" and inserting in lieu thereof "$7,500,000" and by striking out "$500,000" and inserting in lieu thereof "$1,000,000".

Mr. BERRY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. BERRY. Mr. Speaker, I rise in support of S. 200 and ask every Member of the House to support this measure.

All that is involved in this bill is an amendment to the bill passed by Congress on August 3, 1956—70 Statute 986, 25 U.S.C. 309.

Under that act Congress provided a program of trades training and on-the-job training for Indians similar to the GI on-the-job and trades training law. The legislation has been the greatest assistance to the Indian people of any legislation passed in many years. It has in fact been so popular and so successful that we now need additional funds to provide training for additional Indians who are seeking this training in order to prepare themselves for employment.

As an example of how successful this program has been, on one reservation in western South Dakota, the Pine Ridge Reservation, 280 Indian people are now employed in a fishing tackle industry and the company will take on an additional 120 more just as soon as money is available to give them training to carry on the work. This is only one example.

All the bill does is to increase the authorization for funds for the program from $3,500,000 to $7,500,000 annually. It is needed. It is doing a great work for the Indians of the Nation. I trust everyone will support it. Thank you.

The SPEAKER pro tempore. Is a second demanded?

If not, the question is on the motion of the gentleman from Florida that the House suspend the rules and pass the bill S. 200, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

SALUTING "UNCLE SAM" WILSON OF TROY, N.Y.

Mr. O'BRIEN of New York. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 14, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. BASS of New Hampshire. Mr. Speaker, reserving the right to object, I am very much distressed to note that

the committee has struck out the language of the Senate referring to "Uncle Sam" Wilson's New Hampshire connections.

I would like to inquire of the gentleman from New York as to the reason for this language being stricken out.

Mr. O'BRIEN of New York. To be perfectly honest with the gentleman from New Hampshire it was the result of an attempt to reach a common denominator. The distinguished gentleman from Indiana [Mr. ADAIR] claims that Samuel Wilson is buried there. The people of Troy, N.Y., claim that he is buried there. The people of Massachusetts claim that he was born there. The good people of New Hampshire claim he spent 20 years of his life there. But the gentleman from New York found that amid all that controversy there was one central point of agreement, that this gentleman did live in Troy, N.Y., and that that is where he acquired the title of "Uncle Sam." There was no attempt, not the slightest attempt, to downgrade the part which the great State of New Hampshire played in the career of this distinguished gentleman. I might say to the gentleman from New Hampshire that in eliminating reference to his birth in Massachusetts, I had to eliminate the city of Cambridge, Mass., which happens to be the native city of my own wife.

Mr. BASS of New Hampshire. Mr. Speaker, actually he spent 20 years in the town of Mason, N.H., which is right next to where I live. I would hope that the gentleman from New York would recognize that fact, which is a well established fact, according to our town history.

Mr. O'BRIEN of New York. I thoroughly agree with the gentleman from New Hampshire.

Mr. BASS of New Hampshire. Mr. Speaker, I withdraw by reservation.

Mr. ADAIR. Mr. Speaker, reserving the right to object, as the gentleman from New York [Mr. O'BRIEN] said earlier this afternoon, in response to my question, the bill now before us provides, in effect, that a Samuel Wilson lived for a period of time in Troy, N.Y., and that a Samuel Wilson is the progenitor of our "Uncle Sam." As to where "Uncle Sam" was born or where his remains lie buried, the resolution makes no statement, nor takes any position.

Mr. O'BRIEN of New York. If the gentleman will yield, the gentleman has made a very accurate statement.

Mr. GROSS. Mr. Speaker, further reserving the right to object, are we disinterring or are we burying Samuel Wilson?

Mr. O'BRIEN of New York. We are trying to do neither, sir.

Mr. GROSS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GROSS. Mr. Speaker, after we have disposed of Samuel Wilson, will we have reached the bottom of the legislative barrel for today?

The SPEAKER pro tempore. There is one more suspension after this, I might say to the gentleman.

Is there objection to the request of the gentleman from New York [Mr. O'BRIEN]?

There was no objection.

The Clerk read the concurrent resolution, as follows:

Whereas in a world largely hostile to the idea of freedom we must keep alive the cherished values of our way of life; and

Whereas at a moment in our history when we need all our sense of purpose and capability to match the challenge of disciplined communism some say that our national symbol of "Uncle Sam" is archaic and should be disowned; and

Whereas the symbol of "Uncle Sam" was evoked out of the needs of a young Nation, and is linked to a grassroots character, Samuel Wilson, of Troy, New York, who still represents the strength and idealism that made up the greatest Nation in the world; and

Whereas the years 1766 to 1854, the years in which Samuel Wilson lived, witnessed the birth and glorious progress of the United States, spanning as they did the period before the Declaration of Independence to the emergence of the United States as a world power; and

Whereas no congressional action has ever been taken to make the symbol of that American tradition, the symbol of "Uncle Sam," official and permanent: Therefore be it

Resolved by the Senate (the House of Representatives concurring), That the Congress salutes "Uncle Sam" Wilson, of Troy, New York, as the progenitor of America's national symbol of "Uncle Sam".

Mr. KING of New York. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KING of New York. Mr. Speaker, as the Speaker is well aware, Senate Concurrent Resolution 14 expresses the sense of Congress in saluting "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of America's national symbol of Uncle Sam.

Mr. Speaker, in the early part of the 19th century there was living in Troy, N.Y., a prosperous middle-aged gentleman who was destined to achieve a kind of fame almost unique in history. He was on the way toward becoming a symbol of a new people's conception of its own character and personality.

By direct inheritance he was Scotch-Irish, with a Massachusetts background; by indirect, he was a descendant of Yankee Doodle and a nephew of Brother Jonathan. His name was Samuel Wilson and he was called by the people of Troy, and later on by the State and Nation, as "Uncle Sam."

Wilson's direct descent is naturally a little easier to establish than his indirect. There is no doubt that he existed and that he was generally known as "Uncle Sam." On the other hand, there have been skeptics who could not be convinced that the "Uncle Sam" who once farmed on Mount Ida in Troy which was later made famous by its industrial growth and its collars and cuffs, is the same "Uncle Sam" now universally recognized as the personification of the United States of America.

Proof has been submitted that Samuel Wilson was born in Menotomy, now Arlington, Mass., on September 13, 1766, and who died in Troy on July 31, 1854, is the progenitor of the Nation's symbol of Uncle Sam. He spent some years of his life in Mason, N.H.

Our "Uncle Sam" cannot be disowned by the doubters and disclaimers who vow that as a stereotype he is out of date, because "Uncle Sam" sprang from the needs of the American people and belongs to them. He sums up our best national traits and traditions, embodying our national promise at home and abroad.

If any distortion of "Uncle Sam" exists today, we ourselves must take the blame for having failed to recognize his flesh-and-blood origin.

Passage of Senate Concurrent Resolution 14 will therefore give added meaning to "Uncle Sam" as a representative and uplifting symbol. It will add vitality to his spirit and validity to his historic meaning and mission.

Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. MORSE], may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MORSE. Mr. Speaker, I deeply regret that Senate Concurrent Resolution 14 as approved by the other body has been amended to omit recognition of Arlington, Mass., as the birthplace of Samuel Wilson.

As author of a resolution identical to Senate Concurrent Resolution 14 in its original form, I have investigated the origins of "Uncle Sam" Wilson with meticulous care. I am distressed that reference to his birthplace has been stricken from the legislation now before us.

Facts available through the Library of Congress, the Arlington, Mass., Historical Society, and other distinguished and reliable sources, clearly establish that "Uncle Sam" Wilson was born in the town of Old Menotomy, now known as Arlington, in what today is the Fifth District of Massachusetts, which I have the honor to represent.

On September 13, the 195th anniversary of the birth of "Uncle Sam" in 1766 in Old Menotomy—the Troy, N.Y. Area Committee for Uncle Sam will hold an official observance at the grave of this progenitor of our national symbol. Full cognizance of the fact that Uncle Sam had his origins in the Fifth District of Massachusetts will be given at this ceremony. The Troy committee also has carefully researched dusty archives and have emerged with unquestionable supporting evidence that "Uncle Sam" is as much a product of the Fifth District of Massachusetts as are the minutemen, Concord Bridge and Lexington Green. They have dispelled the folktales which would have it that "Uncle Sam" was born elsewhere.

The Reverend Samuel Cook who attended the birth of Samuel Wilson at Old Menotomy on September 13, 1766, records that important fact in his "Abstracts of Births, Deaths, and Marriages." Another source book is Benjamin Cutter's "History of the Town of Arlington, Mass., 1635–1879, with Genealogy," "Vital Records of Arlington,

Through the Year 1850," supports the facts.

Language in paragraph 4 of the preamble of the bill which was approved by the other body, which read:

Whereas the story of Samuel Wilson's life, from his early Colonial beginnings in Old Menotomy (later West Cambridge, now Arlington, Mass.) and Mason, N.H., to his rise in prominence and great public affection and esteem in Troy, N.Y., where the sobriquet of "Uncle Sam" was given him, in an abridged story of America; and

And, the resolving clause, reading:

That the Congress salutes "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of America's national symbol of Uncle Sam, and also recognizes Arlington, Mass., famed in the history of America's dawning years, as the birthplace of the said Samuel Wilson,

Gave clear expression to established historical fact.

In the interests of recognition, too long denied, of the contribution of Samuel Wilson's life to our culture and our heritage, I urge that Senate Concurrent Resolution 14 be adopted.

Mr. GARMATZ. Mr. Speaker, in connection with the bill before us saluting "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of Amercia's national symbol of "Uncle Sam," I think the Members of the House will be interested in a broadcast which I wish to insert at this point. This broadcast was made by Al Quinn, veteran Maryland broadcaster over WBAL in Baltimore, in his nightly program Maryland Report, on the subject of "Uncle Sam":

MARYLAND REPORT

Good evening, this is Al Quinn with Maryland Report: So now they're trying to locate the grave where Uncle Sam is buried.

And shucks. I didn't even know he was dead.

And a lot of us who remember the grand old man with the whiskers and the stovepipe hat and red, white, and blue pants, in the Fourth of July parades of our youth just aren't going to believe he passed away. We know he's still alive and always will be as long as the United States of America exists.

And who's trying to declare Uncle Sam interred in the cold earth? The Communists? The Fascists? or some other gang of crackpots?

No, sir. It's certain Members of the U.S. Congress.

The Judiciary Committee of the U.S. Senate already has placed the grave of Uncle Sam in Troy, N.Y. They did that by approving a resolution presented by Senator KEATING of New York, declaring that the original Uncle Sam was a fellow named Samuel Wilson, who lived in Troy back around the Revolutionary time, and had something to do with supplying the Revolutionary troops.

Now Indiana is rarin' up on its hind legs, and claimin' through the voice of Representative ADAIR of that State that the real original Uncle Sam was a Hoosier whose final resting place can be found somewhere out there among the corn and soybeans.

And in New York City, there's a fellow named E. D. McMullen who has been communicating with Representative ADAIR and claiming that the real, true Uncle Sam lived and died, not in Troy, N.Y., or out on the banks of the Wabash, but in New York City itself—an old bewh'skered codger of Revolutionary days named Samuel Huntington.

There are rumors that Texas also is getting ready to present a claim of poessessing somewhere in its 267,339 square miles the remains of the tall fellow whose initials are the same as those of the United States.

And you can be sure there will be others. Why shouldn't Massachusetts enter the game with the contention that old Samuel Adams was the original Uncle Sam—or the inspiration for the coining of the name. Surely, Sam Adams had a bigger part in the maturing of the Colonies and the birth of the Nation than did those other characters whose names are being bandied about.

And there were Samuels of some prominence all over Virginia, and Pennsylvania, and in all of the other Thirteen Colonies, including Maryland. Like Maryland's Samuel Chase, signer of the Declaration of Independence, Member of the Continental Congress and an Associate Justice of the Supreme Court in the early days of the Republic.

Yes, there were Samuels of note all over the place—and many of them sporting chin whiskers.

But none of these was Uncle Sam. And none of their graves is the grave of Uncle Sam. Because Uncle Sam isn't there. He is here. He isn't dead. He lives.

He was with Patrick Henry in the Virginia House of Burgesses when Patrick defied the British sovereign. He was at the tea party in Boston, and he fanned the blaze that burned the tea ship, Peggy Stewart, in the harbor at Annapolis. He was in Frederick for the repudiation of the British Stamp Act.

Yes Uncle Sam is a spirit who lives where the true spirit of America manifests itself. He was with Washington and his barefoot troops at Valley Forge. And he was at Trenton and Long Island and especially at Yorktown, and he was with the American forces at Fort McHenry and in all the other battles of the War of 1812, and maybe he whispered to Francis Scott Key some of the words of the Star Spangled Banner.

He was with the Yankee troops at Chateau Thiery. And at Belleau Wood. And at the Bulge and all the other great battles of the Second World War.

He stood on the frozen hills of Korea when Americans fought there for the sake of freedom.

And he must have been at the elbow of President Kennedy a few nights ago when the President laid out the true American position in regard to the threats and challenges of Soviet Russia, and he has been at the recruiting offices of the Army, Navy, Air Force, and Marine Corps in all the subsequent days as young Americans have signed up to defend the American way of life and the freedom of humanity.

Yes, Uncle Sam is very much alive today from the rockbound coast of Maine, as they say, to the sunny shores of California, and from the Canadian border to the Mexican. And in all the farflung outposts of the American fighting men who are defending his cause, the cause of human liberty.

He isn't buried in Troy, N.Y., or Manhattan, or Muncie, Ind., or Houston, or Richmond, or Baltimore because he isn't buried at all. He isn't dead.

And it's high time those fellows in the Congress of the United States got wise to themselves and to the facts of the American story. And if they want to go grave hunting, let them find the graves of all the mere mortals who lived and died in the American cause. Let them even place a stone over a rise in the ground and say "Here lies Johnny Appleseed," or "Here are the remains of Paul Bunyan," or even of Paul's great blue or by the name of "Babe."

Let them claim for their localities of their States the dusty bones of Tom Swift and Ragged Dick, and the James brothers and the Merriwell brothers and all the other heroes of fact and fiction—of truth, exaggeration, and simple myth. Maybe there are enough of them to distribute throughout the 50 States and satisfy the ghoulery of all the tombstone huntin' patriots in the Congress.

But not Uncle Sam.

All the resolutions or bills that Congress can adopt or pass will not kill Uncle Sam or place his grave in anybody's buryin' ground.

And it's time for some Congressman with more sense than the average, say some Maryland Congressman, to get up a resolution declarin' that Uncle Sam, the livin' and ever-livin' Uncle Sam, belongs to no particular town or State, but rather to the whole United States. And that the argument over his place of burial is absurd, silly, stupid, and rash, because there is no such place, and, as long as there is a United States, never can be such a place.

Because Uncle Sam has never died.

And thank you for listening; this has been Al Quinn with Maryland Report.

The SPEAKER pro tempore. The question is on the concurrent resolution.

The concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PRESERVATION AND PROTECTION OF LANDS IN PRINCE GEORGES AND CHARLES COUNTIES, MD.

Mr. RUTHERFORD. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 459) to provide for the preservation and protection of certain lands in Prince Georges and Charles Counties, Md., and for other purposes, as amended.

The Clerk read as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to preserve for the benefit of present and future generations the historic and scenic values, the unusual cultural, scientific, and recreational values, and the present open and wooded character of certain lands situated along the Potomac River in Prince Georges and Charles Counties, Maryland, and in order to preserve lands which provide the principal overview from the Mount Vernon Estate and Fort Washington, in a manner that will insure, insofar as practicable, the natural beauty of such lands as it existed at the time of the construction and active use of Mount Vernon Mansion and Fort Washington, the Secretary of the Interior is authorized to acquire and administer lands and interests therein, in the manner hereinafter provided.

SEC. 2. (a) The Secretary of the Interior is authorized to accept donations of lands or interests therein located in Prince Georges and Charles Counties, Maryland, in the vicinity of Piscataway Creek, held by the Accokeek Foundation or other foundations or organizations for public use.

(b) When the Secretary receives a commitment, subject to such conditions as shall be agreeable to the Secretary of the Interior and the potential donor or donors, in accordance with which commitment the property referred to in subsection (a) will be donated to the United States for purposes of this Act, he is authorized to acquire by such means as he finds are in the public interest other land and interests in land lying generally within the area identified as follows:

Beginning at a point on the shoreline of the Potomac River at the intersection of the northerly right-of-way line of Maryland State Route 227 in Charles County, Maryland; thence following the Maryland shoreline of said river in a northeasterly direction to the confluence of Piscataway Creek in Prince Georges County, Maryland;

thence following the shoreline from Mockley Point and proceeding in a generally easterly direction along the south shore of Piscataway Creek to a point 250 feet to the west of the point where the westerly right-of-way line of Farmington Creek Road intersects the shoreline of Piscataway Creek; thence southeasterly along said line approximately 250 feet west of Farmington Creek Road approximately 800 feet; thence westerly generally following the 50-foot contour line to the southeasterly corner of the property of the Accokeek Foundation;

thence westerly along said boundary approximately 1,600 feet; thence southerly with said boundary line approximately 1,800 feet; thence northwesterly on said line approximately 2,200 feet; thence westerly along said line approximately 800 feet; thence generally westerly with the 50-foot contour line to the north side of a private road on the Alice Ferguson Foundation property; thence in a westerly direction along north side of said road to the southeasterly corner of Moyaone Association land;

thence with the boundary line of the Moyaone Association land approximately 900 feet northwesterly; thence with that line approximately 800 feet westerly; thence with that line approximately 500 feet southeasterly to its intersection with the right-of-way of Bryan's Point Road; thence generally westerly with the northern right-of-way line of that road approximately 3,500 feet to its intersection with Cactus Hill Road.

thence northerly along the eastern right-of-way line of Bryan's Point Road approximately 300 feet to the southwesterly property line of the Bryan's Point Farm of the Accokeek Foundation; thence with the southerly boundary line of said property approximately 700 feet; thence with that line approximately 1,000 feet in a southerly direction; thence 1,700 feet in a westerly direction; thence following said boundary line along the easterly side of the area known as Johnson's Gully to a point approximately 4,500 feet from the Potomac River;

thence northerly along said line to the 50-foot contour line; thence northerly along said line to its intersection with Prince Georges-Charles County line; thence in a westerly and southerly direction along the southerly boundary of the Accokeek Foundation lands; leaving the Accokeek Foundation land at a point approximately 2,200 feet from the Potomac River; thence approximately 300 feet in a westerly direction; thence north on a line parallel to and 300 feet from the boundary of the Accokeek Foundation land approximately 800 feet; thence approximately 2,200 feet in a northwesterly direction to the southeasterly corner of the Accokeek Foundation lands;

thence along the southerly border of said lands approximately 1,700 feet in a southwesterly direction to the southwest corner of said lands; thence approximately 1,400 feet to the intersection with the northerly right-of-way of Maryland State Route 227; thence with said right-of-way approximately 1,300 feet to the point of beginning, excluding all that land within the described area now leased and operated by the Marshall Hall Park, Inc., as more specifically described in a deed, recorded in the land records of Charles County, Maryland, in folio 126, liber 131. The property herein described is more particularly depicted on drawing numbered 1961–1, a copy of which is on file with the Secretary of the Interior.

Within the above-described area the Secretary shall not condemn improved residential property. As used herein "improved residential property" means a detached, one-family dwelling and structures accessory thereto, the construction of which was begun before May 1, 1961, which are used solely for noncommercial residential purposes, together with one acre of land on which the improvements are situated, or all of such lesser acreage as the owner may hold.

(c) To further the preservation objective of this Act the Secretary may accept donations of scenic easements in that land within the described area now leased and operated by the Marshall Hall Park, Inc., as more specifically described in a deed, recorded in the land records of Charles County, Maryland, in folio 126, liber 131, and the area lying between the south boundary line depicted in drawing numbered 1961–1, referred to in section 2(b) and a line approximately 3,000 feet south of said boundary. The Secretary may also acquire by other appropriate means scenic easements in the area referred to in this subsection when, in his judgment, such action is necessary in order to assure uniform application of scenic control. To further achieve the purpose of this Act he may cooperate and enter into agreements and covenants with property owners, groups thereof, and nonprofit organizations and may also cooperate with the State of Maryland and the political subdivisions thereof in order to promote and achieve scenic preservation through zoning and such other means as may be feasible.

SEC. 3. Land and interests therein acquired pursuant to this Act shall be administered in accordance with the Act entitled "An Act to establish a National Park Service, and for other purposes," approved August 25, 1916 (39 Stat. 535), as amended and supplemented.

SEC. 4. There are hereby authorized to be appropriated such sums but not more than $937,600, to carry out the provisions of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. SAYLOR. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. RUTHERFORD. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, House Joint Resolution 459, by Congressman SAYLOR, is designed to protect the view looking from Mount Vernon across the river from commercial exploitation and from the installation of a sewage disposal plant. The authorities have fully explored the possibility of achieving the same result through zoning procedures in Maryland, but the local political subdivision situation there is so thoroughly complicated and confused that this appears to be impossible.

The sewage disposal proposal within sight of the first President's home speaks for itself, but it is only the latest in a series of moves that, though they have fortunately failed or have been frustrated thus far, cannot be regarded as anything but serious. Unless safeguards are taken, other such moves will undoubtedly recur in the future and there is no guarantee that one or more of them will not succeed. One of those that came to the fore a few years ago was a proposal to install an oil tank farm on lands included within House Joint Resolution 459. This was prevented only through the generous purchase of the site by a public-spirited citizen and the gift of the land to a foundation for future preservation. Another, also of recent vintage, was a proposal to run a sewerline across the property and to dump the effluent, raw and untreated, into the Potomac. This also was fortunately warded off.

The resolution calls for the acquisition in fee of approximately 1,186 acres. At least 600 of these will be donated to the United States. The estimated cost of acquiring the remainder is about $938,000. In addition, the resolution provides for the acquisition of scenic easements in the land surrounding the area to be acquired in fee. The committee has been assured that the bulk of these will be donated. The area acquired will be administered as a unit of the National Capital park system under the National Park Service. The terms of House Joint Resolution 459 assure that existing residential property—that is, detached one-family dwellings and surrounding 1-acre tracts—will not be subject to condemnation.

Many public-spirited citizens appeared before the committee in support of the measure. We are assured of the full cooperation of local citizens' groups who have been spearheading the fight against apartment houses, commercial developments and sewage disposal plants that would deface the landscape and make the view unrecognizable both to George Washington and to the millions of Americans who have visited Mount Vernon over the last 100 years.

No witnesses appeared in opposition to the resolution, even though the Chair specifically asked whether any wanted to be heard. One or two witnesses asked that the taking area be extended to include the Fort Washington-Piscataway area. This, however, would probably have run the cost too high and would have included land a little too remote for consideration. I have written letters to those who thought that this should be done, explaining the situation and urging them to take local action if this is at all possible.

Mr. Speaker, I wholeheartedly urge adoption of House Joint Resolution 459.

Mrs. BOLTON. Mr. Speaker, as the vice regent for Ohio of the Mount Vernon Ladies' Association, I am deeply grateful to the Committee on Interior and Insular Affairs and to the House leadership for bringing House Joint Resolution 459 to the floor. I would also like to take this occasion to pay tribute to Congressmen JOHN SAYLOR and WAYNE ASPINALL for their untiring efforts in behalf of this legislation. Also to Congressman J. T. RUTHERFORD, chairman of the Subcommittee on National Parks.

From the time of George Washington until the present day, the Maryland shore which frames the Mount Vernon overlook, has been spared those structural developments and topographical alterations which elsewhere in America have so radically changed the face of the land. Each year a million and more visitors enjoy a prospect which survives essential as it appeared in the 18th century. However, since the close of World War II the Mount Vernon Ladies' Association has realized that this fortuitous condition could not long continue. Yet, as a Virginia corporation charged with a local responsibility and limited by an income equal only to its intramural needs and occasional purchases of relevant memorabilia, it was powerless within itself to forestall what seemed to be an inevitable scenic encroachment.

A recent proposal to install a sewage disposal plant within sight of the first President's home speaks for itself, but it is only the latest in a series of moves that, though they have fortunately failed or have been frustrated thus far, cannot be regarded as anything but serious. Unless safeguards are taken, the sewage plant and other such moves will undoubtedly recur in the future and there is no guarantee that one or more of them will not succeed. All avenues short of enactment of House Joint Resolution 459 have been explored, but none appears to be feasible. Effective zoning regulations cannot be had. Purchase of more land by private persons is too much to ask and in any event, would not furnish the needed protection against bodies with the power of condemnation.

It is therefore most important that the House enact this legislation so that the many millions of Americans who visit the home of their first President may continue to enjoy the panoramic view seen by him—for it is so much a part of full enjoyment of all who visit this, the greatest of all our national shrines. In the words of the founder and first regent of the Mount Vernon Ladies' Association, Ann Pamela Cunningham, "Let one spot in this grand country of ours be saved from change."

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Maryland [Mr. LANKFORD], may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. LANKFORD. Mr. Speaker, I rise in support of House Joint Resolution 459. The land referred to in this resolution is entirely within the Fifth Congressional District of Maryland.

During the past 6 years, I have worked unceasingly for the completion of that portion of the George Washington Memorial Parkway located in Prince George's County. Recently, the Congress partially fulfilled its commitment by authorizing funds for land acquisition to preserve a portion of the shoreline on the Maryland side of the Potomac.

In addition, I have endeavored by every means available to support the campaign to begin the gigantic cleanup of our Nation's most polluted river, the Potomac. Legislation enacted by the 86th Congress, I believe, was a significant and long-overdue step forward in this direction. I recall well the proposal made several years ago to install an oil tank farm on lands that are to be included in House Joint Resolution 459. Such a development would have not only served to aggravate the existing conditions in the Potomac River, but would, beyond doubt, have marred the magnificent view from Mount Vernon.

I agree with the Committee's statement that the preservation of the area surrounding Mount Vernon cannot be left to generous contributions of individual citizens, for I feel that this is truly a national responsibility, and hence the Federal Government must act.

I note that the Bureau of the Budget indicates its belief that there should be further exploration with the local government units concerned leading toward the development of local zoning controls rather than direct Federal ownership. I am confident that responsible officials of the State of Maryland and Prince Georges County will wholeheartedly cooperate in such an undertaking, for the present large holdings by the Federal Government in Prince Georges County have substantially reduced the County's tax base. I could not support a move to remove still further lands from local development until I am thoroughly convinced that it is the only way this region, steeped in history, can be preserved for the benefit of the entire Nation.

I urge support of House Joint Resolution 459, Mr. Speaker, confident that every effort will be made by the Department of the Interior to cooperate with local officials for the realization of the goals set forth by the Bureau of the Budget.

The SPEAKER pro tempore. The question is, Will the House suspend the rules and pass the joint resolution, House Joint Resolution 459, as amended?

The question was taken; and (two-thirds having voted in favor thereof, the rules were suspended and the joint resolution was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. RUTHERFORD. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their remarks on the resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEGISLATIVE PROGRAM FOR THE BALANCE OF THE WEEK

Mr. HALLECK. Mr. Chairman, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I take this time in order to inquire as to the program for tomorrow and the balance of the week, if we can learn it. I do this principally because, as I understand it, there is scheduled for consideration tomorrow House Resolution 403, providing for an investigation of the Export Control Act of 1949. It now is apparent that the public works appropriation bill will not come up tomorrow as originally scheduled. There is a unanimous-consent agreement that any votes tomorrow, because of the New York primary, will go over until a later time. A number of Members have asked me about whether this vote might come on Friday. As far as I am concerned, I think it would be well if some arrangement could be made as to when that vote might be had if a record vote is required tomorrow.

Mr. ALBERT. Of course, we desire to cooperate with the minority leader and the Members of the House on this matter. While the vote is scheduled to come on Friday, in view of the change in the program it might be an accommodation to Members and would not in any manner defer the ultimate disposition of the business of this session of Congress if the vote were put over on the resolution.

Mr. Speaker, I ask unanimous consent that any rollcall vote on that resolution or on any other matter requested tomorrow might be put over until Wednesday next.

Mr. JONES of Missouri. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Missouri.

Mr. GROSS. Mr. Speaker, a parliamentary inquiry. As I understand it, the gentleman is submitting a unanimous-consent request.

Mr. ALBERT. That any rollcall votes that occur tomorrow will be put over until Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mr. JONES of Missouri. I object, Mr. Speaker.

Mr. FRIEDEL. Mr. Speaker, will the gentleman withhold his objection? I assure the gentleman there is no skullduggery going on here.

Mr. JONES of Missouri. I am glad to hear there is no skullduggery going on here, but I want to get some time here to find out what is going on, and I think a lot of other people do, too.

Mr. FRIEDEL. From Sunday night until Monday and Tuesday there are the Jewish holidays.

Mr. JONES of Missouri. I am in favor of observing the Jewish holidays and all other such days, but I am not in favor of taking Saturday off and losing 5 days when we could accomplish some business around here.

Mr. ALBERT. If the gentleman will yield, the leadership makes this request only in an effort to accommodate Members. The leadership is programing these bills as fast as they are ready to be programed. May I advise the gentleman that the only business on Friday will probably be rollcall votes put over from Thursday?

Mr. JONES of Missouri. Can the gentleman tell me why the public works appropriation bill was put over until next Tuesday and the vote carried over to next Wednesday, when it was announced and programed we were going to have it up here tomorrow? Now we are to get it next week.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. JONES of Missouri. I yield to the gentleman from Indiana.

Mr. HALLECK. I have tried all day to get that bill up tomorrow. It was scheduled for tomorrow. I might say in my conversation with the majority leadership, if they had their way I think the bill would be scheduled for tomorrow. I wanted it scheduled for tomorrow. As to why it was not scheduled I do not know, although I have my suspicions about that. As I said earlier in the day, and I say it again, if we did get that bill up and over to the other body

we would be well on the way to a sine die adjournment, and that is what we want.

Mr. JONES of Missouri. I agree with the gentleman 100 percent.

I wonder if the gentleman from Oklahoma can tell us why that bill was carried over?

Mr. ALBERT. The only thing I can say to the gentleman is that the matter of calling up bills from the Committee on Appropriations is within the discretion of the chairman of the Committee on Appropriations. The Speaker of the House has no authority to call up an appropriation bill. The chairman of the committee or the Member responsible for the handling of the bill can call the bill up, if he so desires.

Mr. JONES of Missouri. In other words, we are accommodating everybody around here except the people who live at a distance and who are anxious to get home. Yet, we have taken 5 days out of the time to consider an important part of this legislative program. We are going to take Thursday out; we are going to take Friday out; we are going to take Saturday out; we are going to take Tuesday out; and Monday; and carry over the votes until Wednesday. If that is not 5 days lost, then I do not know what I am talking about.

Mr. ALBERT. Mr. Speaker, if the gentleman will yield, all I can say to the gentleman is that the chairman of the Committee on Appropriations has advised that the bill was not ready to be brought up tomorrow.

Mr. JONES of Missouri. If I heard correctly, the chairman of the Committee on Appropriations asked that the bill be programed, and it was programed, and it appeared on the whip notice and everybody in this House expected it to be brought up tomorrow. I would like to know some reason why it cannot be brought up tomorrow because I do not feel that the leadership has been keeping faith with this House in not carrying out their program as announced.

Mr. ALBERT. The gentleman's statement is completely uncalled for. The leadership has nothing to do with it.

Mr. JONES of Missouri. If the leadership has nothing to do with it; who is running this House?

Mr. ALBERT. The chairman of the Committee on Appropriations is the one who has made the decision not to call up this bill tomorrow.

Mr. ARENDS. Mr. Speaker, if the gentleman will yield to me, I suggest he get together with his colleague from Missouri and take him to the woodshed tomorrow and find out what is the matter.

Mr. JONES of Missouri. I do not want to wait until tomorrow. I want this information today.

Mr. Speaker, before I withdraw my objection, I want to say I am opposed to any of these delays and that I will be opposed to any leadership that carries on delays such as we have had, to lose Thursday, and Friday, and Saturday, and Monday, and Tuesday.

Mr. Speaker, I withdraw my reservation of objection.

Mr. COLMER. Mr. Speaker, reserving the right to object, I would like to ask the majority leader about what I think is uppermost in all of our minds. What can the gentleman tell us, if anything, about sine die adjournment?

Mr. ALBERT. All I can say in response to the gentleman is that as soon as we have finished the business of the session, and so far as I am concerned, that will be done as expeditiously as the processes of this House will permit, we will certainly be happy to accommodate the gentleman and all of our colleagues in the matter of adjournment.

Mr. COLMER. The gentleman, of course, has not thrown any light whatever on the subject on which I addressed the question to him. We had understood that there was some possibility of adjournment this week. Then, we were told it was possible or we would most likely adjourn next week. Can the gentleman tell us whether there is a possibility of adjournment next weekend?

Mr. ALBERT. I would say there is a possibility if we can finish the business of the Congress.

Mr. COLMER. Can the gentleman tell us whether the leadership have in mind trying to finish?

Mr. ALBERT. The leadership has in mind finishing the business of this session just as fast as possible and, if that can be done next week, we hope that it will be done.

Mr. COLMER. I thank the gentleman for the nonenlightenment.

Mr. BONNER. Mr. Speaker, reserving the right to object, I would like to ask the majority leader whether there will be any vote in the House between now and Wednesday of next week?

Mr. ALBERT. There will, unless the unanimous-consent request which we have made is granted.

Mr. BONNER. In other words, there will not be any business transacted on Friday?

Mr. ALBERT. There will be business transacted during the remainder of the week. We can probably finish all bills listed on the program by tomorrow.

Mr. BONNER. Will there be any rollcalls on those bills?

Mr. ALBERT. There will be no rollcall votes tomorrow in any event, under an order previously entered.

Mr. BONNER. Will there be any rollcalls on Friday?

Mr. ALBERT. There will be unless this unanimous-consent request which I have made is granted.

Mr. BONNER. And if it is granted, there will not be any rollcalls until Wednesday of next week?

Mr. ALBERT. That is correct.

Mr. BONNER. So, therefore, a Member could be absent in security with respect to rollcalls?

Mr. ALBERT. Security so far as the business of the House is concerned.

Mr. GROSS. Mr. Speaker, further reserving the right to object, do I understand that a rule was granted today on the Peace Corps?

Mr. ALBERT. That is my understanding.

Mr. GROSS. And when would you expect to bring that up? Would you have any idea?

Mr. ALBERT. We want to program that at the very earliest date.

Mr. GROSS. Well, would that be Monday or Tuesday or when?

Mr. ALBERT. May I advise the gentleman that the rule has just been reported on this bill and it will not be filed until midnight tomorrow night. I have not had an opportunity to consult with the chairman of the Committee on Foreign Affairs or the chairman of the Committee on Rules about bringing up that bill, since it is not ready for programing yet. As soon as a request is made by those handling the bill we will program the bill. It is a very important bill and the leadership desires to dispose of it.

Mr. GROSS. Well, then, if it is considered on Monday, then the vote on that would have to go over until Wednesday; is that correct?

Mr. ALBERT. That is correct.

Mr. GROSS. Well, there will be no assurance then that we will have a rollcall on Wednesday. Would the gentleman like to help some of us get a rollcall on Wednesday?

Mr. ALBERT. If the unanimous-consent request is agreed to, there will be no problem in having rollcalls on Wednesday next.

Mr. GROSS. What I cannot understand is how we are going to get through with the business in this session if we are not going to pass bills until next Wednesday.

Mr. ALBERT. The gentleman knows that we pass many bills without rollcalls and we will probably pass some of the bills programed for the balance of the week without rollcall votes. We will finish all the bills except for rollcalls. As far as I am concerned, I can advise the gentleman that I am not making this request for my own benefit. I expect to be here tomorrow and Friday and on Monday and Tuesday of next week.

Mr. HAYS. Mr. Speaker, further reserving the right to object, as I understand the procedure here, we are going ahead with the business that is programed, if the unanimous consent request is granted, but the only thing that will be carried over is a rollcall, which might take 30 minutes; is that right?

Mr. ALBERT. The gentleman is correct.

Mr. SMITH of Virginia. Mr. Speaker, further reserving the right to object, now we have been messing around here all summer and people are getting tired of this session and they want to get home. We are getting to the end of adjournment. Now, we have got a lot of business on the calendar and still more to come. All this talk seems to have centered around one appropriation bill. Let me remind the House that if and when you are going to get out of here, if you ever do, you have a good deal of legislation on the calendar. We have got bills that we could work on Thursday, if you really want to adjourn. And, I cannot see any earthly reason why we should be taking days off now when everybody is tired and irritated and we want to close things up. Now, the other

bills that are in the offing may create some controversy. Why not clean up the docket and go along instead of going over until Monday and then probably waste a couple of days more to have rollcalls? If you really mean it and want to get out of here, this business must be gotten out of the way. We had talked about getting out this Saturday. Now we are talking about getting out next Saturday. If you are going to adjourn over until Wednesday, for all intents and purposes you are not going to get out next Saturday. You might as well face that proposition.

Mr. TABER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

A NATIONAL LOTTERY

Mr. FINO. Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point in the RECORD and include a table.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FINO. Mr. Speaker, for the last 2 months, I have brought to the attention of this Congress the many foreign national lotteries that are bringing great benefits to their respective nations.

We in the United States stand virtually alone among the nations of the Western World in our hypocrisy in refusing to establish a national lottery. Of the nations of Western Europe and of the Western Hemisphere, only Canada and the United States do not have some form of Government-controlled gambling. Outside of Western Europe and the Western Hemisphere, those nations operating lotteries are primarily the most advanced and Westernized nations; Australia, New Zealand, Israel, Japan, the Philippines, and India. As far as our official attitude toward gambling, the United States is in step only with the Communist nations—who view gambling as something undesirable in the regimented and brainwashed "new Socialist man." We are certainly in rare company.

In 1960, the nations of the Americas and Western Europe, together with the more advanced nations in other parts of the globe, took in gross receipts of $1,369,500,000 from their national lotteries. The total profits accruing to the governments in question came to $411,400,000. Needless to say, similar wisdom on the part of a nation as wealthy as the United States would be rewarded far more amply.

Unhappily, the United States has not yet demonstrated that wisdom. It is high time that we do so, and bring great benefits to our Treasury while at the same time striking a real blow at organized crime. It is never too late to share the sense of the rest of the world.

Mr. Speaker, a national lottery in the United States could easily pump into the coffers of our Treasury $10 billion a year in additional revenue. When are we going to be as smart as our allies and face up to the fiscal facts of life?

Country	Gross receipts	Net income
1. Argentina	$28,400,000	$12,400,000
2. Australia	78,000,000	25,000,000
3. Austria	13,500,000	3,200,000
4. Belgium	14,900,000	6,000,000
5. Bolivia	1,000,000	400,000
6. Brazil	20,000,000	7,000,000
7. Chile	23,000,000	5,400,000
8. Colombia	12,000,000	3,000,000
9. Costa Rica	10,300,000	2,100,000
10. Cuba	35,400,000	11,100,000
11. Czechoslovakia	11,000,000	9,000,000
12. Denmark	6,000,000	300,000
13. Dominican Republic	31,900,000	7,000,000
14. Ecuador	3,100,000	900,000
15. Finland	4,300,000	1,500,000
16. France	133,800,000	42,100,000
17. Germany	240,000,000	48,000,000
18. Greece	19,600,000	4,400,000
19. Guatemala	3,100,000	800,000
20. Haiti	2,000,000	600,000
21. Honduras	15,200,000	1,700,000
22. Ireland	47,000,000	11,000,000
23. India	25,000,000	[1]
24. Italy	71,700,000	40,400,000
25. Israel	14,000,000	4,400,000
26. Japan	11,800,000	4,900,000
27. Mexico	55,100,000	14,200,000
28. Netherlands	9,900,000	1,500,000
29. New Zealand	1,700,000	600,000
30. Norway	14,500,000	4,600,000
31. Panama	27,800,000	4,700,000
32. Paraguay	1,200,000	200,000
33. Peru	2,500,000	500,000
34. Philippines	14,000,000	3,500,000
35. Poland	53,000,000	17,000,000
36. Portugal	23,700,000	7,800,000
37. Puerto Rico	45,500,000	10,000,000
38. Spain	89,300,000	30,200,000
39. Sweden	49,900,000	28,700,000
40. Switzerland	4,800,000	1,200,000
41. Turkey	8,400,000	3,600,000
42. Uruguay	23,400,000	6,800,000
43. Venezuela	48,800,000	18,700,000
44. Yugoslavia	20,000,000	5,000,000
Total	1,369,500,000	411,400,000

CHICAGO BANK MERGER POINTS UP EVILS OF DIVIDED FEDERAL RESPONSIBILITY—MORATORIUM ON BANK MERGERS A NECESSITY

The SPEAKER pro tempore. Under the previous order of the House the gentleman from Texas [Mr. PATMAN] is recognized for 30 minutes.

Mr. PATMAN. Mr. Speaker, divided responsibility for bank mergers is creating chaos. Last Thursday, August 31, the district court refused to grant the Attorney General's request for a temporary restraining order and thus opened the way for the de facto merger over the Labor Day weekend of the City National Bank & Trust Co. into the Continental Illinois National Bank & Trust Co., both of Chicago. This brings together the second and sixth largest banks in the Chicago area, with 35 percent of total deposits of all banks in the area.

The practical effect of the court's refusal of the temporary restraining order is to make virtually impossible the resurrection of the competition which the merger has destroyed. While the Antitrust Division can proceed to litigate the case and seek a divestiture, the crucial question is: What of the public interest? What chance is there that after a long, drawn-out trial, the court can ever reconstitute the acquired bank as a substantial independent factor in competition? Management will be interwoven. Accounts—bank deposits and loans—will be scrambled. City National is giving up its present headquarters on South La Salle Street, across the street from Continental Illinois. This site will no doubt be unavailable when, as, and if the court concludes that the merger violated the antitrust laws and a divestiture is ordered.

The pace with which the physical merger took place over the weekend is graphically portrayed in this morning's American Banker:

As of Tuesday morning, the 31,000 customers of City National began using Continental Illinois checks and facilities in Continental's building at 231 South La Salle.

The physical merger of the City National into Continental Illinois was completed over the long Labor Day weekend. The move took place after a Hairbreadth Harry court battle with Attorney General Robert F. Kennedy's Department of Justice from which the banks emerged victorious.

Late Thursday afternoon, U.S. District Judge Miner denied the Justice Department's request for a temporary restraining order to stop the movers from going to work Friday.

The mammoth move across La Salle Street, in the planning stage since early January this year, began last Friday afternoon.

It involved 4 moving companies, 100 movers, 8 moving vans, 20 Chicago policemen, 125 bank guards, 5 Brinks armored cars, and a number of Brinks guards.

They moved and guarded more than $1,500,000 in cash and more than $1.5 billion in securities.

In addition, 600 desks, 1,000 chairs, and 1,500 filing cabinets were transferred from 208 to 231 S. La Salle.

The cash and securities traveled via armored car. Detailed precautions were taken to see that nothing went amiss. Armed guards, for example, were strategically placed in the windows of both banks and at vantage points along the La Salle Street canyon to observe the transfer of securities.

As an extra precaution, the banks took out a $45-million insurance policy to protect them against loss during the move.

GIDNEY'S APPROVAL NULLIFIED ATTORNEY GENERAL'S INJUNCTIVE POWERS

The plain fact is that approval of the merger by the Comptroller of the Currency checkmated the Attorney General. A minimum requirement for securing a temporary restraining order was for the Government to show a prima facie violation of the antitrust laws and damage to the public interest. But Comptroller of the Currency Gidney had already approved the merger as in the public interest—in utter and complete disregard of the adverse opinions of the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Attorney General.

Mr. Gidney knows of the difficulties of restoring competition by divestiture after a bank merger has been consummated. He testified as to these difficulties himself before the Senate Banking and Currency Committee in March 1959. This is what Mr. Gidney said:

To require a separation of the merged bank back into its constituent elements, [is] an almost impossible task in the case of banks.

Certainly the public interest is at stake here. The public interest will suffer untold damage by the elimination of competition in the banking business in Chicago. But the district court gave no consideration whatever to this question and only discussed the extent of the pos-

sible injury to the private interests of the merging banks.

The court concluded that the merger had "progressed too far" and could not be restrained without "irreparable injury" to the merging banks. Referring to the question of the public interest, the court stated:

Section 1828, regulations governing insured banks, confers upon the Comptroller of Currency the right and power to examine and consider proposed mergers of banks and their effects on competition, etc. It provides that the Comptroller shall request a report from the Department of Justice embracing its views, and that it shall not approve any merger unless, after considering all factors, it finds the transaction to be in the public interest. The Comptroller of Currency did act under the said statute and did sanction the merger as being in the public interest after prolonged negotiations and conferences between the banks, the Department of Justice, the Comptroller of Currency, and other governmental agencies.

The court went on to state:

Furthermore, any restraining order would nullify the finding of the Comptroller of Currency that the merger is in public interest without affording the banks an opportunity to litigate it. Also, the uncontradicted testimony before the court is that the merger has been "virtually completed" except for the physical transfer of the assets.

DECISION BIG VICTORY FOR BANKS

The court's refusal to grant the Attorney General's request for a temporary restraining order was hailed as a "big victory for the banks." It is said to have "dramatized the difficulties of dividing responsibility for bank mergers among the Federal bank supervisory agencies and the Department of Justice."

I should like to include here an article appearing in Sunday's New York Times discussing this and other aspects of the Chicago bank merger.

CHICAGO BANK MERGER DISPUTE POINTS UP LACK OF YARDSTICKS

(By Albert L. Kraus)

A Federal judge in Chicago has dramatized the difficulties of dividing responsibility for bank mergers among the Federal bank supervisory agencies and the Department of Justice. By refusing to grant the Department's request for a temporary restraining order, the judge, Julius H. Miner, paved the way for the merger this weekend of the City National Bank & Trust Co. into the Continental Illinois National Bank & Trust Co., both of Chicago.

Two days earlier, the Department of Justice had sued to block this union of the city's second and sixth largest banks, charging that it would "substantially and unreasonably" reduce commercial banking competition in the Chicago area.

Judge Miner said the merger had "progressed too far" and that a restraining order would kill the merger. The court, he said, could not permit such hurt "without a full hearing on the issues."

BIG VICTORY FOR BANKS

For the banks, the decision was a major victory. Judge Miner seconded their view that the Federal bank merger statute enacted last year gave final approval of bank mergers to the appropriate Federal supervisory agency—the Comptroller of the Currency for national banks, the Federal Reserve Board for State-chartered member banks, and the Federal Deposit Insurance Corporation for insured nonmembers. The Department of Justice was required to give its advice on competitive aspects of proposed mergers, but this was only one of several factors to be considered in making the determination.

Under the statute, nothing was done to prevent the Department from challenging in the courts a merger that it considered in violation of the antitrust laws.

Judge Miner did not contradict this point. But he said a restraining order "would nullify the finding of the Comptroller that the merger is in the public interest without affording the banks an opportunity to litigate it."

In arguing for the restraining order, the Department of Justice said that if the merger were permitted and later found to be illegal the only remedy would be to reestablish the two banks as before. Completion of the merger, it said, would so scramble the two banks' assets as to make unscrambling later difficult, if not impossible.

For their part, the banks said that granting of the order would permanently disrupt the merger plans.

There seems little question that the possibility of a long engagement can put the chill on even the most promising corporate marriage plans. Faced with such a prospect 2 years ago, Firstamerica Corp. agreed to a consent decree rather than go ahead with 2 or 3 years of litigation.

Firstamerica, a bank holding company with units in 11 Western States, had sought to acquire the California Bank, Los Angeles, and to merge it with one of its subsidiaries. It was permitted to make the acquisition, but as part of the deal it was required to spin off about one quarter of its assets and one quarter of its branches to form a new bank. Firstamerica has since been renamed the Western Bancorporation.

In such circumstances, it is not impossible to understand the banks' characterization of the restraining order as a bludgeon in the hands of the Department of Justice.

On the other hand, the problem of "restructuring" competition is no simple matter. In Illinois, where branching is prohibited, the task could prove much more difficult than in California, where statewide branching is allowed by law.

The merger of City National into Continental Illinois, for example, would entail the relinquishing of City National's present headquarters on South La Salle Street, across the street from Continental Illinois, a site that might be difficult to obtain again if the bank were required to go back into business on its own.

One part of the problem is the lack of any objective standards in the statutes for deciding when competition becomes inadequate, when concentration becomes excessive, and when big is too big.

Until Congress or the courts establish such standards or resolve the conflict between the Department of Justice and the Federal supervisory agencies, such confusion seems likely to continue.

GIDNEY'S CONCEPT OF COMPETITION ALIEN TO AMERICAN FREE ENTERPRISE

Last Friday—September 1—I called for the resignation of Comptroller of the Currency Ray M. Gidney. It is clear that Mr. Gidney has no interest whatever in preservation of competition in the banking business. He would welcome a giant nationwide branch banking system. I know of no single instance where he has ever disapproved a bank merger on competitive grounds, and he has testified that even if a merger takes place between the only two banks in a community "there is still competition in the community." Mr. Gidney has stated that he would disapprove any bank merger that might jeopardize competition, but this is clearly a hollow promise, for Mr. Gidney's notions of competition in the public interest are more akin to concepts of European cartel systems than anything fundamental to the American free enterprise system.

BANK MERGER MORATORIUM NEEDED NOW

Mr. Speaker, on April 17 last, I introduced a joint resolution calling for a moratorium on bank consolidations, mergers, and acquisitions until December 31, 1964. The resolution, which would prohibit such consolidation, merger, or acquisition unless it can be shown the action is necessary to keep a bank open and in operation, was as follows:

Joint resolution to provide for a moratorium on bank consolidations, mergers, and acquisitions

Whereas bank consolidations, mergers, and acquisitions are occurring at an extremely high rate, with more than 100 bank mergers occurring in every year since 1952, and with 1,358 such mergers occurring during the period 1953 to 1960; and

Whereas such consolidations, mergers, and acquisitions have resulted in a high degree of concentration in the ownership of banking facilities, services, and assets in many communities; and

Whereas in the past there has not been adequate enforcement of existing legislation prohibiting such consolidations, mergers, and acquisitions contrary to the public interest nor adequate legislation to prohibit certain types of bank consolidations, mergers, and acquisitions contrary to the public interest; and

Whereas it may take many months or even years to complete adjudication of the antitrust actions recently initiated against certain bank mergers; and

Whereas, notwithstanding the salutary effects which may result ultimately from these antimerger actions, if the current rate of mergers continues, concentration of ownership in banking will increase to excessive levels and many more local communities will be deprived of adequate banking services: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, it is the sense of the Congress further irreparable damage would ensue if bank consolidations, mergers, and acquisitions are continued; and, therefore, that further consolidations, mergers and acquisitions, by national banking institutions and other banking institutions insured by the Federal Deposit Insurance Corporation not be permitted prior to December 31, 1964, unless it be shown that such consolidation, merger, or acquisition is necessary to keep the acquired bank open and in operation.

QUALIFICATIONS FOR NEW COMPTROLLER OF THE CURRENCY

Mr. Speaker, I have called for Comptroller Gidney's resignation. His successor should be one who appreciates the necessity for a competitive banking system, and one who is not satisfied to see a continuation of the rash of mergers and acquisitions and to stand by idly keeping up the barriers to new banking entrants. A new Comptroller of the Currency should be deeply concerned with the fact that today there are less than 13,500 commercial banks as compared with over 31,000 in 1920. In other words, there are only 43 banks today where there were 100 some 40 years ago. The population per bank in the United States was only about 3,400 in 1920. Now the population per bank exceeds

13,000. So the average bank now has 3.8 times the customer potential that prevailed in 1920.

Some proponents of branch banking point to the increase in the number of bank branches from about 1,200 in 1920 to more than 10,000 today and conclude that the availability of banking services is adequate. I would hope that the new Comptroller of the Currency will have the vision to see through this fallacy. It is almost too obvious to bear mentioning that branches of the same banking organization do not compete among themselves in any genuine economic sense. A borrower is obviously restricted in his alternative sources under a branch banking system. But the most serious danger of a branch banking system such as Mr. Gidney would welcome is the fact that local enterprise may be stifled. The local independent banker is interested in promoting local enterprise. He does not have to clear with a home office located in some remote metropolis. He is interested in bringing employment opportunities to the community. The branch bank, however, caters to the large, well-established businesses, and would look with disfavor on any new concern which might represent a competitive threat to its well-established accounts.

DANGERS OF NATIONWIDE BRANCH BANKING SYSTEM

It is quite apparent that there is a widespread campaign underway to promote branch banking. An answer to some of the proponents of branch banking is given to the editor of the American Banker in its issue of September 1, written by R. O. Byerrum, president of the University State Bank of Chicago. According to Mr. Byerrum:

> An attempt is also made by the Illinois Council for Branch Banking to link up branch banking with the maintenance of competition in the banking field. It should be stated, however, that branch banking and bank mergers both have one common effect—to reduce competition. With branch banking the number of independent banks would obviously decline.

I would like to include the entire text of Mr. Byerrum's letter to the American Banker at this point:

DOES PUBLIC REALIZE WHAT BRANCH BANKING MEANS?

EDITOR, AMERICAN BANKER: A few days ago there appeared in one of the larger Chicago metropolitan newspapers, and elsewhere, including the American Banker, reports of an article from the chairman of the Illinois Council for Branch Banking, a self-appointed outfit opposed to independent banking.

The public is being misled by its statement that Chicago is underbanked and that its banking facilities are insufficient to take care of our expanding needs, and the chairman stated that this is a clear relationship * * * between Chicago's economic growth * * * and limited branch banking. Unfortunately, the facts hardly support his gloom-and-doom conclusion that metropolitan Chicago is suffering from economic decline.

Let me quote a letter recently received from the Chicago Association of Commerce and Industry: "During the past decade Metropolitan Chicago has enjoyed the greatest industrial expansion and prosperity of any comparable area in history."

During the last decade, factory construction in the Chicago metropolitan region was twice as high as that for any other metropolitan area in the Nation. Industrial development investments, which include both factory and nonfactory expenditures, for the years up to 1960 led the Nation and totaled more than $3.2 billion. At present Metropolitan Chicago has 3.69 percent of the Nation's population, but it produces 5.4 percent of U.S. output. On a per capita basis Metropolitan Chicago output amounts to $3,431 annually or 48 percent above the national average of $2,231.

An attempt is also made by the council to link up branch banking with the maintenance of competition in the banking field. It should be stated, however, that branch banking and bank mergers both have one common effect—to reduce competition. With branch banking the number of independent banks would obviously decline.

The Federal Government is actively seeking to maintain vigorous competition in the banking field. The Federal Bank Merger Statute enacted in 1960 requires approval of bank mergers. The Department of Justice has gone to court to block a pending merger in Chicago, and in Philadelphia a consolidation merger of the second and third largest banks on the grounds that this would create a bank half again as large as the largest bank in Philadelphia. Together, the two banks would then account for approximately 62 percent of the total banking assets of all commercial banks in the city. The Justice Department maintains that this would lessen competitive aspects of banking in Philadelphia. It is also testing the application to banks of section 7 of the Clayton Act which prohibits mergers that "tend to lessen substantially competition in any section of the country."

It is quite possible that our Department of Justice may save capitalism from extinguishing itself because of the acts of a few.

Quite a play has been made on the council's fatuous statement that $3 million in deposits would be created by this system of banking. May I respectfully ask from whence would all this money come?

With 13,000 independent known banks in the United States we have helped to develop the strongest economy ever known by any nation in the world and during the past 15 years or more we have been supporting the economies of most of the major powers of the world—nations whose domestic economy has been strangulated by the old archaic branch banking system. It is estimated that if nationwide branch banking were adopted in the United States, our banking system would be set back at least 75 or 100 years.

Monopoly banking in the hands of a few men always leads to tyranny and dictatorship, and destroys the strong competition that now exists.

Our bank system at the present time is the most progressive and enlightened banking field.

Very truly yours,

R. O. BYERRUM,
President, University State Bank.
CHICAGO, ILL.

EXTENT OF CONCENTRATION IN BANKING IN MAJOR METROPOLITAN AREAS

In practically every community in this country the number of banks has been reduced to the point where only a very few control the business. Here are some figures from the 1960 annual report of the Federal Deposit Insurance Corporation:

In no less than 58 out of a total of 65 metropolitan areas surveyed, the 3 largest commercial banks have more than 50 percent of the deposits in all the banks in the area.

In 33 metropolitan areas, the 3 largest commercial banks have more than 70 percent of the deposits of all commercial banks in the area.

In 22 metropolitan areas, the 3 largest commercial banks own more than 80 percent of the deposits. And in 6 metropolitan areas, the 3 largest commercial banks hold over 90 percent of the deposits.

Superimposed upon all these concentrations in local areas is the dominant position of the largest commercial banks in the country. The top 10 commercial banks—6 of which are located in New York City—on June 30, 1961, held $48.2 billion of deposits. This represents 21.7 percent of the $222 billion of deposits held by all commercial banks in the United States. These few giant commercial banks set the whole pattern of interest rates charged by commercial banks throughout the country.

It is high time that our Federal banking officials incorporate within their concept of the public interest the basic American ideal of a free competitive banking system.

PERSONAL ANNOUNCEMENT

Mr. MONTOYA. Mr. Speaker, on rollcall No. 188 I was absent and recorded as not voting. I would like the RECORD to show that had I been present I would have voted "yea" on that rollcall.

CONGRATULATIONS TO BILL DOHERTY ON 20TH ANNIVERSARY AS PRESIDENT OF THE NATIONAL ASSOCIATION OF LETTER CARRIERS

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, ability, initiative and personality are the qualities that make a leader. As an example, I call your attention to William C. Doherty, president of the National Association of Letter Carriers.

Twenty years ago, on September 6, 1941, he was sworn in as head of the largest organization of Federal employees. As a letter carrier himself who trudged many miles each day, serving the people of his route, Bill Doherty knew that strong leadership was required to improve the incomes of carriers, to strengthen their morale, to provide security for retirees, and survivorship benefits for widows and children.

Before he took charge and infused new life into the NALC, letter carriers had been on a treadmill where they had been getting the same inadequate salary for the preceding 16 years. Bill marshaled his forces, gave them goals to work for, and with his organizing genius and persuasive powers got the NALC moving forward again.

Few Members of Congress were aware of the organization in 1941, but Bill soon changed that. He instituted an effec-

tive campaign to bring the plight of the carriers to the notice of Congress and the general public. And things began to happen, for the better. In the past 18 years there have been nine pay raises. The membership of the NALC has increased to 150,000, 2½ times the 1941 level. A $3 million white marble national headquarters was built facing Capitol Hill, and the association is currently building an eight-story annex to house its growing health insurance program. And a $4½ million retirement paradise, Nalcrest, will be built on the shores of central Florida's Lake Walk-in-the-Water.

The progress under Doherty's administration has been impressive. Because of his energetic and inspiring leadership, the following benefits have been won: national life insurance for Federal employees; national health insurance; the enlargement of health benefits; the liberalization of sick benefits; liberalized annual leave provisions; the $100 a year uniform allowance; and a great number of other improvements both in working conditions and work procedures within post offices.

Bill is the type of leader who responds to challenge. The more difficult the task, the harder he works. To overcome legislative hurdles that blocked the way to a pay increase, Bill took on the formidable job of pushing a discharge petition, which is a technique for securing the signatures of 218 Members of the House to force a bill out of the Rules Committee and to a showdown vote in the House.

Sponsors of petitions seldom manage to get the required number of signatures. Only 33 have been successful in 51 years. Six of these were NALC petitions, and every one of them was successful, due to the courage and skill of Bill Doherty in winning over Members to favorable action on the vital problems of the letter carriers.

The leadership of Bill Doherty has helped every Federal employee, because in proving the case for the carriers, he opened the way for pay increases and fringe benefits throughout the Federal service. With commendable foresight he is strengthening the NALC and is training subordinates so that they will be prepared for positions of leadership in the future.

On his 20th anniversary as president of the National Association of Letter Carriers, we congratulate Bill Doherty on his brilliant record of achievements, and look forward to the continuation of his vigorous and productive administration which is the pride of the letter carriers, and the heartening example for all other Federal employees.

CLEARING THE PUBLIC RECORD

Mr. CURTIS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, on August 29 I placed in the CONGRESSIONAL RECORD, page 17431, a column which had been written by Washington columnist, Drew Pearson, setting forth some reminiscences of Soviet Premier Khrushchev. Mr. Pearson had obtained these from the Soviet Premier during an interview with Khrushchev at a Black Sea resort. They included a reference to a Khrushchev-Ambassador Averell Harriman conversation in which it appeared that the Soviet dictator and the American Ambassador had made some agreement about Khrushchev helping the 1960 Democratic presidential candidate.

Upon reading Mr. Pearson's column, my first reaction was that we had to get to the bottom of this matter, to see if the allegation was true. My previously cited remarks called for Ambassador Harriman to make a statement on this, a request which was supported by the gentleman from New York [Mr. BARRY] in a statement on August 21—CONGRESSIONAL RECORD, page 17864—and for an investigation calling Ambassador Harriman and Mr. Pearson to clear the issue.

I have received a letter from Ambassador Harriman. It reads:

DEAR MR. CURTIS: Thank you for your letter of August 30 and the opportunity to comment on Drew Pearson's article which you inserted into the CONGRESSIONAL RECORD of August 29. My only comment is that I do not control irresponsible remarks made by Khrushchev. I haven't seen him since September 1959 when he came to the United States at the request of President Eisenhower.

Thanks for your good wishes, which I am glad to reciprocate.

Sincerely,

AVERELL HARRIMAN.

In fairness, it should be made clear that it was not necessarily any statement of Ambassador Harriman's or a case of misreporting by Mr. Pearson that is involved. It could be the irresponsible statements of Premier Khrushchev; this is the point that Ambassador Harriman makes and I am happy to have the RECORD reveal this. I think good reporting by Pearson on a subject this important required checking with Ambassador Harriman; had this been done the theme of Pearson's column would have been Khrushchev is a liar, rather than the unfortunate theme it followed.

COMMON PURPOSE

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. GALLAGHER] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. GALLAGHER. Mr. Speaker, as the House Foreign Affairs Committee is about to vote on the creation of a U.S. disarmament agency, it is important that we all realize the importance of this issue and its full implication to the U.S. security as well as our rightful role as leader of the free world truly interested in humanity. I think our position is best expressed in an editorial that appeared in the Newark Evening News of Tuesday, September 5, 1961.

In the hope that these thoughts can stimulate the thinking of the Members who will soon be called upon to exercise their judgment on this important matter, I respectfully request that the editorial be made a part of this RECORD:

COMMON PURPOSE

President Kennedy feels that with world opinion aroused against Russia's resumption of nuclear testing, congressional approval of a U.S. disarmament agency would provide a sharp and timely contrast between United States and Soviet policies.

Some members of the Senate Foreign Relations Committee feel establishment of such an agency would be a sign of weakness, and there is growing coolness on Capitol Hill toward disarmament legislation at this session.

This is a shortsighted attitude, for the creation of a disarmament agency has long been administration policy and its implementation now would no more indicate weakness than has the President's decision to have John J. McCloy, his disarmament adviser, keep his previously scheduled appointment this week with Soviet Deputy Foreign Minister Zorin in New York.

Ostensibly the two are to discuss preparations for a broad international disarmament conference that for all practical purposes has already been sabotaged by the Soviet resumption of nuclear testing.

In his reaction to Premier Khrushchev's new terror campaign, Mr. Kennedy has succeeded in projecting a world image of the United States as being soberly confident of its own strength, yet at the same time deeply concerned over the security and well-being of less powerful nations and peoples.

This is an image that Congress should try to strengthen by accepting the President's judgment on the Disarmament Agency.

AMENDING INTERNAL REVENUE CODE RELATIVE TO TAXATION OF CERTAIN INCOME

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Oregon [Mr. ULLMAN] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ULLMAN. Mr. Speaker, I am today introducing a bill to amend the Internal Revenue Code relative to the taxation of certain income derived from tribal lands or allotted and restricted land of Indians. My bill deals with what is, on one hand, a rather narrow technical point and aims at clarifying the situation regarding taxation by the Federal Government of different types of Indian income. At the same time there is a substantial policy question involved and I would like to speak briefly on both of these aspects.

In a 1956 ruling the Internal Revenue Service held that income "derived directly" from allotted and restricted Indian trust lands is exempt from Federal income taxes. The ruling expanded on the point by listing as examples of exempt incomes from such allotted and restricted lands, "rentals (including crop rentals), royalties, proceeds from the sales of natural resources, income from the sale of crops, and income from the use of the land for grazing purposes." However, in 1958, in a further ruling on this, the Internal Revenue Service held

that while income from grazing fees for the use of these lands is tax exempt, income from the sale of livestock raised on the lands by the Indians themselves is not.

In other words, Indians who raise crops on their allotted and restricted lands can sell them and the resultant income is tax exempt, but Indians who raise livestock or poultry on such lands must pay Federal income taxes on the proceeds from the sale of the livestock or poultry. The technical question, in view of the Internal Revenue Service is whether or not income from the sale of livestock raised on allotted and restricted lands is "derived directly" from those lands. While ruling that in the case of crops it is, the Service has held that in the case of livestock it is not. After reviewing this restrictive ruling at the request of Members of Congress, the Treasury Department reaffirmed the distinction made and said that "a more liberal interpretation must await further elucidation by judicial interpretation or by Congress itself."

So much for the technical aspect at issue which my bill would clarify by eliminating the narrow distinction between the two types of agricultural production. The policy question seems to me to be of more importance. Aside from the fact that to hold that income from crops raised on allotted and restricted lands is tax-exempt while that from livestock is not, constitutes, in my view, a discrimination against the livestock producers. A major effect of the Treasury ruling is to put a premium on rental rather than operation of such trust-status grazing lands by Indians. This is because the ruling holds that if the Indian rents his allotted land to someone else for grazing purposes, his income from this is tax exempt, but if he carries on a ranching operation on it himself, his income is taxed. Such an effect is directly contrary to our efforts to encourage self-sufficiency on the part of Indians. It results in further decreasing the number of Indians who operate their own lands. It should be noted that most allotments of Indian lands are so small that the rental value for grazing purposes does not constitute an adequate income whereas, if the Indian were able to operate the ranch himself, his prospects of securing an income sufficient to his family's needs would be increased.

Thus, both equity and sound public policy support, in my opinion, the need to eliminate this narrow distinction between the two types of income from Indian trust lands. The bill I have introduced today would achieve that purpose and I hope that it will receive early consideration and favorable action by the Congress.

THE SHARP EDGES OF QUESTIONS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from West Virginia [Mr. STAGGERS] is recognized for 5 minutes.

Mr. STAGGERS. Mr. Speaker, a spokesman for a well-known and highly respected college in the area, in announcing some curricular modifications, has this to say about his program:

> The overriding aim of the program has been, and remains, that the student should confront the tradition embodied in the great books, and through that confrontation learn to clarify his own opinions. To face directly what is problematic in the tradition, to locate the sharp edges of the crucial questions, is no easy task; it is, indeed, a kind of operation bootstrap. The work consists in the repeated effort to raise conflict to the level of rational articulation. Progress means a changing relation to the life of inquiry, a deepening insight into possibility.

Without entering any argument whatsoever as to whether this is or is not an appropriate aim for a college, it occurs to me that it is a singularly astute observation when applied to the matter of international negotiation.

We are disturbed by the seemingly negative results of recent negotiation, the apparent failure of the Geneva conference on nuclear disarmament being the newest example. We are inclined to say that negotiation is useless, and might as well be abandoned. Let us not forget that we are dealing with an entirely new concept in world policy. Our aim is a just and lasting peace. The goal lies at the other end of an unmapped road. We are all like students in a school, seeking something eminently desirable. But in this case we have no tradition to guide us, no body of tested experience to point the way. Our efforts have at least brought us into contact with the sharp edges of crucial questions, two of them being: How to wage war without the actual clash of arms; and, what settlements to make at the end of strife. The tradition of history has been to ignore or avoid both of those questions.

In the world of material things, we expect failure to precede progress. Burbank's ratio of failures to successes, when he was attempting to develop new and more useful plant forms, ran into the thousands. I do not know how many failures attended the efforts to harness the atom, or to put a missile into space, but they were many and expensive. But one success wipes out all antecedent failures.

A recent publication reports that a president of IBM, some years ago, was offering advice to a would-be writer who was discouraged by continued rejection of his manuscripts one after the other. He suggested: Double your rate of failure; somewhere beyond failure lies success, and that is where to look for it. In the field of international relations we can afford to make failures so long as we continue to confront the problematic. Repeated efforts are indeed raising conflict to the level of rational articulation. They are, in fact, driving our opponents from one untenable position after another. They are, in fact, clarifying our own positions in the eyes of the world. Every failure deserves a new and more discerning effort. Step by step we acquire a deepened insight into what is possible.

If we grant the importance of substituting rational settlement of differences for armed conflict in this dangerous world of ours, it is difficult to avoid the conclusion that we should set up appropriate machinery for studying and promoting the arts of peace. A full-scale Department of Peace in the President's Cabinet would provide the needed machinery. It would, in a sense, give us a body of professional experts engaged solely in discovering and applying appropriate procedures in solving difficulties. Our representatives selected for the various conferences in which we have participated are probably the best men available for the job. In most cases, they carry other important responsibilities and duties to which their major attention must be directed. Membership changes from one negotiating team to the next, and there is little opportunity to learn from experience. The value of a permanent group trained in the art of negotiation and dedicated to the problem of resolving conflict can scarcely be questioned.

An incidental virtue in a fully organized and active Department of Peace is that it in no way limits our preparation for war in the case that conflict becomes unavoidable. It remains the duty of a modern society to protect its rights and to promote its interests by force, if necessary, just as such a duty has been accepted by all societies throughout history. But to be abundantly ready to fight in defense of the things we hold precious is only one side of the matter. On it we justifiably expend untold energy and treasure, not to mention rivers of warm human blood. The obverse of the coin calls for a sophisticated contrivance for averting what may well be the ultimate tragedy of the human race.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. STAGGERS (at the request of Mr. ALBERT) for 5 minutes today, to revise and extend his remarks, and to include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. MCCORMACK (at the request of Mr. ALBERT) and to include extraneous matter.

(The following Members (at the request of Mr. NELSEN) and to include extraneous matter:)

Mr. HIESTAND.

Mr. BOW.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2481. An act to amend the National Aeronautics and Space Administration Authorization Act for the fiscal year 1962; to the Committee on Science and Astronautics.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that

that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker pro tempore:

H.R. 32. An act authorizing the establishment of the Fort Smith National Historic Site, in the State of Arkansas, and for other purposes; and

H.R. 256. An act to amend the District of Columbia Alcoholic Beverage Control Act.

SENATE ENROLLED BILLS SIGNED

The SPEAKER pro tempore announced his signature to enrolled bills of the Senate of the following titles:

S. 415. An act for the relief of Margaret Jean Dauel;

S. 513. An act to authorize and direct the Secretary of the Treasury to cause the vessel *Acadia*, owned by Robert J. Davis, of Port Clyde, Maine, to be documented as a vessel of the United States coastwise privileges;

S. 888. An act to authorize the Secretary of the Interior to lease certain lands in the State of Utah to Joseph A. Workman; and

S. 1012. An act to direct the Secretary of the Interior to adjudicate a claim of the Greif Bros. Cooperage Corp., to certain land in Marengo County, Ala.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H.R. 206. An act to facilitate administration of the fishery loan fund established by section 4 of the Fish and Wildlife Act of 1956, and for other purposes;

H.R. 1098. An act to amend section 901 of title 38, United States Code, to provide that a flag shall be furnished to drape the casket of each deceased veteran of Mexican border service;

H.R. 1337. An act for the relief of Amelia Andreoli D'Attorre;

H.R. 1627. An act for the relief of the Princess Ann County School Board, Virginia;

H.R. 2111. An act for the relief of Benjamin Schoenfeld;

H.R. 2429. An act to prohibit destruction of, or injury to, certain property moving in interstate or foreign commerce, and for other purposes;

H.R. 2457. An act to amend title V of the Merchant Marine Act, 1936, in order to clarify the construction subsidy provisions with respect to reconstruction, reconditioning, and conversion, and for other purposes;

H.R. 3159. An act to permit certain foreign-flag vessels to land their catches of fish in the Virgin Islands in certain circumstances, and for other purposes;

H.R. 3222. An act to amend section 4(a) of the act of April 1, 1942, so as to confer jurisdiction on the municipal court for the District of Columbia over certain counterclaims and crossclaims in any action in which such court has initial jurisdiction;

H.R. 3296. An act to authorize the Secretary of Interior to nominate citizens of the Trust Territory of the Pacific Islands to be cadets at the U.S. Merchant Marine Academy;

H.R. 4539. An act to amend section 723 of title 28 of the United States Code to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section, and for other purposes;

H.R. 4639. An act for the relief of Rear Adm. Carl H. Cotter;

H.R. 5054. An act for the relief of Wolfgang Stresemann;

H.R. 5180. An act for the relief of Dr. Ferenc Domjan and others;

H.R. 5321. An act for the relief of American President Lines, Ltd., Nitto Shosen Co., Ltd., and Koninklijke Java-China-Paketvaart Lijnen N.V. (Royal Interocean Lines);

H.R. 5647. An act for the relief of David C. Thomas, Robert W. Barber, Milton A. Chace, and Richard F. Turner;

H.R. 5656. An act to provide for reasonable notice of application to the U.S. courts of appeals for interlocutory relief against the orders of certain administrative agencies;

H.R. 6495. An act to amend the Life Insurance Act of the District of Columbia;

H.R. 6798. An act to amend the act incorporating the Washington Home for Foundlings and to define the powers of said corporation;

H.R. 7044. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia;

H.R. 7154. An act to authorize the Commissioners of the District of Columbia to regulate the keeping and running at large of dogs;

H.R. 7265. An act to amend the code of law for the District of Columbia so as to provide a new basis for determining certain marital property rights, and for other purposes;

H.R. 7707. An act for the relief of Andrew Telesfor Kostanecki;

H.R. 8032. An act to amend the Healing Arts Practice Act, District of Columbia, 1928, and for other purposes; and

H.R. 8033. An act to amend section 17 of the Interstate Commerce Act so as to authorize the delegation of certain duties to employee boards.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 41 minutes p.m.) the House adjourned until tomorrow, Thursday, September 7, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1290. A letter from the Assistant Comptroller General of the United States, transmitting the report on our review of selected activities of the Federal-aid highway program of the Bureau of Public Roads, Department of Commerce, in the States of Maine, New Hampshire, and Vermont; to the Committee on Government Operations.

1291. A letter from the Secretary of the Navy, transmitting a report relating to the construction of a dam immediately below the confluence of De Luz Creek with the Santa Margarita River on Camp Joseph H. Pendleton, San Diego County, Calif., pursuant to (68 Stat. 575); to the Committee on Interior and Insular Affairs.

1292. A letter from the Postmaster General, transmitting a draft of a proposed bill entitled "A bill to amend title 39 of the United States Code to provide for restoration of salary to postmasters in post offices of the fourth class in certain cases"; to the Committee on Post Office and Civil Service.

1293. A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Department of the Interior for "Management of lands and resources," Bureau of Land Management, for the fiscal year 1962, has been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to 31 U.S.C. 665; to the Committee on Appropriations.

1294. A letter from the Acting President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill entitled "A bill to amend the Street Readjustment Act of the District of Columbia so as to authorize the Commissioners of the District of Columbia to close all or part of a street, road, highway, or alley in accordance with the requirements of an approved redevelopment or urban renewal plan, without regard to the notice provisions of such act, and for other purposes"; to the Committee on the District of Columbia.

1295. A letter from the Secretary of Commerce, transmitting a report of all claims paid by the Department of Commerce during fiscal year 1961, pursuant to section 404 of the Federal Tort Claims Act (28 U.S.C. 2675); to the Committee on the Judiciary.

1296. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting a copy of an order together with a list showing the name of the person involved, pursuant to the act of September 11, 1957; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. CANNON: Committee on Appropriations. H.R. 9076. A bill making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1962, and for other purposes; without amendment (Rept. No. 1125). Referred to the Committee of the Whole House on the State of the Union.

Mr. SPENCE: Committee on Banking and Currency. S. 2325. An act to amend the Export-Import Bank Act of 1945; with amendment (Rept. No. 1126). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Virginia: Committee on Rules. House Resolution 399. Resolution to authorize the Committee on the District of Columbia to conduct an investigation and study of the organization, management, operation, and administration of departments and agencies of the government of the District of Columbia; without amendment (Rept. No. 1127). Referred to the House Calendar.

Mr. THORNBERRY: Committee on Rules. House Resolution 451. Resolution providing for the consideration of S. 320, an act to amend the provisions contained in part II of the Interstate Commerce Act concerning registration of State certificates whereby a common carrier by motor vehicle may engage in interstate and foreign commerce within a State; without amendment (Rept. No. 1128). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WALTER: Committee on the Judiciary. S. 262. An act for the relief of Constantinos Georgiou Stavropoulos; without amendment (Rept. No. 1118). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 263. An act for the relief of Guiseppe Giorioso; without amendment (Rept. No. 1119). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 264. An act for the relief of Mr. and Mrs. Franklin Leong; without amendment (Rept. No. 1120). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 553. An act for the relief of Olga G. Coutsoubinas and Spyridon G. Coutsoubinas; without amendment (Rept. No. 1121). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 592. An act for the relief of Nishan Der Simonian; without amendment (Rept. No. 1122). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 1934. An act for the relief of Mrs. Chow Chui Ha; without amendment (Rept. No. 1123). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H.R. 6226. A bill for the relief of Arlin David English; with amendment (Rept. No. 1124). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H.R. 9062. A bill to establish a Department of Culture; to the Committee on Government Operations.

By Mr. CEDERBERG:

H.R. 9063. A bill to regulate the foreign trade of the United States by providing safeguards to domestic industry against unfair and destructive imports and to authorize reciprocal trade agreements between the United States and foreign countries; to the Committee on Ways and Means.

By Mr. HARSHA:

H.R. 9064. A bill to deny the use of the U.S. postal service for the carriage of Communist political propaganda; to the Committee on Post Office and Civil Service.

By Mr. KNOX:

H.R. 9065. A bill to regulate the foreign trade of the United States by providing safeguards to domestic industry against unfair and destructive imports and to authorize reciprocal trade agreements between the United States and foreign countries; to the Committee on Ways and Means.

By Mr. ROGERS of Texas:

H.R. 9066. A bill to require loyalty declarations from employees of Government suppliers and from labor organizations representing the employees of such suppliers; to the Committee on the Judiciary.

By Mr. SHRIVER:

H.R. 9067. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer a deduction from gross income for tuition and other expenses paid by him for his education or the education of his spouse or any of his dependents; to the Committee on Ways and Means.

By Mr. ULLMAN:

H.R. 9068. A bill to establish reciprocity between members of the Confederated Tribes of the Umatilla and Warm Springs Indian Reservations and other Indian tribes in the matter of succession by will or inheritance to certain types of restricted or trust properties, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 9069. A bill to amend the Internal Revenue Code of 1954 to provide that income derived by an Indian from tribal lands or allotted and restricted Indian lands shall not be subject to the income tax; to the Committee on Ways and Means.

By Mr. YATES:

H.R. 9070. A bill to amend title II of the Social Security Act to provide that an individual who is otherwise qualified but delays filing his application for old-age insurance benefits (or for his wife's, husband's, or child's benefits in certain cases) shall be entitled to such benefits from the time he originally became so qualified; to the Committee on Ways and Means.

By Mr. ALBERT:

H.R. 9071. A bill to designate a certain dam on the Canadian River, Okla., as the Eufaula Dam, and the reservoir created by that dam as the Lake of the Five Civilized Tribes; to the Committee on Public Works.

By Mr. McCORMACK:

H.R. 9072. A bill to amend section 7 of the War Claims Act of 1948; to the Committee on Interstate and Foreign Commerce.

By Mr. MOELLER:

H.R. 9073. A bill to amend the Davis-Bacon Act to make it applicable to certain contracts under which a building is to be constructed or altered and leased to the United States; to the Committee on Education and Labor.

By Mr. ROBERTS:

H.R. 9074. A bill to amend the act approved July 14, 1960 (74 Stat. 526), relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Mississippi:

H.R. 9075. A bill to amend section 1033 of the Internal Revenue Code of 1954 to permit certain taxpayers whose property was involuntarily converted before 1958, but who were unable to obtain replacement property meeting the requirements then in effect, to obtain nonrecognition of gain through replacement with property meeting the current requirements; to the Committee on Ways and Means.

By Mr. CANNON:

H.R. 9076. A bill making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1962, and for other purposes; to the Committee on Appropriations.

By Mr. FULTON:

H.R. 9077. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for expenses incurred by a taxpayer in making repairs and improvements to his residence, and to allow the owner of rental housing to amortize at an accelerated rate the cost of rehabilitating or restoring such housing; to the Committee on Ways and Means.

By Mr. RHODES of Arizona:

H.R. 9078. A bill to amend the act approved July 14, 1960 (74 Stat. 526), relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. ROBISON:

H.R. 9079. A bill to amend the Tariff Act of 1930 to place drive calks, drive calk shoes, and certain drive calk tools on the free list; to the Committee on Ways and Means.

By Mr. MOELLER:

H.J. Res. 563. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. ALFORD:

H. Con. Res. 386. Concurrent resolution declaring the sense of the Congress that no further reductions in tariffs be made during the life of the present Reciprocal Trade Agreements Act; to the Committee on Ways and Means.

By Mr. ROBISON (by request):

H. Con. Res. 387. Concurrent resolution, declaring the sense of the Congress that no further reductions in tariffs be made during the life of the present Reciprocal Trade Agreements Act; to the Committee on Ways and Means.

By Mr. HEMPHILL:

H. Con. Res. 388. Concurrent resolution expressing the sense of the Congress with respect to the South Carolina State Student Legislature; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DOWDY (by request):

H.R. 9080. A Bill to authorize the Philadelphia, Baltimore & Washington Railroad Co. to construct, maintain, and operate branch sidings over First Street SW., in the District of Columbia; to the Committee on the District of Columbia.

By Mr. FINO:

H.R. 9081. A bill for the relief of John Postupak; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H.R. 9082. A bill for the relief of Mrs. Moy Ng Shee; to the Committee on the Judiciary.

By Mr. OLSEN:

H.R. 9083. A bill for the relief of Lauren F. Teutsch; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

208. The SPEAKER presented a petition of Mr. Albert C. Lambert, national secretary-treasurer, Sons of Union Veterans of the Civil War, Trenton, N.J., transmitting a copy of a resolution adopted by the 80th Annual Encampment of the Sons of Union Veterans of the Civil War, which met in Indianapolis, Ind., which was referred to the Committee on the Judiciary.

SENATE

WEDNESDAY, SEPTEMBER 6, 1961

The Senate met at 10 o'clock a.m., and was called to order by Hon. J. J. HICKEY, a Senator from the State of Wyoming.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Lord God, who knowest the burdens we bear and the temptations which beset us, grant us the royalty of inward happiness and the composure which comes from living near to Thee. Daily renew in us a sense of joy and let the love that casteth out fear dwell in our hearts that we may carry about the infection of a good courage and may meet all life's ills and disappointments with gallant, highhearted happiness, giving Thee thanks always for all things.

Endue with the spirit of wisdom Thy servants here to whom has been entrusted the responsibility of government. As with righteous wrath we behold the vile treacheries which today foul the earth, give us that personal honor and integrity which shall make us fit to be the

defenders of those high things which make life worth while.

We ask it in the Redeemer's name. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 6, 1961.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. J. J. HICKEY, a Senator from the State of Wyoming, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. HICKEY thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. PASTORE, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, September 5, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on September 5, 1961, the President had approved and signed the act (S. 2268) to amend the Federal Aviation Act of 1958 to provide for the application of Federal criminal law to certain events occurring on board aircraft in air commerce.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, notified the Senate that the Speaker pro tempore had appointed Mr. MEADER as a manager on the part of the House at the conference on the bill (S. 1653) to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises, vice Mr. MILLER of New York, excused.

The message announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 2344. An act for the relief of Teresa Del Vecchio Cipollone;

H.R. 2615. An act for the relief of Dr. Victor Wang Ta Ng and his wife, Alice Siu Har Ng;

H.R. 3007. An act for the relief of Alberto Luciano (Rocchi) Rosasco;

H.R. 3008. An act for the relief of Hom Hong Hing, also known as Tommy Joe;

H.R. 3401. An act for the relief of Salvatore Cairo;

H.R. 3840. An act to provide for the conveyance of certain real property of the United States to the Carolina Power & Light Co.;

H.R. 4211. An act for the relief of Alessandro Bottero;

H.R. 4280. An act for the relief of Dimitri Elias Sartan;

H.R. 4484. An act for the relief of Miss Liu Lai Ching;

H.R. 4499. An act for the relief of Mrs. Margaret Ruda Daniel;

H.R. 4795. An act for the relief of Walter J. Johnson;

H.R. 4797. An act for the relief of certain aliens;

H.R. 7873. An act for the relief of Mrs. Maria Gonzalez Fernandez Long;

H.R. 9033. An act making appropriations for foreign assistance and related agencies for the fiscal year ending June 30, 1962, and for other purposes; and

H.J. Res. 542. Joint resolution relating to the admission of certain adopted children.

ENROLLED BILLS SIGNED

The message also announced that the Speaker pro tempore had affixed his signature to the following enrolled bills, and they were signed by the Acting President pro tempore:

S. 415. An act for the relief of Margaret Jean Dauel;

S. 513. An act to authorize and direct the Secretary of the Treasury to cause the vessel *Acadia*, owned by Robert J. Davis of Port Clyde, Maine, to be documented as a vessel of the U.S. coastwise privileges;

S. 888. An act to authorize the Secretary of the Interior to lease certain lands in the State of Utah to Joseph A. Workman;

S. 1012. An act to direct the Secretary of the Interior to adjudicate a claim of the Greif Bros. Cooperage Corp. to certain land in Marengo County, Ala.;

H.R. 32. An act authorizing the establishment of the Fort Smith National Historic Site, in the State of Arkansas, and for other purposes;

H.R. 206. An act to facilitate administration of the fishery loan fund established by section 4 of the Fish and Wildlife Act of 1956, and for other purposes;

H.R. 256. An act to amend the District of Columbia Alcoholic Beverage Control Act;

H.R. 1098. An act to amend section 901 of title 38, United States Code, to provide that a flag shall be furnished to drape the casket of each deceased veteran of Mexican border service;

H.R. 1337. An act for the relief of Amelia Andreoli D'Attorre;

H.R. 1627. An act for the relief of the Princess Anne County School Board, Virginia;

H.R. 2111. An act for the relief of Benjamin Schoenfeld;

H.R. 2429. An act to prohibit destruction of, or injury to, certain property moving in interstate or foreign commerce, and for other purposes;

H.R. 2457. An act to amend title V of the Merchant Marine Act, 1936, in order to clarify the construction subsidy provisions with respect to reconstruction, reconditioning and conversion, and for other purposes;

H.R. 3159. An act to permit certain foreign-flag vessels to land their catches of fish in the Virgin Islands in certain circumstances, and for other purposes;

H.R. 3222. An act to amend section 4(a) of the act of April 1, 1942, so as to confer jurisdiction on the municipal court for the District of Columbia over certain counterclaims and cross-claims in any section in which such court has initial jurisdiction;

H.R. 3296. An act to authorize the Secretary of the Interior to nominate citizens of the Trust Territory of the Pacific Islands to be cadets at the U.S. Merchant Marine Academy;

H.R. 4539. An act to amend section 723 of title 38 of the United States Code to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section, and for other purposes;

H.R. 4639. An act for the relief of Rear Adm. Carl H. Cotter;

H.R. 5054. An act for the relief of Wolfgang Stresemann;

H.R. 5180. An act for the relief of Dr. Ferene Domjan and others;

H.R. 5321. An act for the relief of American President Lines, Ltd., Nitto Shosen Co., Ltd., and Koninklijke Java-China-Paketvaart Lijnen N.V. (Royal Interocean Line);

H.R. 5647. An act for the relief of David C. Thomas, Robert W. Barber, Milton A. Chace, and Richard F. Turner;

H.R. 5656. An act to provide for reasonable notice of applications to the U.S. courts of appeals for interlocutory relief against the others of certain administrative agencies;

H.R. 6495. An act to amend the Life Insurance Act of the District of Columbia;

H.R. 6798. An act to amend the act incorporating the Washington Home for Foundlings and to define the powers of said corporation;

H.R. 7044. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia;

H.R. 7154. An act to authorize the Commissioners of the District of Columbia to regulate the keeping and running at large of dogs;

H.R. 7265. An act to amend the code of law for the District of Columbia so as to provide a new basis for determining certain marital property rights, and for other purposes;

H.R. 7707. An act for the relief of Andrew Telesfor Kostanecki;

H.R. 8032. An act to amend the Healing Arts Practice Act, District of Columbia, 1928, and for other purposes; and

H.R. 8033. An act to amend section 17 of the Interstate Commerce Act so as to authorize the delegation of certain duties to employee boards.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 2344. An act for the relief of Teresa Del Vecchio Cipollone;

H.R. 2615. An act for the relief of Dr. Victor Wang Ta Ng and his wife, Alice Siu Har Ng;

H.R. 3007. An act for the relief of Alberto Luciano (Rocchi) Rosasco;

H.R. 3008. An act for the relief of Hom Hong Hing, also known as Tommy Joe;

H.R. 3401. An act for the relief of Salvatore Cairo;

H.R. 4211. An act for the relief of Alessandro Bottero;

H.R. 4280. An act for the relief of Dimitri Elias Sartan;

H.R. 4484. An act for the relief of Miss Liu Lai Ching;

H.R. 4499. An act for the relief of Mrs. Margaret Ruda Daniel;

H.R. 4797. An act for the relief of certain aliens;

H.R. 7873. An act for the relief of Mrs. Maria Gonzalez Fernandez Long; and

H.J. Res. 542. Joint resolution relating to the admission of certain adopted children; to the Committee on the Judiciary.

H.R. 3840. An act to provide for the conveyance of certain real property of the United States to the Carolina Power & Light Co.; to the Committee on Interior and Insular Affairs.

H.R. 4795. An act for the relief of Walter J. Johnson; to the Committee on Finance.

H.R. 9033. An act making appropriations for Foreign Assistance and related agencies for the fiscal year ending June 30, 1962, and for other purposes; to the Committee on Appropriations.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. PASTORE. Mr. President, under the rule, there will be the usual morning hour, for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSIONS

On request of Mr. PASTORE, and by unanimous consent, the following committees and subcommittees were authorized to meet during the session of the Senate today:

The Committee on Foreign Relations.

The Juvenile Delinquency Subcommittee of the Judiciary Committee.

The Committee on Post Office and Civil Service.

The Committee on Armed Services.

The Permanent Subcommittee on Investigations, of the Committee on Government Operations.

On request of Mr. PASTORE, and by unanimous consent, the Permanent Subcommittee on Investigations, of the Committee on Government Operations, was authorized to meet during the sessions of the Senate on Thursday and Friday of this week.

On request of Mr. PASTORE, and by unanimous consent, the Committee on Rules and Administration was authorized to meet during the session of the Senate today.

Mr. PASTORE. Mr. President, I ask unanimous consent that the Antitrust and Monopoly Subcommittee of the Judiciary Committee be permitted to sit during the session of the Senate today.

Mr. COTTON. Mr. President, to that request, I am compelled to object.

The ACTING PRESIDENT pro tempore. Objection is heard.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON REAPPORTIONMENT OF AN APPROPRIATION

A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of the Interior for "Management of lands and resources," Bureau of Land Management, for the fiscal year 1962, had been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriation; to the Committee on Appropriations.

AMENDMENT OF STREET READJUSTMENT ACT OF DISTRICT OF COLUMBIA

A letter from the Acting President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation to amend the Street Readjustment Act of the District of Columbia so as to authorize the Commissioners of the District of Columbia to close all or part of a street, road, highway, or alley in accordance with the requirements of an approved redevelopment or urban renewal plan, without regard to the notice provisions of such act, and for other purposes (with an accompanying paper); to the Committee on the District of Columbia.

REPORT ON CERTAIN CONTINGENCIES IN CONNECTION WITH CONSTRUCTION OF DAM AT CAMP JOSEPH H. PENDLETON, CALIF.

A letter from the Secretary of the Navy, reporting, pursuant to law, on certain contingencies in connection with the construction of a dam immediately below the confluence of De Luz Creek with the Santa Margarita River, Camp Joseph H. Pendleton, San Diego County, Calif.; to the Committee on Interior and Insular Affairs.

REPORT ON TORT CLAIMS PAID BY DEPARTMENT OF COMMERCE

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on tort claims paid by that Department, during fiscal year 1961 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON ADJUSTMENT OF IMMIGRATION STATUS OF A CERTAIN ALIEN

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a copy of an order entered in behalf of Robert M. L. Teng, relating to the adjustment of his immigration status (with accompanying papers); to the Committee on the Judiciary.

AMENDMENT OF TITLE 39, UNITED STATES CODE, RELATING TO SALARY OF CERTAIN POSTMASTERS

A letter from the Postmaster General, transmitting a draft of proposed legislation to amend title 39 of the United States Code to provide for restoration of salary to postmasters in post offices of the fourth class in certain cases (with accompanying papers); to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HARTKE, from the Committee on the District of Columbia, without amendment:

S. 1761. A bill to amend the act of March 3, 1901, relating to divorce, legal separation, and annulment of marriage in the District of Columbia (Rept. No. 881).

By Mr. MORSE, from the Committee on the District of Columbia, with an amendment:

S. 2194. A bill to amend the District of Columbia Unemployment Compensation Act of 1935, as amended (Rept. No. 880).

By Mr. HUMPHREY, from the Committee on Foreign Relations, with amendments:

S. 2180. A bill to establish a U.S. Disarmament Agency for World Peace and Security (Rept. No. 882).

PROPOSED DEPARTMENT OF URBAN AFFAIRS AND HOUSING—REPORT OF A COMMITTEE—MINORITY VIEWS (S. REPT. NO. 879)

Mr. MUSKIE. Mr. President, from the Committee on Government Operations, I report favorably, with amendments, the bill (S. 1633) to establish a Department of Urban Affairs and Housing and for other purposes, and I submit a report thereon. I ask unanimous consent that the report be printed, together with the minority views of Senators MCCLELLAN, MUNDT, CURTIS, and ERVIN.

The ACTING PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Maine.

REPORT ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON, from the Joint Select Committee on the Disposition of Papers in the Executive Departments, to which was referred for examination and recommendation a list of records transmitted to the Senate by the Archivist of the United States, dated August 23, 1961, that appeared to have no permanent value or historical interest, submitted a report thereon, pursuant to law.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. JOHNSTON, from the Committee on Post Office and Civil Service:

Eighty-two postmaster nominations.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MORSE:

S. 2504. A bill for the relief of Helen Duey Hoffman; to the Committee on the Judiciary.

By Mr. METCALF:

S. 2505. A bill for the relief of Lauren F. Teutsch; to the Committee on the Judiciary.

By Mr. BIBLE (by request):

S. 2506. A bill to authorize the Philadelphia, Baltimore & Washington Railroad Co. to construct, maintain, and operate branch sidings over First Street SE., in the District of Columbia; to the Committee on the District of Columbia.

By Mr. WILLIAMS of New Jersey:

S. 2507. A bill for the relief of Jose Tavares Rebelo; to the Committee on the Judiciary.

RESOLUTION

INCREASED EXPENDITURES BY SPECIAL COMMITTEE ON AGING

Mr. McNAMARA submitted the following resolution (S. Res. 204); which was referred to the Committee on Rules and Administration:

Resolved, That S. Res. 33, agreed to February 13, 1961, authorizing the creation of a Special Committee on Aging, is amended on page 4, line 5, by striking out "$150,000" and inserting in lieu thereof "$185,000".

AMENDMENT OF THE FILIBUSTER RULE

Mr. KEATING. Mr. President, the Senate Committee on Rules and Administration has reported without recommendation a resolution which would change the requirements for cloture under section 2 of rule XXII from two-thirds of the Senators present and voting to three-fifths of the Senators present and voting. This is a step in the right direction, and would be some improvement over the present rule. Experience under rule XXII, however, indicates that this change would make little practical difference.

Moreover, the three-fifths amendment does nothing to satisfy the concept of majority rule which is at the heart of the controversy. The effort to restore the right of a constitutional majority of the Senate to act after full debate is not just an argument over fractions. It is a matter of basic principle which should not be confused by minor concessions and unsubstantial gestures. I am willing to make any reasonable concession to the principle of full debate, in which I believe; but there is no way to compromise the principle of majority action without impairing the constitutional prerogatives of the Senate and undermining democratic procedures.

The filibuster rule is a monkey wrench in the machinery of government. It is the kind of challenge to orderly procedure which it is always hazardous to ignore, and which in these perilous times it could be fatal to ignore.

Senate Resolution 4, the three-fifths proposal, is scheduled for consideration on September 9.

I am today submitting an amendment which I intend to offer at that time to permit filibusters to be curbed by a vote of a constitutional majority of the Senate—51 Senators. The cosponsors of this amendment are Senators DOUGLAS, JAVITS, HUMPHREY, KUCHEL, CARROLL, BEALL, HART, BUSH, MCCARTHY, CASE of New Jersey, MORSE, SCOTT, PROXMIRE, and WILLIAMS of New Jersey.

This amendment, if adopted, would establish as a principle of Senate procedure that, after a full opportunity for debate, a majority of the Senate may act on the public business. It reflects full recognition of the importance of debate as a means of resolving differences of opinion, but repudiates the concept of debate as a device for wearing out the opposition and making it impossible for a Senate majority to chart the laws of the land.

I would have much preferred to consider a proposed rules change at the beginning of this session, when time would not have been such a heavy factor in our deliberations and the old rules were most appropriately subject to revision. The obstacles to an effective rules change at this point in the session are great, and only a determined effort to succeed can possibly lead to a meaningful change in the old filibuster rule.

It is my view, however, that, under the Constitution, a majority of the Senate can change its rules at any time, and that any provision of the rules to the contrary is a violation of the Constitution. I hope that the majority leader will join in urging this interpretation in the Senate when the issue is presented. He has taken steps to redeem his pledge to bring before the Senate a proposal for a change in rule XXII. But if the Senate is to have a real opportunity to express its will on this question, it must be under procedures which will permit action by a majority of its Members.

My views on the constitutional, practical, and substantive issues are set forth fully in the report of the Committee on Rules and Administration which was published today. This has been a disappointing session in terms of progress in the field of civil rights. There is no better way to lay the groundwork for a successful fight for civil rights legislation next session than by dealing a knockout punch to "King Filibuster" before we go home this year.

Mr. President, on behalf of myself and Senators DOUGLAS, JAVITS, HUMPHREY, KUCHEL, CARROLL, BEALL, HART, BUSH, MCCARTHY, CASE of New Jersey, MORSE, SCOTT, PROXMIRE, and WILLIAMS of New Jersey, I submit an amendment intended to be proposed to Senate Resolution 4. I ask unanimous consent that the proposed amendment be ordered to lie on the table and to be printed. Since the text of the amendment is already printed on page 16780 of the CONGRESSIONAL RECORD, I will not ask that it be printed again in the RECORD.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and will lie on the table as requested.

Mr. JAVITS. Mr. President, I ask unanimous consent that these remarks may be printed in the RECORD following the remarks of my colleague [Mr. KEATING].

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from New York? The Chair hears none, and it is so ordered.

Mr. JAVITS. I wish to invite the attention of the Senate to the extraordinary degree of bipartisan unanimity now attained in the contest which we shall make to bring rule XXII to some meaningful form of amendment.

It will be recalled that when I was a member of the Committee on Rules and Administration there was a two-man subcommittee composed of the Senator from Georgia [Mr. TALMADGE] and myself, which conducted most exhaustive hearings in regard to this problem, in 1959. Subsequently the Committee on Rules and Administration reported by a 5 to 4 vote the majority proposal, the so-called Douglas plan, to the Congress.

Now another plan has been reported by the Committee on Rules and Administration without recommendation. My colleague Senator KEATING, a member of the committee, has proposed the Douglas plan. From the amendment which my colleague submitted this morning it will be seen there is backing of a very solid and unified bipartisan group on both sides of the aisle.

I bring this to the attention of the Senate because I think it is very fine that we are maintaining what has always been the tradition in respect to the fight for civil rights; that is, a strong bipartisan body of support. I hope very much that our friends in the Senate—and they are numerous—will take encouragement from the fact that all these points of view have been unified in the one amendment, and that they will support it.

AMENDMENT OF SHIPPING ACT, 1916, RELATING TO OPERATION OF STEAMSHIP CONFERENCES—AMENDMENTS

Mr. KEFAUVER submitted amendments, intended to be proposed by him, to the bill (H.R. 6775) to amend the Shipping Act, 1916, as amended, to provide for the operation of steamship conferences, which were ordered to lie on the table and to be printed.

STUDY OF FEASIBILITY OF ESTABLISHING THE ABRAHAM LINCOLN MEMORIAL PARKWAY — ADDITIONAL COSPONSOR OF BILL

Mr. HARTKE. Mr. President, on April 13, 1961, I introduced S. 1579, a bill to provide for a study of the feasibility of establishing a national parkway to be known as the Abraham Lincoln Memorial Parkway. The senior Senator from Kentucky [Mr. COOPER], has requested an opportunity to join in sponsoring this bill, and I ask unanimous consent that his name be listed as a cosponsor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. KEFAUVER:

Address entitled "Taxes Related to Corporate Activity," delivered by Senator GORE before the Tax Executives Institute in Detroit, Mich., on May 24, 1961.

U.S. RESUMPTION OF NUCLEAR TESTING

Mr. PROXMIRE. Mr. President, the RECORD should show that the decision of the President of the United States—announced this morning—to resume nuclear testing was made only after the most painstaking efforts of our Government to achieve an agreement to control testing by inspection.

The flat U.S.S.R. rejection of agreement, its brutal decision to resume nuclear testing with big bombs—with death-dealing fallout above ground—literally left us no choice.

Mr. President, it should be recognized further that the President of the United States had a duty to the citizens of our

country and to the entire free world to take this necessary step, as he said in his announcement of test resumption.

To fail to order test resumption would be to hand over to the Soviet Union and communism sure and swift domination of the world.

Communist military power would soon have become overwhelmingly superior.

As an American, Mr. President, I am proud that this decision to test has been designed to safeguard the health of mankind everywhere by confining testing to below ground, and that we continue until September 9 our offer to end all fallout tests.

I earnestly hope and pray, Mr. President, that our country will continue to press for an agreement to control and eventually end nuclear tests by inspection.

In this bleak hour of frustration, America must not relax its determination to lead the way to peace. Events of the last week make it emphatically clear how overwhelmingly peace, as well as freedom, depends upon our Nation.

THE POWER OF ALASKA

Mr. GRUENING. Mr. President, an excellent appraisal of the hydroelectric potential of the 49th State appears in the September issue of the magazine Rural Electrification. The article was written by Charles A. Robinson, Jr., staff engineer and staff counsel of the National Rural Electric Cooperative Association. Mr. Robinson accompanied Norman Clapp, the national REA Administrator, to Alaska in May, to inaugurate the Cooper Lake Dam and power station, which supplies additional power to the Chugach Rural Electric Cooperative. I was happy to be present at that event.

Inevitably, Mr. Robinson calls attention to the greatest of all potential power projects remaining under the American flag—the dam in the Rampart Canyon on the Yukon, which the Corps of Engineers of the Army is now engaged in studying.

I ask unanimous consent that the article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Rural Electrification, September 1961]

THE POWER OF ALASKA—A LOOK AT ELECTRIC POWER CAPABILITIES—PRESENT AND FUTURE—IN OUR 49TH STATE

(By Charles A. Robinson, Jr.)

Alaska's 590,000 square miles of land mass is underlaid with a mineral wealth so vast as to be yet unmeasured. Its water power potential is 19-million kilowatts, second only to the State of Washington, according to FPC statistics. The development of this 49th and largest State affords the United States its finest opportunity to demonstrate that the institutions and ideals we cherish are the best ones yet conceived to achieve a high material living standard while preserving basic individual freedoms.

It is indeed anomalous that this opportunity and challenge which is presented to our engineers and political scientists by Alaska is derived from the very nation which now seeks to destroy America. It was in 1867, under the administration of President Andrew Johnson, that the United States acquired the whole of Alaska from czarist Russia for $7 million—$12 a square mile. At the time of its consummation, this acquisition of land was castigated as one of the worst financial fiascos in the history of mankind.

Only 165 miles separate Nome, one of Alaska's larger cities, from Soviet Russian territory. Anchorage, the largest city in Alaska, is separated from Soviet territory by only 700 miles. Here, under the very nose of the Soviet Union, is America's chance to prove that its resources can be developed for the benefit of its people, rather than exploited for the disproportionate enrichment of the few.

As little as half a century ago, Alaska was a land of romance and adventure, toward whose gold fields a few hearty souls ventured in search of quick, if somewhat violent, wealth. Now it has become a land of stable, diversified economic opportunity.

Yet, there still remains a certain spirit of adventure associated with Alaska, and those who set out for the 49th State for the first time do so anticipating new experiences and new concepts. In this they are not disappointed. Alaska is full of raw opportunity. Absent is much of the narrow legal, economic, and social thinking, and the conservatism which strangles progress in the older sections of our country.

Land is still available for homesteading. All a man needs is the rudiments of a four-wall home, an indulgent wife, and a little more than ordinary persistence and ingenuity. With these attributes he can achieve possession and ownership of 160 acres for the taking and occupation.

PIONEER SPIRIT

The pioneer spirit of the people of Alaska reflects the fact that notwithstanding the mushroomlike growth of a few coastal cities, the vast, untamed, and uncharted wilderness, which constitutes 95 percent of the State, is still without roads, without electricity, without water and sewage facilities, without modern communications, and without nearly all of the 20th century inventions which we have come to think of as necessities.

Except for Anchorage and Fairbanks—cities not unlike their counterparts in Wyoming and Montana—life in Alaska is a challenge. The climate, even in the coastal areas, is cold. Lakes in the Anchorage area are not free of ice until very late May or early June. Much of the ground never fully thaws—permafrost.

More challenging than all of these natural phenomena, however, is the difficult transformation from territorial status to full statehood. Throughout the years Alaskans have felt an economic squeeze, caused by the exploitation of their natural resources for the benefit of non-Alaskan enterprise. The Kenai Peninsula, for instance, is rich in oil and natural gas. Yet there are no oil refineries in Alaska, and the people pay 40 cents a gallon for regular gasoline, and 40 cents for a gallon of kerosene. And only this year has real progress been achieved toward transmitting natural gas from the Kenai production area to Anchorage for heating, cooking, and industrial consumption.

Alaska possesses more underdeveloped hydroelectric power than any other State in the Union except one, and is rich in coal. Yet, in many areas electricity runs from 10 to 50 cents per kilowatt-hour. Agricultural production is high in the fertile Matanuska Valley, 75 miles from Anchorage. In spite of this, large quantities of produce rot in the fields due to inadequate transportation between agricultural areas and population centers, which results in Alaskans eating imported food products almost exclusively. If it is to grow and prosper, Alaska must use its newly found powers of statehood to solve these basic economic problems.

All of these factors have had their effect on the people. Alaskans, as a group, are in some respects unlike Americans in any other part of the world. They possess unlimited faith in the future of their State, and immeasurable resourcefulness in overcoming obstacles which would dismay a less persistent people. Alaskans respect the conventional only to the extent that it suits the needs of their situation.

They are quick to discard unless anachronisms and artificial formalities which hinder their progress. Each person in Alaska knows in his own mind that not in his lifetime will his State be fully developed, or a major portion of its resources utilized. Yet each is determined to carve his initials in its history; perhaps by bringing central station electric service to another isolated Indian community, or by pushing a paved road a little farther toward the Arctic Circle.

Largest electric utility in the 49th State is Chugach Electric Association of Anchorage, developed in the late 1940's to provide central station electric service beyond the lines of the municipal utility which serves the core of the city. Chugach has set expansion records in several respects. After World War II, when utility poles were not available, its lines were stretched on 2 by 4's, despite no little REA bureaucratic surprise in Washington.

LINES STILL GROW

The 2 by 4's have long since vanished, but the Chugach lines continue to grow and grow. The cooperative now serves some 12,000 consumers: urban, rural, industrial, and commercial. It is interconnected with the Bureau of Reclamation's 30,000-kilowatt Eklutna hydroproject, located a few miles up the Alaska Railway toward Fairbanks. It owns and operates the 11,500-kilowatt Kenik Arm steam electric station, and has recently completed the 15,000-kilowatt Cooper Lake hydroelectric station, 53 miles south of Anchorage on the Kenai Peninsula.

Power from Cooper Lake will be transmitted northward to Anchorage over Chugach's new 115-kilovolt transmission line, and southward 85 miles to Homer via another new 69-kilovolt transmission line. Chugach is building a whole new distribution system to serve the sparsely populated Kenai Lake area surrounding its Cooper Lake station. It has recently signed contracts to sell wholesale electricity to the city of Seward and to the Anchorage municipal electric system.

Other rural electric cooperatives in Alaska serve towns and rural areas alike. The Matanuska Electric Association serves Alaska's richest agricultural area. The Golden Valley Electric Association spread its lines from Fairbanks to serve some 3,000 consumers in the surrounding territory. And the far north Eskimo community of Kotzebue, a huddle of 1,290 souls on the Arctic Ocean, is served by an REA-financed electric system.

NEED FOR INDUSTRIAL DEVELOPMENT

The need of Alaska for basic industrial development is critical. Raw materials are plentiful. The land is richly covered with forests and richly underlaid with gold, platinum, silver, copper, lead, tin, tungsten, iron, nickel, and coal. It needs basic industrial development to escape from the squeeze of economic exploitation, to provide long-term stable employment for its expanding population, and to spur the occupation and growth of its interior.

Men who have devoted their lifetimes to achieving a better way of life for all Alaskans believe that the key to their State's future industrialization is low-cost electric power. Alaska's distinguished scholar and eminent statesman ERNEST GRUENING, now representing the 49th State in the U.S. Senate, has studied electric power, generation and transmission throughout the world.

Her other U.S. Senator, the beloved BOB BARTLETT, and Congressman RALPH J. RIVERS, who as a boy traveled the Yukon on paddle wheel steamboats, are in solid agreement that somehow their State must have abundant electricity.

HOPE OF THE YUKON

They think that they now know how this can be done. And, they believe that the answer lies in the same river which a century ago attracted the thousands of adventurers who sought the gold that abounded in the land which it drains—the Yukon.

Since the turn of the century, engineers have watched the Yukon River surge toward the sea, evidencing the tremendous power which belongs exclusively to nature. The Corps of Engineers thinks that it knows how to convert the raw natural energy of the Yukon into the largest and most economically justified hydroelectric project on the North American Continent; 100 miles northwest of Fairbanks, the Yukon flows through Rampart Canyon. A dam erected in the canyon would create a lake 80 miles wide and 370 miles long—a water surface 10 percent larger than Lake Erie. Over a billion acre-feet of storage would be impounded. The dam would cost $1.5 billion and take 6 years to build. The reservoir would take 20 years to fill. Once filled, the waters of Rampart Canyon would develop nearly 5 million kilowatts of electric power. Energy from the project is estimated to cost 2 mills per kilowatt-hour at the busbar, and 3 mills per kilowatt-hour delivered over a 400-kilovolt or 500-kilovolt transmission system at all major population centers of the State.

RAMPART WOULD ATTRACT

Rampart Canyon is a project which most Alaskans believe would attract the tremendous industrial complexes necessary to realize the potential of the State's mineral resources, and to transform the economy of Alaska from one dependent upon the exportation of raw materials to one permitting the manufacture of pure metals, machinery, coal tar derivatives, petroleum and chemical products, wood products and all manner of finished goods.

Rampart Canyon is the hope of the future for Alaska; the hope of a higher living standard for its people; the hope of an end to seasonal employment; and the hope of demonstrating to the world that progressive utilization of natural resources is the key to a better way of life for the free peoples of the world.

Rampart Canyon has captured the imagination of members of the U.S. Congress who have seen similar gigantic hydroelectric projects under construction in Soviet Russia. They have seen the Russians building dams to develop from 3 to 6 million kilowatts of capacity at a single site. They have seen the Russians transmitting this power via 400-kilovolt and 500-kilovolt networks to remotely located industrial complexes, and they have seen the Russians planning for development of new manufacturing complexes at the dam sites. With these experiences apparently in mind Congress has already appropriated $274,000 for engineering surveys at Rampart Canyon. An additional $626,000 will be required during the next few years before surveys are complete and the project is ready for authorization and construction.

There are those who say that Rampart Canyon is not feasible because there is no existing load to absorb its output. These are the same outcries that greeted the authorization of Grand Coulee on the Columbia and the TVA projects on the Tennessee. They are the same voices which declared the purchase of Alaska itself to be a monumental blunder. They are the voices which declared rural electrification impossible because it had not yet been accomplished.

America, if it is to succeed in retaining freedom for its people and preserving its existence as an independent Nation, must abandon the concept that what was adequate for its fathers is adequate for its children. It must push toward the frontiers of economic and social development with the same vigor and determination with which it is pushing toward the physical frontiers of the universe.

THE ENTRY OF GREAT BRITAIN INTO THE EUROPEAN COMMON MARKET

Mr. MORSE. Mr. President, the conversations leading to the entry of Great Britain into the European Common Market have had repercussions which are arousing the concern of many growers of agricultural products. In this connection I ask unanimous consent that the article entitled "British Common Market Bid Alarms Fruit Trade," which appeared in the August 12 issue of Pacific Fruit News, be printed in the RECORD at this point in my remarks.

Mr. President, I hope sincerely that the measures being taken to solve the economic problems of a great ally will not bear too heavily upon the American farmer and fruitgrower. Whatever arrangements may be made, it would be the part of wisdom to safeguard long established trade channels which link Great Britain to the United States.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Pacific Fruit News, Aug. 12, 1961]

BRITISH COMMON MARKET BID ALARMS FRUIT TRADE

Prime Minister Harold Macmillan's decision to seek admission for Great Britain to the European Common Community (commonly referred to as the Common Market or EEC) may please U.S. specialists in international policy, but it creates another headache for those in the fresh and processed fruit industry. We have a well-founded fear that one of Britain's concessions to gain Common Market entry will be her acquiescence to higher tariff barriers for many imported agricultural products, including fresh and processed fruits. We further fear that though Britain may fight hard to retain some special favors for Commonwealth suppliers in the British market, she will make no such fight in behalf of even such a historic source of many of these products as the United States.

Britain has been a very important export market for many of our products, including fresh apples and pears, prunes and raisins, and canned fruits, juices, and vegetables. U.S. exports of canned fruits to Great Britain in 1960 totaled 34,886 short tons, of dried fruits, 19,086 tons, and of principal fresh fruits, 40,475 tons. Britain was our most important export outlet for prunes and raisins in 1960, our third most important export market for canned fruits, and our most important export market for fresh apples and fourth most important export market for fresh pears.

The importance of Britain as a market for these products is further indicated by her imports from all sources in the first 3 months of this year: 406,728 of fresh fruits and 105,616 tons of preserved fruits.

Britain is expected to have to face the very insistent demand of French agricultural producers to raise Common Market tariff barriers for products coming from outside the Common Market. France alone of the Common Market countries has not liberalized import trade in canned deciduous fruits and continues to employ nontariff barriers to curtail such imports.

Lately the Pacific Coast fruit industry was enheartened by the British liberalization of canned fruit imports from the United States, effective August 1. Earlier, Britain had liberalized imports of prunes and raisins from the United States, though continuing licensing controls on citrus fruits and apples. Thereafter, Italy liberalized imports of canned fruits, frozen fruits, grapefruit and pineapple juices effective June 27.

OPPOSITION AT HOME

Britain's prospective entry into the Common Market—and this is considered to be inevitable because of impelling economic reasons—does not have wholehearted support of the British people and certainly not of its Commonwealth partner countries. These latter fear the move would end the preferential treatment given their exports in the British market, even though Macmillan has given public assurance the trading interests of other Commonwealth countries would be safeguarded.

How well Macmillan will succeed in keeping these promises and in resisting the presure for restrictions on trade with such countries as the United States is considered very uncertain. For one reason, the difficult position in which Charles de Gaulle now finds himself, mainly because of his inability to resolve the Algerian problem, makes it unlikely he will wish to incur the wrath of French farmers and protectionists by agreeing to any concessions Macmillan might ask.

This realization has caused those presently engaged in the United States export of fresh and processed fruits to Great Britain to take a closer look at what may happen to duty rates should Britain become a full-fledged member of the Common Market. Some Common Market duties for products from nonmember countries, on a percent ad valorem basis, are presently as follows: apples, 10; pears, 10; prunes, 18; raisins, 9; canned deciduous fruits and pineapple, 27; and orange and grapefruit juice, 21.

It is not a pretty prospect for our industry, though it may enable Britain to solve some of its economic problems.

FEDERAL AID TO EDUCATION

Mr. MORSE. Mr. President, in the Washington Post of this morning appears an editorial entitled "Consolation Prize," which discusses some of the problems confronting the Senate in connection with Federal aid to education legislation. It discusses with specific reference the able position taken by the Senator from Michigan [Mr. MCNAMARA].

As chairman of the Subcommittee on Education, I wish to say to the Washington Post that I appreciate the wonderful and strong help that newspaper has been to us on the subject of Federal aid to education legislation.

In connection with the editorial which appeared in the Post this morning, I agree with much of it, but I want to comment on some differences of opinion in regard to the following sentence in the editorial:

Nevertheless, we hope he'll forgo his revenge. In the absence of general help for the public schools, the impacted areas—those school districts which have been swollen suddenly by an influx of Federal workers and their families—stand in the most drastic need of assistance.

I respectfully say that is a false assumption in connection with many of the impacted areas of the country. In many areas of the country now receiving aid under federally impacted areas legislation, the school districts are not the worst impacted areas. It must be remembered that such aid has been furnished for 10 years. In many instances those districts could carry more of a full load financially, and there is serious doubt as to some whether they need Federal money. I know there are still some seriously impacted area school districts which need Federal money. We need, however, to take a new look at the federally impacted areas problem.

I point out there are many school districts that are more impacted with children, and they are school districts in which there are no Federal installations.

The Washington Post editorial is mistaken when it makes the general statement that these federally impacted areas stand in the most drastic need of Federal aid. This is not a correct picture. It is true in many instances, but it is not true in many other instances. There are schoolchildren in our country who are in overcrowded schools where there are no Federal installations.

I have a suggestion to make to Members of Congress. There will be many so-called Federal junkets after this session is over. I have a study project for Members of Congress to make. I wish the Secretary of Health, Education, and Welfare would organize it. I think Members of Congress should go to school district after school district in our country where children are attending school on stages, in basements, in corridors, in borrowed buildings next to schoolhouses, because of the failure on the part of Congress to do what ought to be done by passing Federal aid to education legislation for the benefit of the boys and girls ready to attend school.

The Congress cannot justify walking out on its obligation by not passing Federal aid to education legislation in this session. What I suggest is the kind of junket right here at home, doing the domestic job the people elected Members of Congress to do. I am sure that if Members of Congress saw all the child-impacted areas we would get some Federal aid to education legislation enacted.

There is great merit in the position the Senator from Michigan is taking. As chairman of the Education Subcommittee, I wish the RECORD to show I am opposed to any extension of federally impacted areas legislation for 2 years, and I am opposed to any extension of NDEA legislation for 2 years, because we should face up to the political strategy of this proposal on the part of the House. They want to "take the heat off." They know that if they can get such legislation enacted for 2 years, then in the next session of Congress Federal aid to education legislation will be "dead as a dodo." I do not think Congress can justify extending those two pieces of legislation beyond 1 year. So far as I am concerned, I shall do everything I can to oppose extension of such legislation for more than 1 year.

Mr. President, I am an ally in the great crusade the Senator from Michigan is proposing against any extension of the legislation I have mentioned for more than 1 year. I am an ally also in seeking to add to legislation the House may pass some amendments which will give to all of the boys and girls the Federal assistance to which they are entitled, instead of giving it merely to the one-third attending schools in the so-called federally impacted areas. It is not right, just, or fair to be giving Federal money to one-third of the schoolchildren of this country, and not the other two-thirds. I think Congress ought to stay in session all fall, if necessary, to see that the schoolchildren are protected, in view of the program announced by the House.

Mr. President, I ask unanimous consent that the Washington Post editorial to which I have alluded be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 6, 1961]

CONSOLATION PRIZE

Congress, which passed up the opportunity to do something imaginative and effective for American education, seems sheepishly in agreement now upon giving the schools a consolation prize in the form of aid to impacted areas and an extension of the student loan program. Senator PAT MCNAMARA—a stalwart friend of full-fledged Federal aid to education—has suddenly stepped forward, however, with a threat to filibuster these meager measures to death. His idea, apparently, is to teach the foes of Federal aid a lesson.

"If Congress is not willing to pass a full-fledged aid-to-education bill," says Mr. MCNAMARA, "then let the boys who are against it go home emptyhanded and face the music. That filibuster business works both ways." Well, we can hardly blame the Senator for feeling piqued.

Nevertheless, we hope he'll forgo his revenge. In the absence of general help for the public schools, the impacted areas—those school districts which have been swollen suddenly by an influx of Federal workers and their families—stand in the most drastic need of assistance. And in the absence of the scholarships which would have been provided by an adequate National Defense Education Act, it seems especially important to continue the program of Federal loans to needy students seeking a college education. The country needs these measures as a bare minimum. We trust they will be adopted this week and that the Congress which, through them, has acknowledged the indispensability of Federal aid to education, will next year adopt a greatly expanded program.

Mr. MORSE subsequently said: Mr. President, will the Senator from Rhode Island yield to me?

Mr. PASTORE. I am happy to yield to the Senator from Oregon.

Mr. MORSE. Mr. President, while the two Senators from New York are on the floor, I wish to pay high commendation to the great newspaper of their State, the New York Times. I refer specifically to the editorial published this morning in the New York Times, entitled "School Aid: Hypocrisy." I ask unanimous consent that the remarks I now make be printed in the RECORD immediately following the remarks I made earlier today in my discussion of the editorial published in the Washington Post.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Mr. President, the editorial published this morning in the New York Times reads in part as follows:

SCHOOL AID: HYPOCRISY

Senator MCNAMARA, of Michigan, is quite correct in rebelling against the hypocrisy that has impelled Congress to turn its back on genuine and general Federal aid to education while it shows great eagerness to renew assistance to the local federally impacted areas.

The hypocrisy is documented by well over a hundred votes which are regularly cast for aid to the impacted areas by Members who, with equal regularity, help to defeat nationally distributed Federal aid to the schools. The impacted area grants are based on the theory that school districts which feel the unusually heavy impact of children of parents working in defense establishments and other Federal projects need such help. They probably do, although it should not be overlooked that Federal projects, even though they take real estate off the local tax rolls, contribute heavily to the nearby communities' economic well-being. At any rate, there are many nonimpacted areas whose schools are in far greater need of help.

Mr. President, the New York Times could not be more correct in regard to the economic situation which involves many of the federally impacted areas. Many of them simply do not need a continuation of Federal school aid; but if we were to suggest that the Federal installations be removed from those areas, there certainly would be a hullabaloo raised by the local chambers of commerce and by various economic groups in those districts.

What pressure they put on Congress to get those installations in the first place, and how willing they were to make sacrifices, so they said, to get them. Yet these days they are willing to cheat millions of boys and girls out of Federal aid to education in areas much more impacted with children which do not have Federal installations; they are willing to bar boys and girls from the educational opportunities that they are entitled to receive from all the taxpayers of the country.

Mr. President, I intend to take this issue into congressional district after congressional district in the country in the months ahead, in order to inform the parents how their Representatives in the House of Representatives are voting against Federal aid to education, thus denying the boys and girls the help they should have from the Federal taxpayers.

The New York Times editorial hits this nail directly on the head when it points out that there are in the country school districts more impacted than the so-called federally impacted areas, as these are defined in the legislation on that subject. If some Members of the House of Representatives want to make this issue a political issue—although it should not be made one—I am willing to make it a political issue in their own districts. I am willing to take the record of their votes to the voters in those districts, because I am satisfied that once the parents of the country understand

how some Members of the House of Representatives are voting to cheat the boys and girls out of the help they should receive from the Federal Government, such Members of the House will get their answer at the polls.

This is not the first time liberals in American politics have had to seek this course of action. I was nurtured and succored on the philosophy of the elder Senator Bob La Follette of Wisconsin. He said that what is sometimes needed is to take the voting records of politicians right to their voters. I think this issue is so vital to the security of the Nation and is so important from the standpoint of the moral obligation we owe the younger generation, that I am willing to take it into district after district to the voters. This will let the voters understand what are the true voting records of some Members of the House of Representatives who give only lipservice to Federal aid to education, but who actually are seeking every escape hatch that they can find in order to duck their responsibilities of giving to all the boys and girls of the country the Federal aid that is so sorely needed to education.

The editorial in the New York Times is a great one. I read further from it:

> Congressmen, in the interest of legislative decency and national responsibility, ought to think of what they can do for the country, not merely what the country can do for them, by supporting their local vote-getting interests. Let the politically popular impacted area grants be continued—provided that they can be made part and parcel of straightforward, nonpolitical, generalized Federal aid to education wherever it is needed. There is no satisfactory reason why this cannot be done in this session. If there is time to pass impacted area aid, there is time to pass general aid to the public schools.
>
> It is intolerable for legislators to cash in on their pseudosupport of education when it suits local vote-getting expediency while they continue to block real aid to the public schools. The time to drive this home—by insisting on general public school aid, along with renewal of the grants to the impacted areas—is now. But the failure of leadership, in the White House, in the Department of Health, Education, and Welfare, and in the House of Representatives gives little cause for hope. Compromise has been the order of the day—and the result has been a fiasco for Federal aid to education and a disaster for the Nation's public schools.

As chairman of the Subcommittee on Education let me say, however, that in my judgment, the facts do not support the comment made in the editorial about a failure of leadership on the part of the White House or on the part of the Secretary of the Department of Health, Education, and Welfare.

I can be a good witness on this matter, because I know how hard the President has worked for a Federal aid to education bill at this sesssion of Congress. I know what the Secretary of the Department of Health, Education, and Welfare has done in his valiant attempt to get the House of Representatives to measure up to its responsibility in connection with the matter of giving the Members of the House of Representatives an opportunity to vote on a general Federal aid to education bill. In my judgment, the responsibility for the failure to pass Federal aid to education legislation of a general scope and nature rests squarely at the doorstep of the House of Representatives. What I said the other day on the floor of the Senate, I now repeat: Let us face up to the major cause of the failure of the House of Representatives to get an opportunity to vote on Federal aid to education legislation which is general in scope. It is due to the policy of the House Rules Committee. It is due to the fact that there is in the House of Representatives a procedure which denies to all the people of the country the right to have the majority of the Members of the House really control the House of Representatives.

I think that issue also needs to be taken to the American people, because once the people understand that procedural restriction upon their majority rights, they will insist that those they elect to the House of Representatives do what should have been done many years ago—namely, to change the rules of the House, so that the majority will have an opportunity to pass upon legislation by voting it either up or down. That is what ought to be done with Federal aid to education legislation.

The schools now have opened again; and in our committee we are receiving reports from school superintendents and superintendents of education in State after State. These are reports which point out the deplorable situation which confronts them in the nonfederally impacted areas. These are areas which, in many instances, are more impacted with children than are the federally impacted area school districts of the country in which some Federal installations are located.

Mr. President, we must take a look at what we are doing to the real property taxpayers of the country by our failure to pass Federal aid to education legislation which is general in scope. We are placing an unjust and an unfair burden upon millions of real property taxpayers. Of course, these real property taxpayers will make any sacrifice that they must make for the benefit of their children. It is the answer to the argument, "but they are voting new bond issues"—of course, they will vote them, rather than deny to their children the educational opportunities they know they should have.

But there are thousands of school districts in the Nation which just do not have the wherewithal to provide school facilities necessary to give to their children the opportunities they should have. The financial need should be met by the application of a progressive tax policy based upon income, and not by the regressive tax policy which characterizes the real estate tax structure in State after State. We shall have to meet the need by Federal aid coupled with a determination that there are written into law provisions assuring that the educational policies will be controlled by the school districts and not by the Federal Government. The Senate did that in S. 1021.

I think it is a shame that we have the prospect of adjourning this Congress without taking care of the general school needs of this country. I shall continue to do all I can to obtain Federal money to help the two-thirds of the schoolchildren who are being discriminated against by the policy which we shall have adopted if we accept only a federally impacted areas aid bill. I am for that bill. If anyone thinks the position I am taking is popular in my State, I invite him to read my mail. There are many federally impacted school districts in the State of Oregon, but I am saying to the school authorities, "In my judgment, you ought to be helped, but you ought to help us help the other two-thirds of the schoolchildren in school districts who need it, in many instances, as much as the children in your school districts, and in many cases more." If a thorough examination is made of the existing federally impacted areas legislation, it will be seen that Federal funds ought to be reduced in many instances. That is what the administration pointed out last January, when it came before the Congress and asked for a tapering off of federally impacted programs.

It was wrong, in my judgment, to do it, on the basis of the long-term policy it recommended. As members of the committee will state, and as the present Presiding Officer, the Senator from Montana [Mr. METCALF] knows from his own participation in the conferences, I was helpful in persuading the administration to agree to withdraw its proposal to taper off the federally impacted areas program provided we placed into S. 1021 a provision that, at the end of 18 months, the Department of Health, Education, and Welfare would submit a report to the Congress containing specific evidence which would justify tapering off of the program in any specific districts. That is what we wrote into the bill.

I say again, as I said earlier this morning, I shall support an extension of such legislation for 1 year. I shall oppose an extension beyond 1 year, because I think the American taxpayers are entitled to receive the report we requested. I feel any further extension of the federally impacted areas legislation beyond 1 year should be based on a careful consideration of all of the facts.

What I contend for, as hard as I can, because there is still time left, is that the House of Representatives, in my judgment, should measure up to the clear obligation it owes to all the schoolchildren of the country by passage of a general Federal aid to education bill.

LETTER WRITTEN BY JOHN EDGAR HOOVER TO LAW ENFORCEMENT OFFICIALS

Mr. GOLDWATER. Mr. President, the burdens of legislative work being what they are, the demands on our time being so great, we in the Congress are prone to overlook the great accomplishments of some of the other agencies of our Government. One of these, I might suggest, is the Federal Bureau of Investigation which, under the inspired leadership of that great American, John

Edgar Hoover, has just compiled another outstanding year of giving protection to all our people. With its title including the word "Federal," it is easy to forget that this organization reaches its strong and helping hand into every State of the Union and into most of our cities and towns as it stresses the word "cooperation" in the constant battle against crime in our country. This record is ably and concisely presented in a letter appearing in the FBI Law Enforcement Bulletin of September 1961, written by Mr. Hoover to all law enforcement officials, which I ask unanimous consent to be printed in the RECORD at this point in my remarks.

There being no objection, the bulletin was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
FEDERAL BUREAU OF INVESTIGATION,
Washington, D.C., September 1, 1961.

To All Law-Enforcement Officials:

As America stands on the threshold of daring and remarkable scientific achievements which promise to dwindle the universe about us, the law-enforcement profession may be proud of the equally giant strides it has made in crime-fighting techniques during this century.

The FBI is most fortunate that in an era of progress never before witnessed in the law-enforcement field, it has the honor of being associated with this great and forceful movement for the betterment of mankind in this Nation. Nothing so graphically illustrates why our profession has grown than the one word "cooperation," and achievements such as those recorded below are indeed symbols of the peace officer's acceptance and utilization of joint crusades against the lawless:

During the fiscal year 1961, local enforcement officers in all 50 States and the District of Columbia availed themselves of the services of the FBI Laboratory. The Laboratory reached new records with the receipt of 40,662 requests for assistance involving 224,183 scientific examinations of 186,378 specimens of evidence.

More than 13,000 law enforcement agencies, substantially every one in this country, submitted in fiscal year 1961 an average of just under 22,000 fingerprint cards a day to the FBI resulting, among other things, in the identification of over 1,500 wanted persons each month for local, State, and Federal law enforcement agencies.

Fiscal year 1961 brought another record for the eighth consecutive year when FBI agents located for local authorities 1,418 criminals who had fled across State lines in violation of the Federal Fugitive Felon Act. Working shoulder to shoulder with the FBI, local authorities continue to make this act work as Congress intended it should.

In the same fiscal year, more than 88,000 local law enforcement officers attended 3,464 police training schools in which the FBI assisted.

June 1961 brought a milestone in our profession's advancement with the graduation of the 67th session of the FBI National Academy which increased to over 4,000 the number of local officers who have graduated from this specialized training school.

At the same time, information obtained by the FBI from informants was used by local, State, and other Federal agencies to arrest 2,640 wanted persons and to recover $1,605,047 in stolen and contraband merchandise.

Between January and July of 1961, more than 50,000 pieces of criminal intelligence obtained by the FBI from varied sources were disseminated to local, State, and Federal agencies resulting in untold disruption of underworld schemes.

This is but a part of the score in the mortal contest against the criminal marauders who have too long believed they can plunder our country unchallenged. FBI agents, just as they lend all possible aid to their colleagues in law enforcement, receive invaluable assistance daily from fellow officers throughout the Nation. Every day which passes imbues the law-enforcement officer with the knowledge, the inspiration, and the confidence which will topple the empires of criminals as fast as they try to build them. This knowledge, this inspiration, and this confidence are born of a growing brotherhood among law enforcement agencies.

Realistic analysis of the above figures makes it evident that there are today in actual operation national clearing facilities for the exchange of vital information of mutual interest among local, State, and Federal law enforcement agencies.

Crime cannot long withstand such a rising tide of cooperative effort, and we in the law enforcement profession must nurture this idea, this philosophy, so that it may reach even greater heights. Mutual accomplishments can bring mutual satisfaction in a job well done.

Very truly yours,
JOHN EDGAR HOOVER,
Director.

PLIGHT OF MIGRATORY FARMWORKERS

Mr. YOUNG of Ohio. Mr. President, the chairman of the Migratory Labor Subcommittee of the Labor and Public Welfare Committee, the distinguished junior Senator from New Jersey [Mr. WILLIAMS], deserves our commendation for the magnificent contribution he has made in helping to alleviate the plight of migratory farmworkers and their families and in bringing this problem to the attention of all Americans.

In great measure due to his efforts, the Senate this year passed measures to help correct this deplorable situation. We have established assistance programs to help States and local communities provide better education opportunities for migrant adults; required Federal registration of crew leaders who make work arrangements between workers and growers; and have authorized up to $3 million annually to stimulate and support local health programs for migrant workers. Last week we also provided for the establishment of a National Citizens Council on Migratory Labor, and took action to set a minimum age for child labor outside of school hours.

It is my hope that all of these bills will become the law of the land before this session of the Congress adjourns.

The conditions under which our migrant farmworkers live and work are a blight on our Nation. The time is long past due to help them achieve a minimum decent standard of living.

In the September 1961 issue of the Progressive magazine, appears a very cogent article, written by the junior Senator from New Jersey [Mr. WILLIAMS], exposing the conditions under which our 2 million migrant farmworkers exist, and outlining the need for Federal legislation to help ease their unfortunate circumstances. The junior Senator from New Jersey is to be congratulated upon the excellent article he has written and upon the real and needful public service he has rendered.

The Progressive magazine is an outstanding publication, which has long been a vital force in the fight for social justice.

I ask unanimous consent that this article be printed at this point in the RECORD as part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE EXCLUDED

(By Senator HARRISON A. WILLIAMS, JR.)

Even as late as 1939, when Senator Robert M. La Follette, Jr., investigated farm labor conditions in California, many Americans still cherished the belief that small, independent farmers gave us most of the food and fiber we needed for ourselves and for foreign trade. But La Follette helped dramatize the fact that factories in the field were very much at work, not only in grain country, but in truck farm regions, too. Slow-moving machines, big and black on the horizon, appeared to be masters of the soil and its products.

All was not changed, however, by tractors, automatic seeders, weeders, and harvesters. Though automation enabled the farmer to plant and harvest on a scale impossible on the small family farm, the grower discovered that machines could not do every job. For many fruits and vegetables there was no substitute for human judgment or human hands. On many a farm today there is still no substitute.

To chop cotton, for instance, the most efficient device seems to be a worker who can weed out surplus plants with a hoe. Vineyards and orchards must have specialists who know how to prune and pick. On tobacco fields, workers stoop to thin plants. Under the summer or early autumn sun, other workers help grow or harvest berries, nuts, celery, lettuce—the produce we later see so neatly packaged in plastic bags at supermarkets.

To work these and other crops, great numbers of laborers are needed, but usually for only a few weeks or so at a time. As crops mature, these workers travel in their buses, trucks, or automobiles south to north across the slopes, valley, and plains of our Nation. They are the migratory farmworkers of the United States. They are citizens, wanderers in their own country: southern Negroes, Texas-Mexicans, some white workers, and Puerto Ricans.

These workers help produce and process crops worth billions of dollars yearly (a single county, Fresno in California, boasts $1 million reaped daily from farm production). And yet, though the migrants have helped to create much wealth, they have not shared in it. They have been called the excluded, the forgotten, the voiceless.

A supervisor for migrant education for the Florida Christian Ministry for Migrants seemed to sum it all up one hot day last year when the Senate Subcommittee on Migratory Labor stopped at Belle Glade, Fla. There, at a 20-year-old camp, entire families live in one-room huts, but they feel they are fortunate. This is a good camp. One of the reasons it is good is the ministry's recreation center, a homely, barnlike structure where a worker can go at nightfall instead of staying in his hut. Women come to use sewing machines. Youngsters play hide-and-seek on the bare wooden floor. The hours pass. Those youngsters, said the supervisor, lag years behind their nonmigrant fellows in schools. She has even found homes where parents refused to send their children to school because they didn't have the necessary clothing. Why such

deprivation? "The reason," she told us, "is that they have lost out along the road."

They have lost out. Not only do they lack what other citizens call the necessities of life; they have been shut out of practically every great social reform that other Americans take for granted.

Though the migrants work in the nation's third most dangerous industry (only mining and construction trades cause more mishaps than agriculture), they have the protection of workmen's compensation in only seventeen states. In some of those States the employer may elect to—or not to—let them sign up for it.

Though he has no real certainty of income in his old age, the migrant receives only spotty social security coverage.

Often at the mercy of labor contractors who act as middlemen between farmer and worker, the migrant is protected by contractor registration laws in fewer than a dozen States.

There is no Federal minimum wage for the agricultural worker and no minimum age for his child's labor outside school hours.

His diet is poor; he and his family endure more disease and ill health than any other Americans; and his children receive less education than anyone else in the Nation.

As one reporter wrote about the migrants after covering 2 days of subcommittee hearings, "You name it and they don't have it."

As many as 2 million Americans—the workers, their wives, and their youngsters—live this kind of life in the United States today. It is imperative that their wretched existence be understood by the other millions of citizens who do not have to face want or despair. If we are to succeed in taking effective action against this national disgrace, Americans everywhere will have to take a part in ending it. We need a lobby to speak for the excluded.

This lobby—which would simply be an informed American public determined to put overdue laws on our Federal books—would speak for the poorest Americans in the Nation—Americans who for 40 years have been politically powerless to help themselves.

Since August 1959, the Senate Subcommittee on Migratory Labor, on our travels through the Nation, has found out how poor the migrant really is, how desperate his life has become. For instance:

The migrant earned an annual average of $710 from farmwork in 1959, plus another $201 for nonfarm labor. Often forced by bad weather to move on or to stand idle, he worked an average of only 119 days in 1959. Sometimes the average is even lower. A witness in Wisconsin told us that "most families do not have more than $500 left after their 9 months of work." Some migrants end the season in debt to the labor contractor. Occasionally there are reports of workers who make $200 a week or thereabouts on highly specialized work—as sorters in packing sheds, for example. But these "highs" are considered in the overall average. For every peak wage, there is a "low."

There are many more migrants on the road than most people realize. As they travel north from Florida as far as New England, or from Texas to groves and fields, near the Great Lakes, or from southern California to Oregon and Washington, the migrants stop off at 47 States some time every year. Twenty-eight States have 5,000 or more at peak; 3 States, absorb 40,000 or more. About one-third of all counties in the Nation—943 out of about 3,000—have 100 or more domestic agricultural migrants at one time or another every year. This count, of course, does not include the foreign workers—the third of a million Mexican braceros, for instance. The ironic fact is that these imported wage earners, who work under separate international agreements, often have more security and certainty of employment than our domestic workers.

However brief their stay might be, the domestic workers leave their mark on communities and entire counties. Infant mortality is higher and sickness more common among the migrants than among other citizens. They are more liable, therefore, to need hospital services, even if they don't have the money to pay for them. A Minnesota clergyman told us that a small community hospital there had to write off $3,554 as bad debts in two summers. This amounted to 51 percent of medical bills owed by the migrants in that period. There was some danger that the hospital would be unable to meet its deficit.

Children suffer most of all in the migratory way of life. Where there are schools, classes are usually hopelessly overcrowded. Where there are no schools, children stay home during the day or work out in the fields. (Even in the nine States that have minimum wages for child labor outside of school hours, officials often do not have the supervisors they need for adequate inspection.) There have been reports of children locked in cars or cabins during work hours, and there have been other reports of untended children who perished in drainage ditches or on highways near the fields where their parents worked. Playtime can be perilous for the migrant boy or girl. At a California camp, the subcommittee saw children jumping up and down inside the only play facility in sight: an abandoned, battered automobile. The youngsters' feet were bare. Broken glass littered the floor.

Without fixed residence, few migrants can meet local requirements for welfare, maternity, and other benefits, though they need these services more than anyone else. Even where they may be legally qualified, difficulties arise. The Children's Bureau of the Federal Social Security Administration explains: "While services under the maternal and child health, and crippled children's programs are for the most part available to migrant families, a number of obstacles limit their use—such as language barriers, distances to clinics, insufficient health department staffs to meet the many problems of a large temporary population."

Much more could be said about present inequities. Much has already been said in television documentaries and in newspaper or magazine articles. The big question is, What can be done to overcome this national problem? Perhaps an even more compelling question is, When will we do it?

Early this year, the Senate Subcommittee on Migratory Labor began its consideration of an 11-point legislative program to attack specific and general problems affecting the migrant. This package of bills was the result of more than 18 months of travel, study, drafting, and redrafting. We had taken many suggestions from witnesses at hearings; we are still taking them. These are some of the provisions of that program:

To help migrants make a decent living wage, we are asking for a 75-cent minimum which would be raised in four annual stages until it reached the industrial minimum level.

We are seeking a practical minimum age for agricultural child labor. Our bill, when revisions are completed, will probably also restrict dangerous work for those under 18 years of age.

We would give Federal grants to States and municipalities to help them meet seasonal demands on schools and staff members. But what about education for the adults, too? Many growers told the subcommittee that the migrants had no idea at all of what to do with showers, toilets, screen doors, and other facilities found in some camps. And so we offered a bill to give practical training to those who want to learn how to live better lives.

We had the farmer in mind, too, when we offered a new draft of a bill to give low-cost loans for construction of better housing. Many growers had told us that they could not afford to pay for good housing that would be used for only a few weeks at a time. If Federal help could be given, however, they might find it possible to build decent quarters.

Federal grants would help develop local health programs and day care centers for migratory children. We have also offered a program to improve recruitment, transportation, and distribution of domestic agricultural workers (a program similar to that already in operation for braceros and other imported workers).

Two other bills were offered, one to apply collective bargaining rights to agriculture, and another to establish a National Citizens Council to keep the public and President informed and concerned about the migratory worker.

We have added up the cost of this program: it would require $6.8 million annually in Federal funds. This hardly seems an excessive amount for a nation in which 2½ times as much was appropriated during the last fiscal year for the care, protection, and habitat improvement of migratory birds.

Opponents of even this modest program may claim that individual States have already taken steps against some of the worst conditions endured by the migratory worker. They could say, too, that church groups and private organizations are often effective during the growing season and during emergencies, such as the freeze that left thousands of migrants jobless and and hungry in Florida last year.

No matter what has already been accomplished, however, the fact remains that, in States where the greatest progress has been made, officials and responsible citizens were the first to tell the subcommittee that much more must yet be done.

For a national program is needed—one that will work with the States, the counties, the municipalities, the individuals already at work. We citizens who join the lobby for the excluded recognize that all is not affluence in the United States, and that the migratory worker needs more than eloquent commiseration.

PRIME DEFENSE CONTRACTS

Mr. JAVITS. Mr. President, I wish to note for the information of the Senate that the defense contracts situation in my home State of New York, in which we have had sort of a sporting rivalry with California, has somewhat improved. I make these comments for the information of all Eastern Senators.

California is still maintaining a lead over New York, having received in the most recent recorded period, during fiscal year 1961, nearly twice as much in prime contracts as New York.

Nonetheless, New York's share is inching up.

New York State's share of prime contracts has risen from 11 percent in fiscal 1959, to 11.7 percent in fiscal 1960, to 12 percent in fiscal 1961. The $2,642,803,000 in total prime contracts in New York State during fiscal 1961 compares to the fiscal 1960 total of $2,377,522,000—an increase of $265,281,000. New York's April–June 1961 total awards of $873,969,000 compares to a fiscal 1960 April–June total of $695,784,000—an increase of $177,185,000.

Mr. President, I give great credit for this to the work of the New York State congressional delegation, of which I have

the honor to be a member, and of which my colleague [Mr. KEATING] is my alternate, under the chairmanship of Representative EMANUEL CELLER, of New York.

I hope very much other Eastern States will note the need not only for having labor and management sharpen their pencils, but also for having the total congressional delegations work hard at the process of encouraging defense orders and for having industry and business in those States take advantage of the opportunities presented by the productive facilities of those States.

TAXATION OF U.S. PRIVATE OVERSEA INVESTMENT

Mr. JAVITS. Mr. President, last April President Kennedy delivered to Congress a message on taxation which suggested several changes in our present tax structure. The House Ways and Means Committee, after holding extensive hearings on these proposals, decided to hold the whole question over until the next session of Congress in order to give us all more time in which to consider it.

Because I am vitally interested in our international economic position, and because one of these proposals deals with the foreign subsidiaries of American firms, I had a member of my staff prepare a memorandum on the President's proposal. I think this is a very illuminating report and that it raises many questions which we must consider carefully before this legislation reaches the Senate floor.

In order to evaluate the conclusions of this memorandum in the light of the administration's position, I sent a copy of it to Secretary of the Treasury Douglas Dillon for comment. In reply, I received four memodandums from Assistant Secretary Stanley S. Surrey. These memorandums answer some of the issues raised by the report but they do not, I believe, answer them all.

In examining carefully both my staff report and the memorandums, it appears to me that one of the most important aspects of the whole matter has not been considered adequately by the Treasury.

A tax on the unremitted dividends of foreign subsidiaries does not affect only those firms and individuals paying the tax—it touches all of our position abroad. The Department of Treasury is quite reasonably concerned more with taxes than with foreign policy, but we as legislators must look at both aspects of the problem before a wise decision can be reached.

I believe that private enterprise can be one of the most effective instruments of our foreign policy and I believe that it should be so used since it is the basis of the economic system of our country.

The proposed tax would have no direct effect on underdeveloped countries, yet if it succeeds in cutting back investment in Europe, then the closely dependent investment in the underdeveloped countries may be curtailed as well. Furthermore, as my staff report points out, the tax would not encourage American firms to make economic decisions concerning their investment capital. On the contrary, a firm entering a foreign country must compete within that country, and American firms cannot do that if they are taxed two or three times as heavily as other firms there. Also, this tax may easily be considered an effective violation of our present tax treaties, and, even if foreign governments do not object, it may result in hardship for minority stockholders, both American and foreign.

Finally, a careful consideration of the effects of this tax should take into account the fact that four countries—Great Britain, France, Germany, and Canada—with tax rates almost as high as ours, account for more than half of our foreign investment. This indicates that most firms are not lured into other countries primarily by low tax rates, and it shows that the effect of this tax would be confined to that part of U.S. private oversea investment which has been slowest to develop until now.

All American firms and individuals should pay their fair share of the cost of running our Government. If the Treasury believes that we should provide them with the means for enforcing our present laws, then I think we should give most serious consideration to their request. If new laws are needed to prevent the use of tax haven countries by paper corporations whose purpose is to effect avoidance of domestic taxes in the United States, then we should pass those laws. But the fact that some firms have abused the present system is not in itself cause for changing the system, without giving due consideration to the adverse effects which may be caused by the changes contemplated.

I ask unanimous consent that the report by my staff member, Miss Helen Smits, of New York—a student intern from Wellesly College—and a summary of Treasury's memorandums, be printed in the RECORD.

There being no objection, the report and summary were ordered to be printed in the RECORD, as follows:

SENATOR JAVITS' STAFF MEMORANDUM ON THE PRESIDENT'S PROPOSED TAXATION OF OVERSEA INVESTMENT

I. TAX EVASION

The President has argued that one of the reasons why the present law must be changed is the current use of tax haven countries to escape U.S. corporate taxes.

1. The means used are, chiefly:

(a) Any transfer of goods or services to the foreign subsidiary at a lower cost than would be paid were the subsidiary an independent company. This can include:

(1) patent licensing;

(2) technicians, skilled workers, or management;

(3) any transmission of know-how;

(4) machinery;

(5) partially finished goods;

(6) finished goods for distribution.

(b) Conversely, any transfer of goods from the subsidiary at a higher cost than would be paid were it independent.

(c) Where costs or profits must be split between the two companies, any allocation which gives most of the profits to the subsidiary. This is particularly true in licensing, trading, and servicing companies.

2. Prevention of this evasion is, however, possible under existing law. Section 482 of the Internal Revenue Code gives the Secretary the right, in the case of any two organizations owned or controlled directly or indirectly by the same interests to distribute, apportion, or allocate gross income, deductions, credits, or allowances if it is necessary to do so in order to prevent the evasion of taxes.

There have admittedly been difficulties in administering this law with regard to foreign corporations, but last year the Congress passed legislation which should make the Treasury's task considerably easier. In section 6038 of the code, an American corporation is required to furnish, with respect to any foreign corporation which it controls, information regarding profits, deductions, and transactions for the year, as well as a balance sheet showing assets, liabilities, and capital. In section 6046, all American officers and shareholders in a foreign corporation are required to report whatever information the Secretary should require for the carrying out of the provisions of the income-tax laws.

Auditing the books of companies scattered all over the globe is admittedly not an easy task, and will make enforcement of these sections difficult. But the same objection would hold, after all, for the President's proposed tax.

II. METHOD OF PROPOSED TAX

1. Provisions: Since a foreign subsidiary is a firm which has been incorporated under the laws of the country in which it operates, the United States has no legal claim on that part of its income which does not originate in this country unless that income is paid as profits to a corporate or private resident of the United States. Any attempt to tax these firms directly would not only be without precedent in our history of taxation but would, as Secretary Dillon himself admitted before the Ways and Means Committee, violate our present tax treaties.

In order to avoid this problem, the new law would require all American stockholders in an American-controlled foreign firm to pay taxes each year as though all profits of the firm had been distributed. This would include private individuals as well as corporate stockholders.

2. Problems raised by the method:

(a) There is serious legal doubt as to whether or not the Government may tax a firm or individual for income which it has not received. The Supreme Court held in *Eisner* v. *Macomber* that the Congress would not tax an individual for his share of the accumulated profits of a company until those profits had been returned to him. It has been argued that the same principle would apply to the President's proposed tax.[1]

The only precedent lies in the tax now levied on personal holding companies, but there is in fact an immense difference between such companies and foreign subsidiaries of American firms. In a holding company, control lies in the hands of a few people or a single person; in addition the chief purpose of such companies was believed to be the avoidance of taxes.

(b) The tax would create serious conflict of interests among the various stockholder groups in many cases. Often part of the stock of these firms is owned locally; some countries, such as Japan, require a certain percentage of local participation. Since this law would mean that it would often be in the interests of the American shareholders to have all, or a large segment, of the yearly profits returned, such practices may be forced on the firm against the wishes of its minority stockholders.

(c) In the case where effective control did not lie in American hands, and the return of profits could not be forced on the company, the tax would be extremely unjust.

(d) The complication in bookkeeping is immense, often with little or no return to

[1] See summary of Treasury memorandum.

the U.S. Government. In this respect it is important to notice that, according to the tables provided by the Treasury to the Ways and Means Committee, over half of all American investment abroad is in four countries—France, Germany, Great Britain, and Canada. In each of these the corporate tax rate is at least 50 percent (the German rate does fall considerably if all profits are distributed). In other words, the return to our Government from these four countries would be usually 2 percent or less.

III. GENERAL OBJECTIONS

1. U.S. oversea investment in all areas must compete with other foreign investment. Removal of tax deferral would put our firms at a disadvantage in the competition for economic influence and a base for operations in foreign nations. Especially in the new trading blocs, we need a foothold so that we can retain and expand our future export markets.

2. The most tangible and effective source of U.S. power in foreign economic policy is in trade and investment. These two are interdependent. Diminution of this power would be against our national interest. In particular, it would put us in a position of long-term disadvantage in our balance of payments; it would mean loss of exports and of dividend returns. In general, it would involve retreat from the world scene and a steadily increasing decline of our world power.

3. Underdeveloped countries may often be harmed, rather than helped. Admittedly this law would encourage the incorporation of subsidiaries in underdeveloped areas, but it may indirectly cut back on the total amount of investment which American business is putting into any given country. This would come from the fact that a large percentage of U.S. firms with investments in these countries have their primary oversea interest in some developed country where a market for finished goods is more readily available, and where both currency and the political situation are more stable. In many instances, a curtailment of the activity of the European subsidiary of a firm would have serious repercussions in that firm's investment in underdeveloped areas.

4. With regard to the figures mentioned in paragraph 2(d) above it is important to notice that much American investment abroad is not apparently lured by the prospect of lower taxation. Our firms remain in Great Britain and new investment flows there despite the fact that tax rates in England, both corporate and personal, are higher than in the United States. Large amounts of capital are attracted to Canada every year and yet the Canadian rate of corporate taxation is 50 percent. In short, the President's scheme would be costly and difficult both for the Treasury and for the businesses involved, and yet it would not affect much of the capital flow which it is designed to discourage.

5. Finally, oversea reaction should be considered. Although the arrangement of this law is designed to avoid conflicts with our current tax treaties, it is clearly an evasion of such treaties in substance, and may well be received with considerable disfavor overseas.

SUMMARY OF TREASURY MEMORANDUMS

The four memorandums sent by Treasury were as follows: A legal opinion by Robert H. Knight regarding the constitutional questions involved in the proposed law; a report on the problems in the administration of present revenue laws relating to foreign firms; a tabular summary of cases involving tax avoidance; and a report entitled "Statistical Data and Economic Issues Involved in the Treasury's Testimony on Tax Deferral."

The legal question: Two powers of Congress must be considered in any decision as to whether or not the proposed tax would be constitutional—not only the power to tax, but the power to regulate commerce as well. When considering the power to tax, the issues raised are: first, are these earnings income? second, would a taxation of them violate the due process clause?

According to Mr. Knight, the decision in *Eisner* v. *Macomber* is not directly relevant, since the issue in that case was whether or not the actual receipt of a stock dividend constituted income when the holding was not increased in value. The real issue of whether or not income must be realized before it can be taxed has never, as he points out, "been squarely met by the Court," but the trend of past decisions and pronouncements of leading scholars in the field would seem to indicate that the Court would hold that it could be. While the courts have found that a tax laid on one person's income measured by the income of another violates the due process clause, this is not true in those cases where the taxpayer has maintained control over the income or enjoys its benefits. There is precedent, including the decisions handed down by lower courts on the foreign personal holdings companies, to indicate that the stockholders of foreign companies who are affected by the law could be considered to have maintained such control.

In addition, the power to regulate commerce gives Congress the right to impose taxes which are not subject to attack by reason of limitations which apply to taxes based on the taxing power alone. In determining whether or not a given statute is a regulation of commerce, the courts will accept as conclusive evidence any indication of congressional intent.

Administrative problems: The information available to Treasury under the present laws is often incomplete and of very limited use. The new material which, under the provisions of section 6038, will first be received in 1962, will be limited also since it applies only to corporations with more than 50-percent American ownership and does not, therefore, reach all foreign subsidiaries. No provision at all has been made for submitting information with respect to unincorporated entities such as partnerships or trusts.

There is often serious lack of cooperation on the taxpayers' part with regard to this information. Since the penalty for failure to file the information required under 6038 is only a 10-percent reduction in creditable taxes, it is possible that some corporations will find it advantageous to file none of the material and accept the consequences. Although Treasury's most able and experienced men work on the reporting of foreign income, the task they face is a formidable one. Employees of a taxpayer under investigation will answer only specific questions which demand a factual answer; broad "fishing" questions meet with no response. Therefore, the inspector must know exactly what he is after—which is often just what he is trying to find out.

The conclusion is that Treasury is clearly handicapped in its administration by the failure of the law to require disclosure of the interests of U.S. citizens in certain types of foreign activity.

The report on tax avoidance: This presents statistical data on 47 cases of avoidance through the use of foreign subsidiaries. Nine different devices are listed, falling into the general categories described in the Javits staff memorandum.

Statistical data and economic issues involved in the Treasury's testimony on tax deferral: (NOTE.—Much of this Treasury report is devoted to issues which were not raised in the Javits memorandum. Only material relating to this memorandum is summarized here.)

In considering the effect of American investment abroad on our balance of payments, many problems arise as to the relevant data involved. It is necessary to look only at the figures available for subsidiaries in Western Europe and Canada; material relating to individual firms is not valid, nor is the worldwide position relevant since this taxation would not apply to subsidiaries in underdeveloped countries and it is these firms which are at present remitting dividends to the United States in excess of the capital outflow to these countries. With respect to Western Europe and Canada, remitted dividends for the years 1957 through 1960 fell short of capital outflow by $655 million. In addition, exports to subsidiaries cannot be considered in this balance-of-payments picture because (a) many of these would still take place in the absence of American subsidiaries and (b) account would then have to be made for the adverse effect of the products of the subsidiaries which may be replacing American exports.

As regards the reaction of foreign countries, Treasury points out that "Major European countries believe that the United States would be justified in making adjustments in its tax system so that capital flows to Europe and reinvestment of profits in Europe will not be dictated by tax considerations." There has been, to date, no protest or comment from any of the Western European countries regarding these proposed tax changes.

The exact effect of this suggested tax on underdeveloped countries is, as all of its final effects, difficult to determine exactly. The Treasury admits that a cutback of investment in Europe might conceivably result in some reduction in investment in underdeveloped countries, but points out that "deferral for advanced countries is an inferior method for encouraging companies to invest in less-developed countries because it is not selective." Instead of adding to the profit of every enterprise abroad, taxation of this sort should be established combined with further Government programs to aid underdeveloped countries—such as an expansion of the investment guarantee program which would be more to their benefit than continuing the present system.

UNEMPLOYMENT

Mr. MILLER. Mr. President, reports on the unemployment situation in this country are not optimistic. In the Wall Street Journal of August 30 is an article which points out that the seasonally adjusted rate of unemployment for the last month remained at 6.9 percent, the 9th consecutive month in which the jobless rate has been near 7 percent. Unemployment has been one of the chief problems of the Kennedy administration. The policy of this administration has been to stimulate business activity—thus relieving unemployment—by vastly increased Federal spending programs. In the August 31 issue of the Washington Post and Times Herald appears an editorial which expresses the philosophy of the administration in this respect.

I ask unanimous consent that the article from the Wall Street Journal and the editorial from the Washington Post and Times Herald be printed in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Iowa? The Chair hears none, and it is so ordered.

(See exhibit 1.)

Mr. MILLER. Mr. President, I might point out that not to be overlooked in the reduction in unemployment, which has nevertheless remained at a

most unsatisfactory level, is the fact that from January 20 through the end of July this new administration has added a net of 82,967 civilian employees to the Federal payroll. Mobilizing 250,000 more men for the Armed Forces will also have an impact on the unemployment situation. Moreover, the administration contemplates adding another 10,000 civilian employees to the Department of Defense in connection with the buildup of 250,000 more military personnel. Nevertheless, it is apparent that the administration is not confident that all of this new Federal spending, all of these new Federal employees, and the mobilization of some of our Reserve units will get the job done. The aforementioned article in the Journal quotes Secretary of Labor Arthur Goldberg as predicting that the unemployment rate will fall to 5½ to 6 percent by the end of this year, which would seem likely when the administration's plans for hiring 10,000 more civilians in connection with the military buildup plus unknown more thousands for other Federal programs are carried out, along with the mobilization of reservists. However, the Secretary is reported to have said that if this rate held into next year, it would probably prompt the White House to push for public works legislation.

Mr. President, I am not a pessimist. However, I look at history to see whether or not public works legislation had any sustained favorable impact on unemployment. This same cure was tried back in the thirties during the administration of the late President Franklin Roosevelt, and the result was that unemployment remained exceedingly high until World War II bailed us out of the depression. Continued deficit spending and inflation discouraged the growth of private business needed to provide sustained high employment.

I ask unanimous consent that a table I have prepared showing the unemployment and deficit spending picture for the years 1933 through 1940 be printed in the RECORD at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Unemployment—Deficit spending table

Year	Unemployed [1]	Percent unemployed of total labor force [1]	Annual Federal deficit
			Billion
1933	12,830,000	24.9	$2.6
1934	11,340,000	21.7	3.6
1935	10,610,000	20.1	2.8
1936	9,030,000	16.9	4.4
1937	7,700,000	14.3	2.8
1938	10,390,000	19.0	1.2
1939	9,480,000	17.2	3.9
1940	8,120,000	14.6	3.9

[1] From Bureau of Labor Statistics.

Mr. MILLER. In yesterday's Washington Post is an article quoting the Secretary of Commerce, Mr. Luther Hodges, as saying that the way to cure unemployment is to have mass spending. In Monday's issue of the Pittsburgh Post-Gazette is an article quoting the Chairman of the President's Council of Economic Advisers, Dr. Walter Heller, as stating that a public works program would be sought only to meet the next recession. I ask unanimous consent that these two articles be printed in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 2.)

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. MILLER. Mr. President, I ask unanimous consent that I may be permitted to speak for an additional 3 minutes.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, it is so ordered.

Mr. MILLER. Here we see developing the philosophy of greatly increased Federal Government spending and the hiring of more Federal employees as the prescription for reducing unemployment; and if unemployment is not reduced substantially the groundwork will be laid for calling the situation another recession, giving rise to further Federal spending on public works and the hiring of thousands more to break the unemployment figures. We are led to believe that this is not going to cost any more in taxes, because the stimulated employment and purchasing power will lead to mass spending, which will mean more profits and more income and more tax revenue which will pay for all of this additional Federal spending. This sounds good, Mr. President. The only trouble is that it has not worked before, and there is nothing new in the picture to indicate that it will work now.

This philosophy proceeds on the faulty premise that the Federal Government rather than private business is the proper source of job opportunities in the United States. The reason why it has not worked before and why it will not work now is that it provides no sustained incentive for private business to expand. The mounting Federal debt, spurred on by nondefense, domestic spending programs, inevitably causes inflation and has a depressing effect on private business incentive and growth. One reason why the new administration finds a serious unemployment situation continuing, notwithstanding the pump-priming efforts to date, is that the $3 billion deficit for the fiscal year just ended and the $7 to $10 billion deficit in prospect for the current fiscal year present a familiar picture to businessmen who remember the history of the 1930's. They are understandably fearful of more inflation or higher taxes, or both. The prospects of semimobilization, with wage and price controls, add to these fears.

The only sound way out of this situation, Mr. President, is for the President himself to take the lead in reducing to deeds his words calling for fiscal integrity through elimination of programs which are desirable but not essential, coupled with an overhaul of our Federal tax system in a manner that will encourage rather than discourage private business growth. In the August 30 issue of the Christian Science Monitor, the lead editorial points out that the June to July cost-of-living increase took nearly a half cent out of every dollar and wisely points out that President Kennedy's administration should set a good example by curbing its demands leading to inflation-making deficits and recognize that tax reforms and other incentives for private business can cause more long-range job-producing growth than can deficit spending. I ask unanimous consent that this editorial be printed at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

JOBS WITHOUT INFLATION

A jump in the cost of living—the biggest in many months—is arousing some concern in Washington. For this could signal a new inflationary spiral. And economic planners in the Kennedy administration must regard it as a potential threat to their programs for economic growth.

They are aware that several pressures for inflation are combining and building up. New military expenditures will lift the expected budget deficit to at least $7 billion. Business is booming in most lines. New wage and price boosts are threatened. Administration forces are already pushing against price rises in steel and bread and to restrain wage increases in the automobile industry.

The hope of administration economists, headed by Walter W. Heller, is to foster growth without inducing inflation. They aim to stimulate production and employment by Federal action. They headed off a move to raise taxes to pay for the new arms buildup. They favored a decision to speed by 2 months the advancing of Federal money to the States for the national highway program.

The purpose here was to make sure that the recovery should not end too soon—as most economists now believe happened after the 1959 recession. Moreover there is, in some administration circles, a disposition to regard the damage from high unemployment as so great as to warrant some risks of inflation. It is contended that if growth can be raised from around 3 percent a year to something nearer the rate in Japan, the Soviet Union and much of Europe (often double the American rate) the Nation will gain vastly and Federal revenue will rise enough to more than wipe out deficits.

Everyone can agree that the purpose to provide more jobs is fine—both for humane and economic reasons. And some Government expenditures do spur the economy. But some have a dampening effect on private enterprise, which is still the predominant source of jobs and of national wealth. Moreover, where it induces inflation a hidden tax is levied which wipes out apparent gains. (The June-to-July living cost rise took nearly a half cent out of every dollar.)

Administration advisers fear continued high unemployment—still figured at 7 percent. Although they believe they can produce jobs without inflation they might instead produce inflation without jobs. Arthur J. Burns, President Eisenhower's original top economic adviser, takes a confident view. He believes recovery will by next year bring unemployment down to 4 percent (now considered acceptable). Both schools of opinion could be wrong.

A free economy is expected to make many adjustments: The coal miner left jobless by an increase in oil-powered transport should get a job driving a diesel truck; a farmer, no longer needed for cotton production, should find a job in a rayon plant; and so on. But these adjustments are less automatic than automation. And the pace of

change has quickened. Retraining and relocation must keep pace. The new distressed areas act contains a retraining program and $14,500,000 to finance it. This is a hopeful step.

The Kennedy administration is also seeking to ward off inflation by holding down prices and wages. Antimonopoly laws can be invoked but so far the weapons are pleas and informal pressures on employers and labor unions. These should have public support. But the administration should set a good example by curbing its own demands for money—and inflation-making deficits. Also it should recognize that tax reforms and other incentives for private enterprise can cause more long-range job-producing growth than can deficit spending.

Mr. MILLER. However, Mr. President, I must say that I see no indication whatsoever that the administration intends to practice the fiscal integrity it preaches. We are told that tomorrow we will have a balanced budget—maybe. We are told that every domestic spending program proposed by the President—even before the Berlin crisis—is something we cannot afford to sacrifice. Deficits are recognized because they cannot be ignored; but the idea is being advanced that increased military spending is responsible; that any tax boosts which may be recommended will be caused by increased military spending. Nothing is being said about the fact that hundreds of millions of dollars in increased domestic spending programs are adding to the deficit and may require increased taxes to support them. Our younger people who will be looking for decent job opportunities when they come out of school and the millions of unemployed and their families, along with the older people and the housewives who feel the impact of inflation on their family budget, will have to make their protests heard at the polls in 1962 and 1964 if they do not want a repeat of what happened in the 1930's.

[From the Wall Street Journal, Aug. 30, 1961]

JOBLESS TOTAL FELL 598,000 IN MONTH TO MID-AUGUST—BUT DECLINE WAS SEASONAL; EMPLOYMENT ROSE 40,000 TO A RECORD FOR AUGUST—LONG-TERM IDLENESS DROPPED

WASHINGTON.—Unemployment fell 598,000 in the month to mid-August to 4,542,000, the Labor Department reported. The decline was seasonal.

In the same period, the number of jobholders rose 40,000 to an August record of 68,539,000, the agency said.

Because the drop in unemployment was normal for this time of year, the seasonally adjusted rate of unemployment remained unchanged at 6.9 percent. Labor Secretary Goldberg said this was the ninth consecutive month in which the jobless rate has hovered near 7 percent.

Mr. Goldberg predicted the rate would fall to 5½ to 6 percent by the end of the year, barring unforeseen circumstances. But the administration would regard that level as unsatisfactory. And if the rate held that high into next year, it probably would prompt the White House to push for public works legislation.

A hopeful sign in the August jobless figures was a decline in the number of long-term unemployed persons. The total out of work for 15 weeks or more dropped 194,000 to 1,440,000 over the month to mid-August. Of these, 913,000 have been jobless 27 weeks or longer, down from 1,026,000 in mid-July.

The decline in long-term unemployment was termed greater than the normal seasonal change. In August 1960, however, the number of persons unemployed 15 weeks or longer totaled 816,000.

[From the Washington Post, Aug. 31, 1961]

UNEMPLOYMENT STILL HIGH

The failure of unemployment in July to recede from its high level of 6.9 percent, announced yesterday by Secretary Goldberg, is disappointing. The recovery of production from its recession low has proceeded very satisfactorily. With the production index up 10 percent in 5 months, some absorption of unemployment might have been expected, in addition to the substantial gain in employment that occurred within a rising labor force. Perhaps the early model change of the automobile industry contributed in some small measure to continued high unemployment. The growth in the labor force, of about 1 million over the year, worked in the same direction, but an increment of this size cannot be considered abnormal. The principal factors that have kept unemployment high appear to be the longer hours worked, and a rapid growth of productivity.

The workweek in manufacturing has gained almost 2 hours over its December low. As production has expanded, employers often have found it more profitable to lengthen the hours of their existing work force, in some cases paying overtime, than to do new hiring. Rising fringe benefits, attractive as they are, do have the effect of raising accession and layoff costs and so discouraging new employment. Productivity gains are hard to estimate with accuracy, but the combination of rising production with stable unemployment suggests that productivity has advanced materially. This would be good news for the U.S. Treasury, which gets half of the added corporate profits, for stockholders, who get the other half, and for the unions, who in due course will present demands for higher wages. It may be good news even for the consumer, if business will remember that productivity gains ought to be shared with him through price cuts.

Meanwhile there are indications that the employment situation will mend. The lengthening of the workweek has gone quite far. Future gains in output ought to find expression chiefly in lower unemployment. The prospect for expanding production seems to be good. Secretary Goldberg, in expressing this hope, mentioned expanded highway and urban renewal programs, additional social security benefits, increased military procurement, and the new minimum wage law. While the impact of higher minimum wages upon employment is perhaps uncertain, mounting public expenditures can be counted upon to push economic activity forward. And no doubt the Secretary would not disagree with the view that gains in housing, capital equipment expenditures and inventory rebuilding will also add steam to the expansion.

EXHIBIT 2

[From the Washington Post, Sept. 5, 1961]

HODGES ASKS MASS SPENDING TO BRING MASS EMPLOYMENT

DENVER, COLO., September 4.—Secretary of Commerce Luther H. Hodges said today the Nation needs mass spending if it wants mass production and mass employment.

To keep the economic recovery rolling, Hodges said, the first problem "is to stimulate spending—not just by Government, not just by business, but by the mass of American consumers."

In an address to the American Society of Association Executives, Hodges said the encouraging rebound from the mild winter recession "is not the prelude to certain prosperity, nor does it signal the end to our economic troubles."

To a great extent, he said, this can come only through generation of spending.

"We cannot have mass production, mass employment, unless we first have mass stimulation of our latent wants," Hodges said.

He expressed dismay that retail sales have lagged during the recovery and actually declined in July.

"Obviously," he said, "consumers have been playing it cautious, deferring some of their spending and hanging on to more of their dollars, perhaps because of job worries."

He said it is significant that during the April–June quarter individuals saved 7.1 percent of their after-tax personal income, compared with 6.5 percent last year.

"If we could convince people right now to spend at retail 1 percentage point more of their disposable income, we could raise sales more than $3.5 billion, on an annual basis."

Hodges said this would not be "wasteful spending"—that there are legitimate latent wants throughout the economy which, if transformed into sales, would benefit both the private and public welfare.

[From the Pittsburgh Post-Gazette, Aug. 4, 1961]

TAX BOOST IN 1962 SEEN UNNECESSARY—KENNEDY AID BASES FORECAST ON ARMS PLAN

WASHINGTON, September 4.—Dr. Walter W. Heller, Chairman of President Kennedy's Council of Economic Advisers, predicted yesterday that there will be no increase in taxes next year unless there is a substantial boost in military spending beyond that already programed.

He said there had been a prospect of a tax reduction before the intensification of the Berlin crisis. The increased military spending now planned will be covered by increased Federal revenues stemming from the "quite brisk" recovery underway from the 1960–61 recession, he said.

Mr. Heller forecast a gross national product—the total value of the Nation's goods and services—of $565 to $570 billion by the second quarter of 1962.

BUOYANT RECOVERY

"That would be a strong and buoyant recovery," he said, "* * * but we would still not be using all our resources."

The predicted increase in the gross national product compares with a $500 billion GNP rate, at the beginning of this year, $515 in the second quarter of this year and a possible $540 billion in the fourth quarter—already forecast by Commerce Secretary Luther Hodges.

"A $600 billion total output is not beyond our reach," Mr. Heller said "* * * I would certainly hope it will be reached in the next year or two."

He foresaw these advances under conditions of noninflationary, reasonable price stability, that is continuation of the present approximate 1½ percent rise annually. And he spoke optimistically of a drop in the current unemployment rate of 5½ percent of the work force which he said President Kennedy feels is too high.

WORKS PROJECTS RESERVED

Asked if the President would ask Congress to authorize a public works program if the unemployed total doesn't subside, Mr. Heller said he thought such authorization would be sought only to meet the next recession, if and when it develops.

On other subjects Mr. Heller:

Called a $100 billion national budget inevitable by 1968 and not out of the question in the next 2 years. He said the economy unquestionably could generate enough taxes to balance this boost from the present $88 billion level, and make it noninflationary.

Said the threatening strike in the automobile industry would run the risk of slowing down the business recovery, but he wouldn't say it would curb the economic climb back.

Stated that if a boost in steel prices comes and proves inflationary, some of the presently speeded up programs, including Federal highways and Government procurement, would have to be slowed down and Federal reserve interest rates increased.

A COMPREHENSIVE SYSTEM OF MEDICAL INSURANCE

Mr. MCNAMARA. Mr. President, on January 5 of this year I introduced S. 65, a bill to establish a broad and comprehensive system of medical insurance for the retired men and women of this country through the time-tested and dignity-preserving social security system.

This bill also would have provided health insurance for aged persons not covered by social security.

Other bills providing for improved health insurance programs for our senior citizens also have been introduced.

But by now it should be apparent to everyone that this first session of the 87th Congress will take no action on legislation to improve medical insurance for the elderly.

Recently, Mr. President, I expressed my concern on this subject and my desire for early action on planning for next year to the President of the United States.

I was pleased to receive in his letter of response assurances from the President that he regards adequate health care for our senior citizens as one of our most important responsibilities.

The President further assured me, I am glad to report, that he intends to give legislation in the field of health insurance for the aged under the social security system the "highest priority at the next session of Congress."

Mr. President, I ask unanimous consent that my recent exchange of letters with the President of the United States on medical care for the aged be included in the RECORD.

Mr. JAVITS. Mr. President, reserving the right to object—and, of course, I shall not object, but I hope the Senator will yield to me——

Mr. MCNAMARA. I am happy to yield.

Mr. JAVITS. Mr. President, I do not object.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

The Honorable JOHN F. KENNEDY,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing you to express my keen desire to achieve one of the major commitments that both you and I made in talking to the American people during the course of the past several years—passage of legislation that would assure them of adequate health services insurance during their retirement years.

This can be done effectively, of course, only by financing such insurance through our time-tested system of social security, which maintains the dignity and independence of the insured.

My experiences and study, first as chairman of the Senate Subcommittee on Problems of the Aged and Aging (of which you were vice chairman), and now as chairman of the new Special Committee on Aging, have convinced me of the priority and urgency of this proposal in the hearts and minds of our 17 million senior citizens and their families.

Moreover, all indications are that the public at large strongly supports the proposal. My mail and my personal contacts indicate a strong feeling that Americans—young and old—are more than ever in support of a social security financed health insurance program.

Little more than a start has been made upon this necessary legislation during the current session of the Congress. It is apparent that no definitive action will be taken by the Congress this year before adjournment.

In view of this, I believe that an assurance from you expressing determination to pursue this subject with all possible vigor when the Congress convenes again next January, would be warmly welcomed both by the supporters of this legislation and the millions of Americans it would benefit.

Further, it would serve to stimulate a prompt beginning to the planning for the next session that must begin soon so that this most necessary legislation may be enacted by the 87th Congress.

Sincerely,

PAT MCNAMARA,
U.S. Senator.

THE WHITE HOUSE,
Washington, August 31, 1961.

DEAR PAT: I consider adequate health care for our 17 million senior citizens one of our most important responsibilities. Medical costs represent the greatest of all threats to economic security in old age. The financial burden of illness and incapacity in later years constitutes an ever-present specter to almost every family. Inability to meet the costs of hospitalization or home care can destroy self-respect and deny the right to dignity and comfort after retirement.

Although everyone recognizes the threat presented by the possibility of serious illness in later years, savings for this purpose are often inadequate. Nine out of ten persons over 65 are hospitalized at least once. The duration of their hospitalization averages 2½ times longer than that of those under 65. I am convinced that only the social security system can furnish satisfactory protection against the costs of these illnesses. Small retirement incomes are usually inadequate to cover the premiums required to obtain a sufficient amount of private insurance.

The theory of using earnings during the most productive years to purchase protection during retirement years has been tested and proved. This is the social security approach. I know you share my view that it is the only mechanism that can satisfy the need, insure protection, and be financially sound.

I have followed with considerable interest the hearings held by the Committee on Ways and Means of the House of Representatives on this subject. The testimony incontrovertibly establishes the need for the legislation. Our national responsibilities require prompt and effective action.

I wholeheartedly agree with your belief in the importance of this legislation to our Nation. It will relieve some of the most serious hardships of old age, it will enable the worker to look forward with confidence to his ability to take care of himself, it will help solve many problems of family living. I consider the proposal to provide health insurance for the aged under social security one of the most important measures I have advocated. Your support is very much appreciated and I assure you that I intend to recommend that this legislation be given the highest priority at the next session of Congress.

Sincerely,

JOHN F. KENNEDY.

Mr. JAVITS. Mr. President, I have had a rather interesting relationship with the Senator from New Mexico [Mr. ANDERSON] on this subject. The Senator from Michigan [Mr. MCNAMARA] is now the chairman of the Special Committee on Aging, of which I have the honor to be a member. The Senator from New Mexico [Mr. ANDERSON] and I were very close together, I thought, on the possibility of an agreed-upon bill for medical care to the aged, which would have facilitated and accelerated the day when this very deserved proposed legislation could be passed.

Yesterday I made a speech in the Senate on this same subject, alluding to the exchange to which the Senator referred, and suggested that the period between now and the 1st of January be used by the President to bring together the Republican and the Democratic elements interested in the bill—and I think they are represented in the Special Committee on the Aging—in the hope that by the time we return, much as I deprecate having lost this year—and I feel that the administration is to be sharply criticized for it, but that is nonetheless water over the dam—we could come to an agreement on a bill.

I thought that when we came back on the 1st of January we might at least have an opportunity to present an agreed-upon bill. Could we have the Senator's views on that point, if the Senator is in a position to give us his views?

Mr. MCNAMARA. Yes. I think that far from being critical of what the President has done, I am being critical of Congress. I am particularly critical of the Senate for not doing something in this matter. The President is very well informed on it. When he was a Member of the Senate, he was vice chairman of the Subcommittee on Problems of the Aged and Aging from the very start. I am glad to accept the President's views, and I believe he has expressed them very well in this letter.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. JAVITS. I ask that the Senator may be granted 2 additional minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JAVITS. What I had in mind is more as to what we can do, now that the President has indicated his intention of giving this the highest priority, to bring about agreement, between now and January, among those Republicans and those Democrats who are in favor of a measure, and to try to bring in an agreed-on bill. I was very much on the road toward that goal with the Senator from New Mexico [Mr. ANDERSON]. Now that the Senator from Michigan has taken over the effort, I was wondering what the Senator thought about devoting this time, instead of hearings being held around the country—although that would not be inconsistent with the effort

that I have in mind—to an effort to bring about an agreed-upon bill.

Mr. McNAMARA. I am totally out of sympathy with the Senator's approach in attempting to solve the problem. I believe that answers the Senator's question.

Mr. JAVITS. The Senator is taking the position that it is either the Democratic Party's social security bill or nothing, is that it?

Mr. McNAMARA. Well, I am not afraid to take that position. That was not exactly what I had in mind, but if the Senator wants to put it in those words, I will say it that way.

Mr. JAVITS. I am not putting it in any words. I am trying to get the Senator's point of view.

Mr. McNAMARA. I do not want to make politics out of this. I want to keep politics out of it. I rather resent the Senator's attempt to inject politics into the subject, by calling the program a Democratic program. It is a program that the committee has agreed on. It is not a Democratic program. It is a program in the interest of the aged of the country.

Mr. JAVITS. If the Senator please, I am a member of the Committee on the Aged.

Mr. McNAMARA. I understand.

Mr. JAVITS. I do not recall that I agreed on the program, and I do not recall that it has been the accepted program by committee action. I do not want to get into any hassle on this matter. I am afraid that the Senator's temper is a little bit shorter than mine. I had no desire, and I do not have the reputation in the Senate, for being violently partisan. I had some differences with the Senator from New Mexico, and what I am trying to do is make an effort to arrive at some agreement upon them. I have asked the Senator from Michigan a very civil question as to whether he feels that we should employ our time in committee to try to agree upon them. The Senator may not himself want to yield any ground whatever.

Mr. McNAMARA. That is right.

Mr. JAVITS. On the other hand, there may be other members of the committee who might feel differently. I am sure the Senator is very sensitive about that. He is very fair, whatever he may say at this time. I know him as a man, and I know how he feels. I am simply making the suggestion that we do divorce the subject from politics. The record will show that I have tried very hard to reconcile the two points of view of the people on our side and the feelings of those on the Democratic side. I believe the two points of view can be reconciled. I am asking the Senator from Michigan whether he feels that such an opportunity ought to be afforded.

Mr. McNAMARA. No; I do not feel that way. I am in favor of including the program under social security, totally; I believe the Senator is not in favor of that. I believe we are that far apart.

Mr. JAVITS. I would respectfully say that is not so. The Senator from New Mexico [Mr. ANDERSON] and I were in a fair way of getting together on an adaptation of both segments. I think, if anything, the Senator is evidencing right now an inflexibility of view, which I do not believe, with all respect, would be conducive to getting anything done. Up to now the Senator's position has not succeeded, any more than has ours. I am trying very hard to see if we can get to the point where we can succeed.

Mr. McNAMARA. I will say to the Senator that I am perfectly convinced that in this matter I have the general public on my side. I am more concerned with that than with anything else. I am not ready to compromise their views.

Mr. JAVITS. I do not believe it is necessary to compromise the people's views. I am very much dismayed and distressed by the Senator's apparent inflexible attitude on this issue.

Mr. McNAMARA. It was my intention to express inflexibility as far as including medical care for the aged in the social security system is concerned. If I got that point across, that is what I intended to do.

Mr. JAVITS. I do not believe the areas of difference between our bill and the bill on the Senator's side have involved that sole question. In other words, I believe there is a great deal that can be done within the confines of the social security system which could go very far toward satisfying many strong opponents of the bill.

Mr. McNAMARA. My remarks were addressed to S. 65. That definitely limits the program to the social security system. If the Senator wishes to talk about the other bill, he had better talk to the Senator from New Mexico about it.

Mr. JAVITS. No, I wanted to talk about the administration's social security bill and the effort which can be made to do something about it, which would get the votes to get it passed, instead of having it be merely a political issue.

Mr. McNAMARA. I thank the Senator for his interest.

DEMOCRACY IN FINLAND

Mr. SMATHERS. Mr. President, recently I took part in a television debate on a program called "The Nation's Future." The question was, "What can be done about Cuba?"

During the course of an animated exchange with Mr. Max Freedman, of the Manchester Guardian, my opponent in the debate, I listed several countries which have fallen under the domination of communism, and inadvertently included Finland in the list. Obviously, this was a misstatement on my part, and I am happy now to be able to correct the record. Finland is a free and independent nation.

It was Finland's strong determination to remain a free nation that motivated its people in their courageous and intense fight against the massive Communist aggression in 1940. The struggle Finland waged was one of modern history's most valorous events.

I am happy, as are all Americans, that the flame of democracy still burns bright in Finland. The United States admires the strong Finnish attachment to democracy and independence. Our policies are designed to foster good relations with Finland and to strengthen the bonds which link Finland with countries dedicated to similar concepts of democracy and independence.

CHRISTIANITY IN WESTERN EUROPE

Mr. ROBERTSON. Mr. President, the distinguished owner and editor of the U.S. News & World Report, Mr. David Lawrence, gave a report this morning to our Senate breakfast group of impressions gained from his recent visit to Western Europe.

Mr. Lawrence, a frequent visitor to Europe since the days when he reported the negotiation of the Versailles Treaty following World War I, said that he had never previously observed such business activity as is now evidenced in Western Europe nor such a materialistic spirit which included the gathering of gear on the one hand and a carnival spirit during periods of relaxation on the other. He did not find in Western Europe, said Mr. Lawrence, the same fear of another world war that now exists in this country, and summarizing his impressions of the people of Western Europe, he expressed the belief that Christianity in Western Europe was not successfully meeting the challenge of the anti-God ideology of communism.

Since one member of our breakfast group during the discussion period expressed the belief that Christianity in the United States was successfully meeting that challenge, I ask unanimous consent to have published in the CONGRESSIONAL RECORD at this point a forceful article by Dr. Wilbur M. Smith, to the effect that Christianity in the United States is being tragically weakened by betrayal within, and as a result is not successfully meeting the materialistic challenge that confronts the entire world. Dr. Smith is a professor of English Bible in Fuller Theological Seminary, editor of Peloubet's Select Notes on the International Sunday School Lessons, and the author of numerous books on theological subjects. His article, entitled "The Holy Bible: 'Verdun' of Triumphant Christianity," was published in the August 28, 1961, issue of Christianity Today.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE HOLY BIBLE: "VERDUN" OF TRIUMPHANT CHRISTIANITY

(By Wilbur M. Smith)[1]

During the First World War, the fortress of Verdun was fiercely attacked by the Germans, and for 2 years they threw division after division of troops against this pivotal defense of the Allies. A million soldiers lost their lives, but the fortress held, and the brave French resistance gave rise to the motto, "They shall not pass." So long as

[1] Wilbur M. Smith is professor of English Bible in Fuller Theological Seminary and editor of Peloubet's Select Notes on the International Sunday School Lessons. A prolific writer, he is author of numerous books and magazine essays.

Verdun remained unconquered by the Germans, there was hope for the Allied cause, and, finally, the assurance of ultimate victory.

No one questions the fact that the Christian faith during the last 50 years has been under more terrific attack than at any time since the cessation of persecution in the early centuries. As Archbishop Garbett said in his notable work, "In an Age of Revolution," "The advances made in scientific knowledge, the results of Biblical criticism, and the mental and spiritual disturbance caused by the wars, have shaken the traditional beliefs and customs. There is more open and aggressive atheism than at any other period of human history. In Russia, in Germany, in France, and in many of the central European and Balkan nations. Christianity is treated either with hatred or contempt. Far more general is the attitude of almost complete indifference to religion and ignorance of its nature. Except for occasions such as baptisms, marriages, and funerals, the ordinary man has little contact with the church or its ministers."

Though one confesses this with grief, all men—whether Christians or pagans, believers or scoffers—must recognize that the Christian faith is counting for less and less with the passing of each successive decade. I am referring here to conditions in general. We must not see world conditions through the spectacles of some local, evangelically active area, such as southern California, or perhaps the church life of the Twin Cities. Maritain has said, "It is not Europe alone, it is the world, it is the whole world which must now resolve the problem of civilization" ("The Twilight of Civilization," 1944, p. 64). Attacks upon the Christian faith are are being projected from almost every major area of life, even from the area of eccelesiasticism.

THE COMMUNIST THREAT

First, we must reckon with this hideous monster that has arisen in our century to threaten the liberties of man and challenge the whole free world, namely, communism. I know that people grow weary of hearing this word, but we must face the facts. Communism is not simply anti-Christian, it is anti-God. It is atheistic and vigorously so. The Soviet Encyclopedia goes so far as to say that Jesus of Nazareth never existed. There are 200 million people today in the Union of Soviet Republics. There are 630 million people in Communist China. This makes a total of 830 million people who are consistently exposed to anti-God propaganda. Yet this virus of communism is in the vitals of all nations, more or less. It is vigorously being propagated in Japan. It is blatantly arrogant in our own country. Some of its principles infiltrate many of our textbooks. We are now on the verge of a great student exchange movement, when thousands of our college students will be studying in Russia, and thousands of Russian students will be studying in this country. The day is not far off when we are going to be challenged with the atheism of these communistic nations more directly than most people today dream.

SCIENCE AND AGNOSTICISM

In the second place, modern science—fascinating, indispensable, exciting in its discoveries, and more and more dominating every department of life—is today, for the most part, totally indifferent to the Christian faith. I believe one is safe in saying that not 10 percent of the outstanding scientists of our Nation are Trinitarians today. I have not yet shaken off the sense of shock which recently came to me in reading a new volume titled "Science Ponders Religion," edited by the distinguished astronomer of Harvard University, Prof. Harlow Shapley. Eighteen well-known scientists of our country, some now in the prime of life, almost all of them with distinguished careers in teaching in our larger colleges and universities, attempt in this book to set forth their conceptions of religion. Let us remember these men are not purposely attacking Christianity. They are not writing from Moscow, but from the United States. And yet not one of these scientists confesses that he believes in a personal, sovereign, omnipotent God, nor does one of them confess to any sure hope of personal life after death. Not only is their own position agnostic, but they frankly say they represent a true cross section of what scientists today think about religion, and I am quite sure that in this they are correct. As Dr. Leslie Newbigin has said, "The typical and dominant scientific man of the West is to a large extent alienated from the Christian tradition.

"It is impossible to exaggerate the importance of the fact that at the moment when the scientific culture, which was formed within the Western Christian tradition, has achieved worldwide expansion and dominance, its unity with the supernatural faith in which it was begotten has disintegrated" ("Summons to Christian Mission Today" in the "International Review of Missions," April 1959, p. 178).

PHILOSOPHICAL UNBELIEF

Modern philosophy is more outspoken than science in its antagonism to the Christian faith. A recent volume by the German scholar, Dr. I. M. Bochenski, "Contemporary European Philosophy," reinforces the impression that the philosophers who have exercised the greatest influence over the world of thought since the dawn of this century are all atheists, with possibly one exception, Whitehead, and he was by no means a Trinitarian. In this volume, the modern philosophers are introduced by a chapter on Bertrand Russell. This is followed by one on the Italian, Benedetto Croce, emphatically atheistic. Next follows John Dewey, who exercised such a pernicious influence over modern American education, and who once wrote that the greatest hindrance to the progress of modern man was his belief in the supernatural. Then there is a chapter on Martin Heidegger, of whom a contemporary professor of philosophy has recently said, "He regards the atheism of Nietzsche and Marx as a salutary attempt to purge us of idols." And last comes Jean-Paul Sartre, the most vigorous atheistic philosopher of our day. It is not necessary to add that in the realm of psychology the most profoundly influential in this department has been Freud, who scoffed at the very idea of the existence of a personal God.

In 1951, the New York Times had a remarkable article on the 100 greatest books of the preceding century. Careful study of these authors, however, would reveal that not more than eight of them could be called Christian, and they were not among the most influential. More than half were deliberately and vigorously antagonistic to Christian principles.

UNBELIEF WITHIN THE CHURCH

Moreover, while unbelief multiplies on every hand, in Christian as well as Muslim countries, the church itself is being tragically weakened by betrayal from within. Two most recent illustrations of this will suffice.

Probably during the last 30 years, the outstanding single ecclesiastic in the Methodist Church has been Bishop G. Bromley Oxnam, who retired from the active bishopric only last year. He has been chairman (1939–44) of the division of educational institutions for the Board of Education of the Methodist Church; from 1940 to 1948, in the same great denomination, he was chairman of the Commission on Public Relations and Methodist Information; while for 8 years, 1944–52, he was president of its division of foreign missions. For many years, he was chairman of the Methodist Commission on Chaplains. Bishop Oxnam also was on the board of trustees of numerous educational institutions and was the president of the board of trustees of Wesley Theological Seminary, Washington, D.C. He was a professor in the University of Southern California, and also in the Boston University School of Theology, and president of DePauw University for 8 years. He has been a bishop in the Methodist Church since 1936 and has served as president of the Council of Bishops. In addition to the highest possible offices in his own denomination, he was president of the Federal Council of Churches from 1944 to 1946, and president of the World Council of Churches, 1948–54. In his book "Testament of Faith" (Boston, 1958), he not only ridicules the idea of the Virgin birth and scoffs at biblical inspiration, but he emphatically repudiates even such a truth as the atoning work of Jesus Christ our Lord. "I have never been able to carry the idea of justice to the place where someone else can vicariously pay for what I have done in order to clean the slate" (p. 38). "They argue that God sent His own Son who died upon the cross and, in so doing, satisfies God's sense of legislative justice. It simply does not make sense to me. It is rather an offense. It offends my moral sense" (p. 41). "Must God have a sacrifice, the lamb slain from the foundation of the world, as the Book says? No, no; I cannot think of it this way" (p. 42). And what is the bishop going to do with his sins? He tells us, "I cannot see forgiveness as predicated upon the act of someone else. It is my sin. I must atone" (p. 144).

More recently, Bishop James A. Pike of the Protestant Episcopal Church, bishop of the Diocese of California, in an article in the Christian Century (Dec. 21, 1960) says of the Virgin birth: "I am inclined to believe it is a myth." On the work of the Holy Spirit, he says: "I no longer regard grace or the work of the Holy Spirit as limited explicitly to the Christian revelation." Of the Bible, he says, "It came along as a sort of Reader's Digest anthology." But it is on the great doctrine of the Trinity that he most blatantly reveals his unbelief. "Take the Trinity—a doctrinal formulation which I did not question 10 years ago—I can't see its permanent value. I see nothing in the Bible, as critically viewed, which supports this particularly weak and unintelligible philosophical organization of the nature of God." "In other words, I believe totally in that which the formula is seeking to express; my belief is in God, not in men's formula about Him." Like Bishop Oxnam, Bishop Pike has been active in educational work.

The terrible significance of these denials of basic Christian truths is the more ominous in that the respective churches of these ecclesiastical leaders are so silent about it all. I do not know of one official organization in the whole of Methodism, or any group of ecclesiastical leaders within that church that has had the courage (or even the desire) to speak out publicly and forcefully against such repudiations of the faith. Some Episcopal clergymen have recently declared publicly their full support of Bishop Pike. If bishops may deny the faith, then certainly the clergy have the same privilege. Indeed, for the sake of harmony, why may not the day soon be upon us in which the bishop will urge his clergy to stand with him in his opposition to biblically revealed truth? And, if those who are the ordained teachers and preachers of the Holy Scriptures no longer believe in the divine origin and absolute authority of the word of God, surely the laity need not believe, and unless some other more wholesome influences are at work in their hearts and minds, they most certainly will not believe.

The emphasis on myth, which has no powerfully gripped theologians on both sides of the Atlantic and has penetrated into many pulpits of the continent, of course destroys confidence in and even need for the actu-

ality of New Testament events which the church has always considered undeniably historic. Modern man is not going to come under any conviction of his need of salvation through Jesus Christ if he can reduce the crucifixion, the resurrection and the ascension in mythological nomenclature.

Some denominations, by their own authorized and widely distributed Sunday school literature, and study books assigned for teaching in church organizations, are sowing seeds of doubt as to the truthfulness of many supernatural events in the Gospels. I have before me one on the Gospel of John which, in referring to the raising of Lazarus, says that this record may have four different interpretations, of which the view that it was an historical event is dismissed as the least valid. Other than that, it might be taken as just a piece of fiction, or a misinterpretation, or a parable. Young people, mastering the laws of chemistry, biology, and physics, are not going to find the gospel of Christ powerfully appealing to them if they are being taught that what the New Testament sets forth is to be considered as superstition, or as spiritual truths couched in historical form but all the while decidedly unacceptable as history.

The Bible is the Verdun of the Christian church. Unless there is a definite reversal of the more powerful currents in modern thought, the Christian church may have to contend with a condition of universal repudiation of the preeminence and authority of the Scriptures, the uniqueness of Jesus Christ and his salvation, and of belief in the eternal, omnipotent, sovereign God.

THE BIBLICAL WARNING

Yet, such a situation as this, of fierce antagonisms against our faith, need not take us wholly by surprise if we are careful students of the word of God. The Apostle Paul said that Satan, the god of this world, has blinded the minds of men (II Corinthians 4: 7). Our Lord warned us again and again that there would come, with particular power at the end of the age, false prophets, false Christs, and false teachers (Matthew 24: 11, 24; II Peter 2: 1). In fact, so the New Testament tells us, it is Satan who has deceived the whole world (Revelations 12: 9; 20: 3, 8, 10). Our Lord said that though he spoke the truth and was the Truth, Satan was a liar and the father of lies (see John 8: 40–46; 15: 26; 16: 7, 13). There is the spirit of truth and the spirit of error, and these two must ever be in conflict. Indeed, said the Apostle Paul, at the end of this age men would turn from sound doctrine and follow those who preached flattering and false gospels (II Timothy 4: 1–4).

Now we might well ask ourselves the question: Well, what of it? What if faith in the Bible does go? What if believing Christ to be the Son of God and the Saviour of men is to be, for the most part, erased from the convictions of humanity—what difference does it make?

First of all, let men lose confidence in Jesus Christ as revealed in the Scriptures and we lose any satisfying knowledge of the true and living God. No religion in this world or philosophy or science dare talk to us with evidence about a God of love, and a God of holiness, except that religion which is built upon the Bible. Our Lord said those who have seen him have seen the Father also. I remember when the atomic bomb was first exploded. Dr. Compton said, "Now we know there is a God." What nuclear fission has to do with a knowledge of God, I wouldn't know, but in all the years since none of these physicists, to the best of my knowledge, are echoing Dr. Compton's words. Secondly, without faith in the person and work of Jesus Christ, men will not have and cannot have a Saviour from sin who can make men walk in the liberty of the children of God, who is able to reconcile men unto God, and who can deliver them from the wrath to come. How foolish did so great a man as Emerson appear when more than 100 years ago he talked about looking for a new great Saviour from the West? The tragedy today is that most men don't even believe that we need a Saviour; they think we need nobody but ourselves. Indeed with the loss of the living conviction of a sovereign and holy God, and of life after death, the sense of the very need of a Saviour disappears too.

Thirdly, without Jesus Christ, no man has any adequate reason for real hope for the future. Our Bible talks about the day when God is going to make this an earth of righteousness, when sin will be judged, when the supernatural enemies of mankind will forever be put away, when the dead in Christ shall be raised, shall be in the presence of God and possessed with eternal life. These are the things that will go if Christ goes. It has always been true, it is true today, and it will forever be true, that men without Christ are without hope in this world (Ephesians 2: 12).

Is it not also true that if the Christian faith goes, along with the highest ethical principles ever known on earth, even those restraints that still exist, which tend to make men decent, honest, and truthful, will be removed, and we are already as lawless in thought and deed as we dare to be? Even such an atheist as Bertrand Russell would testify to this. In his lectures at Columbia University, which were published under the title "The Impact of Science on Society," he apologetically confesses that the only hope for the world is in what is called Christian love. These are his words: "The things that it (our age) must avoid and that have brought it to the brink of catastrophe are cruelty, envy, greed, competitiveness, search for irrational subjective certainty, and what Freudians call the death wish. The root of the matter is a very simple and old-fashioned thing, a thing so simple that I am almost ashamed to mention it, for fear of the derisive smile with which wise cynics will greet my words. The thing I mean—please forgive me for mentioning it—is love, Christian love, or compassion. If you feel this, you have a motive for existence, a guide in action, a reason for courage, an impressive necessity for intellectual honesty. If you feel this, you have all that anybody should need in the way of religion. Although you may find happiness, you will never know the deep despair of those whose life is aimless and void of purpose; for there is always something that you can do to diminish the awful sum of human misery" (pp. 59 f.) And from what source does Christian love derive? It comes from faith in and obedience to Jesus Christ, and is revealed fully and truly only in the Holy Scriptures.

In saying that full confidence in the divine origin of the Bible and faith in the word of God are being erased in our desperately critical and convulsive midtwentieth century life is not to say, however, that the word of God is itself in danger of being extinguished. The all-powerful and eternal God himself has said, "I watch over my word to perform it" (Jeremiah 1: 12). The Lord Jesus said that though "heaven and earth will pass away * * * my words will not pass away" (Matthew 24: 35). I believe that. Peter was right that "the grass withers, and the flower falls, but the word of the Lord abides forever" (I Peter 1: 24, 25). Even when the beast and the false prophet bring together that great federation of demon-possessed kings at the end of this age to go out and wage war against the Lamb, we are told that it is God himself who "has put it into their hearts to carry out his purpose by being of one mind and giving over their royal power to the beast, until the words of God shall be fulfilled" (Revelations 17: 17).

THE HOPE FOR REVERSAL

What will bring about any reverse in this alarmingly growing mood of unbelief and denial? There is only one hope, so far as you and I know, and that is in a return to, a full confidence in, and a loving obedience to, the Holy Scriptures. Philosophy is not going to bring us to God—it never has. All the marvelous discoveries of nature are not leading us into a deeper reverence for God, and most of those engaged in these necessary enterprises do not even give God a thought. We talk about the coming of a new society for a new world, but if the next 50 years show the same graphs as the last 50, then we will have greater periods of destruction, a higher crime rate, more violence and racial hatred than the world has ever known. Who can judge and control the human heart but God alone? Certainly, no legislation of any government can bring us to God. And most of all, what is in the heart of men by unaided human nature is not going to give us a knowledge of God. The heart is desperately wicked. I shudder when I see posters on the bulletin boards of some churches that read "God is the best that is in you." Our Lord said, "I have told you the truth." And then He asked the sad question, "If I tell the truth, why do you not believe me?" (John 8: 45, 46).

At the dawn of human history, Satan's first words to unfallen man were, "Yet, hath God said?" And our first parents, finally concluding that God has not said what they thought they heard, or at least, that what God said was not true, turned their backs on a righteous Creator and led the human race into a subservience to the father of all lies. Even Eve, within a few hours, confessed how tragic was her decision when she acknowledged that the serpent had deceived her. Satan is asking this more loudly, with greater sarcasm than ever in human history, and is appealing to the growing pride of man in his "yea, hath God said?" The answer man gives to that question will determine the destiny of his soul, and the answer that this age gives to that question today will determine more than anything else whether we will continue to rush into one great final overwhelming disaster, or whether there will remain still a time of grace and an opportunity for lost men to be saved, for men dead in trespasses and sins to be possessed with eternal life, and for those who are without hope to cry out, "Blessed be the God and Father of our Lord Jesus Christ, which hath begotten us again unto a lively hope by the resurrection of Jesus Christ from the dead" (I Peter 1: 3).

THE STRATEGY OF TERROR

Mr. WILEY. Mr. President, the September 11 edition of the U.S. News & World Report contains an editorial entitled "The Strategy of Terror," written by David Lawrence. He has reached the conclusion that we should put our scientists and engineers to work to perfect a means of sending radio messages to the Russian people by devices that cannot be jammed by the Moscow government. He says:

> We must reach the Russian people. For they and other peoples behind the Iron Curtain must be told of the dangerous game Khrushchev is playing.
>
> The strategy of terror which the Soviet Premier has undertaken can and must be met with resoluteness and by appeals to all mankind to unite in a crusade to preserve our civilization.

Mr. President, yesterday the President of the United States announced the resumption of underground nuclear tests. Naturally, our security stands as the number one consideration. According to experts, however, we now have an ample arsenal of nuclear weapons.

It was after the third bomb explosion that the President spoke up.

It is his function to do so. For the 22-odd years that I have been a Member of the Senate I have never thought it was my part to criticize the Executive when he was performing an executive function. So in this case I say he has made the decision, and it must stand. I ask unanimous consent to have the article to which I have referred printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE STRATEGY OF TERROR

(By David Lawrence)

Since ancient days tyrants have brandished their weapons of war. Sometimes they have tried, by a strategy of confusion, first to divide and then to conquer nations in alliance against them. Sometimes they have endeavored, by a strategy of terror, to frighten their opponents into submission.

But it will become clear soon that Nikita Khrushchev has committed his worst blunder. For he stands alone today before mankind as the man who threatens its destruction.

Who will be impressed by his bluster? His own people, who are frightened at the thought of a nuclear war? The Western Allies, who feel they have an adequate stockpile of weapons with which to retaliate in kind?

Then, it may be asked, what was the real purpose of the statement by the Soviet Premier in which he not only announced his resumption of nuclear tests but also threatened the world with superweapons of incredible power to destroy people at any moment at any spot on the whole world's surface?

Conceivably Khrushchev is like Hitler, who also thought that mere threat would suffice to cause his opponents to surrender without a fight. Back in the 1930's there were Americans who visited Nazi Germany, saw the armament there—guns and tanks and planes—and came back to proclaim that Hitler was invincible. They thought we had better make a deal.

There are voices today which constantly call for negotiation with the Soviets on the theory that somehow, with a concession here and there, the dictator in Moscow may be satisfied on the West Berlin issue. Experience, however, teaches us that the appetite of such tyrants is never satisfied and that it is wiser to stand up to their bluffs at the outset of their campaigns of terror.

Why did Khrushchev take this step? For years he has been back of a worldwide propaganda—which many westerners have gullibly swallowed—that radioactive fallout from mere testing would ruin the health of mankind and that nuclear tests must be banned. Now he turns about and orders testing in utter disregard of Russia's own viewpoint expressed repeatedly in the past. The New York Times rightly declares:

"Premier Khrushchev's action again demonstrates that the whole Soviet propaganda for both a nuclear test ban and total disarmament is only a gigantic hoax perpetrated on the world."

It can only mean that the Soviet Premier is convinced that he can scare the Western peoples and their governments into surrender merely by persistent threats to use nuclear power. President Kennedy properly characterizes this as "primarily a form of atomic blackmail, designed to substitute terror for reason."

What is our next move? Shall we resume testing, as many of our scientists and Government officials, including Members of Congress, have been advocating? One view has been that the Soviets brought about the voluntary test ban merely to get 2 or 3 years in which to catch up to us by secret testing and that we may fall behind now unless we try out some of the many devices accumulated on our drawing boards.

The President has not been stampeded into ordering nuclear tests to be resumed immediately. He is biding his time for a while to allow the full significance of what Khrushchev has done to sink in throughout the world. Presumably we are confident that we have the power to inflict what has been called massive retaliation.

Since, to be sure, we are still ahead on atomic research and since we do have an enormous stockpile of nuclear weapons, a few weeks might not make much difference. But clearly we cannot take chances. For the big question is whether we can intercept the Soviet missiles or render them harmless by counterweapons.

It is rumored, for instance, that Russia hopes to test and perfect a superbomb which might destroy 95 percent of our retaliatory power in a first blow, and carry on for at least 9 hours thereafter such an interference with radio transmission as to render our manned bombers helpless to reach their targets.

If such a terrible thing is on the drawing boards, it is up to the American Government to continue its tests for a deterrent weapon. We can dilly-daily only a little while as world opinion rallies behind our position. But we must not delay unduly.

We should, moreover, put our scientists and engineers to work to perfect a means of sending radio messages to the Russian people by devices that cannot be jammed by the Moscow Government.

We must reach the Russian people. For they and other peoples behind the Iron Curtain must be told of the dangerous game Khrushchev is playing.

The strategy of terror which the Soviet Premier has undertaken can and must be met with resoluteness and by appeals to all mankind to unite in a crusade to preserve our civilization.

BURNS DITCH HARBOR AND THE INDIANA DUNES

Mr. DOUGLAS. Mr. President, opposition is mounting to the wasteful $80 million harbor which has been proposed for the Burns Ditch area in the Indiana Dunes. On August 28, this year, one of the biggest, most public spirited of American corporations, Inland Steel Co., made known its opposition to this proposal in a letter to the U.S. Army Engineers. Inland Steel Co. owns more than a square mile of lake front property in the Indiana Dunes, very close to Burns Ditch itself. It might be expected, therefore, that this company would favor the Burns Ditch Harbor project, but apparently this is not the case.

In its letter, Inland Steel Co. states that nearly all of the traffic which the Burns Ditch area could possibly handle would be used by two companies: Midwest Steel Co., which is a wholly owned subsidiary of National Steel Corp., headed by George M. Humphrey; and Bethlehem Steel Co.

The letter points out that according to the October 1960, Corps of Engineers interim report on the Burns Ditch Harbor proposal, the oversea general cargo at Burns Ditch is estimated to be only 165,000 tons at the end of the 10th year, while the average annual waterborne traffic in connection with the steel mills is said to be 10 million tons.

Inland Steel Co., therefore, correctly states that the huge expenditures of the Federal Government in the amount of $36 million, and of the State of Indiana in the amount of $38 million, would be almost exclusively for the benefit of those 2 companies, and that even this statement should be qualified by the further fact that both Bethlehem Steel Co. and Midwest Steel Co. have refused to make any commitments as to when they will complete fully integrated steel plants.

The senior Senator from Illinois has been stating for many months, over several years, that he is not opposed to a harbor in Indiana, or rather to an additional harbor in Indiana. He is opposed to a harbor in the Burns Ditch area, because it would destroy this beautiful and irreplaceable dunes and lakeshore region which should be preserved as a recreational area for the use of all the people. However, the Senator from Illinois has suggested that a new harbor could be built in Lake County, Ind., to the west of Gary, by continuing the breakwater and connecting the harbor at Lake Calumet with Indiana Harbor, or a point beyond Gary itself.

I am very happy to say that the Inland Steel Co. suggests this as an alternative, and asks the Corps of Engineers to consider this alternative before it comes out definitely and finally in favor of the Burns Ditch Harbor.

I ask unanimous consent that this letter be printed in the RECORD at the conclusion of my remarks. Earlier today I received permission from Mr. Joseph Block, the president of Inland Steel, to have the letter made a matter of public record.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. (See exhibit 1.)

Mr. DOUGLAS. Mr. President, I wish to commend Inland Steel for the position it has taken. Frequently it is difficult for one company to take a stand in opposition to the plans of other companies. But this reinforcement from Inland Steel will be of tremendous help to those of us who are trying to save the Indiana Dunes for the people.

EXHIBIT 1

INLAND STEEL CO.,
Chicago, Ill., August 28, 1961.

Re interim report on Burns' Waterway Harbor, Ind.

U.S. ARMY ENGINEERS,
District of Chicago, Corps of Engineers, Chicago, Ill.

GENTLEMEN: Reference is made to a hearing scheduled to be held in the house chambers, State House Building, Indianapolis, Ind., at 10 a.m., central daylight saving time, August 30, 1961, in connection with the pending study of harbor improvements at Burns' Waterway, Ind.

Inland Steel Co. has, since 1919, owned more than 800 acres of land abutting on Lake Michigan in Porter County, Ind., in the vicinity of the Burns' Waterway Harbor proposed in the interim report dated October 1960. This property has been held and continues to be held for the purpose of building a steel plant with harbor connections. Inland Steel Co. recommends disapproval of this project for the following reasons:

1. As indicated in the October 1960 interim report, oversea general cargo traffic at Burns' Waterway Harbor is estimated to be only 165,000 tons per year by the end of the 10th year

and, even by the end of a 50-year period, is estimated to be only 370,000 tons per year. In contrast with this figure, the annual average waterborne traffic in connection with the steel mills proposed to be built at this site is 10 million tons. When it is considered that the Federal Government's investment, as proposed, would be in excess of $36 million, and that the State of Indiana would invest $38 million, it is respectfully submitted that these huge expenditures are mainly for the benefit of two private steel companies. Of the estimated annual average waterborne traffic for this harbor, 8,800,000 tons of the total of 10 million tons is from coking coal and iron ore and, until coke ovens, blast furnaces and steel furnaces are installed, the actual tonnage will be negligible. In this connection, the following quotation from the Indianapolis Star of June 14, 1961, attributed to A. J. Berdis, president of Midwest Steel Co., is pertinent:

"In view of the uncertainty of the economic situation it is not possible for us to make a firm commitment as to the time when we could build a fully integrated steel plant here."

It is also our understanding that Bethlehem Steel Co. has consistently refused to make any specific commitments as to its development of their property in the vicinity of the proposed harbor.

2. With respect to alternate sites, the Indiana cities of Hammond, Whiting, and East Chicago have passed resolutions urging their Congressmen to petition the Corps of Engineers to make studies of a port located adjacent to these three cities. Such a resolution has been introduced by Congressman MADDEN and is being considered by the Committee on Public Works of the U.S. House of Representatives. It would seem proper to delay further consideration of the Burns' Waterway Harbor to permit a comparative study of a port to be created by a breakwater connecting Calumet Harbor with Indiana Harbor or beyond. A harbor at this location would complement the presently existing Calumet Harbor and the straightening of the Calumet River between the harbor and Lake Calumet and should encourage the more effective use of the multimillion-dollar facilities which have been constructed in that area by the Chicago Port Authority.

It should also be pointed out that the Monon Railroad has made plans for improving the harbor at Michigan City and has had a loan guaranteed by the Interstate Commerce Commission for the improvement of this port. This would provide facilities for the handling of bulk and general cargoes at no expense to the State or the Federal Government.

3. As indicated in 1. above, the justification for a harbor at Burns' Waterway seems to be directly connected with possible future steelmaking and related facilities there and, in view of the large public expenditures, both Federal and State, there should be assurance, at the very least, that other industries in the area and the public have access to such a waterway on an equal basis with the two adjoining steel companies.

For the above reasons it is respectfully submitted that the report disapprove the Burns' Waterway Harbor or that further consideration be postponed until an alternate harbor, to be constructed by connecting Calumet Harbor with Indiana Harbor, can be studied.

Respectfully submitted.

H. W. JOHNSON,
Vice President.

TRANSPORTATION SUBSIDIES AND REGULATION

Mr. BUSH. Mr. President, the Wall Street Journal recently published an editorial entitled "How Not To Run the Railroads." The Interstate Commerce Commission has made some comments about subsidizing railroads. I believe Congress will have to consider measures relating to the subsidizing of railroads. However, if this subject becomes a matter of consideration by Congress, there are other problems which must be taken into account besides merely voting a dollars subsidy to the railroads. This subject is discussed in the editorial published by the Wall Street Journal. I ask unanimous consent that the editorial may be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HOW NOT TO RUN THE RAILROADS

There's certainly no arguing the fact that many of the Nation's passenger-carrying railroads are in financial trouble. So there's a certain plausibility about the Interstate Commerce Commission's suggestion that the public, if they would like to go on riding the railroads, should carry them over their difficulties to the tune of perhaps $52 million a year.

That would offer an easy way out for all concerned, except of course for the taxpayer. But what are some of these difficulties that the people must pay to repair?

The ICC itself notes the huge Government spending for vast highway, airport, and airway modernization, all of which make travel more convenient for the people but which also provide public subsidy to the carriers competing with the railroads. Considering the cost of maintaining roadbeds and control systems, this is no small factor in the equation.

Even this is not the whole of it. For in addition the railroads are taxed, and taxed heavily, for the privilege of bringing trains into the cities for the benefit of the public. In New York City, to use one example, the bus depot was built and is operated by the public Port Authority; the cost of building and operating Grand Central and Penn Stations are borne by the railroads and the city taxes them for the use of the property. The rental charges paid by the business (or by the airlines for using their terminals) are nowhere near comparable in cost to the capital charges met by the railroads.

The ICC itself further compounds the difficulty. Not long ago it turned down a railroad request to lower charges on certain farm commodities, the reason given being that the ICC thought the rates insufficient and unfair to competing carriers. In short, the railroads are so overregulated that their managements often cannot act to meet the competition.

A good bit of that competition, incidentally, is not regulated at all. As the highway system has expanded, more and more freight is being hauled by private, rather than common carriers, with the roadbeds being supplied at public expense.

In sum, then, it is government itself—Federal, State and local—which is creating the situation in which Government officials must now talk about subsidizing the railroads. We agree that if this situation long continues, it will be impossible to resist the arguments for rail subsidies. But if we come to that, it will surely be a ridiculous bit of business.

If the country is going to keep the railroads going, it does need to redress the balance. But the simplest way is to put all forms of transportation upon the same basis as regards taxes and Government regulation, to cease subsidizing one form of transportation at the expense of another. The best way to make the railroads run is to stop blocking them.

SOUTHWEST SEMINAR ON MANAGEMENT AND USES OF NUCLEAR ENERGY

Mr. McCLELLAN. Mr. President, President Kennedy's statement yesterday that the United States will resume nuclear testing is a most vital pronouncement and one that announced a course which is certainly in the best interest of our country and the entire free world. It will serve notice on the Soviet Union that the United States will not relinquish its leadership or allow its present superiority in the nuclear field to be diminished in any substantial degree. In addition, the President's statement is a strong reaffirmation of our country's determination to enhance and promote the peaceful uses of nuclear resources and products and in the same effort to keep our arsenal of nuclear weapons fully stocked as a deterrent to those who would destroy us.

Mr. President, Arkansas was greatly honored last week to serve as host to the Southwest Seminar on Management and Uses of Nuclear Energy. This meeting was held in Hot Springs, Ark., from August 29 to September 2. The purpose of the conference was to find ways and means by which the several States can contribute to the advancement and full utilization of nuclear energy for progress in agriculture, industry, and in all areas of endeavor. I was privileged to view some of the exhibits at the Southwest Seminar, and I firmly believe that this conference is a significant step in the building and strengthening not only the States whose delegates were in attendance but the entire Nation as well. I hope that the holding of such a seminar will be repeated many times over. Such a seminar provides valuable information that the citizens of our country want and need to know about.

Finally, Mr. President, I would call the Senate's attention to a resolution adopted by the first extraordinary session of the 63d General Assembly of Arkansas. This resolution was adopted on September 1, and it memorializes and urges the Congress to go on record as favoring a prompt resumption of our nuclear weapons testing program; and, in that respect, it is in accord with the action taken yesterday by the President of the United States. I ask unanimous consent that this resolution, House Concurrent Resolution 6 of the Arkansas Legislature, be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT RESOLUTION 6

Whereas the Western World has been threatened with resumption of nuclear testing by Soviet Russia; and

Whereas there is, in fact, no evidence that Russia has not been detonating some nuclear weapons even during the international ban on such activity, while the Unted States honorably refrained, in compliance with international agreement; and

Whereas one of the world's most eminent figures in nuclear weapons technology, Dr. Edward L. Teller, has declared publicly at the Southwest Seminar on Management and Uses of Nuclear Energy, August 31, 1961, at Hot Springs, Ark., that the dangers of nuclear testing have been greatly exaggerated

and that the United States probably is lagging behind the Russians in nuclear development both military and peaceful, and that our failure to test is due to fear; and

Whereas resumption of testing by the United States is, in Dr. Teller's estimation, important and essential to the best interests of this country: Now, therefore, be it

Resolved by the House of Representatives of the first extraordinary session of the 63d General Assembly of the State of Arkansas, (the Senate concurring therein), That the Congress is hereby memorialized and urged to put the legislative branch of the National Government on record as emphatically favoring a prompt resumption by the United States of its nuclear weapons testing program for the common good and the advancement of both military and peaceful nuclear technology.

TALBOT FIELD, JR.
JOHN P. BETHELL,

Approved:

NATHAN GORDON,
President of Senate.
ORVAL E. FAUBUS,
Governor.

Mr. McCLELLAN. Mr. President, it is gratifying to me to know that the general assembly of my State took notice of the international crisis, particularly with respect to the deception, fraud, and advantages that Russia was taking in her secret testing of these weapons, and that the Arkansas Legislature took the initiative, so far as I know, in asking that the U.S. Congress indicate its sentiments, for the purpose of assuring the President of the United States that the citizens of our country want to see testing in this field resumed. I believe the President is taking the right course. I do not think we could safely do otherwise.

THE LATE JUDGE LEARNED HAND

Mr. BUTLER. Mr. President, few men have made a greater impression on their country and few jurists have contributed more to the history of American jurisprudence than the late Learned Hand.

The distinguished columnist of the Baltimore Sun, Mr. C. P. Ives, wrote a most moving article about Judge Hand in a recent issue of the Sun, and he concluded by saying:

With the increasing politicalization of our jurisprudence to which Hand testified, it has become normal to classify judges in ideological terms. But of Learned Hand one did not say that he was a liberal or that he was a conservative. One said that he was a judge and one of the wisest of judges said he was our wisest judge.

Judge Hand knew, as we should all remember, that there is much to be learned from those who have lived before and from that which has occurred before. I, therefore, recommend to my colleagues the article "Our Wisest Judge," and I ask unanimous consent for its insertion in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUR WISEST JUDGE

(By C. P. Ives)

Learned Hand's single claim to membership on the Supreme Court was superlative fitness to be a Supreme Court Justice. This he had shown in long years of service on the Federal Court of Appeals at New York. As Professor Kurland wrote, "If some members of (Hand's) court were hopeful of appointment (to the highest Court), the chosen path was by proof of capacity to fill the post and not by appeal to the electorate through the instrument of judicial opinions or public speeches." Yet strangely, or perhaps not so strangely, none of this court was ever raised to the Supreme Court whose vacancies were filled instead by a long series of lesser men whom Professor Kurland duly listed—not, we may be sure, in malice but in melancholy.

It was not a thing about which Hand himself said very much but there are some comments in a book published in 1958 on the general question of Supreme Court eligibility. "I submit," he wrote, "that insofar as it is made part of the duties of judges to take sides in political controversies, their known or expected convictions or predilections will, and indeed should, be at least one determinant in their appointment and an important one. There has been plenty of past experience that confirms this; indeed, we have become so used to it that we accept it as a matter of course."

But everything in Hand's philosophy resisted a political judicature. He was aware, of course, of the fashionable cynicism, out of dilute Marx and Freud, that all men are biased and, that being so, that the President might as well have judges who shared the Presidential biases. "There are those who insist that detachment is an illusion," Hand wrote in 1947, "that our conclusions, when their bases are sifted, always reveal a passional foundation. Even so: though they be throughout the creatures of past emotional experiences, it does not follow that that experience can never predispose us to impartiality. A bias against bias may be as likely a result of some buried crisis as any other bias. Be that as it may, we know that men do differ widely in this capacity; and the incredulity which seeks to discredit that knowledge is a part of the crusade against reason from which we have already suffered so bitterly."

For Hand knew the perils of a jurisprudence professing not abstract justice but the mere personal predilections of the judges: "The degree to which [the judge] will secure compliance with his commands depends in large measure upon how far the community believes him to be the mouthpiece of a public will, conceived as the resultant of many conflicting strains that have come, at least provisionally, to a consensus. This sanction disappears insofar as it is supposed permissible to smuggle into his decisions his personal notions of what is desirable, however disinterested personally these may be." The consequence—expressed in sober understatement:

"Compliance will then much more depend upon a resort to force, not a desirable expedient when it can be avoided."

How did Hand's philosophy of judging come out in practice? He attacked from the beginning the modern notion that human or personal rights are more sacred than property rights. Just why property itself was not a personal right nobody took the time to explain. Along with all disinterested men Hand deplored the old pre-Roosevelt Justices who read their proproperty biases into the basic law. But by 1947, when personal rights were in issue, something strangely akin to the discredited attitude of the old apostles of the institution of property was regaining recognition. Hand could not see how, when concerned with interests other than property, the courts could have a wider latitude for enforcing their own predilections than when they were concerned with property itself.

This view naturally heightened Hand's concern when he was told in the 1950 trial of the Communist leaders that the use of informers against the accused, however tolerable in other cases, was here intolerable because human rights and intellectual values were at stake. Hand pointed out that the matter on appeal in his court was not one of doctrine but of criminal conspiracy.

"Courts have countenanced the use of informers from time immemorial; in cases of conspiracy, or in other cases where the crime consists of preparing for another crime, it is usually necessary to rely upon [informers] or upon accomplices because criminals will almost certainly proceed covertly."

But what about other prosecutorial devices by which the grim majesty of the state is arraigned against the lonely defendant in the dock? "Our dangers do not lie in too little tenderness of the accused," wrote Hand in a well-remembered opinion of 1923. "Our procedure has been always haunted by the ghost of the innocent man convicted. It is an unreal dream. What we need to fear is the archaic formalism and the watery sentiment that obstructs, delays, and defeats the prosecution of crime."

The larger interest which Hand always kept in mind was liberty and civility in an ordered social context. "Risk for risk," he wrote in 1952, "I had rather take my chance that some traitors will escape detection than spread abroad a spirit of general suspicion and distrust, which accepts rumor and gossip in place of undismayed and unintimidated inquiry." His ideal of justice was that every man should have his due—approbation and support for those who upheld liberty and civility, rejection and restraint for those who tore them down. No man knew better how fragile was the social context, how tenuous its support in the frailties of human nature. But Hand knew the strengths of human nature, too, and how they were best conserved and mobilized. "They taught us and we believed," he said in 1949 of his Harvard law professors, "that every civilized society must depend for its existence upon some body of principles ascertainable from not inaccessible sources, having moral authority and carrying sanctions.

"This authority which alone makes the sanctions tolerable is derived in large measure from continuity with the past; it is traditional. This is not because the compromises of the past, which these principles embody, are necessarily those that would emerge from similar conflicts today or, for that matter, were ideally the best even when originally they got themselves accepted. It is because they have proved their ability to withstand the shock and abrasions of time; because no better solutions have as yet been able to establish themselves in their place; and because man by his nature inevitably will act in large part on habit and convention."

Hand was as little sure as the next man what the country and the world would face ahead. But he knew with utter conviction how lawyers were to make ready: "This mansion of ours, where has ever dwelt what is fair and bright and of good report—let it not be said of us that we were not willing in our turn to set it in order, so that in the future as in the past it should nurture the best promises and the best hopes of our illustrious profession."

With the increasing politicalization of our jurisprudence to which Hand testified, it has become normal to classify judges in ideological terms. But of Learned Hand one did not say that he was a liberal or that he was a conservative. One said that he was a judge and one of the wisest of judges said he was our wisest judge.

CARROLL COUNTY (MD.) GENERAL HOSPITAL — DEDICATORY ADDRESS BY FORMER GOV. THEODORE R. McKELDIN

Mr. BUTLER. Mr. President, the new Carroll County General Hospital was recently dedicated at Westminster, Md., with a most inspiring ceremony which reflected the tremendous efforts which were put forth by Mr. Atlee W. Wampler, Jr., and his associated colleagues who composed the executive committee of the hospital drive. These gentlemen include Nathan Weinstock, chairman of the building and grounds committee; David A. Scott, chairman of the equipment committee; A. Earl Shipley, chairman of the medical committee; Scott S. Bair, chairman of the finance and investment committee; and Charles O. Fisher, chairman and counsel of the nominating committee. Credit should also be given to Mrs. Gladys M. Wimert who was president of the Carroll County General Hospital Auxiliary and the other charming ladies who served with her. The dedication address was made by former Gov. Theodore R. McKeldin and since it contains so many vitally important observations, I ask unanimous consent at this time to have the remarks of the distinguished former Governor inserted in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THEODORE R. McKELDIN

Thank you for permitting me to participate in the dedication of this facility of medicine and surgery that is established for the better health and general well-being of a very substantial section of our citizenry. A hospital to a community is what a heart is to a person—the source of health, the preserver of life. The community mind may be distributed among the officials of various units of government, the business community, the professional groups, the unions of labor, and the organizations through which the farmers express themselves—for the mind is an organ of many parts. The soul of a community resides in its churches and in its religious life. But it is through its facilities for the health and happiness of the people that a village, a town, a city, or a county expresses its concern for the individual. Therein lies the heart.

A young man, responsible only for himself, traveling about the country, may be satisfied with any doctor or any medical facility that happens to be close at hand when illness overtakes him. He doesn't worry about it. But when he marries and settles down, when the children are born and he becomes the responsible head of a family, the heart takes over—the heart with its love and its concern for those who depend on him. Then he wants a family doctor. It is evidence of his maturity. So it is with a community. Through the years of its development and growth, other concerns may outweigh those of the general health and immediate care of the ill. When maturity comes, a hospital becomes a thing to be devoutly desired, if not an absolute necessity.

The area of Maryland which is Carroll County could have continued to exist and survive without its new hospital in the years, decades, and centuries to come, as it has in those that are gone. But it could not continue to exist and survive and show its concern for its citizens as well and effectively without this hospital as it can with it.

Your ambulances could have continued to rush your stricken citizens to the crowded hospitals of Baltimore and Frederick, but not as quickly as they can be moved to this fine and modern facility within your county borders. And, perhaps even more important, the great hospitals in other places never could give the citizens of Carroll County the sense of security that this hospital will give them. Neither could any distant hospital provide them with the healthy and healthful sense of pride that is embodied here in this handsome building, in the rooms and hospital beds, and kitchens and medicine closets and laboratories, and all the other facilities that it contains—but most of all in the fact of its accomplishment. For this is no hospital to which they merely can be admitted and treated. This is their hospital, the general hospital of their county or your county.

There have been many fine leaders in this venture from the founding of the war memorial fund drive in 1943 to the present leaders who will see that the work of the hospital is carried on in the great spirit in which it was built, and who will inspire others to preparation to succeed them.

I wish that Claude Kimmey could have been here to see this day's accomplishment. He was chairman of the war memorial fund drive, as you know, from its beginning until his untimely death in 1948.

Deserving of special mention are such people as Scott Bair, F. Kale Mathias, Nathan Weinstock, Dr. Charles Billingslea, Charles Fisher, David Scott, Earl Shipley, Ralph Bonsack, and Howard Koontz, Jr.—all officers of the board of directors or chairman of its standing committees.

And then there are Mrs. Gladys Wimert, president of the hospital auxiliary; and Clifton Warner, and Walter Bennett, Walter Speicher, Mrs. Ralph Price, Mayor Joseph Mathias, Sherman Flanagan, Mrs. Harry Reese, Jr., John Eckard, Dr. D. D. Caples, Paul F. Kuhns, Russell Morgan, Ray Riley, Daniel Stoner, Mrs. Darthean Fox. And there are so many more. Particularly, there is the president of the hospital, Mr. Wampler. Indeed, I would like to mention the name of nearly every citizen of Carroll County, for this is a community project in the finest and most effective sense of the word.

At the time of your ground breaking, less than 2 years ago, I recall hearing that the hospital corporation consisted of more than 5,000 members—a most amazing figure and one that truly bespeaks the high interest of the citizens in the community, its health and its well-being. You are indeed most fortunate in having Dr. Richard Y. Dalrymple as the chief of your medical and surgical staff, and in the quality of the other fine physicians and surgeons of this area who will serve the hospital. And I think those doctors will agree with me that they too are fortunate in having this wonderful new hospital in which to increase and improve upon the medical services which they have been rendering to you through the years.

In this country, imbued as we are by the tradition and the character of independence, we worry a great deal about regimentation. It is our nature to resist extremes in government. Most of us, in our love for individual freedom and our adherence to the source of power among the people, subscribe to the Jeffersonian tenet that that government is best which governs least. As individuals we want to choose our own ways of life within the law; to buy from stores of our choice; to travel by routes of our choice; to be treated in our illnesses by doctors of our choice. In regard to this last, we resent the threatened infringement by the Federal Government into the field of medicine. We hold the fear that this will lead to socialized medicine and eventually to the assignment to the people of doctors by government—or, to put it another way, assignment of people to doctors.

Well, the best way to avoid this is for individuals and communities to demonstrate their responsibilities and abilities to provide for the care of their own health and that of their neighbors. Carroll County today is taking a long and effective step in the direction of such community responsibility in the dedication of this hospital to the health and well-being of the people of this area. If every community would do likewise, our network of community hospitals plus this State's pioneer system of medical care for the indigent and medically indigent would make the bringing of federalized medicine to Maryland like the carrying of coals to Newcastle.

Congratulations to Carroll County and to all its citizens.

And thank you again for the inspiration that I have found here today. May many more communities of Maryland follow your wonderful example.

ESTABLISHMENT OF NATIONAL WILDERNESS PRESERVATION SYSTEM

Mr. PASTORE. Mr. President, is there further morning business?

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

Mr. PASTORE. I ask unanimous consent that the Chair lay before the Senate the unfinished business.

The ACTING PRESIDENT pro tempore. The Chair lays before the Senate the unfinished business, which the clerk will state.

The LEGISLATIVE CLERK. A bill (S. 174) to establish a national wilderness preservation system for the permanent good of the whole people, and for other purposes.

IMPORTS OF RESIDUAL OIL

Mr. PASTORE. Mr. President, I speak today in behalf of the consumers of my State to ask for relief from an unnecessary and unjust burden—I ask the removal of the existing restrictions on the importation of residual fuel oil. Others of my colleagues from various States will rise to speak for their several areas.

We have one thing in common, fuelwise, we are penalized by our geographical disadvantage. Where we live and labor, fuel is hard to come by. We have no modern sources of fuel. Time was when the woodcutter of New England provided the fuel for our needs of that age. Then came coal until the transportation costs of coal priced it out of our market.

Let us take Boston as a focal point. Coal costs $5.59 a ton for delivery there. Residual fuel oil costs $1.16 a ton. One hundred thousand barrels of residual fuel oil is a full cargo for which the transportation bill to Boston would be $17,800.

Its heating equivalent in the form of bituminous coal from the fields of West Virginia would cost for transportation alone—without putting a penny into the pockets of the miners or mineowners—but for transportation alone would be $122,000. That's more than $100,000 greater than the transportation cost for residual fuel oil.

Offhand one might think that residual fuel oil use in these hard-to-get-to areas might be a cause of unemployment in the mining areas which are the proper concern of our colleagues from the States affected.

I, too, am concerned, along with my colleagues over unemployment in the coalfields of America. I have joined with those colleagues in the proposal for a natural fuels study to assay the causes and to effect a cure. But restricting the importation of residual fuel oil is not the cure. Let me give you the simple mathematics in proof. In 1950 there were 415,582 men engaged in the bituminous coal industry. Ten years later there were only 159,100 men employed.

But the use of residual fuel oil in the United States had nothing to do with that—nothing at all. During that same ten year period the use of residual fuel oil in the United States remained practically constant. It was 554 million barrels in 1950 and only 556 in 1960.

So the 260,000 coal miners did not lose their jobs to residual fuel oil. They lost their jobs to automation. They lost their jobs to tremendously increased productivity. This productivity was 13.25 tons per man-day in 1960 as against 6.77 tons per man-day in 1950. Productivity just doubled.

Yes, the demand for residual fuel oil has remained constant. But the domestic supply did not remain constant. It has dropped radically. Where we used to get 30 percent residual per barrel of domestic oil, we now get 8 percent. That is all to the credit of American industry and its techniques—higher and higher grades and smaller and smaller percentage of residue, the residual fuel oil, the thick low grade petroleum product used by our industry, our large buildings, our apartment houses, our hospitals, our schools, our ships.

We cannot emphasize enough that residual imports do not replace an American market. They fill the lag in American production; they fill the gap between domestic supply and domestic demand.

We are fortunate in having an established source of supply in our friendly neighbor, Venezuela.

Thirty months ago, on March 1, 1959, import restrictions were instituted under the broad aspects of a crude oil quota system. The announced purpose of the controls was to safeguard the U.S. oil reserves and reduce foreign competition to the domestic oil industry.

Residual fuel oil was included not by reasoning but by relationship as a petroleum product. I say it was not a reasoned inclusion. Witness the statement of the Chairman of the Eisenhower Cabinet Committee on Trade Policy at the time these restrictions began. He is the Honorable Sinclair Weeks, a former Secretary of Commerce.

It was never the recommendation of my Committee—

Mr. Weeks said—

that residual fuel oils be included in crude oil restrictions. It is my understanding that quotas on residual fuel oil were imposed because some importers were re-refining in contravention of the entire program. But it is obvious that restrictions should be removed on residuals used for heating and industrial purposes.

He continued:

In New England where winters are hard and we have no original sources of fuel, import restrictions have created shortages of a commodity necessary to the survival of our businesses and the welfare of our citizens.

What has become of the announced purpose of safeguarding our oil reserves and our oil industry? The oil industry is not at all worried over competitive imports of an unprofitable product like residual fuel oil. Refiners can make more money by producing less residual oil.

The majority of the American petroleum industry today supports removal of residual oil restrictions. That is the best possible evidence that imports of this commodity do not hurt the industry. They have no effect on its stability. They have no effect on stimulating exploration for new oilfields. They have no practical effect, good or bad, on our oil industry. And the industry itself says so.

But restriction of importation of residual fuel oil has had a truly bad effect on fuel users, and indirectly, on every electric utility customer, every hospital patient, on every taxpayer. Those restrictions added several hundred thousand dollars to Uncle Sam's fuel bill last year. Across the country, prices have risen for competing fuels as well as residual fuel oil, although world prices of residual have been dropping.

For the small users, in particular, supply has become uncertain and subject to bargaining. Advantages of orderly distribution in a free market have disappeared as the disadvantages inherent in a controlled market have grown.

Overall, the restrictions on imports of this necessary fuel have served to put its users at a serious competitive disadvantage at home and abroad.

The Interior Department, watchdog over our Nation's petroleum resources, has recognized the need for imports of residual oil and has indicated unequivocally its intention to permit sufficient imports to meet needs not supplied by domestic production.

For our farflung Defense Establishment the Defense Department favors a multisource supply for its varied fuel needs.

Fuel-consuming industries, forced to pay higher prices for all fuels because of artificially inflated costs for residual fuel oil, welcome the prospect of lower fuel prices which could very well result if import restrictions were eliminated.

The consumer, pure and simple, wherever he may be using fuels of all kinds in this country of ours is our concern. We lead the fight for all of them because we are concerned most directly. But let no one be mistaken. This is a matter that affects the pocketbooks of all consumers in terms of higher prices for the goods and services he buys.

Today we speak for more than Rhode Island, more than for New England. We speak for the out-of-work coal miner of West Virginia and Pennsylvania, who is being cruelly deluded into false hopes that somehow restricted imports on a competing fuel, like residual oil, are going to spell reemployment for him. We are speaking for him, and for his brother in Maine and Massachusetts, Vermont and Rhode Island, Connecticut and California, New York and New Hampshire, and Florida and Hawaii, whose livelihood is threatened by rising fuel costs which close down the plant where he works.

We are speaking for everyone who knows we are not going to help anybody in West Virginia or Pennsylvania by hurting someone in New England. But conversely, a more prosperous New England—which has as many and more depressed areas as coal-producing States—would benefit the general welfare of West Virginia and Pennsylvania.

He who studies the facts will find the whole truth. He will see the anomaly of the railroad industry, which itself led the parade away from coal fuel, urging others to use more and more coal, from whose transport the railroads derive so much of their revenue.

He will see the cruel injustice of the coal industry implying to unemployed miners that their jobs will return if only import restrictions are maintained.

He will see the restrictions generating a vicious inflationary price spiral that sooner or later will affect every single citizen.

He will see the importance of maintaining our international trade and diplomatic relations, and friendships, through a reasonable import-export program.

He will see the importance of keeping mutually advantageous relationships with countries like Venezuela, a prime source for residual fuel oils and many other petroleum products we must have.

He will see that imports constitute the only practical source for this fuel.

He will see that restrictions harm, rather than help, our national defense.

With the Office of Civil and Defense Mobilization there was a brief filed by the New England Council, the American Public Power Association and the Oil Users Association. Its detailed arguments for removal of quotas illuminates the issues of national security and the economic well-being of all 50 States.

I commend it to Senators, and I ask unanimous consent to have it printed in the RECORD at the conclusion of my remarks.

There being no objection, the brief was ordered to be printed in the RECORD.

(See exhibit 1.)

Mr. PASTORE. Mr. President, let us not fall for the fallacy of turning back the clock. Time and technology do not stand still. To yearn for the coal status quo, or the good old days, is to surrender to a dream and to invite disappointment and disaster. For I conclude with a fact that I emphasized in the beginning: In these restrictions upon imports of residual fuel oil there is no help and no hope for the miner. For the threat to his job does not come from that source.

America does not advance itself by creating roadblocks among the sister States. All that is negative. Progress is positive, sincere, sound, and mutual.

Unemployment is our universal ill and our common concern. Let us meet it with commonsense. Let us meet it with directness, not with detours. Let us employ all our resources of research to put men to work in the mining regions and the manufacturing regions of America. Let us conquer unemployment, not by delusions but by determination.

And conquer it we can.

EXHIBIT 1

A REQUEST FOR ELIMINATION OF RESTRICTIONS ON THE IMPORT OF RESIDUAL OIL

(Filed with Office of Civil and Defense Mobilization, Washington, D.C., by the New England Council, the Oil Users Association, American Public Power Association)

INTRODUCTION

This request is being filed jointly by the New England Council, the Oil Users Association, and the American Public Power Association.

The New England Council is a nonpartisan, nonprofit organization representing all aspects of the New England economy made up of representatives of industry, labor, educational and farm groups, as well as the six State governments. The council is concerned solely with regional development and with the improvements of the New England economy. The council was established in 1925 at the request of the six New England Governors and serves today as secretariat for the New England Governors conference.

The Oil Users Association is a nonprofit corporation which exists for the purpose of carrying on activities that promote an adequate supply of fuel oil and heating oils at fair and reasonable prices. It is national in scope, representing the interests of consumers in all parts of the Nation. Its membership consists of organizations such as manufacturing industries and utilities which are large users of energy producing fuels.

The American Public Power Association represents more than 1,000 local, public-owned electric utilities in 44 States.

A REQUEST FOR ELIMINATION OF RESTRICTIONS ON THE IMPORT OF RESIDUAL OIL

The New England Council, the Oil Users Association, and the American Public Power Association respectfully request the Office of Civil and Defense Mobilization to intercede with the President of the United States to rescind the residual oil provisions of the Presidential proclamation of 1959, under which imports of residual fuel oils are sharply restricted.

In support of this request, we submit the following facts and figures which we believe will prove conclusive that:

1. The restrictions on residual oil and the restrictions on crude oil are entirely different, insofar as the national security is concerned.

2. The inclusion of residual oil in the oil import program does not serve the intent of the program.

3. While demand for residual oil is slightly higher, the supply is dwindling in the United States because residual is uneconomic for U.S. refiners to produce.

4. Reduction in residual oil imports are not in the best interests of national security but do, in fact, have the opposite effect.

5. Current restrictions on residual oil imports work a hardship on major east coast industry, on public agencies and institutions, and on millions of private citizens in eastern coastal areas. By blocking normal competitive processes, they take millions of dollars out of the pocketbooks of U.S. consumers.

6. Artificially-induced high prices on residual oil in using areas result in placing much of east coast industry at a competitive disadvantage with other geographical areas and in world markets.

7. Residual oil imports do not offer injurious competition to the domestic petroleum industry, nor have they been responsible for the depressive effects in the bituminous coal industry.

8. The program is inflationary. Moreover, it retards economic growth.

In addition, we believe that reductions of residual oil imports cause unnecessary hardship to oil-producing Latin American neighbors and, therefore, are inconsistent with the administration's policies of inter-American cooperation.

BACKGROUND OF THE RESIDUAL FUEL OIL IMPORT PROGRAM

At the request of the OCDM, President Eisenhower issued a proclamation on March 10, 1959, which sharply restricted the imports of crude oil and its derivatives.

The reasons given were that (1) demand for petroleum products were increasing at a substantially greater rate than were the domestic reserves of oil, (2) the interests of national defense required that further exploration for oil in this country should be stimulated, and (3) excessive imports of crude oil from Latin America offered damaging competition to the domestic oil industry.

No mention was made of the competition with the bituminous coal industry, but it is believed that this was an important factor in the OCDM and Presidential actions. This was substantiated in hearings conducted by the Interior Department early this year.

Included in these restrictions were residual fuel oil as a derivative of crude, despite the fact that, due to U.S. efficiency in refining, residual oil is only a small percentage of American production and is inadequate to supply domestic needs.

The effects have been to place residual oil supplies below demand, increase prices to the American consumer (even while world prices of residual have been dropping), and place industry, institutions, apartment houses, and small users at a serious disadvantage since they lack the long-term contracts of larger users.

EAST COAST DEPENDENCE ON RESIDUAL OIL

For many years, residual oil has been the principal fuel of most east coast industry. It has also been the principal fuel of apartment houses, hospitals, and public buildings. Industrial power units and building heating units have been built around this fuel and cannot be change to other fuels, or where they can, only at prohibitive costs.

The reasons for this are clear. The delivered prices of coal to these areas are far higher than the price of residual oil, because of high shipping costs of coal.

For example, many industrial areas of the country cannot use coal economically. The logistics of coal to most of New England, for example, call for rail delivery to Hampton Roads, Va., reloading to ships, stockpiling at destination and ground transport for local delivery. Consequently, the shipping costs of coal per ton are actually greater than the price per ton at the mine-mouth.

This means that east coast industries have to pay a much higher delivered cost per ton than do those of the inland areas, where shipping is direct and low in cost. To use coal as fuel would seriously affect the competitive position of many east coast industries.

New England has historically depended on residual oil because it is the least expensive fuel available to them in an area where heating costs have usually run 50 percent above the national average. The restriction on residual imports has imposed an additional burden by disrupting normal competition among fuels.

Restrictions on these supplies, the deadening of competition among suppliers and the upward trend of prices in this sellers' market have created a hardship for many millions of consumers and have placed east-coast industry at a competitive disadvantage.

IMPORTS ONLY MAKE UP U.S. DEFICIT

The American refiner by and large does not find it economically advantageous to produce residual fuel oil. It brings him less revenue than his other products. He is continually trying to reduce the amount he produces. Thanks to innovations in refining technique he is succeeding. The yield of residual fuel oil from domestic refineries is being reduced each year. Residual produced from crude runs in the United States has declined from 425 million barrels, or 20 percent in 1950, to 332 million barrels, or about 11 percent in 1960. This reduction in yield has been built into our refineries.

At the same time, the demand for residual oil in the United States has shown a slight increase. But on the east coast, in particular, the demand for residual oil is increasing substantially. For example, between 1950 and 1960, the east coast demand rose from 255,426,000 barrels to 318,775,000 barrels.

It is obvious that as the supply diminishes, residual oil must be imported to fill the gap between domestic production and domestic demand.

The principal foreign source of supply is Venezuela. Venezuelan crudes give high residual yields. The average yield for all Venezuelan crudes is in excess of 50 percent. Many yield as high as 70 percent residual.

Unlike his U.S. counterpart, the Caribbean refiner wants to produce residual. For him it is not a waste product which he is anxious to eliminate. It represents over 50 percent of his product mix and he refines it at a profit.

It is a shocking fact that despite the shrinking supply of residual fuel oil in the United States and the abundance of residual flowing from the refineries of our South American neighbor, the Government of the United States has undertaken to restrict the imports of residual into this country since March 10, 1959.

It is time to face the facts on residual controls. They are a wasteful hidden cost of living for U.S. consumers. And even their proponents do not actually benefit from them.

RESIDUAL OIL IMPORT RESTRICTIONS SHOULD BE REMOVED

The following compilation of facts show conclusively why the restrictions on the import of residual oil should be exempted from the oil import program.

These facts clearly show that (1) the domestic petroleum industry cannot supply the current needs, (2) limited import quotas serve to keep residual oil prices unreasonably high, thereby affecting eastern industry and millions of consumers, (3) it is impossible for most eastern users to substitute coal for

residual oil, (4) imports of this oil cannot adversely affect national defense requirements, (5) removal of restrictions on this product would improve inter-American relationships, without seriously affecting any part of the domestic economy, and would thereby contribute to our national security.

RESTRICTION EFFECTS

Import restrictions have raised the price of residual oil—Cargo prices are higher

Since the imposition of import restrictions, the consumer is paying more for residual if he works and lives in areas dependent on this source of fuel.

A study conducted by the Office of Civil and Defense Mobilization shows the following increases on average cargo prices of residual fuel in the combined east coast region of the United States between the first quarter of 1959 and the first quarter of 1961:

	Cents more per barrel
For resale (sales to wholesalers)	11
For electric utilities	16
For other users	21

Although prices have risen generally, they have risen relatively more in the Florida and New England regions. It is significant that in the latest report, prices for Florida utilities went up 20 cents per barrel. The New England States had the following price increases:

	Cents more per barrel
For resale (sales to wholesalers)	18
For electric utilities	16
For other users	(1)

[1] Not available.

In this region the price of residual oil for resale has gone from a low of $1.97 in July 1959 to a high of $2.27 in March of 1961—a 30-cent increase.

The first of these increases came during the summer of 1959 after the import restrictions had time to take full effect. It is significant that midsummer is a period when oil prices are ordinarily low.

The fact that residual consumers other than wholesalers and utilities have had the higher costs foreshadows higher prices in the future for all users. Wholesalers and utilities generally are protected to a great extent against price increases by long-term contract. Other users, not similarly protected, must rely on periodic purchases in the open market.

Tank Wagon Prices Are Up

Under the impact of the import restriction program, posted tank wagon prices for residual at New England ports increased from $2.49 a barrel in July 1959 to $2.79 by June 1961.

In New York, tank wagon prices showed similar increases.

Platt's Oilgram on May 26, 1961 reported a specific example of the impact of import restrictions on consumer prices in New York. Offerings on bids to the New York Housing Authority ranged between .89 of a cent and 1.31 cents a gallon higher than those submitted in 1959 just prior to the imposition of the quota.

These increases amounted to 37 to 49 cents a barrel—from 17 to 24 percent higher.

On June 7, 1961, Platt's Oilgram reported further evidence of the impact of import restrictions on residual prices:

"NO. 6 RETAIL ADVANCES SEEM READY IN NEW YORK CITY AREA

"NEW YORK, June 6, 1961.—Retail prices for heavy fuel appear poised for advances in metropolitan New York City area following recent 8 cents per barrel price hikes at yard level of supply (see June 2 Oilgram).

"One large retailer says he is making blanket increase of 0.3 cent per gallon. (12 cents per barrel) in his retail prices for No. 6 fuel, effective June 8. Several of other large retailers plan price advances within next day or two.

"Upward trend in retail listings probably will have greatest impact on low side of current wide price range. Current representative postings are 7.4 cents per gallon, but sources say discount offerings range as low as 6.24 cents per gallon. In some cases, lower prices have been heard."

Reduced discount means further increased prices

Discounts on posted tank wagon prices have become narrower, since import restrictions have been imposed—raising prices further. Table I shows price differentials quoted in contract awards for 15 public agencies in the Greater Boston area. As the table indicates, not only did tank car prices increase by 25 cents a barrel, but they also had a further price rise of 23.4 cents based on weighted averages taking into account shrinkages of discounts. The users shown in the table—hospitals, schools, and other public institutions—paid 48.4 cents a barrel more on their fuel bill as a result of import of restrictions on residual.

Price inequities are worse than the statistics indicate

Most surveys and price studies on residual fuel oil prices are based on averages. But nobody pays an average price. During a period when the average price of residual went up 18 cents, the price paid by Middlesex Sanatorium (table I) increased 62 cents a barrel.

Who pays high prices rather than the average price?

The smaller consumer who does not have a long-term contract and must depend on spot purchases.

Consumers such as the New York City Housing Authority and the public agencies in Boston, who are required by local ordinance to purchase fuel for their annual requirements through public bidding.

These buyers suffer from the fact that spot cargo markets have dried up. The spot market is an important element in any commodity market; it acts as a balance wheel and regulates price on both the high and low sides. Without spot offers, the contract price becomes the floor or pegged price.

With artificial restrictions such as those imposed by import controls on residual, the last barrel available is bid to a high price. Unfortunately, it is usually the small buyer—least able to afford high prices—who is forced to bid for the last barrel.

TABLE 1.—*Results of public bidding—15 Greater Boston public agencies*

Agency	Quantity in barrels	Time of bid	Amount per barrel under posted tank car		Difference, 1960 versus 1961 per barrel	Posted tank car increase, 1959 and 1960 (per barrel)	Total increase since import restrictions (per barrel)
			1960	1961			
Town of Brookline	20,000	Apr. 15	−$0.33	−$0.09	$0.24	$0.25	$0.49

But the large buyer suffers too. Ordinarily he buys fuel under 5- or 10-year contracts. With an assured supply, he can afford to make capital outlays for large-scale transportation, unloading, and storage facilities. Today, uncertain of future deliveries, he is discouraged from designing and building proper facilities for expansion, so that the consumer is being deprived of the savings that follow from capital outlays on such equipment.

Restrictions pad the consumer's electric bill

In the end, restrictions on residual imports cost everybody money.

Table II shows the largest electric utility users of residual fuel oil on the east coast.

All of these companies have clauses in their industrial rates which provide for them passing along to their customers changes in fuel costs as they occur. All of the companies except the Long Island Lighting Co. also have provisions for passing along costs to residential users of electricity.

The 15-cent price increase in residual of July 1960 has already raised the electric bill of 4.9 million consumers. Based on 1959 oil usage, the additional cost to consumers for electricity purchased from these companies is $4,280,740.

Restrictions destroy benefits of competition

One of the most serious consequences of import restrictions on residual fuel oil is that they have restrained competition among suppliers. This has cost consumers money. It has also hurt the taxpayer.

TABLE 2.—*Largest electric utility residual oil users, east coast, 1959*

Company	1959 oil usage, barrel	Number of customers	Cost of 15-cent-per-barrel increase on 1959 usage	Company	1959 oil usage, barrel	Number of customers	Cost of 15-cent-per-barrel increase on 1959 usage
Consolidated Edison Co. of New York	8,455,000	[1] 2,796,000	$1,268,255	Public Service Co. of New Hampshire	1,462,900	[3] 173,455	$219,430

[2] May 31, 1961.
[3] Average 1960.
[4] Dec. 31, 1960.

For example, in the hearings before Secretary Udall on February 20, 1961, the General Services Administration testified that since restrictions were imposed it has asked for bids and got only one bidder. This has proved expensive.

General Services Administration said that, from this cause, its costs had increased $660,000 in the last fiscal year in the Washington, D.C., area alone.

In Jacksonville, Fla., the Department of Electric and Water Utilities has been faced with the same problem: only one bidder, with resultant increased costs of over $430,000 in 1961.

Today no buyer is able to approach a new source for his oil requirements. Sellers are unable to solicit new accounts. The normal arm's length between buyer and seller is disappearing rapidly in the seller's market.

Closed door on new businessmen

Not only has the program restrained competition among sellers; it has also made it impossible for a businessman to go into the residual oil business.

Allocations are available only for importers who imported in 1957, or terminal operators with a history of throughputs for 18 months prior to the start of an allocation period. Under these requirements a terminal operator would have to deal entirely in domestic residual for the period required by the regulation. In a tight market, with a price premium on domestic residual, this is a practical impossibility.

Restrictions have bred profiteering

It is now common knowledge that import restrictions on residual have resulted in profiteering wherein the owner of residual covered by an allocation can resell his cargo at a 30-cent-per-barrel profit without ever having possession of it. The increased costs created by this type of trading are, of course, passed along to the consumer.

Restrictions on residual imports raise energy costs generally

Increased costs of residual oil have brought increased prices of competitive products—raising energy costs generally.

On October 24, 1960—since the imposition of restrictions—the coal-carrying railroads announced a 7-cent-per-ton increase in freight rates for bituminous coal which will affect approximately 74 percent of all coal produced in this country.

The gas producers have flooded the FPC with rate increase petitions. Today the Commission is stalled by a large backlog of cases.

Fuels other than residual also increase in price as a result of the price parity clauses in fuel requirement contracts. Under such contracts, the price of one fuel is geared to the price of another. When residual oil goes up, for example, the price of gas or coal goes up proportionately.

The following statement by New England Gas & Electric Association describes such a contract:

"The contract between the two companies calls for the price of interruptible gas at each location shall be midway between the cost to you of equivalent competitive fuel and the cost to us of interruptible gas."

Boston Edison has this to say about such a contract:

"One of the determinants of the price we pay for gas boiler fuel is the average price paid for oil and coal. This means that an increase in the price of residual oil raises the price of gas."

Because of such purchasing contracts, increases in the price of residual oil have meant increases in the cost of other fuels to some large users.

Restrictions increase U.S. manufacturing costs and damage our competitive position

Today in Boston and New York, manufacturers are paying 30 cents to 33 cents more a barrel for residual oil than their foreign competitors pay outside of the United States.

Residual oil sold in east coast ports as bunker fuel for ships must compete with foreign oil at world oil prices. Before the imposition of import controls there was only one posted price for bunker oil. However, in July 1959, 3 months after the imposition of import controls, there appeared an addition price quotation—bunker oil for "domestic" trade. The price premium on this oil in July 1961 is 30½ cents per barrel. This is the same oil coming from the same tanks but sold at a different price because in one instance (international trade) the oil is not under the import restriction program and in the second case (domestic) it is.

Current contract bunker prices, east coast ports, dollars per barrel export terminal, duty, and taxes

	Domestic			International (bonded)			Difference, domestic versus international
	Posted price	Discount	Net price	Posted price	Discount	Net price	
Boston	$2.71	$0.18	$2.53	$2.405	$.18	$2.225	$0.305
New York	2.62	.10	2.52	2.395	.18	2.215	.305
Philadelphia	2.62	.10	2.52	2.395	.18	2.215	.305
Baltimore	2.62	.10	2.52	2.395	.18	2.215	.305

This 30½ cents a barrel differential can also be substantiated by constructing a derived price for cargo purchases based on known data.

Platt's Oilgram, May 4, 1961, stated: "So-called going price for heavy fuel oil in the Caribbean is 30 cents off posted or $1.70 a barrel."

Tankers are being chartered for the Caribbean to Boston and New York runs at American Tanker Rate Schedule minus 60 percent which is 18 cents and 17 cents a barrel for the two ports respectively. Taking into account a duty of 5¼ cents a barrel, this oil should be laid down in Boston at $1.93 a barrel and in New York at $1.92.

But because of import restrictions, cargo buyers are paying $2.26 a barrel and $2.25 a barrel respectively.

In the face of steadily decreasing world prices on residual oil, U.S. prices have been increasing.

The net result of restrictions on residual oil has been to deprive the U.S. consumer and the U.S. manufacturer of the benefits of this decline in world prices. The nationwide increase of $167 million [1] in the direct cost of residual fuel oil in 1960 alone tells only part of the story; it does not reflect such indirect increases as, for example, the rise in labor costs because of escalator cost-of-living clauses.

The artificial price differential between residual in the United States and abroad is one more handicap for the U.S. businessmen attempting to compete effectively against foreign competition in domestic markets. This has had the effect in some instances of accelerating the plans of U.S. industries to locate facilities abroad.

[1] Calculated on basis of 30 cents per barrel.

DOMESTIC OIL INDUSTRY

Residual import controls do not help the domestic oil industry

Those who argue that residual must be controlled to maintain a healthy petroleum industry base their argument on the belief that controls help to maintain the price of crude at the wellhead.

In a letter to the New England Council dated October 15, 1960, Mr. Elmer F. Bennett, then Undersecretary of the Interior, made the following comment concerning the objectives of including residual oil in the oil import program:

"Residual fuel oil is included in the oil import program solely because of the relationship of that product to the domestic petroleum industry. Domestic production of residual fuel oil in districts I to IV totals 60 percent of domestic demand in those districts in the year 1959. This volume represents a considerable percentage of the gross revenue received by domestic refiners and, consequently, has a direct bearing on the price the oil purchaser may pay for domestic production of crude oil. Any material reduction in the price of residual fuel oil resulting from excessive imports would probably be reflected in the price of crude oil at the wellhead."

Let's examine this argument. Refiners in the Texas Gulf and Louisiana Gulf Districts use domestic crude almost exclusively. Their percentage yield of residual is currently running at the rate of 7.6 percent for the Louisiana gulf and 7.4 percent for the Texas gulf.

The Independent Oil Producers Association reports indicate these refiners currently are paying an average $3 a barrel for crude at the wellhead. Assuming 25 cents a barrel for transportation to the refinery, the total cost of crude to them becomes $3.25. The low-cargo price for residual at the gulf is now $2.20. With a residual yield of 7½ percent, this loss, on a barrel of crude, is 7.9 cents.

If, as a result of the removal of import restrictions, the price of residual at the gulf were to drop 10 percent to $1.98, the loss per barrel of crude resulting from the decline would increase to 9.5 cents. According to the Interior Department's theory, this would be 1.6 cents less revenue per barrel for the purchase of crude. This is five-tenths of 1 percent of the current crude price, a very small proportion to trace back to the raw material from the byproduct. The effect on domestic refiners of the price fluctuations of a major product such as gasoline obviously obliterate any effects of a change in the price of residual.

In the light of these facts, assigning a major role to residual in buoying up the price of crude oil is like saying the price of sawdust affects the price at which a sawmill purchases raw timber.

To be sure, as the price of the byproduct fluctuates, the net profit of the producing industry also fluctuates to same extent. But the impact of the fluctuations in the price of residual is minimal—quickly lost in the major change caused by price fluctuations in the principal petroleum products, gasoline and light distillates.

Residual restrictions do not encourage oil exploration

Let's examine the Interior Department's argument further. The theory supposes that residual restrictions, by buoying the price, help to stimulate oil exploration.

Since residual oil cannot be a profitable factor in the domestic production process, domestic producers would not in any circumstance explore simply to supply the residual market.

If, in fact, there is any connection between demand and exploration, the demand for other products more profitable determines capital outlays for oil exploration. In 1959, for example, the oil industry cutback on exploration because of the oversupply of crude and the business recession of the previous year.

Let's go one step further. How about the refineries that produce no residual at all? There are many of these in the United States. Inasmuch as they represent the most advanced refinery design, still more refineries in the future will be similarly designed to eliminate residual as a byproduct.

Should we turn back the clock and make them produce residual? The argument is patently ridiculous.

TABLE 3.—*Residual oil data, 1949–60*

[Thousands of barrels]

Year	Residual oil demand [1]			Exploratory wells drilled, United States [3]
	Total, United States	East coast	New England [2]	
1949	496,021	211,482	50,658	7,294
1950	553,793	255,426	64,236	8,554
1951	564,397	262,784	60,575	10,302

A more constructive approach to a healthy oil industry

What do we advocate instead? We advocate removing the price supports on residual oil created by the import program. This will encourage domestic refiners to speed up the installation of coking facilities—with the end in view of creating a more profitable product mix.

This policy would benefit the residual oil users on the east coast, eliminating the price penalty they are now forced to pay. It would tend to help conserve America's fuel reserves by using residual refined from Venezuelan crude rather than U.S. crude. And it would help the domestic refiner by eliminating his historical losses on the sale of residual.

QUOTAS AND COAL

Residual restrictions cannot relieve unemployment in coal mine areas

Even though the Government has not justified the restriction on the basis of its effect on the coal industry, we feel it is important to examine this aspect of the question.

Coal interests have consistently claimed that importation of residual oil has resulted in unemployment in the coal mining regions of the United States. That this claim is not true is best shown by the data provided by the coal industry in its "Bituminous Coal Data, 1960." In 1950 the bituminous coal industry employed 415,582 men and produced 516,311,000 tons of coal. The output per man-day was 6.77 tons. Ten years later the industry employed 159,100 men and produced 413 million tons at a productivity rate of 13.25 tons per man-day. In the 10-year period over a quarter of a million men have left the industry, and the output of those that have remained has doubled.

During the same 10-year period the use of residual oil in the United States has remained relatively constant, 554 million barrels in 1950 and 556 million barrels in 1960. A large portion of these sales are made in areas where coal is not competitive; for example, many parts of New England, Florida, and the west coast. In addition, some markets for residual—ships and the oil industry itself—are beyond the reach of the coal industry and have been for many years.

TABLE 4.—*Bituminous coal data, 1950–60*

Year	Production (net tons)	Men employed	Number of mines	Average number of days worked	Net tons per man per day	Percent of underground production		Percent of total production	
						Cut by machine	Mechanically loaded	Mechanically cleaned	Mined by stripping
1950	516,311,053	415,582	9,429	183	6.77	91.8	69.4	38.5	23.9
1951	533,664,732	372,897	8,009	203	7.04	93.4	73.1	45.0	22.0

Source: U.S. Bureau of Mines

The unemployed coal miner should not be deluded that his plight is due to unrestricted imports of residual oil, especially since there has been no increase in the use of residual, and the productivity in the coal industry has been doubled through mechanization. In underground mines the use of mechanical loaders has increased from 67 percent to 85 percent in terms of coal produced and mechanical cleaning apparatus from 35 percent to 63 percent. At the same time equipment improvements in strip mining have been dramatic, particularly in the size and capacity of shovels used to remove overburden.

Productivity in the bituminous coal fields per man day worked has just about doubled from 1950 to 1960. In order to keep the same number of miners at work it would be necessary to double the demand for coal. This would require bituminous production of an additional 413 million tons per year. This theoretical increase is equivalent to 10.6 times the total permissible imports of residual oil for the year ending March 31, 1962.

The residual market is relatively inflexible

Could coal take over existing residual markets?

There are severe limitations on the ability of an industrial type fuel user to convert from one fuel to another.

As a practical matter, most heavy fuel users cannot convert to other fuels without prohibitive expense.

A survey by The New England Council in June, 1961, of its industrial members reveals that out of 70 manufacturing companies 67 used residual oil extensively, 2 coal, and 1 gas. All of the oil users state they could not convert to another fuel without prohibitive cost. Four said it would be impossible to switch to another fuel or would take so long they would have to go out of business.

A few steam powerplants—in areas where oil, coal, and gas have been competing for the business—are equipped to burn more than one fuel.

Having burned oil for a number of years, a powerplant equipped to burn more than one type of fuel would find the incremental cost of additional labor and maintenance required to return to coal very high. These additional operating costs raise the conversion price parity for coal substantially above the point where conversion would take place on a straight British thermal unit basis.

As noted above, a relatively small number of residual users are able to burn other fuels. The Interior Department has estimated possible conversion might amount to 6 million tons of coal per year. Continued improvements in productivity or a few added work hours by the industry would produce the necessary tonnage. This amount of coal could be produced without putting a single unemployed miner back to work.

Why demand for coal has declined

Two factors are sufficient in themselves to account for the entire decline in demand for coal since the 1947–49 period.

First, the railroads, which used 114 million tons of coal in 1947, have switched almost completely to diesel fuel. On February 28, 1960, the Wall Street Journal noted that use of coal by the railroads had declined to about 1.7 million tons for the year 1960. Here is a single giant former coal customer whose operating changes have accounted for a loss of volume of more than 110 million tons a year or nearly half the total decline in coal demand since 1947. Even the coal-carrying railroads converted their equipment almost totally to diesel. This was done in spite of the fact that coal for years has been the best single revenue producer for the railroad industry, and despite the fact that the coal-carrying railroads are the most profitable in the industry.

Second, millions of families throughout the country stopped shoveling coal into basement furnaces and installed oil burners or gas burners in their homes. In 1947 the figure for retail coal deliveries was 137 million tons; in 1960 the figure was 29 million tons, a loss of 108 million tons per year.

The demand which coal has lost since 1947 would have been lost in any case. The loss is unrelated to residual imports.

Why should coal be protected?

We have shown that unemployment in the bituminous coal industry is due to technological change in mining methods; that residual oil has not been a factor in principal market losses which the coal industry has encountered.

What is the future of the coal industry? The growing market for coal is in the power generating plants of electric utilities. In this area coal has made substantial gains since 1947. In 1947 utilities used 90 million tons of coal. In 1960 electric power utilities used 165 million tons of coal.

The National Coal Association's publication Steam Electric Plant Factors, 1959, having previously defined the coal competitive area as including New England, the Middle Atlantic region, and the East North Central region, presents the following statements and facts:

"Within the above the defined coal competitive areas coal held 83 percent of the total steam electric utility fuel market in 1959. This may be compared with 84 percent in 1958, 85 percent in 1957, 86 percent in 1956, 85 percent in 1955, 83 percent in 1951, 81 percent in 1952 and 1954, 80 percent in 1953. The following tabulation shows the percentage of the coal competitive market assignable to coal, oil, and gas by years since 1950. (Percentages were derived on a British thermal unit basis:)

	1951	1952	1953	1954	1955	1956	1957	1958	1959
Coal	83	81	80	81	85	86	85	84	83
Oil	7	7	8	6	5	4	4	5	6
Gas	10	12	12	13	10	10	11	11	11
Total	100	100	100	100	100	100	100	100	100

The National Coal Association predicts that the utilities will use 185 million tons of coal in 1961. In "Bituminous Coal Facts, 1960," the coal industry estimates that electric utilities will burn 475 million tons of coal in 1975 to produce 65 percent of their power output, and that by the year 2000, consumption will be 600 million tons a year.

Based on these potentials, it is only fair to ask why this industry, which is and has been supplying between 80 percent and 85 percent of the fuel requirements for the electric industry in the coal competitive area, should demand or expect production, in the form of legislative or governmental fiat, from competition from other fuels.

Coal's real problem is not residual oil but transportation costs

The coal industry has done an outstanding job of keeping down the cost of coal at the mines in the last 15 years of inflation. However, the mine-muth cost of coal is only a portion of the total cost of coal to users.

In many areas of the United States coal has never been competitive with oil or any other fuel, because of the cost of transportation from the mine to the user. And it never can be.

In such areas, transportation costs for coal exceed by a large amount the cost of coal at the mine.

A typical example is the case of one large user in New England that buys coal at the mine for under $5 a ton. Rail freight from West Virginia to Hampton Roads, Va., plus vessel transportation to Boston makes the total transportation bill approximately $5.57. Transportation costs do not stop there. The coal must be unloaded from the collier, stocked out into a coal field and then reloaded onto a conveyor belt, put through a crusher, loaded into silos by belt, and then put through mechanical pulverizers. All of this equipment is costly to purchase and install and expensive to maintain.

Contrast this with the current price of $1.16 a ton for delivering residual oil from Cardon, Venezuela, to Boston.

In the first instance, coal costs $5.59 a ton for delivery; in contrast, oil costs $1.16 a ton. Putting this on a ton-mile basis merely magnifies the discrepancy. Coal costs 0.6 cent per ton-mile, oil 0.05 cent per ton-mile. The coal rate per ton-mile is 11.9 times that for oil.

A T2 tanker holds approximately 100,000 barrels of residual oil. The transportation bill for such a tanker bringing a full cargo from Cardon, Venezuela, to Boston, at present rates, would be $17,800. In terms of British thermal units 100,000 barrels of residual oil is about equivalent to 22,000 tons of bituminous coal. To transport 22,000 tons of coal from the bituminous fields of West Virginia to Boston would cost $122,000, over $100,000 more than the equivalent in residual oil shipped from Venezuela, despite the fact that Venezuela is 1,382 statute miles farther away.

High transportation costs is the coal industry's real problem, one which is beyond its control. Because of high transportation costs, the area where coal is competitive is going to be subject to changes. These are inevitable. In some areas the coal industry has never been able to compete and in some areas it has been on the competitive borderline compared with other fuels. It must inevitably lose other areas because of the high cost of transportation.

This does not mean that the coal industry's total marketing prospects are diminished in any sense. The large utility consumption within low-cost shipping distances of the coal mines represents a bonanza for the bituminous coal industry.

The unemployment problem is being attacked other ways

Nobody questions the vital importance of solving the unemployment problem in this Nation's coal mining regions. But everyone should agree that the problem should be solved in a constructive and effective way.

Public Law 87–27 passed by the 87th Congress on May 1, 1961, known as the depressed area bill provides for the following appropriations: $100 million for loans for public facilities; $75 million for grants for public facilities; $4,500,000 annually for technical assistance to depressed areas; $4,500,000 annually for training of unemployed workers; $10 million annually for retraining and subsistence payments.

The cost of this program will be shared by the whole Nation including the residual oil users on the east coast, who also must bear the cost of the restriction program.

In an effort to create new markets for coal, the Bureau of Mines in the Department of Interior has an annual appropriation of $7,750,000 this year, and has an estimated budget of $8,168,000 for fiscal year 1962 for coal research. In addition to this, the Federal Coal Research Act created the Office of Coal Research, also in the Department of Interior, to develop new and more efficient methods of mining, preparing, and utilizing coal. This is essentially an attempt to deal with coal's short-range problems. At the same time, the Bureau of Mines is concentrating on long-range research. The cost of both of these programs is being borne nationally.

Perhaps the most constructive approach to a sound economic solution to unemployment was advanced by the President in his state of the Union message this year. On May 25, President Kennedy stated that he was transmitting to Congress a new manpower development training program to train or retrain several hundred thousand workers in new occupational skills. This program is to extend over a 4-year period in order to retrain workers with skills made obsolete by automation and industrial changes. The unemployed will be taught the new skills which new processes demand. The President said this was a positive answer to the challenge of technology.

Capacity of coal industry in times of emergency

The coal industry repeatedly has argued that in a national emergency it would be unable to provide the energy requirements for which it would be called upon. This argument does not stand up.

Present residual fuel oil allocations allow for the importation of 461,427 barrels per day. This is the equivalent of 104,000 tons of coal a day or 38 million tons per year. In 1959 the coal industry exported 37,226,948 tons of coal. Most of the export coal being shipped overseas is exported by us for the same reason that we import residual oil. Metallurgical coal in Western Europe and in Japan is in very short supply as is residual oil in this country. For this reason the governments of those nations, national security arguments notwithstanding, have fostered the importing of this coal from the United States.

In the event of a national emergency, limitations on the exportation of coal would offset any loss of imports of residual oil.

Restrictions on residual are not necessary to create additional coal mining capacity.

The coal industry already has sufficient capacity to meet any national emergency. The capacity of the bituminous coal industry as it now exists is best described by the National Coal Association in its publication, Bituminous Coal Data, 1959:

"As it is impossible for all mines to operate every working day in the year, a conservative figure of 280 for calculating potential capacity was suggested some years ago by the coal committee of the American Institute of Mining and Metallurgical Engineers. The average output per day worked in 1959 was 2.1 million tons which, if applied to 280 days, gives an annual potential

output of 588 million tons compared with the actual production of 410 million tons."

This represents a reserve capacity in the bituminous coal industry of 43½ percent without any further mechanization in existing mines.

What has been the effect of the restriction program on the coal industry?

Residual oil and coal compete for sales to only three major classes of consumer—industrial users, the space heating market, and electric utilities. Industrial use of residual fluctuates not with oil prices but with the state of the economy. Consumption of residual for space heating shows a steady increase from year to year. Only electric utility use of residual appears responsive to oil price changes.

A source of data on the amount of switching between coal and residual within the electric utility industry since the restrictions have been in effect can be obtained from the Federal Power Commission, table V.

From this it would appear that coal's participation in District I electric utility fuel consumption changed from 72.7 percent in 1959 to 74.4 percent in 1960, and oil from 16.7 percent in 1959 to 14.7 percent in 1960. Based on the total fuel requirements for 1960 (90.2 million coal equivalent tons), this represents a gain of 1.5 million tons for coal and a loss of 1.8 million equivalent tons for oil. The balance of .27 million tons was picked up by gas.

Assuming increased coal consumption to be an objective of the restriction program, let's consider at what price this increase was bought.

TABLE 5.—*District I: Consumption of fuels by electric utilities*

	Actual units			Million tons of coal equivalent [1]				Percent participation		
	Coal (million tons)	Oil (million barrels)	Gas (billion cubic feet)	Coal	Oil	Gas	Total	Coal	Oil	Gas

[1] Conversion factors: Oil, 0.240 tons bituminous equivalent; gas, 0.0395 tons bituminous equivalent.

Source: Federal Power Commission.

We have concluded that the price of oil in the United States is now 33 cents per barrel higher than the world price due to the restriction program. Applied to 1960 east coast demand 318.7 million barrels, this increase represents an additional cost of $106.2 million paid by users of residual oil to achieve increased consumption of 1.5 million tons of coal through utility conversions. This amounted to a penalty of over $70 for each ton of coal converted.

As Representative HASTINGS KEITH, of Massachusetts, has pointed out, it would have been better for the Nation as a whole if there had been no restriction program and someone had bought this coal at the mine and thrown it away.

EFFECT ON TRADE POLICIES

Unwarranted restrictions violate our international trade policies

Since World War II, the United States has taken a leading role in liberalization of foreign-trade relations. Removal of trade restrictions has been a stated policy of our Government, and still is. One expression of this comes from OCDM, in reporting the Treasury Department's views on this policy: "The Treasury Department takes the position that the policy of encouraging the expansion of international trade on a nondiscriminatory basis is one from which the United States derives reciprocal benefits."

Import restrictions on residual fuel oil violate this policy before the world. If the national security were indeed benefited, such repressive measures might be justified, but it is not benefited. Therefore, continuation of these restrictions would be a direct slap at those friendly nations whose residual oil is a major item of export.

Specifically, this discrimination is especially difficult for Venezuela, which has been an active supporter of U.S. foreign policy in Latin America. Trade restrictions on residual oil primarily affect Venezuela, and they also serve to limit dollar income that would otherwise be available to buy more American goods.

It is not extraneous to this point that the growth of anti-American feeling, demonstrated in the hostility to former Vice President Nixon in 1958, might be aggravated by any continuing feeling of discrimination against this country. Nor is it to be forgotten that the Venezuelan Government asked Adlai Stevenson in June to end the abuses and injustices of U.S. oil restrictions. In a country where a major proportion of petroleum derivatives is residual oil, removal of restrictions on this product could have considerable effect.

A nation which recognizes its responsibility to less developed countries in the form of money grants and technical assistance should not overlook the advantages inherent in sincere stimulation of trade with those countries.

CONCLUSION

We have shown that the restrictions on residual oil (a) do not enhance the national security, but have the opposite effect, (b) discriminate against important industrial areas of the country, (c) increase costs to public buildings, institutions, and public agencies, (d) take millions of dollars out of the pockets of U.S. consumers, and (e) violate international trade policies.

We have shown also that imports of residual oil have no adverse effects on the domestic petroleum industry, are not responsible for the distress in the coal industry, and continued restrictions cannot be used to rectify that distress.

We, therefore, request that the OCDM recommend to the President of the United States that the restrictions on the import of residual oil be rescinded.

Mr. COTTON. Mr. President, while this is September and we are in Washington, I should like to be able to transport the Congress through time and space to New Hampshire in December. If I could impress all Senators vividly with the bone-chilling cold of a New England winter, and then send all of them a New England fuel bill, I believe they might see as clearly as I do the folly of import restrictions on residual oil.

Unfortunately, I am not an artist at winter landscape, so I had best heed the warning of Mark Twain, who once said that weather is a literary specialty and no untrained hand can turn out a good article on it.

Let me, instead, by submitting a few facts, convince Senators of the folly of import restrictions on residual oil.

In New England our fuel bills in the past have usually run 50 percent above the national average. Residual oil has for many years been the principal fuel of apartment houses, hospitals, and public buildings there.

Residual oil has dominated this market because it is the most economic and convenient fuel available. The coal industry, which has been one of the major forces seeking to choke off the supply of residual oil imports to New England, is at a severe disadvantage in this market. To serve New England, the coal industry must first deliver coal by rail to Hampton Roads, Va. There the coal must be loaded on ships. At its destination it must be stockpiled. Then it must be transported in trucks to its destination. Today, transportation costs for delivering coal to New England are greater than the cost of coal at the mine.

Largely because of such differences in transportation costs, New England can buy energy in the form of residual oil from Venezuela far cheaper than in the form of coal. The New England Council

has supplied some figures which dramatize this point.

A T–2 tanker, holding approximately 100,000 barrels of residual oil, can bring a full cargo from Cardon, Venezuela, to Boston, for $17,800, at present tanker rates. In terms of the actual energy supplied, 100,000 barrels of residual oil are about equivalent to 22,000 tons of bituminous coal. To transport 22,000 tons of coal from the bituminous fields of West Virginia to Boston today costs about $122,000. The difference amounts to nearly $105,000 more than the cost of equivalent energy in residual oil shipped from Venezuela.

The temptation may be great for the coal industry to try to force New England to burn more coal and less residual oil, but economically speaking it is New England that is going to have to carry out the ashes.

Import restrictions on residual oil have unquestionably raised New England's fuel bill. This means that money which schools are spending for fuel might be used for teachers' salaries. This means that money which hospitals are spending for fuel might be used to lower the cost of patient care. This means higher rents and higher costs to the taxpayers for the operation of public buildings. And in both summer and winter it means higher operating costs for the New England manufacturers.

We in New England have our own full share of unemployment. We, too, have areas of chronic unemployment. So we can fully understand and sympathize with the desire of the coal miner to find work. But it is the height of folly to attempt to cure unemployment in coal mining areas by raising manufacturing costs and thus depressing areas elsewhere.

I am hopeful that it will not take a New Hampshire winter to convince the Congress of the cold fact that residual oil import restrictions accomplish nothing constructive and work unfair hardships on entire sections of the country. The time has come for them to be removed.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a series of letters on this subject, which I have received from various persons and corporations in the State of New Hampshire vitally interested in the problem of residual oil.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PUBLIC SERVICE CO. OF NEW HAMPSHIRE,
Manchester, N.H., June 21, 1961.

Mr. GARDNER A. CAVERLY,
Executive Vice President,
The New England Council,
Boston, Mass.

DEAR MR. CAVERLY: We present herewith certain information regarding the use of residual oil by Public Service Co. of New Hampshire and its subsidiaries.

1. Public Service Co. of New Hampshire and subsidiaries are engaged principally in the sale of electricity to areas in the State of New Hampshire in which approximately 80 percent of the State's population resides. They supply essential services in the broadest sense of the word.

2. Currently the amount of residual oil used on an annual basis is approximately 1 million barrels.

3. The net increase in price of residual oil between April 1, 1959, and the present time has been 16 cents per barrel.

4. The annual increase in cost because of the increase in price is currently running at the rate of about $160,000 per year.

5. Approximately 30 percent of our total fuel burning electrical generating capability is not equipped to burn any fuel other than residual oil.

We believe there are at least two excellent reasons for liberalizing the restrictions on the importation of residual oil. One of these applies solely to New England and the other has national implications.

The one which applies to New England relates to the fact that New England produces no fuel of its own and that all of its domestic fuel, whatever kind, is relatively expensive because of high transportation charges. This serves to place New England at an economic disadvantage when compared with most other sections of the country.

The one which applies on a national scope relates to the subject of fossil fuel supplies in general. Such supplies whether they be coal, oil or gas are not inexhaustible, and it would seem like good planning in a world such as that in which we now live to draw on and deplete foreign reserves rather than our own. Obviously, one way to bring this about is to use more foreign residual oil.

We hope New England Council will continue its efforts to ease the cost of fuel to the people of New England.

Sincerely yours,

A. R. SCHILLER,
President.

PUBLIC SERVICE CO. OF NEW HAMPSHIRE,
Manchester, N.H., June 19, 1961.

Re use of residual fuel oil.
NEW ENGLAND COUNCIL,
Statler Building,
Boston, Mass.

GENTLEMEN: Public Service Co. of New Hampshire and its subsidiaries, New Hampshire Electric Co. and Kittery Electric Light Co., operate an integrated system furnishing electric service in 182 New Hampshire cities and towns, 6 towns in Vermont, and 6 towns in Maine. The system supplies the requirements of 173,000 customers including 385 large light and power or industrial customers. Many of the latter are contributing directly or indirectly to the defense effort.

All of the company's steam electric generating stations are equipped to burn residual fuel oil, and certain units are not equipped to burn any other fuel. At the present time, approximately 1 million barrels per year of residual oil are being burned in the company's plants.

Since April 1, 1959, the price for residual oil paid by the company has increased 15 cents per barrel. At the current consumption rate, this represents an increase in expense of approximately $150,000 per year.

In the final analysis, all expenses of a regulated public utility are paid by its customers. Consequently, anything which tends to increase utility expenses is of concern not only to the utility but also to the customers it serves. For this reason, we believe that in the best interest of our customers and the area we serve, import restrictions on residual fuel oil should be canceled.

Very truly yours,

ROGER G. MOSSCROP,
Executive Vice President.

JUNE 21, 1961.

Mr. GARDNER A. CAVERLY,
Executive Vice President,
The New England Council,
Boston, Mass.

GENTLEMEN: The Nashua-New Hampshire Foundation is a nonprofit trust.

It was formed in 1948 to improve the economic situation of Nashua by promoting industrial development.

At the time of its inception, the foundation acquired title to 2,500,000 square feet of industrial buildings, most of which were vacant.

These have since been occupied by 26 diversified industries including Sanders Associates, Inc., Sprague Electric Co., several shoe shops, machine shops and various other plants.

The foundation operates a steamplant which provides steam for heat and process to these industries.

This plant consumes 60,000 barrels of No. 6 fuel oil annually.

The cost of our No. 6 fuel oil has increased 25 cents per barrel since April 1, 1959, making an annual increase of $15,000.

The steamplant is not a dual fuel fired plant. We can use only No. 6 fuel oil.

We are thankful that the council has taken an active part in the efforts to have the restrictions on fuel oil imports removed.

Very truly yours,

THOMAS Z. WINTHER,
Manager.

SPAULDING FIBRE CO., INC.,
North Rochester, N.H., June 20, 1961.

The NEW ENGLAND COUNCIL,
Boston, Mass.
(Attention: Mr. Gardner A. Caverly, executive vice president.)

DEAR SIR: Our company has three small plants in New Hampshire which are located in Dover, Milton, and North Rochester. We employ approximately 350 people and manufacture specialty papers and fiberboards for industry. We then fabricate these basic products to specifications and are used as components by other manufacturers.

During World War II much of our effort was engaged in making fiber shoe counters for the Armed Forces, gas mask face forms, shell wadding, shell ring grommets, and containers for handling explosive powder.

In 1960 we used 1,253,000 gallons of bunker C oil.

The price increase since April 1, 1959, has totaled $0.003 per gallon.

This has increased our costs $3,771 annually.

One of our plants can be converted back to coal at considerable loss of downtime and expense. The other two cannot be converted to coal.

We sincerely hope the efforts of the New England Council will be successful in removing the restrictions on the imports of this type fuel oil.

Very truly yours,

———— ————,
Division Manager.

MONADNOCK PAPER MILLS, INC.,
Bennington, N. H., June 20, 1961.

The NEW ENGLAND COUNCIL,
Boston, Mass.

GENTLEMEN: As suggested in your recent memo, we are writing to review the problems which have resulted from the restrictions on imports of residual fuel oil. We are, of course, very interested in this subject which has had a very marked effect on our operating costs of recent years.

We are a small paper mill located in Bennington, N.H., and this industry is the only substantial employer of this community. Fuel oil costs have a very direct bearing on our operations. We are currently using approximately 1,700,000 gallons of No. 6 fuel oil on an annual basis. Since April 1, 1959, our prices have increased .0085 per gallon which represents an annual increase in cost of approximatey $15,000. We are unable to burn any other fuel and we are entirely dependent on fuel oil. We would appreciate everything that your organization can do to obtain relief on the

current restrictions on imports so that we can remain competitive in our industry.

Yours truly,

ERVING A. LE CAIN,
Assistant Treasurer.

A. C. DEWEY CO.,
Enfield, N. H., June 19, 1961.

The NEW ENGLAND COUNCIL,
Boston, Mass.

GENTLEMEN: With reference to your communication of June 14, we are engaged in the business of manufacturing woolen cloth. We are located in a one-industry town where we currently employ 375 people. Not only are we necessary for the town's economy, but we also pay 25 percent of the taxes collected in this town.

As far as our connection with the defense effort, the National Association of Woolen Manufacturers and the Northern Textile Association (both of which we are members) is currently engaged in trying to convince the various agencies of the U.S. Government that the textile industry, particularly the textile woolen industry is necessary for national defense, and has already been hard hit in many ways, all of which I am sure you are familiar with.

We are currently using 49,000 barrels of residual fuel oil per year and the price increase per barrel since April 1, 1959, is 15 cents. This cost our firm an additional $7,357 annually during the past 2 years. We are unable to burn any other fuel.

For your information, we generate all of the power ourselves for the operation of this plant.

Yours sincerely,

WILLIAM T. DEWEY,
President.

NASHUA CORP.,
Nashua, N.H., June 19, 1961.

The NEW ENGLAND COUNCIL,
Boston, Mass.

GENTLEMEN: We are manufacturers of a wide variety of converted paper products which might be briefly described as coming under two broad classifications: (1) Industrial packaging materials, such as heat seal label paper for product identification, bread and confectionery wrappers, gummed sealing tape, and corrugated carton tape; and (2) technical chart papers which are used by the medical profession in developmental laboratory work and throughout industry to document a wide variety of functions.

Because we are wholly dependent upon residual oil for power and heat and because it is not practical for us to convert to other types of fuel, we feel that the restrictions on imports of residual oil and the resultant price increases are causing an unnecessary hardship upon us, a hardship with which others in our industry in other areas of the country do not have to contend.

Our annual consumption of No. 6 fuel oil is 35,000 barrels. Since April 1, 1959, we have had increases, resulting from import restrictions, totaling 25 cents a barrel—which, on an annual basis, results in increased costs to us for fuel of $8,750.

We feel that every possible effort should be made to remove the restrictions on imports of residual oil into the New England area, and solicit your help in achieving this objective. Your activities to this end will be greatly appreciated.

Very truly yours,

JAMES R. CARTER.

TROY MILLS, INC.,
Troy, N.H., June 16, 1961.

The NEW ENGLAND COUNCIL,
Boston, Mass.

(Attention: Mr. Gardner A. Caverly, executive vice president.)

DEAR MR. CAVERLY: In reply to your memorandum of June 13 regarding the investigation of the residual oil problem for New England, we make answer to your inquiries, as follows:

1. We are classified as a textile manufacturer, our products being woven apparel fabrics and needled punched felts of jute and synthetic fibers, and coated fabrics.

2. We are currently using 35,000 barrels of residual oil per year.

3. The price increase per barrel we have experienced since April 1, 1959, is $0.1504.

4. Annual increase of cost to our firm—$5,264.

5. The only other fuel which we might possibly use would be coal but this cannot be properly done due to inadequate draft.

We hope that you will be successful in your efforts in removing the restrictions on imported residual fuel oil.

Very truly yours,

ERNEST L. WOODBURY,
Controller.

FOSTER BEEF CO.,
Manchester, N.H., June 10, 1961.

Mr. GARDNER A. CAVERLY,
Executive Vice President,
The New England Council,
Boston, Mass.

DEAR SIR: We are sausage manufacturers and meat processors as well as wholesalers of beef-pork provisions, butter, cheese, eggs, employing about 125 people, handling and distributing meats in a five-State area of New England including Army and VA installations, as well as shipping to outside Army and Navy installations.

In our operations requiring a 125-horsepower high-pressure boiler we use about 2,240 barrels of oil a year.

The increase in cost since April 1, 1959, has been $0.25 per barrel, totaling $560 annually.

We cannot burn any other fuel with the type of equipment we have.

Very truly yours,

JACOB FOSTER 2D,
President.

Mr. PROXMIRE. Mr. President, as a nation, we have become consumer-conscious as at no other time in our history. Erosion of the consumer's pocketbook through spiraling prices is a danger literally everybody thinks and talks about. Some of these pocketbook threats are obvious. But others are subtle, hidden, insidious. In many ways these latter can hurt us the most, simply because we do not realize what is happening until it is too late.

A case in point arises in the current controversy over whether restrictions should be continued on imports of residual fuel oil. Consumers of this heavy fuel oil claim these restrictions on the imports which are their only practical source of fuel oil have not put a single miner back to work in the last 29 months. But the controls have served to boost the price of this petroleum fuel to a point sufficient to put their plants and factories at a competitive disadvantage.

Price parity clauses in fuel contracts with large consumers provide that as the cost of one fuel rises—as residual oil has—the price of other fuels, like coal and gas, also can be increased. This is a fact of life, in force and in practice. The net effect is a general increase in all fuel prices. And this increase reflects not only in the areas of origination, but all over the country.

My friends in Wisconsin are paying more for the fuel they use because the price has increased to a consumer in Maine or California. The oil they use for heating or manufacture costs them more. The gas they use costs them more and the products they buy from all parts of the country, reflect these increased costs.

The very fact of import quotas on residual fuel oil tends to raise and keep prices up. Import restrictions are not reducing imports so much as they are raising prices. As a practical matter, imports of residual oil are the only practical source of supply. Our domestic oil industry does not care to supply the domestic demand for this kind of petroleum fuel because it is an unprofitable product, and few refineries care to produce heavy fuel oil. Residual fuel oil, to the efficient American refiner, is unprofitable, leftover byproducts not worth handling. The goal of these efficient American refiners is to so completely utilize its crude oil in producing more sophisticated petroleum products as to leave no residual oil at all. It is like one of our meatpacking plants that boasts of using every part of the pig, even the squeal. And those who use residual fuel oil cannot convert to gas or coal without prohibitive expense.

Since our American producers are not of a mind to fill this supply vacuum, imports certainly must do it. Any restriction on imports of this particular petroleum product will create an uncertainty of supply that inevitably leads to increased prices for all fuels. And that is the tragedy of it. It is a completely unproductive increase in price, that harms our national economy and eventually visits all our pocketbooks.

Without import restrictions, residual oil prices may well come down, and thus help bring down other prices of competing fuels. The restrictions are having an inflationary effect as matters stand now.

In the end, nothing is accomplished by stifling competition at the expense of the consumer. And the consumer, in this case, is not just a resident in Wisconsin, New England, or California, or Hawaii, but a resident of every State.

Mr. MUSKIE. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield to the Senator from Maine.

Mr. MUSKIE. I compliment the distinguished senior Senator from Rhode Island for the leadership he is showing in protecting the interests of our common New England region with respect to this particular critical problem.

Mr. President, in Maine we have an old saying about our weather: "We have two seasons, July and winter." When it comes time to pay our fuel bills, we are apt to think someone left out July.

Winter, which costs New Englanders perhaps half again as much to keep warm as it does the average U.S. citizen, is just 3 months away. The cost of fuel, therefore, is a major concern to us in terms of home heating, heating for public buildings, industrial uses, and thermal production of electricity.

New England has historically depended on residual oil because it is the least expensive fuel available. It has been the principal fuel of industry, schools, apartment houses, hospitals, and

public buildings. Under these circumstances, it is understandable that we view with a jaundiced eye any efforts to restrict the supply of residual fuel in our area.

To put the issue as bluntly and simply as possible, I believe that the present import control program which restricts the shipment of foreign residual fuel oil for our domestic market is harmful to our national interest and injurious to the citizens of New England in general, and Maine in particular.

To some, this may seem to be an issue which necessarily divides one area of our Nation from another. This has been the nature of the debate over residual oil imports, but I do not believe it is the nature of the problem. After reviewing the facts involved in the production of domestic crude oil and its products, the consumption of residual oil and other fuels, the problems of the domestic coal industry, and our relationship with other oil-producing countries, I am convinced that the oil import control program, especially as applied to residual fuel oil, is based on false assumptions. I am certain that these restrictions can be removed without injury to any substantial segment of our economy.

Since the residual oil import program was instituted in the spring of 1959, fuel oil costs in New England have increased tremendously. The average price per barrel has increased about 30 cents in just 2 years. Competition in the industry has declined considerably, encouraging high profits for the distributors, and squeezing the poor consumers. The price has not only injured the direct user of residual oil; it has also resulted in higher electric bills in the northeast—an area which already has some of the highest power rates in the country. The July 1960, increase of 15 cents per barrel to electric utilities has cost customers of the Central Maine Power Co. an estimated $230,505 in increased electric power rates.

Comparable increases have adversely affected our manufacturers, already hard pressed in competition with those in other areas of the United States and with foreign industries. We cannot afford to bear this cost, and I do not believe it is fair to impose an artificial burden on our workers.

It has been argued that residual fuel import restrictions are necessary in order to protect the domestic oil and coal industries. But such an argument does not stand up. In the first place, the domestic oil industry is producing less and less residual oil, relative to its total crude production.

In 1950, 20 percent of our domestic oil products was represented by residual fuel. By 1960, that proportion had dropped to 11 percent. Domestic refiners have found it more profitable to shift the production to gasoline and other distillates. Some refineries produce no residual. By contrast, foreign sources concentrate on residuals. In Venezuela, for example, the yield of residuals from crude averages 50 percent. For some refineries the yield is as high as 70 percent.

The representatives of our coal-producing areas have argued that the residual fuel oil import restrictions are a necessary protection for the declining coal industry. Actually, the total domestic residual oil consumption has been remarkably stable in the last ten years. From 1950 to 1960, for example, total consumption of residual fuel oil increased only three million barrels, from 554 million barrels to 557 million barrels. This is hardly a drastic increase in the use of a competing fuel.

At the same time, east coast consumption has gone up from 255 million barrels in 1950 to 319 million barrels in 1960. In New England, consumption rose from 51 million barrels in 1949 to 71 million barrels in 1959. Obviously, the east coast and New England have suffered the most from the import restrictions.

Why has the consumption of residual fuel oil increased so much in our area, while remaining fairly constant in other areas of the country? The simple fact is that coal is not and cannot be competitive, because of shipping costs. It costs more to ship a ton of coal from West Virginia to New England than the cost of the coal at the mine mouth. For example, one large coal user in New England has been paying $5 a ton for the coal at the mine mouth and $5.75 a ton for freight. For most users, coal consumption under these circumstances is and would be uneconomic. Present users of residual oil will not pay the high costs of conversion to return to the use of coal, when more than half the cost of coal consists of freight charges.

It should be clear, from the facts I have cited, that New England is being asked to pay a high cost in increased fuel costs for an import policy which is not going to do the job its supporters want. All we ask is that we be released from this burden.

Mr. President, I have said that this is not only a policy which injures New Englanders; it is one which is harmful to the national interest. In the first place, it will encourage uneconomic use of our domestic crude oil, by pressuring refiners to produce more residual fuel oil at the expense of more profitable distillates. In the second place, it will hamper the growth of industries in an important area of our country. Finally, it will continue to be an irritant in our relationships with Venezuela and other important Latin American countries.

I am fully aware of the problems confronting our coal mining areas. I believe they need and deserve help. That is why I worked so hard for the Area Redevelopment Act.

I understand the problems of import competition. That is why I introduced S. 1735, the Orderly Marketing Act of 1961, which would help protect domestic industries against a flood of low-cost imports.

I believe in the sound use of our natural resources. That is why I cosponsored the national fuels policy resolution. This, to me, is the road to prosperity and sound conservation for all segments of our domestic fuels industry.

I ask our friends from the fuels producing States to join us in removing an unnecessary, unrealistic, and misleading policy which is injuring one section of our country, without being of benefit to another. I urge widespread support for removal of the restrictions on imports of residual fuel oil.

I thank the distinguished Senator from Rhode Island for yielding to me.

Mr. PASTORE. Mr. President, I congratulate the junior Senator from Maine for a very splendid presentation of a very important subject.

At this time I yield to the Senator from Florida [Mr. SMATHERS].

Mr. SMATHERS. I thank the Senator from Rhode Island.

Mr. President, the mandatory oil import control program initiated pursuant to Presidential Proclamation No. 3279 of March 1959, is having an adverse effect on our domestic economy, insofar as the inclusion of residual oil and its derivatives is concerned.

Assuming, however, that some controls are needed on the importation of crude oil and its principal derivatives, it seems clear to me that the present mandatory control program has extended its scope to include products whose importation could not possibly injure the domestic oil industry or impair the national security. These products as a matter of fact are not in any sense of the word "principal derivatives of crude oil."

For example, present mandatory controls apply to such products as residual fuel oil, liquefied gases, and asphalt.

Residual fuel oil is a byproduct of crude oil; and the production of residual fuel oil by domestic producers has been steadily declining. Domestic producers apparently consider residual oil to be an undesirable and unprofitable byproduct; yet it is used extensively by public utilities, hospitals, and the like.

The application of mandatory controls to this product in no way serves the purpose intended by the mandatory program, and has only led, as such restrictions must inevitably lead, to higher prices for domestic consumers.

Propane is another excellent example of the extension of the program beyond any reasonable limits in terms of national security. This product amounts to less than one-half of 1 percent of a barrel of crude oil, and was not being imported in districts I through IV, and only in insignificant quantities in district V—the West Coast—prior to the imposition of mandatory controls. It is obvious that the importation of this product could not possibly have had an adverse effect on national security, since it was not being imported, and was not even of sufficient importance to be controlled under the voluntary program.

Both residual fuel oil and propane are available in large supply from Venezuela. This market is readily available and at a time when the United States is diligently seeking to assist Latin America in its economic development, and to promote better relations with the nations of the Western Hemisphere, there can be no justification for imposing restrictions on the importation of these products from

a nation such as Venezuela, whose economy and development are so closely tied to the oil industry.

It is ironic indeed that during the long dictatorship of Marcos Perez Jiminez, restrictions on importations from Venezuela were not in effect, while almost immediately after the rise of a democratic regime in Venezuela, severe import restrictions were imposed on these products as well as crude oil and its principal derivatives. Removal of all unnecessary restrictions on the importation of oil products would be of great benefit to the economy of Venezuela and would benefit consumers in the United States at the same time.

The time has come for a careful reevaluation of the entire mandatory control program, and particularly its application to certain products listed as principal derivatives of crude oil, in order to ascertain if such products are, in fact, principal derivatives, and if their importation would be a threat to the domestic oil industry and to the security of the United States. This, of course, I do not believe would be the case.

I believe it is very apparent that, in the great haste in which the mandatory control program was prepared and imposed, many products were included arbitrarily and without reference to the aims and objectives of the program, and the abuses that this program was intended to correct.

Severe restrictions on normal trade between the United States and other peoples of the free world should not be imposed except for the most compelling reasons. Such restrictions invariably result in higher costs to the consuming public and in a lessening of our trade ties with our allies in the free world.

We in Florida depend largely on residual oil imports, and our statewide economy is dependent on a sufficient quantity. It is the primary source of power, since we have no coal deposits, and, while water is available in great quantities, we have not yet been able to derive energy from it.

Our industries are completely dependent upon fuel oils. Because of high freight rates and other unfavorable economic factors, the use of coal for all practical purposes is out of the question. Our installations are not equipped to burn coal, and therefore the removal of the import restrictions would not have any adverse effect on the coal industry.

There appears to be no dispute about the fact that the domestic production of residual fuel oil is insufficient to meet the national need. It is my understanding that the domestic oil industry admits this fact to be true. It has been our contention that the domestic oil industry is more chiefly concerned with the imports of crude rather than residual fuel oil. It is obvious, therefore, that these artificial restrictions are unnecessary for the protection of any domestic industry and should be removed.

Since the restrictions imposed are unnecessary and operate adversely to economic growth, not only in Florida, but throughout other areas of the Nation as well, I urge that prompt action be taken to have them removed.

Mr. PASTORE. Mr. President, I congratulate the Senator from Florida for a fine contribution to this important subject.

I now yield to the Senator from Vermont [Mr. PROUTY].

Mr. PROUTY. Mr. President, first, I wish to commend the distinguished senior Senator from Rhode Island for his determined efforts to bring public attention to the serious effects which oil import restrictions have on the general economy.

Oil import restrictions have cost the consumer millions of dollars, particularly if he lives or works on the east coast of the United States. Every study of residual oil prices that has been made shows conclusively that prices have risen substantially since restrictions on imports were imposed.

The OCDM is making continuing studies of these prices, and their data shows that cargo prices for heavy fuel oil on the east coast of the United States between the first quarter of 1959 and the first quarter of 1961 have risen 11 cents a barrel for resellers, 16 cents a barrel for electric utilities, and 21 cents a barrel for other users.

Prices in New England and Florida have risen relatively more than the average for the entire east coast. In New England the cargo price of residual oil to resellers has gone from a low of $1.97 a barrel in July 1959, to a high of $2.27 in March 1961, a 30-cent-a-barrel increase.

Proponents of residual oil restrictions, particularly the coal industry, insist on using 1957 as the base year for comparison of present-day fuel prices; 1957 was a year of high fuel oil prices due to the Suez Canal crisis. In fact, 1957 oil prices were higher than any other year since the Korean war, and serve as a convenient benchmark for those who wish to proclaim that residual oil prices have not gone up.

The OCDM survey shows that prices definitely have gone up to cargo buyers since restrictions were imposed, but other available data shows that the small user is paying a great deal more under the impact of the restriction program. Posted tank truck prices in New England have increased from $2.49 a barrel in July 1959 to $2.79 a barrel in 1961. In New York tank truck prices show similar increases. In addition to the posted price increases, discounts on tank truck deliveries have been narrowing since import restrictions were imposed raising prices still further. Many small buyers depend on short-term or spot purchases for their fuel oil requirements, and, as might be expected in a market where a shortage exists, it is these purchasers who pay the highest premium. This is also true of public agencies who are required by statute or local ordinance to make all fuel purchases on the basis of public bidding.

Typical examples are:

The New York City Housing Authority, one of the largest buyers of residual oil in the East, opened bids in May of this year for 89.3 million barrels of residual oil. They were forced to sign contracts at prices substantially higher than at any time—barring the Suez crisis—since 1954. The price increases to the New York City Housing Authority varied between 17 and 24 percent higher than bids received in 1959.

In Boston an analysis presented by the New England Council of public bids for 15 public agencies in the greater Boston area showed a weighted average increase of 48.4 cents a barrel for 1960 bids compared with those of 1959.

With artificial restrictions such as those imposed by import controls, it is, unfortunately, the small buyer least able to afford these high prices who is forced to bid for the last barrel available.

The General Services Administration testified before Secretary Udall on February 20, 1961, that due to the restrictions on imports, bidding on fuel contracts for the Washington, D.C., area had been severely limited, and that its annual costs in Washington were increased by $660,000 because of the poor procurement climate.

There is ample proof that these price increases are directly attributable to the restriction program. In all east coast ports there now exist two prices for residual oil, one price for oil coming under the quota program and another price for oil which does not come under the quota program. This differential is 30 cents a barrel, and it never existed prior to July 1959. This is the same oil in the same tanks coming from the same source. Caribbean residual oil can now be purchased in Canada almost 25 cents per barrel cheaper than it can in Boston, New York, Philadelphia, or Baltimore. It might be worth while to consider how these differentials occur.

When bonded residual is placed in storage, the tank is sealed by a customs official. If oil is to be withdrawn and used domestically, the customs official measures the tank and unseals it. The oil is withdrawn, the tank is remeasured, and the duty on the amount of oil withdrawn is paid. The tank is then resealed.

Withdrawing for international use follows the same pattern except the duty is not paid. This oil, of course, is the same oil and may be used interchangeably with any other residual oil. In fact, oil from the same tank may be used for barge or truck deliveries to industrial or heating consumers.

Contrary to the statement by the National Coal Association which appeared in the daily CONGRESSIONAL RECORD on August 10, page A6274, oil for ships' use has always operated in the same underlying price pattern as oil for domestic consumption. It is quite apparent that if an oil company expects to sell residual oil in an international market, it must meet the world price. Ships coming into U.S. ports are not captive customers as they can readily take on fuel at the non-U.S. port of call before or after stopping in the United States.

What this means then is that if oil users on the east coast had access to a free world market for this fuel, they would be paying 30 cents a barrel less than they are now paying. Based on the nationwide demand for this product, in 1960 the total cost of the restric-

tion program for that year only to the oil users was $167 million. Of course, this only tells part of the story. It does not reflect other indirect costs, loss of business, and loss of jobs. This artificial price barrier is one more handicap for the U.S. businessman attempting to compete both at home and abroad against foreign competition. These price increases also affect the homeowner and apartment dweller. Practically all large electric utilities that use significant quantities of residual oil have fuel clauses in their rates which provide for passing along to residential users, and in fact all electric customers, increases and decreases in the cost of fuel. Every utility in this category has experienced at least a 15-cent-a-barrel increase in the cost of oil, all of which has been passed on to their customers.

Leases for most industrial property contain escalator clauses which automatically raise the rent as fuel costs increase. In the city of New York charges to occupants of cooperatively owned apartments follow a similar pattern.

It would seem that it is time for the Senate to understand that the American consumer should be protected from having his pocket picked under the guise of national security. We have already committed the American taxpayer to a defense budget in excess of $45 billion. We cannot permit national security to become a political football or crutch every time an industry sees an opportunity to close the door on normal competition.

I am very grateful to my distinguished friend the Senator from Rhode Island.

Mr. PASTORE. Mr. President, I congratulate the Senator from Vermont for his fine contribution.

I now yield to the Senator from Massachusetts [Mr. SMITH].

Mr. SMITH of Massachusetts. Mr. President, I wish to associate myself with the remarks of the Senator from Rhode Island and other Senators who have preceded me. We in Massachusetts suffer greatly from continued restrictions on imports of residual fuel oil. I should like to speak of another phase of the problem which confronts us today.

Mr. President, much has been made in recent weeks of how important continued restrictions on imports of residual fuel oil will be to national defense and security. We even have heard the claim that residual oil imports have been found to impair the national security—notwithstanding the absence of any such specific finding by the Office of Civil and Defense Mobilization, which is the agency responsible for such determinations.

This careless use of personal opinion and purposeful misrepresentation has no place in discussions of matters as serious as the defense and security of this Nation. It is dangerous in the extreme to misuse terms like national defense and national security as screens for the ambitions of self-serving groups.

Unfortunately, this unthinking use of these terms of reference—actively encouraged by elements of the coal, railroad, and oil industries—has found its way right into the very Halls of Congress. National defense and national security are serious matters calling for our best and most objective thinking. They must not be made into mere familiar phrases, political footballs to be used by anyone wanting the Government to provide him with a special protective armor against fair competition. With this in mind, let America take a hard look at the realities of national defense in today's world and the relationship of residual fuel oil imports to it.

The United States no longer is an invulnerable fortress surrounded by protective oceans. For this reason our Government has dispersed and moved forward its defenses through a worldwide network of alliances consistent with the requirements of a world power charged with the defense of liberty everywhere. The time is gone when we can think in terms of World Wars I and II.

We certainly hope no nuclear war ever will come to this planet. But to be realistic, we must calculate possible consequences of such a war. Would we really lose our ability to supply the east coast—and the west, for that matter—with necessary fuels such as residual oil coming from abroad?

First of all, everyone seems to agree a nuclear war could last only a relatively short time. Retaliatory capability on hand would decide the outcome. It would be a period of mutual destruction, especially the wiping out of fixed targets zeroed in ahead of time. Even with overall military superiority, fixed targets such as railhubs will be vulnerable. Coal shipments by rail from mine to consumer, especially along the concentrated transport areas of the east coast, would be easily interrupted. When we think of how a snowstorm can slow them down, think what would happen in a bombed out marshaling yard.

True, our shipping lanes and refinery installations also are vulnerable to attack. But the major threat from enemy missile-carrying submarines is to land installations. And there is one thing in a tanker's favor—it cannot be zeroed in ahead of time. It is a moving target that would have to be hunted down, one at a time, by enemy sea forces. While the present Russian submarine fleet is superior to Germany's before World War II, so too are our own submarine detection systems better. Our defense against enemy submarines is far superior to our defense against nuclear missiles right now.

The defense against nuclear attack upon refineries must lie in dispersal and spreading out of capacity both at home and abroad. The more refineries available to us in the Caribbean and at home, the better the survival chances of our petroleum sources. We should develop excess capacity in the Caribbean to assure the east coast adequate supplies of residual oil, and at the same time establish a going system of flexible water transportation.

As a practical matter, coal supplies could be tied in knots by an enemy attack much more quickly, much more easily than oil-fuel supplies coming in by tanker. In a nuclear war, coal would be of little help along the east coast. There would not be sufficient time to develop our full industrial potential. And coal could not be used in a majority of plants presently burning residual oil.

On this point of relative vulnerability and fueling our industries, it is strange indeed that the coal industry, which would like Government protection under the guise of national security, should be opposed to development of atomic powerplants. Such installations would not require any type of fuel transportation, and thus would be least vulnerable, fuelwise, in time of war. If the industry sincerely believed in the thesis of ultimate security, it logically should take a different position on atomic power development.

To claim the United States might be cut off from our residual oil supplies in the Middle East is tantamount to accepting defeat in advance. Defense against all-out nuclear war does not require us to take such a defeatist point of view, to give up our shipping lanes to Russian submarines, to withdraw to our own shores and there wring our hands as a captive nation at the mercy of a hostile world around us.

Defense against nuclear attack requires a vast network of alliances, multiple and dispersed retaliatory capability and flexibility in both our fuel resources and transportation system. Expansion of our residual oil import supply and transportation system fits this picture of dynamic enlightenment, especially in view of the ever-shrinking domestic supply of this essential fuel.

But think of national defense in another degree—the so-called brush-fire wars. These sporadic and separated outbursts of violence would leave our major shipping lanes untouched. At least, they have in the past. But still flexibility and dispersal of the free world oil supply is an essential requirement. Take the case of a war in the Middle East, serious enough to cut the residual oil supply to both Europe and the United States. As we demonstrated during the Suez crisis, we can supply the additional European oil needs from the Western Hemisphere—thanks to the surplus tanker fleet now in existence.

But even assuming the most unlikely situation that we were temporarily cut off from Europe as well as Africa, without total nuclear war, we would be able to obtain the Venezuelan residual oil that now is shipped to Europe—thanks in this case not only to our surplus tanker fleet, but to our historically friendly commercial and diplomatic relations with that country. Venezuela's exports are 90 percent oil—with a major share going to the United States. No other market could replace our own for Venezuela. That good neighbor wants to sell us her oil and has gone on record as opposing the current import restrictions.

In time of brushfire wars, also, additional coal could be used, if necessary, by plants and installations with dual burning facilities. It is figured an absolute maximum of 6 million tons of coal per year could be used by such facilities if they could not get oil. This kind of additional tonnage could be supplied

easily by full-time schedules of production and employment in the coal industry. It would be no strain for the coal industry. It would give now-employed miners a little extra money. But it would not put any of today's out-of-work coal miners back on the payroll.

National defense, national security—these are dynamic states that must take life and form from positive thinking and positive action. They do not flourish on negatives. National defense is an obligation, not an excuse. National security grows from confidence and independence, from doing things for ourselves rather than having them done for us. They are a flag to look up to, not a wall to hide behind.

We hope and trust OCDM will find removal of residual oil quotas is in the best interest of the Nation's defense and security.

I thank the distinguished Senator from Rhode Island.

Mr. PASTORE. Mr. President, I congratulate my good friend from Massachusetts for his excellent contribution.

I now yield to my colleague from Rhode Island [Mr. PELL].

Mr. PELL. Mr. President, I am pleased to participate in this discussion so ably organized by my senior colleague [Mr. PASTORE].

It is my belief that the mandatory import controls on residual oil are detrimental to our Nation insofar as they place excessive stress on a large segment of our economy. With the advent of economic and political cold war, the health of our economy has not only national, but also international repercussions.

Occasionally it is important for us to be reminded that it is not only the producers of munitions and military hardware that are essential to this Nation in time of war. Three of Rhode Island's most prominent industries—textiles, paper products, and chemicals—will be assigned as important a role in any future conflict as in the past.

It is easy to see how the leaders of these industries and the many thousands on their payrolls find it difficult to be receptive to the continuance of import controls on residual oil. For these industries in my own State of Rhode Island already are hard hit by both domestic and foreign competition. In all three industries the cost of fuel is a major factor in production. Since the import restrictions were imposed on March 1, 1959, residual supply has lagged behind domestic demand and prices have continued to climb. Fuel costs are 50 percent higher in New England than in the country as a whole. A conservative estimate places the additional cost of residual oil to New Englanders at $10 million a year since the mandatory restriction of imports began. In my own State of Rhode Island there has been a 24.4-percent increase in the price of residual fuel oil in the last 30 months.

The textile, paper products, and chemical industries in my State—to mention only three of several industries throughout New England that have been adversely affected—are being pushed to the brink of economic disaster in time of peace, jeopardizing the certainty of their service to the Nation in time of national emergency.

Moreover, every electric utility customer in the State of Rhode Island is suffering because of residual oil import restriction. The electric industry requires large quantities of fuel and higher residual oil prices mean higher electric rates for industrial and private consumers.

The present supply of residual oil which is domestically produced cannot meet the domestic demand. This situation will not improve in the future, either, for as the name implies, residual oil is simply the byproduct of the refining of crude oil and as domestic producers increase their efficiency, less residual oil is produced. Prices will continue to climb to the detriment of large segments of our economy.

Plainly, the import quotas placed on residual oil are harmful to its consumers. How do they benefit producers?

Contrary to assertion, quotas on residual oil do not encourage exploration and development of domestic petroleum resources, for residual oil is not the goal of oil exploration or refinery development. Residual oil is the least valuable product of a refinery. The petroleum industry has every incentive, therefore, to reduce its output of residual oil even further, in order to increase output of more valuable distillate fuels and gasoline.

Mr. President, it is being clearly demonstrated here today that the people of Rhode Island, the people of New England, and the people throughout the country who are also adversely affected by the inequitable mandatory import quota on residual oil deserve some relief. It is clearly in the national interest that this restrictive program be abolished.

It would seem incorrect in a nation founded on the principle of a free economy that an artificial quota should be applied to a product in short supply.

I ask unanimous consent to have printed in the RECORD at this point an editorial published last Thursday in the Boston Herald.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

The soft coal industry is fighting to keep New England and the rest of the east coast from getting all the residual oil (heavy fuel oil used in industry and large space heating) these areas would like to import. Residual is particularly important to New England because it is about the cheapest fuel we can get.

The coal industry wants New England to use coal rather than residual oil. So it is asking the Office of Civil and Defense Mobilization to cut back further on residual imports under the present quota system. It says that dependence on imported residual would be dangerous in case war cut off shipping.

But it neglects to consider that an economy forced to use a more expensive fuel cannot compete with full effectiveness in the economic war with Russia, which is the one we are fighting at the moment.

The Boston Edison Co. in a letter to the OCDM has made a succinct retort to the coal industry. President Charles F. Avila of the company puts the case for a free economy thus:

1. The coal industry has mechanized itself to its economic advantage.

2. The railroad industry has turned from coal to diesel fuel to its economic advantage.

3. The domestic refiners have reduced the yield of residual oil to their economic advantage.

4. Our allies in Canada, Mexico, and the Caribbean have increased the production of residual to their economic advantage.

5. Industry in New England, Florida, and other parts of the country has turned to residual to its economic advantage.

6. All of these developments taken together have strengthened our Nation's economy and security.

And now under the guise of national security, coal and coal-carrying railroads want oil users to reverse course to their economic disadvantage.

The coal industry would have us establish a controlled war economy in anticipation of war—as far as fuel goes. Would the industry also extend its cautionary restrictions to all other imports of critical material? Must we shackle ourselves in a war we are now fighting to prepare for a war we may never be called on to fight or to fight in such a way as to make residual oil imports critical?

Mr. PASTORE. Mr. President, I congratulate my colleague from Rhode Island for an excellent presentation on an important subject.

Mr. CASE of New Jersey. Mr. President, our country is confronted by enough genuine threats to our national security to demand our full attention. I believe all of us have an obligation to avoid inventing spurious threats to our security in pleading one cause or another. Unfortunately, this harmful practice has not been wholly avoided in the area of pleas for protection against foreign competition in fuels.

Admittedly certain domestic industries may need protection because they have strategic importance in our national defense effort. But this does not lessen, it only increases, the need for us to examine closely the actual significance for our national security of any specific restrictions. Our friendly ties with other non-Communist nations can be damaged by unwarranted restraints. Our manufacturing costs can be raised needlessly. The net effect can be to handicap us seriously in the very real cold war that goes on every day with the Iron Curtain countries.

Recently a continuation of import restrictions on residual oil has been urged on the grounds that they are essential to a healthy coal industry and that an expanded coal industry is in turn essential to our survival in another war. This position assumes a prolonged war like World War II in which U.S. industry would have an opportunity to mobilize over several years. In such a war, the argument goes, the United States might find itself the victim of a submarine embargo which would prevent industry from getting residual oil from abroad. Without import restrictions on residual oil to protect the coal industry, so the argument runs, coal might not be available to take up the slack caused by the loss of residual oil.

Let us assume for a moment that the worst occurs—that a major war breaks out, and that it somehow continues over

a long period of time. The United States now allows imports of 461,427 barrels of residual oil each day. This is the equivalent of 38 million tons of coal a year. This figure is almost exactly equal to the 37 million tons of coal we exported in 1959.

If submarines cut off our supply of residual oil imports, it would surely bring a halt to our coal exports. The coal ordinarily exported would then be available for our domestic use.

But there are other more obvious objections to this argument in favor of residual oil import restrictions. In an age of rockets with nuclear warheads it seems unlikely that a submarine blockade could cut off our supply of residual oil without also cutting off the rail communication essential to the movement of coal. Because of their very maneuverability, tankers may be our best hope of keeping our fuel lines open.

We all hope and pray that a war of any type will not come to pass. But if there is another war it may well be a limited brush-fire war. In the event of such a conflict, our supply lines with the rest of the world must remain open.

Meanwhile the cold war is very much with us. It makes sense to take advantage during this period of the most economic source of fuel we can get. To insure adequate supplies of residual oil, we must turn to sources outside the United States if our manufacturing plants are to have the low-cost fuel required for competition in world markets.

In the past the United States has relied heavily on our neighbor, Venezuela, for fuel in time of national emergency. The supply of oil from Venezuela, in fact, has never been cut off to the United States during war. The Venezuelan economy depends on oil. That country cannot turn her refineries on and off to suit our whims. If we drive her away from the U.S. market, she will attempt to market her residual oil elsewhere. We cannot afford to jeopardize such an important long-term source of fuel.

The time has come to take a sober look at our real national defense needs in terms of military probabilities today. Such a realistic appraisal would lead, I believe, to the conclusion that our present restrictions on residual oil are unnecessary and unwarranted from the point of view of our national interests.

Mr. SALTONSTALL. Mr. President, while carrying in our hearts a prayer for peace, we must always prepare for the eventuality of war. It is right that we consider the effects of foreign relations and national security as we discuss any subject before this body.

I have read the speeches of those from the coal producing States who, understandably motivated by regional economics, have charged that elimination of residual oil controls is not in the interest of national security or necessary for good foreign relations. I believe a deeper examination of our 30 months' experience of operating under the quota system shows the reverse to be true. If for no reasons other than national security and foreign relations, the restrictions on residual oil must be removed.

The restriction program is currently costing residual oil users $174 million annually. To that extent the U.S. ability to produce goods and services at competitive costs has been unnecessarily weakened. Cold war is a war of economic survival. We cannot win such a war if we accede to the narrow interests of individual industries, if we adopt an isolationist philosophy, or if we hurt the economy or our relationships with friendly nations.

U.S. military strategy, foreign trade and investment, are based on an independent world. This Nation helped to organize SEATO and NATO. We have military bases throughout the world that are committed to a global defense strategy. To argue that under any war assumptions we cannot keep our sealanes open is contradictory to the mobilization planning of those responsible for the defense of our country and repugnant to a nation which is spending over $45 billion a year for defense purposes.

Global warfare requires foreign supplies of strategic materials such as residual oil. The greater the number of sources and supply routes the greater will be our chances of survival. Yet those who support import restrictions on residual oil would have us believe that the best way to assure open supply lines in time of war is to dry them up in time of peace.

Whatever we can guess about future conflicts, it is not reasonable to anticipate that it will be an action in which the enemy directs its full force against tankers at sea, more particularly at tankers carrying residual oil. In the guided missile age dispersion of fuel supplies and a large tanker fleet offer a greater guarantee of uninterrupted fuel supply than does coal coming through fixed target rail bottlenecks at Mechanicsville or Hampton Roads.

Present residual fuel oil allocations allow for the importation of 461,427 barrels per day. This is the equivalent of 38 million tons of coal per year. This figure is almost exactly equal to the total 37,226,948 tons of coal we exported in 1959. If it were conceivable to imagine a submarine blockade so tight as to deny us importation of residual oil, that same blockade would deny us the exportation of coal which would then be available for emergency use.

There was never a time during World War II, the Korean or Suez crises, when Venezuelan sources were denied to us. These supplies kept coming in time of crises because we had established our customer status and the necessary pipelines in time of peace.

The measure of the damage our restrictions are doing to the Venezuelan economy and the great waste they are creating to her natural resources is evidenced by the fact that there are two 13 million barrel lakes of residual which have been accumulated since the quota restrictions were imposed. With her traditional free world market denied her and faced with the necessity to pump oil and refine it to survive economically, Venezuela has had no course but to pump her residual oil out onto the ground. Small wonder Venezuela is our best source of supply.

Yes, if for no reasons other than national security and good foreign relations, these restrictions must be removed.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. PASTORE. I yield to the Senator from Vermont.

Mr. AIKEN. Since St. Lawrence and Niagara power have been made available to Vermont, our utility companies have not felt the impact of oil quotas as heavily as have those in other New England States. However, the impact upon our other institutions—educational, hospital, industrial, and so forth—has been rather heavy. I think that the aggregate costs of oil quotas to my State as a whole would be very revealing.

I do not have the aggregate costs to the State of Vermont, but spot checks have been made of institutions within the State. I should like to read into the RECORD a few of the checks which have been made.

First is the Brattleboro Memorial Hospital at Brattleboro, Vt. This is a fully accredited, nonprofit, 70-bed hospital which serves an area of about 25,000 people. The price of the residual oil in Brattleboro has increased approximately one-half cent a gallon since the quotas were put on the imports. The increase, while not large, comes to $721.32—an amount which has been paid as a tax to the oil industry this year by a hospital which happens to be in my own county.

I should like to refer next to the University of Vermont, which is located in the Lake Champlain area, and to which institution all oil—largely imported oil—that is depended upon there comes by water. The university uses 387,000 gallons of No. 6 oil annually. I do not have the exact amount of the increased cost, but this year the university paid $2,100 more for oil than it did last year, $2,100 more than it would have paid had it been able to obtain the oil at the same rate that prevailed before the quotas were imposed.

I refer now to a machine tool company, Jones & Lamson Machine Co., of Springfield, Vt. That company paid an increased tax to the oil companies amounting to $1,200 a year.

Another machine tool plant in the same community, the Fellows Gear Shaper Co., estimates that, on the basis of its figures, it pays $1,120 more because of the increased price of No. 6 oil in the community in which that company is located.

Returning to the northwestern part of the State, I have a communication from the Howard National Bank & Trust Co. of Burlington, Vt., which indicates that that company uses an average of 45,000 gallons of No. 6 oil every year, and because of the increased price, which in this case has been almost 1 cent a gallon during the last year, the bank is required to pay an increased cost or tax of $380 a year. I call the cost a tax because that is about what it amounts to.

I have two or three additional examples. The Vermont Marble Co. is one of the larger concerns in our State. That company has suffered an increased annual cost of approximately $2,200 in

its fuel bill because of the quotas which have been imposed on imported residual oil.

Another hospital, the Mary Fletcher Hospital in Burlington, Vt., which is the largest hospital in the State, currently consumes 430,000 gallons of No. 6 oil a year. The increased cost or tax in that case amounts to $3,655 a year. The hospital is one of the harder hit institutions of the State.

Another machine tool company in Vermont is the Cone Automatic Machine Co., Inc., of Windsor, Vt. Its cost is $1,368.50 a year above what it would have been had it been able to purchase No. 6 oil at the same price that it cost before the embargo or the quotas were put into effect.

I have given only 6 or 8 specific cases in which the increased cost amounts from a few hundred dollars to a few thousand dollars a year for each company. We must consider all the industries, institutions, and hospitals in the State that are required to pay an increased cost for oil because of the insistence of Government officials, as well as certain oil interests, that quotas be imposed on the normal source of supply, which is offshore oil. Then we can only conclude that the impact upon the State of Vermont is very heavy indeed.

Mr. PASTORE. I congratulate the Senator from Vermont. I think he has made a very important and practical contribution and a very excellent observation. We tend to forget that the price of the domestic residual oil is about the same—perhaps exactly the same as the price of the imported residual oil. It is not a question of competitive price between what we import and what we produce domestically. But the minute we institute a quota on imported oil because of a shortage of the domestic supply, we tend to inflate the price. When the price is inflated on this residue of the process of refining, we build on top of that price, and that affects the price of all oil, whether it be gasoline or other products of petroleum. That has been the result of the restrictions. It is not so much a question of the help we would give to the coal industry, because I think very little will come to that industry whether we remove the restrictions or shut off imports completely. The fact is that what we are doing is actually inflating the price of oil in this country, whether it is residual oil, crude oil, fuel oil, or gasoline.

Mr. AIKEN. I point out to my friend, the Senator from Rhode Island, as I pointed out previously when the quotas were first imposed, that the very purpose of the quotas was to inflate the price of oil.

Mr. JAVITS. I feel very strongly moved to join the Senator from Rhode Island in his effort to avoid a further restriction upon our export and import trade as it relates to our economic system.

The main point I wish to make is the fact that our overwhelming national interest in keeping the channels of trade as free as possible extends to residual fuel oils.

I point out that if we do not buy, we cannot sell. There is involved here one of the greatest customers of the United States, the Republic of Venezuela, which does a business with us in excess of half a billion dollars a year. In order to maintain that business, as far as our exports are concerned, Venezuela must sell to us.

It is well known in this Chamber that I have been devoted to the urgent need, in the interest of winning the cold war, to keeping the channels of trade as open as possible. I have on occasion found myself alined against the position taken here which represents more protective policies than I have believed wise for the country, even to the extent of differing with my distinguished colleague from Rhode Island, who has been the eloquent spokesman for the protection of the textile interests in his and other States. I know he knows me well enough to know that I value tremendously the contribution which he has made to our debates.

Here in this subject we have pointed up in a rather sharp way two of the questions which constantly arise as we talk about restrictions on imports. One relates to the consumer, how he fares, which the Senator from Vermont has so very eloquently and fairly shown. I could do the same for thousands of consumers in my own State of New York. The other is the problem which we have in connection with these exports as they relate to our essential balance of payments and our ability to exercise the position in the free world which we have, and at the same time to deal with fairness with the imports as they affect domestic industry.

I feel that here, in respect of residual oil we have a case in favor very much in the interest of our Nation to take the role of liberalization of free world trade rather than to take the role of further restrictions, which is what we are debating here.

Trade restrictions on residual oil primarily affect Venezuela, and have had very serious adverse impact on that country, one of our stanchest allies and supporters in our foreign policy. Indeed, the representative of Venezuela has asked our Ambassador to the United Nations, Adlai Stevenson, to end the abuses and injustices of the U.S. oil import restrictions.

Venezuela today is being retarded in its development and is faced with waste of valuable natural resources or the alternative of establishing new markets for oil. Residual oil, a high yield in Venezuelan crude refining, is in some parts of Venezuela being poured into the ground. She must sell oil to survive, and if she can sell only the higher priced products of her refineries, she must refine greater amounts than ever before and thus produce increasingly larger amounts of the residual waste products that are in short supply in this country.

If we continue to deny Venezuela the natural and time-established outlets for her products here, we force her to establish new markets elsewhere in the world—markets where she must buy if she is to sell, and which will carry with them an obligation for continuation in times of crisis.

Oil from Venezuela is an important source of low cost energy for the United States, in both peace and war. During World War II, our lines of supply from Venezuela were never cut off. Although little of this oil entered the United States, it was used to fuel the U.S. Fleet in the Atlantic and Pacific. Much of the foreign oil used to supply one-third of Allied military and bunkering requirements during the war came from Venezuela.

I have noticed press speculation that removal of import restrictions on residual oil would cause a flood of Soviet bloc oil into the United States. This argument is contradicted by the fact that even today when residual oil is in short supply, U.S. oil marketers are not buying Soviet products. Furthermore, as the Soviet Union is not a member of the General Agreement on Tariffs and Trade, Soviet oil imports would not carry the most favored nation designation, and therefore would be dutiable precisely at twice the rate per barrel which is applied to members of GATT, which include Venezuela. Also, the United States could prevent Soviet importation without impairing imports from friendly countries under the U.S. Antidumping Act, since there is evidence that the Soviet Union is selling its oil at a higher price to Soviet satellite countries than to free world countries.

I should like to point out also that my work as chairman of the economic committee of NATO parliamentarians has shown that it is our conclusion that one of the items of Soviet policy that has proved most damaging to the economic system of the free world is in breaking markets for residual oil.

I make that point because, for all we know, considering what the Soviet Union is engaged in, this may be the most important argument in this whole controversy.

The Soviet Union right now is attacking the free world in terms of the testing of atomic bombs and the tremendous pressures, in the military sense, upon West Berlin. However, we have always known that the Soviet Union has a powerful economic capability and has shown, with respect to a number of items, like flax and bauxite, that it can materially affect the markets of the free world, using the less developed areas, by driving down the prices of commodities, of which residual fuel oil is an important one.

It seems to me we should look with the greatest concern upon further limiting our capability for intervening in the international market in order to stabilize it, which would be the end result of an increase in these restrictions. Continued restrictions on residual oil, while not beneficial to either the oil or coal industries, are hampering greatly the ability of American businesses to compete in the world marketplace. Japanese businessmen—and this goes to the point made by the Senator from Vermont [Mr. AIKEN]—pay from 56 cents a barrel less for residual fuel than do their American counterparts along the eastern seaboard. One paper manufacturer in the State of Maine is so close to his com-

petitor across the Canadian border that he can almost see his competitor's plant. Because of residual oil restrictions, however, the U.S. manufacturer is paying 30 cents more per barrel for fuel—a major cost of making paper—than is his Canadian counterpart.

Mr. President, current restrictions on residual oil imports work a hardship on American businesses and adversely affect our national interest in foreign trade, in developing the less developed nations and in peace. As eloquent testimony at this point, I close my remarks by reading a portion of a letter submitted on August 16, 1961, by Venezuela's Economic Minister to the Director of the Office of Civil and Defense Mobilization:

The Venezuelan Government wishes to point out that, in its opinion, the inclusion of residual fuel oil in the mandatory oil import program does not particularly help the domestic oil industry from the standpoint of the national security of the United States. In effect, heavy fuel oil from abroad does not compete with, but rather supplements domestic oil supplies. The limitations on residual oil imports, on the basis of the need, in the interest of national security, to maintain a strong and healthy domestic industry, have little, if any, effect on production of U.S. crude oil or in stimulating exploration. Such limitation, on the other hand, is certain to affect adversely the petroleum industry of the Caribbean area as oil refining plants cannot operate unless there are market outlets for all of their products. It should be kept in mind that the entire oil restrictions program is based on a finding by the then Office of Defense Mobilization that the level of oil imports had reached a point which threatened the health of the domestic oil industry.

There is an ample supply of Venezuelan crude oil which produces a high cut of residual fuel, whereas this type of crude is not in ample supply in the United States; actually, for each barrel of crude refined in the United States less than 10 percent is residual fuel oil, whereas for each barrel refined in Venezuela over 55 percent is residual fuel oil.

The U.S. Department of Defense has long emphasized the need for maintaining access to foreign oil supplies, and that the United States should not take any action that might seriously injure political and commercial relations between the United States and the countries with petroleum reserves, and jeopardize those foreign sources of supply. The Venezuelan Government wishes to draw attention to the fact that Venezuela has always been a reliable source of oil supplies during past emergencies. There has always been continuity and consistency in her policy with respect to the availability of supply to the United States in times of peace and in times of war, especially of petroleum and iron ore. The Venezuelan Government wishes to emphasize the record of Venezuelan oil in periods of emergency, i.e., World War II, the Korean war, and the Suez crisis. During World War II, Venezuelan production was the main source of supply for the Allied forces outside the United States. Venezuelan fuel oil powered most of the free world's naval fleet, not only in the Atlantic but also in the Pacific. It was the main source of fuel oil for the buildup of the invasion of Japan.

The Venezuelan Government and people attach great importance to the sincere and traditional friendship which has always existed between Venezuela and the United States. The continuous attempt made by protectionist minded groups or individuals to further restrict residual fuel oil imports into the United States is a matter of serious concern to the Venezuelan Government, since the burden of these restrictions fall almost entirely upon Venezuela, which directly or indirectly supplies nearly 90 percent of total U.S. imports of residual fuel oil.

The Venezuelan Government wishes to point out that the entire scope of the U.S. oil import program must take into consideration, from the standpoint of national security, the joint interest in hemispheric defense.

As former President Eisenhower stated in his letter of April 28, 1959, to President Betancourt of Venezuela, "The United States has been Venezuela's largest market and I am confident that it will continue to be so on an expanding scale."

Mr. AIKEN. Mr. President, will the Senator from New York yield?

Mr. JAVITS. I yield.

Mr. AIKEN. I was interested in hearing the Senator's special reference to Venezuela. Statistics will show that Venezuelan imports have fallen off in the neighborhood of 50 percent since oil quotas were imposed. This is obviously due to a lack of dollars for purchasing power. The United States has sustained a principal loss in its business with Venezuela, because Venezuela depended upon the United States for a large part of the goods which were used in that country. Also, I think Venezuela had to restrict her importations of tobacco and other commodities. These restrictions have not been imposed by Venezuela simply because she wanted to impose them; it is because, when Venezuela lost the market for large scales of residual oil in the United States, it was necessary for her to reduce their purchases from outside the country.

Mr. JAVITS. Mr. President, I am grateful to the Senator from Vermont. As I said when I began, Venezuela's exports to the United States are valued at half a billion dollars, and customarily she depends upon the United States. Every time she cuts her sales to the United States, she must necessarily, as the Senator from Vermont has so properly said, reduce her purchasing from the United States.

This is but another illustration of the fact that quotas are not measures which are conducive either to our national economic interest or to our leadership of the free world or to the actual economics of our trade and the stimulation of activity in our own country, especially when we take these artificially restrictive and not legitimately restricted measures against imports. We must solve our import problems by domestic means rather than by penalizing the consumer and penalizing our best customers throughout the world.

I find in this residual fuel oil problem a very clear, sharp illustration of all the thorny difficulties we get into when we establish quotas and other protective devices as against the kind of imports which are not related to dumping and other methods which are unfair trade or unfair competition, and do not endeavor to deal with our problems, including some national investigation, if need be, on a domestic basis.

I am pleased to be able to support the position of the distinguished Senator from Rhode Island.

Mr. PASTORE. I congratulate the distinguished Senator from New York for his brilliant presentation and cogent argument on a most important subject.

Mr. KEATING. Mr. President——

The PRESIDING OFFICER (Mr. METCALF in the chair). Does the Senator from Rhode Island yield to the Senator from New York?

Mr. PASTORE. I yield to the Senator from New York [Mr. KEATING].

Mr. KEATING. Mr. President, I associate myself with the remarks which the Senator from Rhode Island has made. I desire to call attention to one argument which has been advanced by those who favor quotas, and try to meet that argument squarely. I have noted claims made by those who favor quotas on residual oil that there have been no price increases on residual oil since the enactment of the restrictions on imports on March 1 of 1959. These statements, like so many which are accurate on their face, are intended to muddy the water and obscure the facts.

Statements that there have been no increases in the price of residual fuel oil since the enactment of the restrictions have outraged and infuriated oil users from the northern to the southern tips of the east coast, and in Hawaii and California as well.

Unfortunately for the poor consumer, he does not buy his oil in cargo lots at harbor-posted prices. Under the false economy of controls, oil supply is less than demand. In order to purchase oil users must bid against each other, and prices go higher and higher.

Government restrictions on oil imports needlessly create all the evils of wartime rationing without curing any of the problems they were established to correct. The artificial shortages created by Government restrictions have made consumers completely dependent upon suppliers who have been given quotas under the Government imports program.

Even such big users as the New York Housing Authority will take little consolation in statements that the posted port price has remained the same. The New York Housing Authority this year had to bid 35 cents per barrel over the price it paid last year in order successfully to fill a 3½-million-barrel order. These costs, of course, must be passed on to New York residents, and those very residents who find it hard to make ends meet.

The New York City Board of Education last year paid an increase of nearly $2 million in its costs for residual fuel oil. That $2 million could have been used to replace one of New York's antiquated schools. That $2 million could have been used to buy classroom equipment. That $2 million could have gone to provide increased teachers' salaries.

There are plenty of ways that the $2 million could have been better spent in the school system.

Consolidated Edison Co. necessarily passed on to its consumers a many-million-dollar increase price in the cost of residual fuel oil.

Every time a New York housewife plugs in her toaster, vacuums her rug,

or turns on a reading light, she is paying a portion of the increased cost of this ridiculous program which benefits no one but the profiteers.

We in New York rather resent being told that the restriction program does not increase the cost of oil.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an excellent article which appeared in the New York Journal of Commerce on August 22 on the case in favor of removing quotas on residual oil imports.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FUEL OIL UNITS HIT IMPORT CURBS

WASHINGTON.—Restricting imports of residual fuel oil harms, rather than helps, our national security and economy by raising our defense costs, damaging the economies of our non-Communist friends and weakening our economic and military ties with these friends and allies.

This was charged by the New England Council, Oil Users Association, and American Public Power Association in a joint statement filed with the Office of Civil and Defense Mobilization, rebutting arguments to continue import restriction on residual fuel oil.

CONTROLS IMPOSED

Import controls on the heavy oil used as a fuel by industry and large public and private buildings were imposed by Presidential proclamation in March 1959. Announced purpose of the program was to safeguard U.S. oil reserves and reduce foreign competition to the domestic oil industry. A corollary objective, the three organizations said, was to put coal miners back to work.

In their joint statement the three groups told OCDM:

"Tanker fleets nurtured by the oil-import program are less vulnerable to attack than fixed targets like rail hubs and other ground installations. Through its mobility, a large part of the tanker fleet available to the free world is more likely to survive even a nuclear attack. With coal transported through a limited number of bottlenecks—Hampton Roads and a few rail centers—coal transport is more vulnerable to interruption than waterborne oil transportation.

"With U.S. growth and prosperity dependent on optimum efficiency, balanced industrial growth and military economies should not be sacrificed because some industry's products are displaced by other products, more economical or superior. Where such industries require relief, some Government action may be called for, so long as it does not penalize entire sections of the country or pile burdens on the consumer or taxpayer.

"Unproductive costs and price increases eventually hit all consumers, not just those in areas feeling the initial impact of higher priced energy sources. They also boost the cost of foreign military and economic aid.

"Import restrictions, such as those on residual fuel oil, contradict before the eyes of the world our own avowed belief in free trade.

"Venezuela, source of most U.S. residual oil imports and historically a prime supplier of low-cost energy for the United States in peace and war, has protested the import controls. While considering the effects of oil import quotas on the preparedness capabilities of domestic suppliers and the coal industry, we cannot afford to ignore the effects on Venezuelan sources of supply."

VENEZUELA'S POSITION

We cannot expect Venezuela to turn her refineries on and off like a spigot, holding her production at the ready waiting to serve the United States in event of disaster, the statement said. Venezuelan facilities must be kept in production and her traditional lines of supply to us open. Trade restrictions, such as those on residual oil, that primarily affect Venezuela not only are inconsistent with our foreign policy but also limit Venezuelan-dollar income available to buy more American-made capital and consumer goods. Venezuela is being retarded in its development to the extent that the United States limits imports of residual oil from this area.

Residual fuel oil must be imported because domestic production does not provide enough to satisfy domestic requirements. There is no reason to believe more residual oil will be consumed after import controls are removed, but consumers will enjoy fair prices, a free selection of suppliers, and freedom from nefarious trade practices inevitably resulting from a controlled economy. Coal will share in these benefits—historically, removing controls on one segment of the free economy has spurred the total activity for all.

Coal clearly is more competitive than other fuels in certain areas, and here is where that industry can expand the market on a positive basis without adversely affecting the economy.

One may even say that import restrictions, through their effect on our international relations, may well hasten the day the United States might be forced to become fuel self-sufficent.

Mr. KEATING. I am very grateful to my friend from Rhode Island.

Mr. PASTORE. I congratulate the Senator from New York for his fine contribution.

Mr. President, I now yield to my colleague from Hawaii.

Mr. FONG. Mr. President, I thank my distinguished colleague from Rhode Island for yielding to me.

I am pleased to join my able and learned colleagues in this discussion as to whether the existing import restrictions on crude oil and its derivatives should be continued. I wish to commend my distinguished colleagues who have spoken before me on this subject for their contributions to an understanding of this problem. Importation restrictions on crude oil and its derivatives were imposed in 1959 because the President found that importations of crude oil and its derivatives threatened to impair the national security. The program has now been in effect for more than 2 years. Whether its objectives have been met or are being met is an appropriate subject for further study and evaluation, and this is now being done by the Office of Civil and Defense Mobilization.

Today I should like to confine my remarks to residual fuel oil which is a derivative of crude oil and which is also included in these restrictions. If it is found that import restrictions on residual fuel oil are vital to our national defense, then I say they should be continued. However, I find it difficult to believe that imports of this waste product of the petroleum industry—of small commercial value to our own domestic oil producers—would be a harmful element in our national defense makeup.

In 1946, crude oil run through American refineries yielded 25 percent residual fuel. This yield dropped to approximately 11 percent by 1960. The trend continues downward and, since residual fuel oil to the refiner is like sawdust to the carpenter, the ultimate goal is to produce as little as possible. Through technological advances, some refineries using high grade American crude separate it into its more usable components and produce no residual oil at all.

Since less, not more, residual oil is the American producer's goal, restrictions on residual oil imports understandably have provided no incentive whatsoever for the exploring and producing of crude oil in this country.

Although the restrictions of residual oil imports, for fuel use, have not spurred exploration, they have kept the costs per barrel to the user at a high price.

In this Nation of free enterprise, it is only natural that with our domestic industry unwilling, if not unable, to produce enough of a product to satisfy the demand, we should look abroad to friendly suppliers like Venezuela for sufficient supplies to take up the slack. Such imports, under such conditions, certainly do not undermine our national defense. In truth, logic says that the importation of residual fuel oil will improve our defense potential by helping preserve our natural stores of petroleum. Every gallon, every barrel of residual fuel oil coming in from abroad means a gallon or a barrel remaining in our natural stockpile.

My State of Hawaii is an isolated group of islands 2,500 miles from the Pacific coast. Fuelwise it is a pauper—much poorer than even the New England States which are so concerned with this problem of crude oil restrictions. Neither coal nor gas is available in Hawaii. Waterpower is also nonexistent. The single fuel used is residual fuel oil, which must be imported from California.

A lifting of the restrictions or an exemption for Hawaii because of its unique geographical location with respect to the rest of the United States would provide a broader base for Hawaii's fuel supply. Since the supply of residual fuel oil in the district from which Hawaii receives its imports is diminishing with respect to the demand, the development of alternative sources of supply is a matter of increasing importance to my State.

The U.S. Navy, which is by far the largest consumer of residual fuel oil in Hawaii, has recognized the advantages and efficacy of having a broader base of supply, and depends for its Hawaii consumption almost exclusively on foreign sources. Mr. President, if the Navy in Hawaii uses foreign sources for its local consumption, then the civilian population of Hawaii should be allowed to do so, too.

Moreover, in an emergency, it would be logical and in the interests of national security to have several sources of supply open to the State of Hawaii, the most important of our defense bastions in the Pacific.

Hawaii's unique insular status may be compared with that of Puerto Rico which is allowed to import crude oil from foreign sources. If it is in the interests of national security to allow Puerto Rico to import foreign oil, then why should Hawaii, the only other insular area of the United States of comparable size, be treated any differently?

The people of Hawaii should not be subjected to the increased fuel costs which will result if the existing situation continues. Hawaii needs the benefit of competitive fuel oil prices for its development. A reduction of only 10 cents a barrel in the price of fuel oil will automatically be passed on to 120,000 consumers of electrical services as a reduction of $320,000 annually in the cost of electric service.

Mr. President, I was much interested to listen to the remarks of the distinguished Senator from New York, who stated that the consumers of New York are paying annually approximately $2 million more for their use of fuel as a result of the import restrictions. If we were to relate the figures to the State of Hawaii, which has a population only one-thirtieth of that of the State of New York, if the New York residents were paying in the same proportion as the residents of Hawaii, the New York residents then would have to pay approximately $9.6 million a year instead of $2 million a year more for their fuel.

Thus, Mr. President, we observe how the high cost of residual fuel oil affects the people of Hawaii.

Hawaii is also in great need of cheaper power for industry. The industrial development of Hawaii has been hampered by the lack of cheap power. In our search to lessen costs we are even exploring the possibility of harnessing the heat of the volcanoes. I hope this quest for an added source of reasonably priced fuel will be successful.

Mr. President, one of the best ways for the people of Hawaii to be assured of a reasonably priced and dependable supply of residual fuel oil is to increase the sources of supply that can furnish residual fuel oil to this market. The most satisfactory way of doing this would be to lift the restrictions altogether, or to permit these isolated islands, which must import fuel oil under any circumstances, to import such oil from either foreign or domestic sources. The Hawaiian market for residual oil would then be a truly competitive market and the benefit of this competition would accrue to the people living and working in these islands.

Mr. PASTORE. Mr. President, I congratulate the distinguished Senator from Hawaii for a brilliant and cogent presentation, and his fine contribution to the discussion.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. PASTORE. I yield to the distinguished Senator from Florida.

Mr. HOLLAND. There may be other areas in the Nation that are harder hit by the iniquitous system about which we are talking today—the quota system to limit the supply of residual oil, propane, and other products coming into our country—than is the State of Florida, but I doubt it. Our economy is so definitely wedded to the price of power and the price of fuel, and we are so remote from other sources, that we are largely dependent upon the supplies of residual fuel oil for the production of our power, and we are largely dependent upon propane for the production of power on a lesser scale for lighting, cooking, and the like.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. HOLLAND. I yield.

Mr. MORSE. I believe the Senator from Florida is completely right. I know something about the problem in Florida. I know something about the problem along the entire east coast in connection with my activities in Latin American and foreign affairs. I want the Senator from Florida to know that I think those who are taking the position that he is taking today are absolutely right from the standpoint of our best domestic interests, and they are absolutely right from the standpoint of our best foreign policy interest.

I do not think it is sound to argue that if we continue with these importation quotas we will do more damage to the coal industry. Many people do not realize what the transportation problem would be in many of our local areas if we really adopted the shortsighted policy of insisting upon the use of coal.

In the Senate, for example, we have been giving great support to the coal-bearing areas of our country. I have voted to help the people in the coal areas time and time again, and will continue to do so, so long as they do not ask us to do an unnecessary and uncalled-for injustice to the economic needs of other parts of the country.

To take the position that the State of Florida and other States should be discriminated against by being denied the importation of oil would be a rank injustice. From the standpoint of our Latin American policy, such discrimination would not be understood by the people in Latin America. They could not understand. Why should they? They would look upon the system as another attempt on the part of Uncle Sam economically to discriminate against them and do them injury. We know that that is not our purpose.

As chairman of the Subcommittee on Latin America, I say to the Senator from Florida that I think we would make a great mistake if we joined in defeating the very legitimate claims the Eastern Seaboard States are making when they ask us to authorize a continuation of the importation of residual oil.

Mr. HOLLAND. I thank my distinguished friend from Oregon with reference to both points that he made—the point with reference to the coal industry, with which he and I have no quarrel, and the point with reference to our relations with Latin America.

First, briefly, with reference to the latter subject, within the last 2 weeks I talked to a businessman from Venezuela, who told me about the terrible situation that country is in economically, and about his feeling that in the main the trouble resulted from the quota system about which we are talking. That gentleman, upon whom I could depend entirely, told me that not only are exports from Venezuela being adversely affected, but an even greater effect upon their prosperity arises from the fact that the exploration for new oil, including the drilling of new wells, has ceased, and that thousands of people are out of work because they do not see any increase in view for the exportation of petroleum and petroleum products from their nation.

They are basing their exploration program, whether rightfully or wrongfully, largely upon this very program. From the account of their current great depression, told to me very plainly by this leading businessman, I think we have much to look to in this field, because Venezuela is one of the countries that have been attracted by the activities of Mr. Castro. I have been told that thousands of people in that country are attracted to him. We would simply play with fire in that field by cutting off their exportations and their explorations for new oil fields.

Mr. MORSE. Mr. President will the Senator yield?

Mr. HOLLAND. I yield.

Mr. MORSE. The Senator's description of the situation in Venezuela is completely right. We would play directly into the hands of the Communist forces in Venezuela if we were to impose the quotas that are being asked for, and we would weaken one of the most friendly governments in all Latin America, which is the Government of Venezuela.

Mr. HOLLAND. I thank my distinguished friend. He speaks with authority as chairman of the subcommittee of the great Senate Committee on Foreign Relations which deals with Latin America, which I think is more important to us than any other area of the world. When we lose sight of its importance, we do so to the detriment of our own best interests.

Mr. President, with reference to Florida, I realize that my distinguished colleague has already spoken. I hope I shall not duplicate much of what he has said. For the record I call attention to the fact that in the past 10 years, from 1950 to 1960, Florida has proved to be the fastest growing State in the Nation, enjoying a population increase of 78.6 percent in that period of time. I am told by the State chamber of commerce that the rate of growth has continued since the beginning of the new decade. Six months ago I was told officially by the Bureau of Census that our State had passed the 5 million mark. That fact was certified to the Rules Committee so that the allowance for the operation of our offices might be at once affected.

Not only is the great growth of our State a matter of fact, but it is also true that we are being called upon—and I am happy and proud that we are—to be the host State for the guided missile efforts. Only the other day it was announced that those efforts were being very greatly increased.

Yesterday the Senate passed an authorization bill to authorize the appropriation of $60 million for the acquisition of additional real estate required in that venture.

I call attention to the fact that we are standing in our own light when we raise the price of electric power, because our Government is a very great user of power

in our State, by far the greatest user of any customer of the power companies.

It is a fact that our rates have gone up. Our contracts are tied to the price of fuel. While I do not have the last figures on price, some time ago it had gone up from $2.13 a barrel to $2.64 a barrel. I understand that that price has continued to increase.

The increase reflects itself in heavier costs to users at all levels. There is no way to escape heavier cost to the U.S. Government and to every other user, big or little.

I call attention to the fact that approximately 13 REA organizations are customers of the power companies and that their costs are also tied to the cost of fuel, which means that every small farm operator who uses light and power for everything on his farm under a generous REA program—which is based on loans of Federal money at the rate of 2 percent interest to enable the benefits of electricity to be extended to his farm—has had to see his rates increased, whether it is as to the milking machines, or the radio, or the television, or the refrigerator, or the hatching machinery, used in the hatching of hen's eggs, and the like, everything the farmer uses is electrified and the cost of his electric supply has gone up.

I am calling attention to the fact that we are not among those fortunate areas to which hydroelectric power can be supplied. We have a small hydroelectric unit at the border of Florida and Georgia, the Jim Woodruff plant, which does not supply firm power. As to any other prospects along that line, they are almost negligible. We cannot get that kind of power into our State except by transporting it over great distances from the Appalachians or Alleghenies, which would be uneconomic. In a greater measure the same thing can be said about coal. We are so far from the coal areas of the country where coal is produced that coal cannot be economically shipped into our State. The coal people know that. They know we are not gunning for them at all. They cannot fill our market because of the high transportation costs from the coalfields in various places in our Nation to south Florida, where the need for fuel is great.

We cannot look to any supply for fuel except to the petroleum field. We found out the hard way that the quota system means a vastly increased price. It has meant so already and it is going to mean that even more in the future.

There is another point I wish to mention, and that is the very unfair competitive situation which has resulted from the quota system. We have several commercial companies which supply power to municipal powerplants and others. The two largest competitive power companies, however, have different types of contracts. One of them had a contract which was tied to the Venezuela price, and its fuel supply is now being taken care of in large measure from other parts of our country under that contract. It still gets its supply of residual oil at the Venezuela price. The other company did not have such a fortunate situation, and it has had to see its price of fuel go up as the market has advanced, which means that consumers in different parts of the State are penalized in different ways, with the companies competing all over the State with each other, finding themselves in a completely unfair competitive situation.

The same thing results for the municipal plants. We have several very important municipal plants in our State. The city of Jacksonville supplies power not only for itself, but also for the surrounding areas, including many industrial plants. The city of Orlando does the same. The city of Lakeland also does it. Various other municipalities do it also. They had different kinds of contracts and, as we would expect under private enterprise in a system of competition and independent operation, no two contracts are exactly alike, and they are being unequally treated under this artificial quota system which has been imposed, certainly not for the benefit of the users of electric power and energy in Florida.

As to the REA plants and municipal plants, a particular hardship is being visited on them because there is no way in the world for them to operate on a fair level except by raising prices.

Some commercial companies operating in different areas have had their price system spread over their whole system. This is not true with reference to REA's and municipalities.

There are other vital uses in our State for residual oil and crude oil. For instance, there is the drying of phosphate rock. Florida is supplying between 65 percent and 75 percent of the phosphate of the Nation. Phosphate is such a bulky commodity that if moved when wet, the transportation cost is vastly greater than if it is first dried. Drying is an economic necessity. Drying is done in the oil dryers in which vast quantities of oil are used.

The same can be said of citrus concentrate plants where the evaporation of water in citrus juice is accomplished by the use of residual oil. There are other plants of one kind or another, but each vital to our economy, which have been adversely affected by this matter.

Before I sit down—and I am exceedingly grateful to the Senator from Rhode Island for giving me this opportunity to speak—I wish to mention one development which is peculiarly bad and simply indefensible. Under the voluntary system, there was no quota system employed against propane. Propane is used by smaller plants which supply bottled fuel for use by modest people in thousands of places in our State. I am sure that is true also throughout the Nation. When the quota was worked out, without any excuse or reason therefor, the earlier voluntary program then being stepped up, the compulsory program was changed to include propane, notwithstanding the fact that our propane production in this Nation, instead of going up, has been going down, because we have squeezed more out of the raw oil than has been done elsewhere, and the residue is less and less.

We are producing and marketing more valuable products. So in the case of propane, a business in our State that was built upon the supply from Venezuela—where propane is produced in its natural form, just as it comes out of the ground—has been penalized by the inability to get any at all under this iniquitous system, and that has just about ruined a very good business enterprise, one which was beginning to operate at the time this quota system was placed in effect.

When we tamper with the law of supply and demand in a vital field like this and impose an artificial system which seriously affects price, we get into trouble. We are in trouble now because of this. I wish to say to my distinguished friend from Rhode Island that, serious as the trouble may be for the North, where the problem of home heating is, of course, a more vital one than it is with us, it would be hard for me to overstate the importance of this problem and its impact upon us because of our great distance from supplies of fuel and because of the fact that we are growing so rapidly and we have these enormous industries, some of them belonging to the Federal Government, like the guided missile base, and the great Eglin air field, and others in private ownership, like the Glenn Martin plant at Orlando, and various other plants, like Pratt Whitney out of West Palm Beach. There are in my State approximately two dozen of these large plants, which are hand maidens to the guided missile industry, and which are finding their power bill going up.

What does that mean? It means that Uncle Sam must pay more and more for the production of their goods. I cannot imagine anything more shortsighted, more blind to our own self-interest, than to allow this system to continue, which has grown worse and worse during the past 2½ years. I hope that at long last someone will show enough intention to call it off. I thank my distinguished friend from Rhode Island.

Mr. PASTORE. I congratulate the Senator from Florida on his fine contribution to this important subject. I now yield to the Senator from Connecticut.

Mr. BUSH. Mr. President, the restrictions on residual oil imports have failed so completely to accomplish what their proponents claimed for them when they were established in March 1959 that it is surprising they still have any defenders. It would appear that the last ditch defense of restrictions now in progress is based largely on a misunderstanding of the record.

At the time the restrictions were imposed, they were supposed to stimulate exploration for oil in this country. The theory was that the restrictions would help to maintain the price of crude oil at the wellhead. This assumes that a very small tail can wag a very large dog.

Refiners in the Texas Gulf and Louisiana Gulf district run domestic crude oil almost exclusively. At the present time they manufacture nearly 93 percent of each barrel of crude into petroleum products other than residual oil. They do so for a very good reason. The other

products are more profitable than residual oil. Refiners do not like to produce residual. They have geared their refineries to produce less and less over the years.

Today refiners in the gulf are paying about $3 a barrel for crude at the wellhead. Assuming transportation costs of 25 cents a barrel to get the crude to the refinery, the total cost of crude to the refiner is $3.25. The low cargo price for residual at the gulf is now $2.20. Residual oil, as Senators probably know, is cheaper than the crude from which it is made. With a residual yield of 7½ percent, the loss on a barrel of crude is 7.9 cents.

Let us assume that without import restrictions, the price of residual at the gulf would decline 10 percent to $1.98. This would mean that the loss to the refiner on a barrel of crude would increase to 9.5 cents. The difference between the 7.9 cents the refiner is losing now on residual and the 9.5 cents we have assumed he would lose with restrictions, is 1.6 cents—about half of 1 percent of the current price of crude oil.

As I said, this is a very small tail to wag such a large dog. How could a difference of about a penny and a half a barrel make any difference in the price of crude at the wellhead, in the face of much more significant variations in the price of gasoline and home heating oil?

In the light of this, does it seem probable that restrictions on residual oil would cause any American oil man to step up his exploration program? Other factors play a far more important part in the oil industry's decision to step up or cut back on exploration outlays. In 1959, for example, the oil industry cut back exploration expenditures because of the oversupply of crude and the business recession.

When import restrictions on residual oil were first imposed, no mention was made of the belief on the part of the coal industry that it hoped to benefit from the restrictions. But the coal association has since come to be one of the most vocal proponents of restrictions.

The argument publicly advanced by the coal industry is that restrictions help reduce unemployment in the mining areas.

The real cause of unemployment in the coal mining regions of the United States is not residual imports but mechanization. According to the coal industry publication, "Bituminous Coal Data, 1960," in 1950 the bituminous coal industry employed 415,582 men and produced 516 million tons of coal. The output per man-day was 6.77 tons. Ten years later the industry employed 159,100 men and produced 413 million tons at a productivity rate of 13.25 tons per man-day. In the decade, about a quarter of a million men left the coal industry and the output of those that remained doubled.

During the same 10-year period, the demand for residual oil in the United States remained about the same. In 1950, we used 554 million barrels; in 1960, 556 million barrels.

Since productivity in the coal fields per man-day worked has nearly doubled in 10 years, if we were to restore employment in the coalfields to the 1950 level, we would have to double the demand for coal. This would mean an increase of 413 million tons per year. In terms of energy, this is the equivalent of 10.6 times the total permissible imports of residual oil for the year ending March 31, 1962.

Import restrictions on residual oil have not stimulated oil exploration. And they have not cured the real cause of unemployment in the coalfields. But they have done serious economic damage on the eastern coast of the United States.

They have raised the electric bill of millions of consumers.

They have raised the costs of manufacturers in New York, New England, and Florida. Meanwhile, outside of the United States, foreign buisness is benefiting from our restrictions because those restrictions have tended to build up the supply of residual abroad, with resultant downward pressure on fuel prices.

The time has come to face up to the fact that residual oil import restrictions benefit nobody, while doing serious harm to the U.S. consumer and taxpayer. It is high time they were eliminated.

Mr. WILLIAMS of New Jersey subsequently said: Mr. President, I want to join the distinguished senior Senator from Rhode Island [Mr. PASTORE] in opposition to the quota system imposed on the import of residual oil.

Certainly it is clear that the importing of residual oil is in no sense competitive with domestic production of this type of oil. It has been said that residual oil to the domestic oil producer is what sawdust is to the lumber mill. It is the substance left over after the end of the oil refining process and since the oil producers can produce more valuable end products than residual oil, their goal has been to leave less and less of the residual oil after refining. And in fact domestic production of residual fuel oil has declined from about 416 million barrels in 1954 to about 332 million barrels in 1960, a 20-percent drop.

The real bone of contention lies with the coal industry. But even here it has been estimated that if all the electric utilities on the east coast which had dual facilities were to switch from oil to coal, the increase in additional coal sales would be very small.

Which raises an important point. Presumably the rationale of an import quota system is to lessen or eliminate the threat of import sales to existing domestic sales, the loss of which would seriously injure the domestic industry in question. I don't think our quota and import restrictions were meant to give additional business to a domestic industry. Yet this is what is involved. For clearly the import of residual oil has not caused the decline of the coal industry. Changing domestic needs—like the change from coal-burning steam locomotives to diesel engines—plus vast technological changes have been the primary causes of the present and unfortunate plight of the coal industry. And during the same period that these domestic changes were taking place, there has been little increase in the use of residual oil.

Now I would like to see the problems of the coal industry solved in every way possible, preferably through increased production if possible.

But I think it is time to say a few words in defense of the consumer, who seems to be a particularly attractive target whenever there is an economic problem to be solved. To the extent that coal production could be increased by the conversion from residual oil to coal use, and it would not be to a very great extent, millions of consumers in New Jersey and elsewhere in the heavily populated Northeast would have to sustain the additional coal production with higher heating bills and higher prices for all the products and services that now involve the use of residual oil. And there would be several dollars difference between the cost of a ton of residual oil and a ton of coal.

Finally, a word should be said about about the international implications of the quota system, particularly as it affects Venezuela, one of our best Latin American friends and a large exporter of the residual oil in question. Our objective has always been to stabilize trade relations with other countries, a problem of critical importance, particularly to so-called one-crop countries, whether that crop be coffee or oil. A marked change in the export market for these countries can have a disastrous effect on their economic stability. It can nullify every cent of aid that we have given over the years. It can set off political repercussions, which could easily lead to the dissatisfactions necessary to create a climate for the successful emergence of the political demagog. I am sure no one here would relish running the risk of causing the rise of another Castro in Latin America in an effort to make an uncertain contribution to the health of the coal industry through the limitation of residual oil imports.

Mrs. SMITH of Maine subsequently said: Mr. President, several of my colleagues have protested in the Senate today against the residual fuel oil import policies of the Kennedy administration as discriminating against New England and causing economic hardship in our area. They are right.

But the concern they express is mostly concern for the large corporate interests that use residual fuel oil.

I want to express my concern about the individual user—the little man as contrasted to the large corporate interests, as contrasted to the industrial concerns—the families of low and moderate income who cannot absorb the price gouging that the large corporate interests can.

I say that we had better be concerned first about the prices they are forced to pay in the coldest part of winter when they have to burn fuel oil in their homes to survive—and in doing so, as a captive market, they have to pay whatever the price is—or go cold and suffer survival risk to the members of their families.

For the greater part, they do not use residual fuel oil—it is the large corporate interests, the large industrial concerns that use residual fuel oil. And I

think it is far more important for Maine to be concerned over the individual home user than the large industrial, corporate interests.

ORDER FOR ADJOURNMENT TO 9 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, after consultation with the distinguished acting minority leader, the Senator from Colorado [Mr. ALLOTT], I ask unanimous consent that when the Senate concludes its action today, it adjourn until 9 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CALL OF THE CALENDAR TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that on tomorrow, at the conclusion of morning hour business, there be a call of the Legislative Calendar.

The PRESIDING OFFICER. Beginning where the last call of the calendar ended—in other words, beginning with Calendar No. 825?

Mr. MANSFIELD. Yes, beginning with Calendar No. 825.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ESTABLISHMENT OF NATIONAL WILDERNESS PRESERVATION SYSTEM

The Senate resumed the consideration of the bill (S. 174) to establish a national wilderness preservation system for the permanent good of the whole people, and for other purposes.

Mr. MANSFIELD. Mr. President, what is the pending question?

The PRESIDING OFFICER (Mr. METCALF in the chair). The pending question is on agreeing to the amendment identified as "8-18-61—D," submitted by the Senator from Colorado [Mr. ALLOTT] on behalf of himself and certain other Senators.

Mr. MORSE obtained the floor.

Mr. MANSFIELD. Mr. President, will the Senator from Oregon yield, if it is understood that in doing so he will not lose his right to the floor?

Mr. MORSE. Yes.

Mr. MANSFIELD. Mr. President, I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Mr. President, it was my privilege to be a cosponsor of the wilderness bill when it was first introduced to the Senate, and even to have been a participant in the development of this proposed legislation.

From the beginning it has seemed urgent to me that congressional action be taken in order to insure the preservation of some of our American wilderness.

I was soon convinced that we still have an opportunity of doing this, and of doing it so as to prevent interference with other land management purposes.

Accordingly, I am especially appreciative of the fact that the measure which the able Senator from New Mexico [Mr. ANDERSON] has reported from our Committee on Interior and Insular Affairs is one that establishes a National Wilderness Preservation System made up of areas that are available for this purpose, without encroachment on other programs. The units of the system have three outstanding qualifications for such a preservation purpose:

First. They are now in Federal ownership.

Second. They are within national forests, parks, wildlife refuges, or other such units that have been established for purposes with which wilderness preservation is consistent.

Third. While serving their park, forest, refuge, or other purposes, they have so far maintained their wilderness condition.

Therefore, I would stress that no new Federal lands will be created, and no new wilderness areas will be created by the bill.

As units of the wilderness system, these areas will continue to be integral parts of the forests, refuges, parks, or other areas within which they now are. They will continue to be administered by the agencies now administering them. They will in the future, however, as units of the Nation's system of wilderness reservations, be so administered, under the mandate of Congress and the President, as to preserve their wilderness character.

This program reflects not only an intense public interest in wilderness preservation, but also the need for realizing such a program, if at all, within an already established land-management program that includes all our land. There no longer exists a wilderness that is not under management or in private ownership. The areas that still maintain the aspects of wilderness which once characterized the entire North American Continent, and are available for public preservation as wilderness, are within lands already devoted to other—though consistent—purposes. This act recognizes this situation, and accomplishes its wilderness preservation purposes without disrupting the already established programs.

When the continent was nearly all wilderness, there were few who valued it as such or foresaw a possibility that all wilderness might disappear. A positive public value of wilderness as wilderness, grew gradually as the wilderness itself was disappearing.

The public ownership and protection of areas as parks open to the public were mid-19th century developments that also helped lead to the later interest in wilderness preservation. To a great extent this interest was more in preventing private exploitation of the scenic interest in outstanding natural features than in wilderness itself—which was, of course, then abundant. Yet there also developed from the beginning an interest in preserving the natural character of such parks.

When Yellowstone National Park was established, the basic act of Congress, signed by President U. S. Grant on March 1, 1872, included provision for "preservation, from injury or spoilation of all timber, mineral deposits, natural curiosities, or wonders within said park, and their retention in their natural condition." I emphasize here the last five words, "retention in their natural condition." When the great National Park Act of August 25, 1916, was passed, the Congress and President Woodrow Wilson then declared that the fundamental purpose of our parks, monuments, and reservations is—"to conserve the scenery and the natural and historic objects and the wildlife therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

The national parks thus came to be increasingly recognized as primeval sanctuaries.

Within national forests also, during the early decades of this century the value of the wilderness character of the large roadless tracts was being recognized by more and more of the foresters who saw the increasing encroachment of roads on the primeval.

A great influence was exerted nationally by the action of New York State in establishing the forest preserve in the Adirondacks and Catskills and providing that the State-owned lands so protected should be preserved forever wild—a phrase that still has great meaning in New York, where the forest preserve now includes some 2½ million acres. Since 1894 these lands have had the protection of New York's constitution itself, which declares in its article XIV, section 1, that—

> The lands of the State, now owned or hereafter acquired, constituting the forest preserve as now fixed by law, shall be forever kept as wild forest lands.

It was on August 25, 1924, that the first area of wilderness was set aside as such in our national forests. That was the Gila Wilderness Area, in New Mexico, established by the regional forester.

Mr. President, the development of our American wilderness preservation program has been growing steadily ever since. The foresters of the U.S. Forest Service, the park rangers of the National Park Service, and others who, as I have indicated, began to value as wilderness the lands that they handled have become the pioneers of a significant movement. It has included the establishment of a special organization of private individuals, called the Wilderness Society, and the incorporation of wilderness preservation in the programs of many other groups.

The executive secretary and editor of the Wilderness Society some years ago wrote a brief article on some of these matters I have been discussing, which was reprinted in South Carolina Wildlife, the magazine of the State wildlife resources department. By unanimous

consent I should like to have this article entitled "Our World and Its Wilderness," by Howard Zahniser, from the winter 1955 issue of South Carolina Wildlife, included in the CONGRESSIONAL RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MORSE. Mr. President, what we are discussing, I wish to point out, is not whether there shall be wilderness areas, but whether they shall continue to be selected and maintained solely through administrative decision, as at present, or given statutory guidelines and protection.

I am constantly astonished by the point of view expressed in much of the mail from my State which seems to believe that commercial rights or interests now available for timber cutting, grazing, mining, or recreation, would be taken away under S. 174.

Mr. President, that just is not the case at all. I say, most respectfully, that, in my judgment, a good many of the people who have written me urging me to vote against the bill have never read the bill, but have simply sought to carry out some instructions that powerful special interest lobbies in this country are using to try to defeat this bill.

Here again I have no intention of surrendering to selfish interests that place materiality above public interest—in this case it might properly be said which place materiality above spirituality, because one of the soundest reasons for the support of the wilderness bill is from the standpoint of what it will do for the spiritual needs of Americans.

Mr. President, I come from a section of the country where God has been most gracious, kind, and generous in providing us with a great heritage of natural resources. He has been kind to all America by providing the grandeur of this western country, from which the Senator from Idaho [Mr. CHURCH] and the Senator from Montana [Mr. MANSFIELD], who are present on the floor at this time, also come.

Mr. President, I say you cannot go into the canyons, along the streams, through the primeval forests, you cannot associate with the grandeur of this great heritage which God Almighty has given the American people, and not come out of such a trip a better man or a better woman for having come that close to the spirit of the Creator himself.

We cannot justify, in our generation, the destruction of these great areas of wilderness. We owe to unborn generations of Americans to leave them the heritage which it has been our opportunity to enjoy. There is no timber interest, there is no mining interest, there is no grazing interest, there is no economic interest that, in my judgment, has any right to be placed above the great need of preserving one of the great spiritual strengths of America which is to be found in these untouched and untapped wilderness areas.

But as one reads this lobby mail, he would think that what we are proposing in this bill is to take over all the naturally wild areas of the States which now exist and turn them into wilderness areas. Those who would give that impression just have not read the bill. The total amount of the land area we are talking about is exceedingly small in comparison with the total amount available to the commercial interests for development—and I stress the word "development." I pray it may be development, and not exploitation. But we must judge by the past. The past shows that short-run interests very often predominate in the breast of man, and too frequently selfish purposes and selfish desires have resulted in the scuttling, ravaging, and destroying of great areas of natural resources which should have been developed, and not exploited.

So far as the senior Senator from Oregon is concerned, he will not yield to the heavy demands which have been placed upon him by certain economic interests of my State, who sent a delegation not so many days ago, urging me to reconsider my position, and, none too tactfully, calling my attention to the fact I shall be up for reelection next year. I will let the voters of Oregon decide whether my position on this matter meets the favor of the overwhelming majority of the people of my State, but I am going to carry out my duty, as I see it, and I shall continue to support this bill. By doing so, I shall be helping to preserve a great intangible value that is so important in helping to maintain the strength of this Republic.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. MORSE. This bill is very closely related to the intangible matter of maintaining wilderness areas in order to give assurance that we shall provide for the spirituality of new generations of America as they tread along the banks of our gorgeous streams, down the canyons, up the mountainsides, and through the great natural cathedrals of primeval forest.

If the Senator from Idaho will permit a sentence or two more, I shall then yield to him.

Only a few weeks ago, I spoke at the dedication of a new tree farm in Oregon, not far away from La Grande, Oreg. On behalf of the private timber companies of my State, I wish to say that many of them have been rendering a magnificent public service in developing on their private timber holdings a sustained yield program which has come to be called a tree farm program. It is a program which recognizes that sound conservation calls for a scientific harvesting of the trees of this country.

Would that Members of the Senate could have been with me on the occasion to which I have just referred. I am satisfied that if they had been there and had experienced the thrill I experienced, standing on the platform in the midst of that natural cathedral of primeval trees, the vote in some instances would be different from the vote which will be cast by some Senators this afternoon, when the Senate votes on the various issues connected with the bill. All around were the stately untouched trees, one after another, many of them hundreds of years old. There was a beauty and solemnity to the occasion. As one stood there, as we did during the invocation, in bowed silence so far as all of us except the clergyman who delivered the invocation were concerned, one knew that we were closer to the Almighty in that natural cathedral than probably ever again we would be in any artificial cathedral, no matter how beautiful or gorgeous it may be the hand of man may build as a symbol of spiritual reverence to God, because we stood in God's cathedral, in the natural beauty of that forest.

If I had ever had any doubts—I have never had any, but if I had ever had any—as to whether I should do all I could to preserve that kind of an area for the spiritual benefit of future generations of American boys and girls, those doubts would have been resolved on that occasion.

That was not my first such experience. As I have asked, what do we think Yellowstone Park has done over the years by way of a spiritual uplift to millions of Americans? What do we think any wilderness area has done to thousands of Americans who have gone into the area in order to enjoy the grandeur of an untouched forest?

Mr. President, I think we ought to listen to the voices of past generations of Senators who stood on this floor when this program was first initiated and who, in a statesmanlike manner, portrayed the importance of the program to the spirituality and spiritual needs of America.

I would refresh the memory of Senators about those pleas, because as I see it the issue is before us once more.

I now yield to the Senator from Idaho.

Mr. CHURCH. Mr. President, I commend the Senator from Oregon for the very eloquent address he is making in support of the pending bill. It is typical of him that he would in this case, as he does in all other instances, place the public interest above any private interest.

I say to the Senator from Oregon that I, too, have been subjected to the threats of pressure groups in my own State, largely due to gross misconceptions of what the bill provides. They have warned me that I am digging my political grave in Idaho by choosing to support this bill.

Mr. MORSE. Will the Senator yield at that point for a very quick comment?

Mr. CHURCH. I yield.

Mr. MORSE. Usually when that argument is made the people who make it have lost all logic and all hope of being able to sell their bill of goods on its merits, because it lacks merit.

Mr. CHURCH. It is the scare technique. I deplore those who scatter for the sagebrush once the sniping starts. If I am shot down, so to speak, it will not be in the back, deserting my duty, as I see it, to the people of Idaho.

As the Senator well knows, the bill in actuality constitutes no threat to any legitimate economic interest. It is based upon the wilderness type areas in national parks and national monuments, and those primitive areas which have

already been withdrawn from the national forests, in which lumbering is already prohibited and in which there is very little or no mining activity.

In the whole of the wilderness system covered by the bill, throughout the entire country, only six mines are in operation, and these mines will continue, for the restrictions imposed by the bill within the wilderness system are made expressly subject to existing rights.

Moreover, such grazing as does exist will not be affected by passage of the bill. It will continue subject to the restrictions of existing law.

No one will be adversely affected by passage of the bill. It has been carefully drawn to give all possible protection to the economic interests of the West.

As the Senator from Oregon has so eloquently pointed out, the bill will establish the necessary statutory safeguards, while we still have some wild lands left intact, to make certain that future generations of Americans can experience the same enrichment we westerners who have known these wilderness areas and who wish to have our children and grandchildren given the same opportunity to know them, have experienced.

This is the public interest which is served by the bill, the long-term interest of the Nation. Though there may not be organized, business groups here today in Washington, D.C., to support the bill, the great unorganized American public supports it, and those of us who vote for it will be acting in their interest and in the interests of generations of Americans yet unborn.

I commend the Senator for his splendid statement. I appreciate the support he is giving the proposed legislation.

Mr. MORSE. I thank the Senator from Idaho very much for the contribution he has made to the debate and everything he has said by way of argument in support of the bill. Not only do I agree with his comments, but I wish to second the motion, so to speak, and to associate myself with his observations.

Mr. President, I have been talking about many people who have written to me in opposition to the bill, who seem to be opposed to wilderness areas. I would have them understand that a defeat of S. 174 would do no more than leave all wilderness areas still under the administrative control which brought them existence and produced the present exclusions as to their use.

What S. 174 proposes is only that Congress make a public policy for these areas, and that Congress decide future changes that would add or subtract from the system.

I favor this bill because I think Congress should assert legislative control over wilderness areas, and not leave their future up to administrative—one is tempted to say "bureaucratic"—control.

If we fail to enact the wilderness bill, the result will be to leave entirely to the whim of a Secretary the whole decision on the amount, kind and character of Federal lands which will have a wilderness designation. One Secretary might increase the acreage significantly, while another might decrease it by large amounts. If we fail to adopt the wilderness bill, I know of nothing that could stop the executive branch from working its will, for we not only have to be in a position to pass an act, but also to be prepared to override a possible veto. The need for wilderness legislation is quite clear.

My reasons for supporting S. 174 are thus positive and related to the need for a national policy and program prescribed by Congress.

S. 174 would provide the guides and strengthen the hands of administrators as well as place the decisive vote regarding the use of this important sector of public land with the Congress—the representatives of all the people.

Much more could be said in a positive way to urge passage of the wilderness bill, but attention must also be given to some of the main arguments in opposition to the bill.

Opponents of S. 174, the Wilderness Act, have repeatedly used two phrases, "blanket in" and "lockup." As is true with so many slogans, these phrases are exaggerated oversimplifications. However, they do sum up rather neatly the main arguments of opponents of the wilderness bill.

"BLANKET IN"

The minority views of the Committee on Interior and Insular Affairs, included in the full committee's report on the wilderness bill, include no objections to the inclusion within the proposed wilderness system of some 44 areas comprising about 7 million acres, now classified by the Forest Service as "wilderness," "wild," or "canoe."

The minority said:

> The lands in question have been carefully studied and classified; they are now and have been for years classified as wilderness or the equivalent.

The minority then goes on to say:

> The bill, however, would also blanket into the wilderness system almost 8 million acres of unclassified national forest lands presently designated as primitive, and make possible the inclusion of an estimated 22 million acres of lands presently contained in national parks, monuments, and other units of the national park system, and an estimated 24 million acres in wildlife refuges and game ranges.

As the report suggests, the areas now designated "wilderness," "wild," or "canoe" were studied by the Forest Service before being so designated. Those areas were once primitive areas, also, and were reclassified after review by the Forest Service.

The areas now classified as "primitive" are simply those areas which have not yet been reviewed.

Yet the minority, in its views, labels as a "blanketing in" the process proposed by S. 174 whereby these remaining areas would also be reviewed, with a congressional check added—a check not available when the primitive areas now classified as "wilderness," "wild," or "canoe" were reviewed and so classified.

Let us now consider briefly the process which has been labeled "blanketing in."

As reported by the Committee on Interior and Insular Affairs, the bill provides that primitive areas included in the proposed wilderness system will be reviewed within 10 years by the Secretary of Agriculture. If the President so recommends and neither House of Congress objects, they will each become a permanent part of the system. If either House rejects a recommendation of the President, the area will then be administered as other national forest land.

Furthermore, any change in size cannot be such that it involves a net increase in the size of the primitive area.

There is one primitive area in Oregon remaining to be classified. Mount Jefferson has 87,000 acres, and only 4,600 acres represent commercial forest. If there is concern in my State about the impact of this legislation on our forest land, it need not exist. Apparently even some of the most radical opponents of the legislation are perfectly content to have the other areas in Oregon which are already designated as wild or wilderness remain that way.

The position taken by the lumber industry in general has traveled a full circle. When the earlier bills were up for consideration, its spokesmen objected to Congress having anything to do with reviewing recommendations by the Secretaries on wilderness designations. My mail makes clear that the lumber operators and their employees now endorse the amendment which would require affirmative action by Congress, for example, on each and every addition of a forest service primitive area to the permanent wilderness system. This is the position that they now take despite their original view that they were opposed to the Congress having anything to do with the decisions on wilderness which might be made by the executive branch.

The committee bill, in my judgment, strikes the proper balance and the balance that our Constitution seeks.

The national park and forest areas possible for inclusion in wilderness in Oregon, amount to only 1.5 percent of the State's area. Crater Lake Park involves 160,000 and the other 10 areas of national forest approximately 750,000 acres. There is, in my judgment, relatively little likelihood that much of the wildlife refuges in my State are susceptible to classification as wilderness.

Does this sound like "blanketing in"?

Even the areas of wilderness within the national parks will be subject to Executive review and will be included in the wilderness system only if neither the Senate nor the House of Representatives resolves otherwise.

Surely such a process cannot be seriously termed a "blanketing in."

"LOCKUP"

Since the inception of measures to establish legislative policy for the protection of wilderness, miners, cattlemen, lumbermen, and water developers have said that vital resources would be locked up by passing a bill to establish a wilderness preservation system.

Just what resources would be locked up by this bill?

First. First of all, it should be made clear that only about 2 percent of our land will be included in the system.

George Thompson, reporting on the wilderness bill in the September–Octo-

ber 1961 issue of Better Camping makes this significant observation:

> If we ever reach a stage where the natural resources on and beneath 2 percent of the area of the United States would become necessary to survival, it will more likely be because of poor conservation elsewhere, not because we have tried to protect the remnants of American wilderness.

Second. Mining: There will be no change in mining operations in the national park system areas, refuges, and game ranges. Within the national forests, the bill would permit exploration for mineral deposits not inconsistent with the wilderness environment. The bill does not affect any existing private rights in these areas. The committee's report states that "the majority of the committee does not feel that the mining industry will actually be injured by the bill." It believes, rather, "that the release of some primitive lands will be of advantage to it."

Third. Timber: There is no timber harvest today from the lands being considered for inclusion in the wilderness system under S. 174. Three statements from the committee's report are significant. The first of these says:

> Timber sales were barred by Executive regulation, with rare exceptions, when the 14.6 million acres of national forest primitive areas were set aside in the twenties and thirties for preservation as wilderness. Actually, because of their inaccessibility, there was little need for such regulation.

The report says also:

> The commercial timberlands in the wilderness-type areas are not a significant portion of our timber resources for future years.

Finally, the report underscores the fact that,

> The need is for the application of modern forestry techniques to all the 488 forest wilderness areas, rather than to cut over the nine-tenths of 1 percent of such lands in the areas of wilderness value to permit a few more days of procrastination.

Fourth. Grazing: S. 174 does not reduce established practices of grazing in any area of the proposed wilderness system.

Fifth. Water resources: No licensed projects are affected by S. 174. Prospective powersite lands within areas of the proposed system make up an area of less than 4 percent of Federal lands withdrawn nationally for power purposes. As reported by the committee, S. 174 provides that the President may authorize the construction of water facilities in national forest and public domain wilderness areas when he finds such use of greater public interest than continued wilderness preservation.

Sixth. Multiple use: For some the term "multiple use" seems to mean either the use of all land for any purpose, or any land for all purposes within the national forests. One suspects that the real goal of those who take this stand is "all or any land for my purposes."

Certainly one important use of some forest lands is wilderness use.

Since uses inconsistent with wilderness eliminate wilderness, it is logical to conclude that if we want wilderness we shall have to exclude such incompatible uses in areas to be preserved as wilderness.

Such a procedure is completely consistent with a multiple-use philosophy. For example, one cannot have timber and a reservoir on the same land, and yet who would deny that the land involved is multiple-use land?

S. 174 has consequently been so written as to designate the finest available lands suitable for wilderness preservation—approximately 2 percent of the Nation's more than 2 billion acres—to be preserved in their primitive condition for their wilderness values until a use in the greater good of the people of the Nation has been clearly demonstrated.

Keeping in mind, first, the little change in actual use of the areas to be included in the proposed system, second, the national values of wilderness preservation, and third, the provisions in S. 174 for the use of wilderness areas for mining and water when clearly in the national interest, it seems reasonable to conclude, as many of us have, that from the standpoint of national interest and true multiple use, these areas are not locked up, although they may appear so to the man who wants to line his pockets with the revenue derived from stripping the land of its timber, defacing the forest with oil derricks, crisscrossing the land with strips of concrete, or dotting the wilderness carpet with lodges and resorts.

Seventh. Another theme that has been used to urge delay of the wilderness bill is that Congress should await the outcome of the Outdoor Recreation Resources Review Commission findings. I would be persuaded by this argument were it not for the fact that the junior Senator from New Mexico, CLINTON ANDERSON, has successfully demonstrated the fallacy of this position.

He is the principal sponsor of the legislation which created the Outdoor Recreation Commission, and has served continuously on that Commission. As chairman of the Interior Committee, he decided to both introduce and urge the committee to bring forth to the Senate the wilderness bill. In so doing he has cited many cogent reasons why the wilderness bill should not be further delayed and he has also demonstrated that no real relationship exists between awaiting the outcome of the Commission's findings and enacting wilderness legislation.

WHAT WILL THE WILDERNESS BILL DO?

Having discussed the objections made by the opponents of wilderness legislation, let us again briefly answer the question: What will the wilderness bill do? The bill, as I pointed out at the beginning of my remarks, will:

First. Establish a national policy for wilderness preservation and a program to make it effective.

Second. Give statutory protection to areas of wilderness within national parks and monuments, national forests, and national wildlife refuges and ranges.

Third. Establish a national wilderness preservation system for the permanent good of the whole people, to consist of the now-existing wilderness areas in forests, parks, and refuges.

Fourth. Set up an orderly procedure for additions, deletions, or changes in the wilderness preservation system, with provisions for due notice, public hearings, and review by Congress.

Finally, I want to make perfectly clear to the lumber operators in Oregon, to their many thousands of employees, to the stockraisers, and the many others in my State who have written me their objections to S. 174 that I believe their understanding of what the bill does is frequently mistaken. The wilderness areas are already there; lumbering on them is prohibited and grazing and mining are restricted. The bill continues that policy, just as I am sure it would be continued if there were no bill.

As for the future, if the time comes when it can be shown that the economic growth and progress of Oregon can be maintained only by opening a wilderness area to lumber operations, I shall be the first to seek such a decision. However, I am strongly of the opinion that such a change should be made via the legislative process and not by Executive fiat. The same goes for possible additions to the wilderness system.

I close my speech by way of a very brief statement of commendation to one of the great conservationists of America, one of the great supporters of a wilderness area system, Associate Justice of the Supreme Court, William O. Douglas. I commend him in his capacity as a private citizen in the position he has taken as a private citizen, in his stalwart crusading defense of our wilderness area program.

One cannot read Justice Douglas' book on the many wonderful trips that he has taken into the natural resources areas of our country, and read of his accounts of the importance of the wilderness areas, and the great spiritual development of the American people, without feeling, as he makes a speech on wilderness area problems, that this great Justice of the Supreme Court, in his capacity as an individual citizen, as one of the great crusading conservationists of this country, is deserving of the sincere thanks of all of us. Not only this generation but many future generations of Americans will owe a great debt of gratitude to the wonderful work Justice Douglas has done in helping to educate the American people to an enlightened understanding of the need for the passage of such legislation as S. 174.

I sincerely hope that when the Senate comes to vote on the bill, the crippling amendments will be rejected and that it will be passed by an overwhelming majority.

EXHIBIT 1

OUR WORLD AND ITS WILDERNESS

(By Howard Zahniser)

From within our sheltering walls and fast-moving vehicles our American world seems far removed from the wilderness. The wilderness we have conquered and from its raw materials have built a civilization in which we have protected ourselves from hardships and feed ourselves to a great extent from many of our natural limitations.

Yet, wilderness preservation has certainly become one of our American purposes, an essential part of a distinctively modern movement for the conservation of natural resources—upon which, it is recognized, the survival of our civilized culture depends. The more highly developed our culture has become the greater our appreciation of wilderness has grown. The more we have

enjoyed the ease and security of our civilization the more we have also valued the hardships and hazards—the adventure—of wilderness excursions. The farther we have come in our programs for managing our world the greater has become our appreciation of the significance of the observations to be made in areas where natural processes go on unmodified by man.

As we have thus achieved the opportunity of leisure to enjoy ourselves and reflect on our progress and our destiny, we have come to realize that the wilderness in all its wildness is important to us, and we have determined to preserve it as a resource of health and inspiration, of knowledge and understanding. We have come to realize that we ourselves are creatures of the wild. In the wilderness we are at home; in maintaining our access to wildness we are not, as some have thought, escaping from life but rather keeping ourselves in touch with true reality, the fundamental reality of the universe of which we are a part. We call it recreation and often, most fortunately, know its deep benefits through simple enjoyment of a good time.

Yet so deliberate and calculated has all our living grown that we have come to realize that we must be aware of the true meaning of our wilderness. If we are truly to preserve its values, we must recognize that its essential importance to us is indeed in its wildness.

Henry David Thoreau, who in his essay on "Walking" declared that "in wildness is the preservation of the world," was one of the first Americans to point out this significance of wilderness. Even in the middle of the 19th century, even before the frontier was gone—he argued for wilderness preservation. Why shouldn't we have "our national preserves," asked Thoreau as he concluded one of his essays, "Chesuncook," in "The Maine Woods," "to hold and preserve" man himself as "the lord of creation—not for idle sport or food, but for inspiration and our own true recreation?" Thoreau perceived, as he wrote in "Walden," that our life "would stagnate if it were not for the unexplored forests and meadows which surround it," and he emphasized—

"We need the tonic of wildness—to wade sometimes in marshes where the bittern and the meadow hen lurk, and hear the booming of the snipe; to smell the whispering sedge where only some wilder and more solitary fowl builds her nest, and the mink crawls with its belly close to the ground. At the same time that we are earnest to explore and learn all things, we require that all things be mysterious and unexplorable, that land and sea be infinitely wild, unsurveyed, and unfathomed by us because unfathomable. We can never have enough of nature. We must be refreshed by the sight of inexhaustible vigor, vast and titanic features, the seacoast with its wrecks, the wilderness with its living and its decaying trees, the thundercloud and the rain which lasts 3 weeks and produces freshets. We need to witness our own limits transgressed, and some life pasturing freely where we never wander."

First published in the Atlantic Monthly in 1858, Thoreau's plea for national preserves was published (posthumously) in "The Maine Woods," in 1864, the same year in which the U.S. Government made its first provision for what we now recognize as wilderness preservation. The Federal Government then, by an act of Congress approved by President Lincoln on June 30, 1864, granted the Yosemite Valley to the State of California upon the condition that it should be "held for public use, resort, and recreation." Two decades later, by an act of Congress approved by President Grant on March 1, 1872, Yellowstone National Park was dedicated and set apart as a public park or pleasuring-ground for the benefit and enjoyment of the people. Provision was made for the "preservation, from injury or spoliation of all timber, mineral deposits, natural curiosities, or wonders within said park, and their retention in their natural condition."

The brilliant and significant surveys and studies begun by the young Verplanck Colvin in New York State's Adirondacks in the 1870's, were at this same time leading to the laws and constitutional provisions that before the end of the century had firmly dedicated the Adirondack wilderness to protection by the State, "forever wild."

John Muir in his Atlantic Monthly sketches was doing his best "to show forth the beauty, grandeur, and all-embracing usefulness of our wild mountain forest reservations and parks, with a view to inciting the people to come and enjoy them, and get them into their hearts, that so at length their preservation and right use might be made sure."

When the National Park Service was established in 1916, under the leadership of Stephen Mather—some 2 years after John Muir's passing, on Christmas Eve in 1914—there were 14 national parks, besides 33 national monuments, in the national park system.

There had also been established 153 forest reservations, within which were the great wilderness destined to be preserved as the primitive, wild, wilderness, and roadless areas of the national forests.

From the Southwest, where on August 25, 1924, the type specimen of these areas was established by regional administrative action in the Gila National Forest, Aldo Leopold had begun to point out to the Nation both the importance—recreational and ecological—of the national forest wildernesses and the growing threats to their persistence. By the 1930's a national policy for wilderness preservation in the national forests had emerged. The great wilderness interpreter and champion, Robert Marshall—forester, thinker, writer, philanthropist, who had learned wilderness in the "foreverwild" Adirondacks (where with 2 companions he had been first to climb all 46 of the peaks 4,000 feet high or higher, and who had seen also the great western areas of still living wilderness "melting away like the last snowbank on some south-facing mountainside during a hot afternoon in June")—Robert Marshall—had not only written his now classic interpretation, "The Problem of the Wilderness," in the February 1930 Scientific Monthly, but had also achieved his position on the staff of the U.S. Forest Service where he was able to contribute notably to the establishment of areas for preservation and to the formulation of regulations for their protection.

Thus it was by our 1940's through the influence of such men as Henry Thoreau, Verplanck Colvin, John Muir, Stephen Mather, Aldo Leopold, and Robert Marshall, and the growing sense among many men and women of the enduring importance of wilderness, that we had in our national forests, and in other Federal and State areas, a great wilderness preservation system.

Through this system of preserved areas there will, in time, exist a national wilderness preservation system, not only in fact but by virtue of congressional legislation giving it perpetuity.

We thus propose to maintain our access to wildness, to what John Muir called "fountains of life." Our expansive civilization, we realize, will eventually modify for human exploitation every last area on the earth—except those that through human foresight and wisdom have been deliberately set aside for preservation. Through such a zoning program as is represented in our preserved areas, nevertheless, we are persuaded, we can insure the existence of a system of wilderness forever. It is not too late. Half a hundred areas in our national park system, six dozen and more areas within our national forests, a few of our national wildlife refuges, certain of our State parks, and other areas within the public domain and on Indian reservations are still wilderness—and in public ownership.

Elsewhere we know we can obtain the timber and mineral commodities we need and shall need. There we will find the needed sites for our great dams and reservoirs, build the roads and landing fields for our mechanical travel in the great outdoors, find also the places for our outdoor recreation with the conveniences and facilities we so well contrive, and in short realize all the benefits that we want from a developed country.

In our wilderness we shall see preserved the unmodified wilderness of our primeval origin, our natural home—the areas of unspoiled nature. Here we not only can seek relief from the stress and strain of our civilized living but can seek also that true understanding of our past, ourselves, and our world, which will enable us to enjoy the conveniences and liberties of our urbanized, industrialized, mechanized civilization—and yet not sacrifice an awareness of our human existence as spiritual creatures nurtured and sustained by and from the great community of life on this earth.

In our continuing access to wilderness—where we can learn the humility to see ourselves truly as the dependent members of this great community of all life—is our continuing hope for the survival of our culture.

As a species, a race, a form of life, we actually run a risk of annihilation if we forget conservation. We can see—and through our science fairly well understand—what happens to forests when conservation has nothing to do with tree cutting. We can see what happens to the soil—perhaps our greatest heritage from the earth community's long past—when we try to use it without regard for its natural place in the scheme of living of which we are a part. We know that whenever, or wherever too many game mammals or birds are shot, or too many fish caught, we can no longer enjoy this resource. Sometimes we have even seen ourselves destroy an entire species and sacrifice forever our own enjoyment and benefits that once came from it. Yet all these are in a sense merely warnings, and we know now that our conservation to be truly successful must arise, not from a too selfish concern for our own day, but rather from a sense of ourselves as a responsible part of a continuing community of life.

From the wilderness we truly gain this sense and thus in wilderness preservation we see a key to all our conservation problems. From our contact with it and its continuing influence, comes the understanding to deal wisely with all the resources of the earth which we share now, but which will also be the need of those who come after us.

Mr. ALLOTT. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum without losing my right to the floor and that I shall retain it at the conclusion of the quorum call.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McNAMARA. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Colorado.

Mr. McNAMARA. I object.

The PRESIDING OFFICER. The Chair had already announced that the order for the quorum call was rescinded.

Mr. McNAMARA. The Chair also ignored my request to be heard.

The PRESIDING OFFICER. The Senator from Colorado had asked unanimous consent that there be a quorum call without his losing his right to the floor; so he was recognized when the order for the quorum call was rescinded.

Mr. McNAMARA. I object. The RECORD will show that the quorum call will continue.

The PRESIDING OFFICER. The quorum call has been dispensed with.

Mr. McNAMARA. I object to canceling the quorum call, because unanimous consent was not obtained. I object, regardless of who has the floor.

Mr. ALLOTT. Mr. President, I do not know the purpose of the request of the Senator from Michigan; but so long as the quorum call may proceed under the unanimous-consent agreement which was originally obtained from the Presiding Officer, I have no objection whatever to the quorum call. I ask unanimous consent that the call for the quorum proceed.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will continue to call the roll.

The legislative clerk resumed the call of the roll, and the following Senators answered to their names:

[No. 185]

Aiken	Gore	Morse
Allott	Gruening	Morton
Bartlett	Hart	Moss
Beall	Hartke	Mundt
Bennett	Hayden	Muskie
Bible	Hickenlooper	Neuberger
Boggs	Hickey	Pastore
Burdick	Hill	Pell
Bush	Holland	Prouty
Butler	Hruska	Proxmire
Byrd, Va.	Humphrey	Randolph
Byrd, W. Va.	Javits	Robertson
Cannon	Johnston	Russell
Capehart	Jordan	Saltonstall
Carroll	Keating	Schoeppel
Case, N.J.	Kefauver	Scott
Case, S. Dak.	Kerr	Smathers
Church	Kuchel	Smith, Mass.
Clark	Lausche	Smith, Maine
Cooper	Long, Mo.	Sparkman
Cotton	Long, Hawaii	Stennis
Curtis	Long, La.	Symington

Engle	McNamara	Williams, Del.
Ervin	Metcalf	Yarborough
Fong	Miller	Young, Ohio
Goldwater	Monroney	

Mr. HUMPHREY. I announce that the Senator from Arkansas [Mr. FULBRIGHT] is absent on official business.

I also announce that the Senators from New Mexico [Mr. CHAVEZ and Mr. ANDERSON] are absent because of illness.

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON] are absent because of illness.

The Senator from Illinois [Mr. DIRKSEN] and the Senator from North Dakota [Mr. YOUNG] are necessarily absent.

The PRESIDING OFFICER (Mr. BURDICK in the chair). A quorum is present.

Mr. ALLOTT. Mr. President, we now come to the part of the discussion of the wilderness bill which relates to the amendment offered by the senior Senator from Colorado, for himself and other Senators, and designated as "8-18-61—D."

The amendment reads exactly the same as the language in the bill beginning at line 12, on page 10, through that portion of the language ending with the words "House of Representatives;" on line 17.

However, at that point my amendment departs from the bill as follows:

But only if prior to such adjournment Congress approves a concurrent resolution declaring itself in favor of such recommendation: *Provided*, That, in the case of a recommendation covering two or more separate areas, such resolution may be limited to one or more of the areas covered or parts thereof.

I have been on the floor now for some 2 hours, and have had an opportunity to listen to the remarks made by the junior Senator from Idaho [Mr. CHURCH] and also the remarks of the senior Senator from Oregon [Mr. MORSE]. I think a few matters should be clarified before we start discussing the amendment. First, because the Senator from Oregon was apparently under a complete misapprehension as to the facts: I know of but few people who are trying to kill this bill. I have stated over and over that, if we can get the proper protection in a bill, I will vote for a wilderness bill, and I will vote for the pending wilderness bill if the pending amendment is adopted. If it is not adopted, I shall be forced to vote against the bill, because I do not believe the great land areas of the West and the States of the West can be protected unless we have an amendment such as the one that is here offered.

Mr. President, I am interested also in another aspect of the remarks of the Senator from Oregon. I am sorry he is not on the floor, but, as I have said, I have been waiting for some 2 hours to obtain the floor. I refer to the attempt to surround this matter in a cloak of emotionalism and virtue by those who say: "Anybody who differs from my point of view is, per se, representing some special interests, or the robber barons of the West, or of some other area, and, unless they agree with me, unless they get under the same cloak of virtue I have wrapped around myself, then they are indeed a party with the devil."

Mr. President, I am not a party to the devil. I heard the great speech about the association with God, about the great spiritual values, but I want to ask—and I would ask the Senator from Oregon if he were on the floor now—by what arrogance and by what right does he claim a closer kinship to God than I do, myself, or than does any other Member of the Senate, and by what right does he claim unto himself a greater appreciation of the spiritual values than does any other Member of the Senate?

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. ALLOTT. I yield.

Mr. LONG of Louisiana. Is the Senator aware that some historians contend the mark of greatness in a politician is when he starts writing his own rules?

Mr. ALLOTT. I have heard that. I appreciate the Senator's contribution.

First of all, let us establish that there is certainly no attempt on the part of the senior Senator from Colorado to defeat the wilderness bill. I have repeatedly said that, although I have been misquoted many times as to my intentions by many interests who take this cloak of virtue and wrap themselves in it.

Mr. President, I am for a wilderness bill. But I want in such a bill protection concerning the addition of other areas to the wilderness system, so that Congress can keep control of it and so the people of the West are enabled to take care of themselves, in view of their constant expansion and the population explosion.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. ALLOTT. I yield.

Mr. GRUENING. Does the Senator's amendment go back to the areas that have already been set aside as wilderness or wild, or does it apply simply to future areas? I would like to be enlightened in my understanding of the Senator's amendment.

Mr. ALLOTT. I believe it has been understood—at least, I have heard the argument made—that my amendment applies only to future areas. It does not. It leaves in the bill provision for the wilderness areas which are now defined as wilderness areas, and it leaves in the bill provision for the inclusion of primitive areas or national park areas or wild game and wildlife refuges, if the President should subsequently recommend that they be included in the wilderness areas. It leaves the same procedures in the bill which it now contains. It does not change one dot over an "i." It requires Congress to act affirmatively upon recommendations of the President, instead of merely exercise a veto power, as the bill now before the Senate provides.

Mr. GRUENING. Will the Senator yield for another question?

Mr. ALLOTT. Yes.

Mr. GRUENING. Does the Senator share the view that, if the amendment is adopted, it will, in effect, involve future proceedings in so much red tape that, for all intents and purposes, the bill will be nullified?

Mr. ALLOTT. I propose to discuss that question at some length a little later, but I wish to answer the Senator in just one sentence. I cannot see that the bill will be nullified. I do not concede that either the Secretary of the Interior or the Secretary of Agriculture, in an advisory capacity to the President, would be any less efficient or any less vital in his activities in including proper areas in wilderness areas in the future than has been true in the past. If they recommend such areas to the President, and the President decides he shall make such recommendations to the Congress, Congress will act affirmatively on the proposal. I cannot see how it would possibly do what the Senator has suggested; but I intend to discuss the point at some length.

Mr. President, the Constitution, by article IV, section 3, vests in Congress the "power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States."

There is no question about where lies the fundamental power and fundamental

obligation to deal with Federal lands. I discussed at some length yesterday the act of 1897, which gave certain powers to the Department of Agriculture. The subsequent Park Act gave certain powers to the Secretary of the Interior with respect to parks. I think this ground need not be gone over again, because it was discussed very thoroughly yesterday when I spoke on the bill. That discussion is of course in the RECORD.

The theory and the practice of American constitutional government has been for Congress to initiate proposals and for the Executive to retain the veto power, which veto of course can be overruled by a two-thirds vote of the Congress. This is our democratic process. This is the theory and the basis for our law in the United States. Congress initiates the laws, and the Executive may veto.

What the committee has done in respect to the bill before us is to reverse that process. Since the Secretary of Agriculture and the Secretary of the Interior now act under general laws, they have by specific regulations taken unto themselves certain powers to set aside wilderness, primitive, roadless areas, and so forth. The bill provides for the Secretary to recommend additions to the wilderness system, which will come to the Congress, via a Presidential recommendation, and Congress will be placed in a position of having a veto power.

For Congress to delegate to the Executive the power to initiate legislation, and to retain to itself only a limited veto power, in my opinion would be a clear abdication of congressional responsibility. Affirmative congressional action is the only effective action.

Why do I say this? There is no question that, if requested, the respective Secretaries of Interior or Agriculture, would hold hearings before putting additional primitive areas or game and refuge areas into the wilderness system.

That leaves the door slightly ajar. The words, I believe, are "if there is any demand."

If the proposal must come back to the Congress, as required by my amendment, if adopted, there will be no doubt about hearings. Hearings will be held, not by some bureaucrat over whom Congress has no direct control, and who is a part of the executive branch of the Government. Hearings will be held by the Congress. Hearings will be held by the Senate, at which individual Senators could participate, at which Senators would have an opportunity to present witnesses and to examine and cross-examine witnesses. The type of hearing would be entirely different.

Second, this would place the burden of proof upon the proponents of legislation where it should be. Under the bill as it is now written there is no burden of proof placed on anybody.

Under the Code of Federal Regulations, title 36, referred to on page 4 of the bill, by which the Secretaries would be bound—and particularly the Secretary of Agriculture—there is no provision, as I read the law, that the Secretary of Agriculture or the Chief of the Forest Service is bound by any of the testimony. I should like to read paragraph C of section 251.20 into the RECORD.

> Wilderness areas will not be modified or eliminated except by order of the Secretary. Except as provided in pargraph (a) of this section, notice of every proposed establishment, modification, or elimination will be published or publicly posted by the Forest Service for a period of at least 90 days prior to the approval of the contemplated order and if there is any demand for a public hearing, the regional forester shall hold such hearing and make full report thereon to the Chief of the Forest Service, who will submit it with his recommendations to the Secretary.

There is no requirement under the regulations that the Secretary shall follow the recommendations, and there is no requirement that the report shall be in accordance with the testimony adduced at the hearing.

The amendment would place the burden of proof upon those who wish to add to the wilderness areas, and that is where it should be.

There is another distinct advantage of the amendment over the bill. Again and again and again we hear how the amendment would throttle the wilderness bill, but nothing could be more untrue. Under the amendment Congress would not in any sense be putting a deadline upon its action. Congress could act at any time.

Fourth, the amendment would provide for operation under the normal rules of the House and Senate, rather than the procedure of the Reorganization Act which I pointed out does not provide adequate safeguards.

When it is left to the discretion of a Secretary or any other official to act, without regard for specific requirements or recommendations; or if such an official can disregard competent testimony given at hearings, I deem it an abnormal procedure which is not in accordance with our normal concept of equity and justice.

It has been alleged by some that the affirmative congressional review is burdensome. I do not know about the feelings of other Senators, but, as I quoted in the RECORD yesterday, I believe there are 39 national parks, and the Congress has passed upon each one of them without anyone suffering from overwork.

Mr. LONG of Louisiana. Mr. President, will the Senator yield at that point?

Mr. ALLOTT. I am happy to yield.

Mr. LONG of Louisiana. Is it not true that the Committee on the Judiciary actually goes to the trouble of reporting hundreds and perhaps thousands of bills to the Senate, which it is necessary for the Senate to study and pass upon, based upon merits of individual claims, every year? That is the type of bill we pass upon most frequently, in the Congress.

If the Committee on the Judiciary can look over so many private claims bills, relating to perhaps $1,000 or up to $1 million, would it seem to be imposing too much of a burden on the Committee on Interior and Insular Affairs to suggest that it should look over the disposition of land involving as much as 100,000 acres at a time, with values running up into millions of dollars?

Mr. ALLOTT. I cannot conceive that it would be too much of a burden upon the Committee on Interior and Insular Affairs.

Since 1939 there have been no new primitive areas added, and the acreage in the wilderness area today—though there have been some slight modifications—is the same as it was in 1939.

The proof of the pudding is in the eating. It has not been possible to classify these lands. We will not be deluged with 50 million or 60 million acres for consideration by the Congress tomorrow, because the land cannot be classified that fast.

Mr. LONG of Louisiana. The Senator is a member of the Committee on Interior and Insular Affairs. I salute him, as a member of the committee. It is a wonderful committee. I have the highest admiration for all members of the committee.

As a Senator who served on the committee, I did not get the impression it was the most overburdened committee in the Senate. My impression is that the Committee on Appropriations, the Committee on Foreign Relations, the Committee on Finance, and perhaps the Committee on the Judiciary, are among the committees with a heavier workload and a greater responsibility with regard to volume of legislation imposed upon them by the Senate.

Does the Senator from Colorado know of any reason why the great Committee on Interior and Insular Affairs could not find time to look over a proposal to take areas of 100,000 or 1 million acres into a wilderness system?

Mr. ALLOTT. I believe the Committee on Interior and Insular Affairs is a hard-working committee.

Mr. LONG of Louisiana. I know that to be true.

Mr. ALLOTT. I do not know of any reason why the provision would cast an undue burden on the committee which it could not perform; particularly in the light of what the Senator mentioned with respect to certain other Senate committees which carry a far more detailed load than does the Committee on Interior and Insular Affairs.

Mr. LONG of Louisiana. I am certain that the Committee on Interior and Insular Affairs is an extremely hard working committee. It was my honor to serve on that committee for a while. I only say that the committee certainly is no more burdened with a workload than are a number of other committees of the Senate.

Mr. ALLOTT. I do not think there is any question about that point. The committee works hard, but it is not overburdened, and does not have as great a burden as do some other committees.

Mr. LONG of Louisiana. Is it not true that the construction of manmade dams in a number of areas makes such areas of greater recreational value and use by human beings for recreational and camping purpose than was the case prior to the construction of such dams?

Mr. ALLOTT. I think there is no question that the construction of dams generally results in making recreational areas more available to a much greater number of people than had been in the past. The construction of dams is a vital necessity to the preservation, retention, and use of the water, particularly for those of us who reside in the West, and also to the conservation of our water, forests, and wildlands of the West.

Mr. LONG of Louisiana. As one Senator who has been in what appeared to be a wilderness area, though I do not know whether it was so classified, I must say that the fact that there was a lake in the area and water was available made it more habitable and more possible to go there and camp, fish, and enjoy the natural values.

Would the bill permit manmade dams to be constructed in wilderness areas?

Mr. ALLOTT. It would not.

Mr. LONG of Louisiana. Is that not a question that should be considered if an area is to be made into a wilderness area?

Mr. ALLOTT. The theory of the wilderness is that it should be an area devoid of development. I should like to put it in a categorical sense. On page 14 the bill provides:

PROHIBITION OF CERTAIN USES

(b) Except as specifically provided for in this Act and subject to any existing private rights, there shall be no commercial enterprise within the wilderness system, no permanent road, nor shall there be any use of motor vehicles, motorized equipment, or motorboats, or landing of aircraft nor any other mechanical transport or delivery of persons or supplies, nor any temporary road, nor any structure or installation, in excess of the minimum required for the administration of the area for the purposes of this Act, including such measures as may be required in emergencies involving the health and safety of persons within such areas.

After that provision there is another special provision with certain modifications of language. I point out to my friend from Louisiana that, on the first and second pages, the bill provides that a wilderness area shall be an area in which no evidence of man can be found. I have never understood how a thousand people on horses can be taken into a wilderness area, with the various tracks that those horses leave during the summer, and still leave an area which can be called untrammeled by man, or an area in which one cannot detect evidence of man's having been there.

Mr. LONG of Louisiana. Are we to understand that the bill would permit the riding of horses into the proposed wilderness areas, and perhaps horse trails into the area for accessibility?

Mr. ALLOTT. Trails for horses, or shanks mares, yes, but one dare not do anything but walk.

Mr. LONG of Louisiana. Would not such a provision greatly reduce the number of Americans to whom the areas might be of potential use?

Mr. ALLOTT. I believe it would. I wish to make my position in this respect clear to the Senator. Yesterday I pointed out that, in establishing wilderness areas, we would prevent great numbers of our population from having any access to them.

First, we would prevent the use of the wilderness areas by people who could not afford to hire guides and rent horses at $10, $15, or more a day for themselves and each member of their families. We would economically remove the use of the proposed areas from a great number of people.

Second, we would remove the use of such areas from a great number of people who live a more or less sedentary life. Such people cannot put a 50-pound pack on their backs and march 10, 15, 20, or 25 miles into a wilderness area and live.

Third, we would remove the use of such areas from all or most people over 60 years of age, and those who have come to that time of life when they may retire. They have never lived a rugged kind of life. They would only be endangering their lives if they were to use the areas. So we would remove use of the wilderness areas from that group of older people for whom a road is an absolute necessity.

Nevertheless, despite all that I have said, I personally think we should set aside certain wilderness areas. We have already set aside—and my amendment would not change that—8 percent of the forest land for wilderness areas. I am perfectly willing that that shall remain, so that those who wish to go into the wilderness areas in any way they can, as provided by the act, may utilize the areas as wilderness areas.

Mr. LONG of Louisiana. We have discussed making the areas available and preserving them in a condition so that all Americans can use them. Can the Senator give me some estimate of the number of people who would use parks like Estes Park, Yellowstone, or Glacier National Park, if those parks had no roads, compared with the number of people who use the areas under existing circumstances?

Mr. ALLOTT. Those who use the wilderness areas constitute eight-tenths of 1 percent of the total number of people who use the national forests. But 8 percent of the national forests is set aside for such people. So roughly there has been set aside for the people who use such wilderness areas land in the ratio of 8 to 1.

Mr. LONG of Louisiana. The fact that there is any kind of road is important. For example, the road might be only a small two-track road, and not even an all-weather road, although a person could get through on a relatively dry day. Would the bill make it possible for a man to go into such an area with his wife and children if there were nothing more than a track or footpath to enable them to get back? For example, I speak of areas such as those in the high Rocky Mountains near the Continental Divide.

Mr. ALLOTT. I think the Senator is correct. I have read the portion of the bill which forbids such roads in wilderness areas.

Mr. LONG of Louisiana. Is the Senator inclined to the view that this is a question which should be carefully studied to make sure that the greatest number of Americans have some opportunity to enjoy some of the area about which we are talking? For example, the Senator has mentioned that less than 1 percent of Americans use the areas about which we are speaking at the present time.

Mr. ALLOTT. One percent of those who use the national forest lands.

Mr. LONG of Louisiana. That breaks down to far less than 1 percent of Americans.

Mr. ALLOTT. The Senator is correct.

Mr. LONG of Louisiana. Do I correctly understand that one-tenth of 1 percent of Americans would now be using wilderness areas?

Mr. ALLOTT. I hestitate to use these figures because I am not sure of them. I used them yesterday. I believe Mr. McArdle, or the Forest Digest, one of the two, used the figure of less than a half million people who used all wilderness areas together, and that represents about eight-tenths of 1 percent of the total using the forest lands.

Mr. LONG of Louisiana. If we look at the question in terms of the total number of people in the United States, the percentage would be much smaller than that. Perhaps two-tenths of 1 percent, or one-fifth of 1 percent—1 American out of 500—would receive the benefit of the provisions of the bill.

If the wilderness areas can be viewed as an asset belonging to all Americans, would it not make good sense that the areas should be managed in such a way that a more substantial percentage of Americans could have some opportunity to use the facilities? If not, should they not at least have an opportunity to have their case considered before they are foreclosed by measures which require no access and no ingress and no egress and no manmade improvements of nature?

Mr. ALLOTT. I agree with the Senator from Louisiana. This is precisely the reason for my amendment. For example, there are a little less than 7 million acres in the national forest, wild, wilderness, and canoe areas. I should add that there are 22 million acres in the park area, which makes about 29 million acres in all. However, the 29 million acres could grow, upon the recommendations of the Secretary, to a maximum of about 65 million acres, which would be considered as wilderness area. Then there would be, of course, less opportunity for people who are not used to the rugged outdoor life, and who are not able to care for themselves under those conditions—and that includes most Americans at this time—to use these areas.

Mr. LONG of Louisiana. The Senator is perhaps familiar with the Appalachian Trail, which goes along a portion of the eastern seaboard, starting in Maine and going on down to the middle of Georgia. If the Senator has gone over a part of the Appalachian Trail, he may have noticed that at certain places there are rustic sheds and an outdoor privy, together with the rudiments of what could be made into a bed, where a person could sleep off the ground if he put a bedroll on it or put some pine straw on the steel wire before he slept

on it, which would be particularly to be desired in the case of the presence of insects or where one was inclined to worry about snakes on the ground. Would such a manmade shed or privy, or sanitary facilities, be within the requirements of the bill?

Mr. ALLOTT. As I read the bill, a privy would not be legitimate in the wilderness area.

Mr. LONG of Louisiana. How about a mere shed, to keep the rain off a hiker?

Mr. ALLOTT. A shed would be ruled out also, although I must say there are a few escape hatches in the bill. At page 16 of the bill, subparagraph 4 provides:

(4) Commercial services may be performed within the wilderness system to the extent necessary for activities which are proper for realizing the recreational or other purposes of the system as established in this Act.

So, while the bill is an attempt to provide for a tight, hidebound system of wilderness, there are several escape hatches built into the proposed act, which might be in the form of a privy.

Mr. LONG of Louisiana. How about an occasional artesian well, a situation where a mere pipe stuck in the ground would make it possible to have some water for a person who had been hiking for 10 or 15 miles?

Mr. ALLOTT. In my opinion that would violate the provisions of the bill.

Mr. LONG of Louisiana. Do not provisions of that type make it difficult to make best use of the land available for these purposes?

Mr. ALLOTT. Obviously.

Mr. LONG of Louisiana. Suppose along a trail people would like to cut some trees out of their way so that they could see a beautiful view. Has the Senator ever had the experience of wanting to see a beautiful view, but not being able to because of the trees and underbrush in the way?

Mr. ALLOTT. I have had that experience.

Mr. LONG of Louisiana. Suppose there is a gorgeous scenic view. Would it be possible under the terms of the bill for someone to cut an opening through the trees or underbrush in order to see that beautiful view?

Mr. ALLOTT. In my opinion, it would be against the spirit of the bill or the intent of the bill.

Mr. LONG of Louisiana. Does the Senator know that so far as the whole Appalachian Trail is concerned, it is probably impossible to see a view from the mountains unless someone has cut a tree down or done something else in order to see the view?

Mr. ALLOTT. I must confess that I am not acquainted with the Appalachian Trail except in general terms, but I have found such a situation out West when I have had to do a great deal of climbing, because of trees and brush and other things in the way, in order to get the view that I wanted to get.

Mr. LONG of Louisiana. As long as one is not in the rocky area, but below the tree line, does not that same problem exist?

Mr. ALLOTT. It exists. Of course, it is necessary in a case like that to climb above the timberline.

Mr. LONG of Louisiana. In some places I assume one cannot get above the timberline.

Mr. ALLOTT. Yes. Here again it is important to point out that there are a great many people who will be forbidden enjoyment of this area because of physical ailments, and also that there are more deaths in the fall during the hunting season due to heart failure than due to any other cause, because people who are not used to this life overextend themselves and die of heart failure. Incidentally most of the wilderness area is up at a considerable altitude.

Mr. LONG of Louisiana. I wonder whether the Senator ever had the experience that befell me at one time, that of getting lost in one of these areas.

Mr. ALLOTT. I was never lost in a wilderness area. When I was a young fellow I was once lost in the mountains west of Pueblo, Colo. It took me several hours to get out again.

Mr. LONG of Louisiana. I must report to the Senator that I once got lost out West on the border of the State of Colorado, in a national forest. It is a wonder to me that I ever got out again. Would not a little road or a trail help a person get out of such an area if he were lost?

Mr. ALLOTT. The Senator has brought out again the fact that there are very few people who are trained and who are in the proper physical condition to cope with a wilderness situation, because they do not have the background which enables them to find their way out of such an area. Trails and roads certainly would help.

Mr. LONG of Louisiana. Suppose a man, an average husband with a wife and two children, wanted to go into one of these wilderness areas and come out again, perhaps stay in there for 3 or 4 days. As a practical matter, most of them would not last 3 or 4 days, sleeping on the ground. However, let us say that they stayed in there for 3 days. Can the Senator give me any idea what the cost would be to hire pack horses and a guide to take them in there and stay for a few days to help them find out how to exist in such an area and then to come out again?

Mr. ALLOTT. I cannot give the Senator such information. A figure was given to the committee by the Sierra Club, a club which is such an ardent advocate of the pending bill, in California, in which they said they ran one trip and, my recollection is, they said they charged $8 per person a day. I will say that that is a rate which is a great deal cheaper than any of which I ever heard.

Mr. LONG of Louisiana. That sounds very low to the junior Senator from Louisiana, based on what little he knows about the problem. However, that works out to about $32 a day.

Mr. ALLOTT. For a family of four; yes.

Mr. LONG of Louisiana. I assume that they would be doing their own cooking while they were in there.

Mr. ALLOTT. That is correct.

Mr. LONG of Louisiana. And they would be sleeping in there without a roof over their heads.

Mr. ALLOTT. That is correct.

Mr. LONG of Louisiana. Would it not be a great deal cheaper if there were some form of ingress, so that people could get in there without horses and guides to take them in and out of those places?

Mr. ALLOTT. Yes; if they could put a tent and oilstove in the back of their car and drive in there. They would not desecrate the area any more than would 100 horses in a few days. In addition, there would be many more people getting the benefit of the area.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. ALLOTT. I am glad to yield to the Senator from Alaska, although, the way he smiled a while ago, I am afraid he is about to ask a loaded question.

Mr. GRUENING. Will the Senator from Colorado permit me to challenge his assertion that under the present wilderness bill a person over 60 years of age would be precluded from the enjoyment of these areas?

Mr. ALLOTT. I do not believe I made quite that statement. I said the great bulk of people over 60 years of age would. I know that the Senator from Alaska is one of those rough and hardy persons who are a day or two past 60. He has lived ruggedly and in the outdoors all his life. He is not one of those persons who would fall in that category. I realize that.

Mr. GRUENING. I thank the distinguished Senator from Colorado.

Mr. ALLOTT. I can understand why the Senator laughed and why there was a glint in his eye. He intended to bring that up when I discussed this subject.

Mr. LONG of Louisiana. Mr. President, will the Senator from Colorado yield?

Mr. ALLOTT. I yield.

Mr. LONG of Louisiana. Inasmuch as the point was raised, I think the RECORD should show that the Senator from Alaska [Mr. GRUENING] is one of the most avid athletes in the Senate and one of our most expert swimmers. The water never gets too hot or too cold for him, whether it is in Puerto Rico or Alaska.

Mr. ALLOTT. I know that is true.

Mr. LONG of Louisiana. He is one of the few Members of the Senate who can swim with the seals.

Mr. ALLOTT. Mr. President, I was saying, a few moments ago, that affirmative congressional action is not unduly burdensome. I stated yesterday that some 22 out of 83 national monuments have been established by congressional action. Congress has not broken down under the load. The Committee on Interior and Insular Affairs has not broken down under the load. All the national parks in existence have been established by congressional action. That has been the procedure for all national parks.

By way of comparison, the 86th Congress—the Congress preceding this one—enacted more than 140 public laws which had been referred to the Committees on Interior and Insular Affairs of the Senate and House.

In view of the fact that the review by the Department of Agriculture of the remaining 39 primitive areas has not been completed in more than 22 years, I

have no doubt that Congress could act affirmatively upon each of the remaining areas as rapidly as the executive branch of the Government could report on them. Let us think about that a moment. For 22 years the executive department has not acted upon the remaining primitive areas. Now we are told that this proposal will cast a burden on Congress which Congress cannot accept. If the executive department does not move any faster in the next few years than it has moved in the last 22 years, I do not believe we in Congress need to feel concerned about our being able to do the work.

There is no crisis which necessitates the abdication of congressional control. Congress has considered these questions for many years. There has been no real classification. It was said earlier today by the senior Senator from Oregon [Mr. MORSE] that primitive areas are not blanketed in. I do not know how language could be plainer than it is on page 3 of the bill:

> The wilderness system shall include all areas within the national forests classified on the effective date of this Act by the Secretary of Agriculture or the Chief of the Forest Service as wilderness, wild, primitive, or canoe.

If that does not blanket them in, I do not know what does. It is true that a review is provided; and it is that review to which the amendment of the senior Senator from Colorado is directed.

Mr. KUCHEL. Mr. President, will the Senator from Colorado yield?

Mr. ALLOTT. I yield.

Mr. KUCHEL. Is it not true, however, that under present law the Secretary of Agriculture today has the untrammeled authority to classify every acre in his domain of the national forests as wilderness area with no review by Congress?

Mr. ALLOTT. I do not know what the word "untrammeled" means in the sense the Senator from California uses it, but I am not certain that the Secretary of Agriculture has that authority. He has assumed or taken authority under the act of 1897, and issued regulations U–1 and U–2, which I discussed thoroughly yesterday.

I should say the Secretary of Agriculture does not have the untrammeled right, because he still must comply with subsection (C) of the Code of Federal Regulations, title 36. In other words, he still must hold hearings, whether he pays any attention to them or not. So he does not have an arbitrary right.

Mr. KUCHEL. But is it not true that under present law, as enacted by Congress in 1960, the Secretary of Agriculture has the authority to make a decision as to what area shall constitute wilderness without review of any kind by Congress?

Mr. ALLOTT. After complying with title 36 of the Federal code.

Mr. KUCHEL. But it is true that the Secretary does have the right to make such decisions?

Mr. ALLOTT. After complying with the code; and that is a very important difference.

Mr. KUCHEL. So the Senator's answer is that the Secretary has that right, subject to such procedure as required by the regulations he himself promulgates?

Mr. ALLOTT. That is correct. The Senator from California has raised a question which is very important; namely, why we must regulate the situation. Congress has been sitting on its hands almost literally for almost 22 years. Now, all of a sudden, it is said that action must be taken to preserve the wilderness.

From the Forest Service itself we can find that the protection presently afforded primitive areas within the national forests is wholly satisfactory. I read from a booklet issued by the Forest Service. The last 2 paragraphs of this document, No. PA–459, are as follows:

> The guiding principles of multiple-use management insure that all resources, all uses, and all users are considered in developing management plans for the national forests. Within this framework and consistent with policy of over 35 years' standing, the Forest Service is protecting and maintaining in their natural state those parts of the national forests which have been designated as wilderness.
>
> Multiple-use management, then, is providing this generation of Americans with optimum opportunities for wilderness recreation. And for the benefit of those generations of Americans yet to come, it is making certain that these irreplaceable wilderness lands shall endure.

Mr. President, I cannot help remarking that that is a misstatement, because there is no multiple use in the wilderness areas today. The only apparent reason for asking Congress to abdicate a large measure of its control over 8 million acres of primitive areas in the national forests is the fear that if Congress took a close look at each of the 39 areas, it would find that the restrictions imposed upon them by the bill would be unjustified and undesirable.

Mr. President, the principal point of the amendment is that we in Congress have a right to impose such restrictions and such conditions upon the inclusion of each one of the primitive areas into the wilderness system, so that the public as a whole may be protected, and so that each of the States and the individual citizens of the States, who are also users of the areas, may be protected.

Mr. MUNDT. Mr. President, will the Senator from Colorado yield?

Mr. ALLOTT. I yield.

Mr. MUNDT. I have been following the Senator's argument, and I have read what he said on this subject yesterday. Does his amendment make any change in the bill other than to retain the historic and constitutional right of Congress to legislate affirmatively, rather than to attempt to exercise a sort of executive veto in reverse by negative legislative action?

Mr. ALLOTT. It does not.

Mr. MUNDT. In other words, the Senator's amendment is limited solely, as I understand, to reaffirming the historic right of Congress to pass affirmatively on legislation and on recommendations for the extension of wilderness areas. I may say that I favor the wilderness area concept. I have advocated it for a long time and have voted for it in the past. But I am at a loss to understand any valid reason for trying to put Congress out into some kind of pigeonhold, where it will have nothing further to say about the wilderness areas.

Mr. ALLOTT. The Senator from South Dakota, with his usual sagacity, has put his finger exactly on the point. If the procedure in the bill is followed, and the respective Secretaries make recommendations to the President, and the President then makes recommendations to Congress, Congress will be placed in the position of having to say yes or no. I shall have to modify that statement slightly, because Congress can restrict the boundaries or take part in the recommendation. Otherwise, as to any other conditions or any commercial use whatsoever, including the construction of roads or dams or water works or water conservation projects, Congress must consider the recommendations as the President makes them, and say yes or no.

As the Senator has pointed out, the great advantage of this amendment is that when the matter comes to Congress, for affirmative review by it, Congress then can hear all the arguments and can make other modifications if they appear to be desirable. Otherwise, Congress could only say yes or no.

Mr. MUNDT. Do not we have here almost precisely the same situation which confronted us at the time when the administration's first farm bill was before us, earlier during this session, when Secretary Freeman blandly suggested that the new farm program be written by the Department of Agriculture, after whatever consultation it decided it should have, and then be sent to the Congress, which could vote either yes or no, but with no possibility of adding amendments or making changes or alterations or modifications?

Mr. ALLOTT. Yes, the situation is very similar.

Mr. MUNDT. I thought that both Houses of Congress rather effectively disposed of that attempt by the administration to grab power which did not belong to it, for when the bill was passed by the two Houses, both Houses were of such a mind to retain their authority that, no Member of either House at the time the legislation was adopted even offered an amendment supporting the administration's proposal that Congress vacate its authority in connection with the very important subject of farm legislation affecting the entire Nation. Still the new farm measure is described by Secretary Freeman as constituting a real advance in the field of agricultural legislation; and the President of the United States, in his exuberance, although when taking a somewhat misty view, I believe, because he does not come from an agricultural area—has heralded that measure as the greatest agricultural act ever to be passed by Congress. How I wish I could share his enthusiasm for its effectiveness. Therefore, if we are to be consistent, after we have acted to retain congressional authority in dealing with the farm program, which affects, either directly or indirectly, approximately one-third of the country, insofar as agricultural activities are concerned, and if Congress can be trusted

to deal properly with respect to that area, I believe Congress can equally well be trusted to deal properly with such matters as the writing of regulations in regard to the operation of motorboats on streams in wilderness areas.

Mr. ALLOTT. Certainly that is correct. Furthermore, in connection with the foreign aid bill Congress asserted its right, its duty, and its responsibility to make annual appropriations for that purpose; and after the passage of that bill the President referred to it as wholly satisfactory. So I do not understand why we should do less in dealing with a matter which affects our land and the regulation of our people for many, many years to come.

Mr. MUNDT. I quite agree. I am much disturbed about the zest for increased Executive power which seems to pervade bill after bill which has been brought forward by the administration at this session. That effort was made in connection with the agricultural bill; but we rejected that effort, almost unanimously. A similar effort was made in connection with the foreign aid bill, and that effort was rejected by the action of a courageous and constructive coalition of southern Democrats and rural Republicans in the House of Representatives; and the conference respected that decision.

Now a similar effort bobs up in connection with the wilderness bill.

As one who, years before coming to Congress, made many talks and engaged in many activities to expand the wilderness areas—and I was serving as national vice president of the Izaak Walton League when I was first elected to Congress—I believe in these wilderness areas; but I believe they must constantly be kept in harmony with the needs and desires of the areas and the wants and desires of the people who wish to utilize and enjoy them. Simply to engage in conservation for the sake of conservation is not a very fruitful national policy.

It seems to me that conservation must produce results which can be utilized and enjoyed by the people, and I believe that the monitoring counsel of Congress is needed in that connection.

In the separate views written by the Senator from Alaska [Mr. GRUENING], whose swimming attributes have been alluded to this afternoon, I notice that he seems to sense that something is missing from this bill—that, somehow or other, we should be sure that the people themselves are consulted in regard to what kind of utilization is to be made of these wilderness areas, for in his separate views—which have been printed in connection with the committee report, which I now hold in my hand, on Senate bill 174, to establish a national wilderness preservation system for the permanent good of the whole people, and for other purposes, he records with some enthusiasm that he has had an amendment added, so as to include a new section 9, with the heading "Land Use Commission." That indicates that he, too, feels that these wilderness areas should be used by someone, in some way, rather than only to be set aside as nesting places for birds and homes for wild animals and places for the development of foliage—that he, too, believes that someone, in some way should have an opportunity to look at them, to enjoy them, to enter them, and then to leave them, leaving them as unspoiled as he found them.

But in these individual views we also find manifestations of the strange idolatry of the Chief Executive which is anathema so far as I am concerned, for human beings in the executive branch function very much as do human beings in the legislative branch; in other words, all are equally subject to bad judgment and errors, as we observe them in this branch. So in reading the separate views submitted by the Senator from Alaska, we find that he has provided with some enthusiasm, as the new section 9 of the bill—an amendment which the committee has included in the bill—the following:

> With respect to any State having more than 90 per centum of its total land area owned by the Federal Government on January 1, 1961—

And I note with some curiosity the statistic 90 percent; I do not know why is would not also be proper in the case of a State which had only 80 percent or some other high percentage of its land owned by the Federal Government on that date, and I wonder whether this provision singles out Alaska for special treatment.

Mr. ALLOTT. Let me point out that Alaska is the only State in that category.

Mr. MUNDT. Yes, and I wonder about the wisdom of having the Senate pass proposed legislation which provides special favors for only 1 of the 50 States.

But quite apart from that, and returning to the matter of the basic philosophy inherent in such measures, which I resent, I read further from the amendment which the Senator from Alaska was successful in having the committee include in the bill which it has reported to the Senate:

> With respect to any State having more than 90 per centum of its total land area owned by the Federal Government on January 1, 1961—

Which we now understand is simply a polysyllabic way of spelling "Alaska"—

> there shall be established for each such State—

To wit, Alaska—

> a Presidential Land Use Commission (hereinafter called the Commission). The Commission shall be composed of five persons appointed by the—

Mr. President, appointed by the Governor of such State? That is what one would normally expect, because the Commission would be established for the purpose of protecting the State itself against bureaucratic excesses. But, no, not at all; the amendment provides that—

> The Commission shall be composed of five persons appointed by the President.

Mr. President, what kind of new technique is proposed to be established in connection with Federal-State relationships, when it is proposed that the personnel of a Commission to protect a State against Federal aggression shall be appointed by the President, even though the purpose of the Commission is to guard against possible excesses by the President and his official family. In criminal practice the suspect never appoints the jury or selects the judge. But in this case it is provided that the President shall appoint the members of the Commission to be established for the purpose of protecting the several States, or any portion thereof which happen to have 90 percent or more of their land federally owned as of the date specified.

I mention this matter because it seems to me that in an amendment of this kind it would be much more consistent to provide that the Governor of the State appoint the members of the Commission which would be established for the purpose of protecting the State and the use of the land of the State against unwanted or unwise Federal regulations or stipulations.

However, such provisions for the surrender of power to the executive branch are replete in this bill.

So I congratulate the Senator from Colorado on his diligence in writing an amendment which in no way, shape, or form endangers the wilderness; or in no way, shape, or form destroys the purposes of the bill; or in no way, shape, or form creates new possibilities for destroying the national wilderness areas, but simply states that the Congress can be trusted to take proper action in connection with the inclusion of areas affecting birds, fish, trees, flowers, and shrubs, and that Congress can be trusted to take proper action affecting the life and future and recreational values and activities in such areas in the United States of America.

It seems to me it is wise to make the valiant effort which the Senator is making to discontinue persistent attempts to whittle away the status of Congress until it becomes an assembly of puppets dangling at the strings which are manipulated from the executive agencies and the White House.

I shall support the amendment, and I certainly hope the Senator is successful.

Mr. ALLOTT. I appreciate the very kind remarks of the Senator from South Dakota, which have been very helpful.

I wish to address myself to one point he has made. I also do not like the provision for the Land Use Commission in section 9 of the bill, but I must say, in all fairness, because the Senator from Alaska [Mr. GRUENING] is on the floor, as are other Senators who were present at the markup of the bill, that we wrestled for some time with this question. Perhaps in the final edition of the bill, when it comes from conference, we may have another way of doing this. Alaska has so many unusual problems and presents an unusual situation, not alone from size, and from the fact that over 99 percent of its land is owned by the Federal Government. We thought this was the only way to do it. I am not enthusiastic about the provision in its present form, but perhaps, before the bill becomes law,

we shall find some way to take care of the situation in which the people of Alaska feel they have been overridden, exactly as the Senator has said, time and time again, particularly by one of the departments of Government.

I hope we can straighten the situation out. I am not enthusiastic about the present form of the provision, but I must say I voted for it. I am happy I did, because the people of Alaska need special attention, and steps must be taken to prevent a department of Government from running over a State which is small in population.

Mr. MUNDT. I am not averse to having special protective legislation for Alaska and I shall not oppose it since it is a unique position. I simply wanted to call attention to the fact that the ambiguity of the language did not conceal the specifics so far as the Senator from South Dakota is concerned. I recognize the problems of Alaska. I have been in Alaska. My point is directed primarily to the realistic situation that, if the great State of Alaska, as I think it does, and as I think I would feel if I were representing that State, needs some kind of extra protective mechanism against executive departments, I submit we are sending a "boy to the mill" with this particular amendment. There is certainly not much protection provided in any Land Use Commission, which is established to sound a warning note, to sort of set up some brakes, to monitor the activities of a department which has been encroaching upon it, when the Land Use Commission itself is appointed by the White Hcuse, who appoints the head of the department against which Alaska seeks protection.

It would make a great deal more sense to me, it would give me a great deal more assurance if I represented Alaska, it would make me feel better as a Senator seeking to protect the vanishing rights of the States which are still left, if it were provided that the Land Use Commission were to be appointed by the Governor. Then we would have stalwart guardians standing at the gates of Alaska to protect the State, rather than have the Commission appointed by the same source that appointed the Cabinet officer against whom Alaska was seeking to be protected.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. ALLOTT. I yield, with the understanding that I do not lose the floor.

Mr. GRUENING. I thank the Senator from Colorado and the Senator from South Dakota for their sympathetic comments. I wish to point out and set straight for the RECORD the fact that the amendment originally introduced in committee provided that three of the five members of the Commission were to be appointed by the President upon recommendation of the Governor of Alaska, but that language did not prevail.

Mr. MUNDT. I congratulate the Senator on his perspicacity in that connection. I hope it will be supplemented by a diligent effort to have such an amendment adopted on the floor, and I assure him that, if he makes such an effort, I shall be happy to support him 100 percent. I think Alaska is entitled to that protection. Perhaps other States should have it also. I think a false sense of security is created when the same source has the appointive power to name both the agent against whom Alaska has fears and the Commission which is supposed to protect Alaska against that agent.

Mr. ALLOTT. I thank the Senator. His comments are particularly valuable because they make a strong argument for the amendment now pending.

The Senator from Alaska [Mr. GRUENING], who is present on the floor and who has participated in the colloquy, knows as well as I do the position of disadvantage in which the Western States, particularly, will be if the amendment does not carry. I point out that, if the amendment is adopted, the people of Alaska will have more protection through their right to appear and be represented before a committee of Congress which must act affirmatively upon a recommendation of the President than they would ever have in their representation by a Land Use Commission which, however well intentioned, can never have the power that Congress has.

Congressional hearings are necessary. They are necessary to obtain the sentiments of the people most vitally affected by designating an area as a wilderness area.

I wish to introduce into the RECORD at this point a letter from Mr. J. E. Whitten, State engineer of Colorado, which encloses a resolution of the Association of Western State Engineers adopted in Bismarck, N. Dak., on August 15 through 17, 1961, against the passage of S. 174. I have stated before, and I will state again, that if this amendment is adopted, which will protect the Western States, I shall vote for S. 174.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. ALLOTT. I yield.

Mr. MUNDT. I think this amendment has much broader dimensions than merely that of protecting the Western States. To me this is an amendment which protects the validity, authority, and integrity of Congress and the rights of all 50 of our sovereign States.

Mr. ALLOTT. That is correct, in its broad sense, but in its immediate application to the subject matter, I think what I have stated is the more immediate objective. As the Senator well knows, I have long taken the position that Congress has surrendered too many of its powers to the executive branch. Too often we pass bills with broad general language, saying the President or the Secretary shall have power to do this or that, but we do not define with enough detail the areas within which the bureaucrat is supposed to act, and we find ourselves "on the hook" time and time again as a result.

I ask unanimous consent that the letter to which I previously referred, together with the resolution, and a letter from Elton K. McQuery, director, western office of the Council of State Governments, and the enclosed resolution opposing passage of the bill without the amendment, be printed at this point in the RECORD.

There being no objection, the letters and resolutions were ordered to be printed in the RECORD, as follows:

STATE OF COLORADO,
OFFICE OF THE STATE ENGINEER,
Denver, Colo., August 30, 1961.

Hon. GORDON ALLOTT,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ALLOTT: For your information I am forwarding copies of the resolutions adopted at the annual meeting of the Association of Western State Engineers held in Bismarck, N. Dak., August 15, 16, and 17, 1961.

Very truly yours,

J. E. WHITTEN,
State Engineer.

RESOLUTION 5

Resolution relating to national wilderness preservation system bills

Whereas certain bills have been introduced in successive Congresses which would establish a national wilderness preservation system; and

Whereas such bills would authorize administrative creation of wilderness areas additional to areas designated by the Congress in creating the system; and

Whereas water conservation and modification of plant cover in wilderness areas would be allowed only upon an express presidential finding of greater national interest than an otherwise presumed paramount interest in wilderness preservation; and

Whereas diverse national interests will be more fully satisfied through a discerning policy of accommodation of all uses of such areas than by an absolute preferment of an exclusively undeveloped status: Now, therefore, be it

Resolved, That while the Association of Western State Engineers is not opposed to the establishment of wilderness areas under proper management, it is opposed to any wilderness legislation which would impede water resources development in the Western States; and be it further

Resolved, That the establishment of new wilderness areas or the expansion of existing areas should be accomplished only upon the specific approval of Congress to each new inclusion of such areas; and be it further

Resolved, That copies of this resolution be forwarded to the Secretary of the Interior, the Secretary of Agriculture, and to members of the House and Senate Committees on Interior and Insular Affairs, and that each member of the Association is requested to send copies of this resolution to the members of the congressional delegation from his State.

RESOLUTION OF WESTERN INTERSTATE COMMITTEE ON PUBLIC LANDS

Whereas national legislation and regulation which establish wilderness preservation areas are contrary to the multiple-use principle in the managment of Federal lands; and

Whereas enactment of special interest legislation and regulation would seriously handicap multiple-use management of Federal lands; and

Whereas wholesale withdrawals of public land would be detrimental to the general tax structure and would limit and reduce the normal operation and development of the following industries: mining, timbering, reclamation, recreation, grazing, oil and gas and dependent service industries in the Western States: Now, therefore, be it

Resolved by the Western Interstate Committee on Public Lands, That the Congress of the United States is hereby memorialized to oppose the wilderness preservation system

as proposed in the Wilderness Act as an infringement on the administrative flexibility of the present system and because the announcement of such a proposal would subordinate policy decisions to a small council of nonrepresentative users; and be it further

Resolved, That the Congress of the United States is hereby memorialized to oppose all of the legislation and regulation not in accord with the multiple-use principle in the management of public lands; and be it further

Resolved, That a certified copy of this resolution be prepared and transmitted forthwith by the western office of the Council of State Governments to the Vice President of the United States, the Speaker of the House Representatives and each Member of the congressional delegations from the Western States.

Mr. ALLOTT. Mr. President, we need hearings to get information on all the available resources in the areas affected. There is not a Member of the House, or of the Senate, the latter of whom sits on at least two committees, who does not know and who has not experienced time and time again the utter futility and sense of frustration of trying to legislate upon matters when the only witnesses are from the very bureaucratic areas of our Government who are going to be affected by the legislation. Time and time again we have to depend wholly upon that one point of view. This amendment will put a stop to such procedures. The amendment will make sure that everybody will have a right to be heard.

The amendment will make certain that each State has a right to be heard. It will make certain that every witness may be examined and cross-examined, if necessary, for the elicitation of every bit of information vital to the consideration of the inclusion of areas in the wilderness system.

The needs of today may not be the needs of tomorrow. We may not need today what we shall need tomorrow. It is impossible at this time, in one fell swoop, to classify all the lands involved. We need to expose them and to reexpose them, as each area is presented to the Congress, to a full examination and inquiry, so that Congress can assume the responsibility for assuring itself that the need for the primitive area to be wilderness is greater, for example, than the need for rare minerals. In the converse, Congress should determine whether there is a greater value to the land as wilderness than as a sandpit.

We need to determine, with respect to each area, whether wilderness preservation is the highest and greatest use. This is a determination that should not be left willy nilly to the Secretary of Agriculture or to any other secretary, particularly since the Code of Federal Regulations, to which I have referred, which is cited on page 4 of the bill, does not require that the Secretary follow the recommendations of the Chief of the Forest Service and does not require that the Chief of the Forest Service follow the testimony which is presented to him in a public hearing.

We need to adopt the amendment to determine if such legislative provisions are necessary in given areas to meet peculiar situations. Roads may be required. A peculiar mining situation may be involved. A peculiar logging situation may occur. There may be a peculiar water situation or a peculiar conservation situation. All of these problems can be handled by the committee.

However, if we accept the bill as it is now written, Congress will have one of two things to do: to take it or to leave it—to take it as it is or to veto it. As a consequence, Congress will not have any real choice, whereas it should have the right to put in special provisos if they appear to be necessary.

Someone may say that I am straining at a gnat in this regard. That is not in the least the case. Though mining is usually forbidden in national parks, Congress wrote special provisions into the law relating to Mount McKinley National Park.

There is pending before Congress at the present time the Great Basin National Park bill in the great State of Nevada. In respect to this particular bill, if Congress provides that the area shall be a park it will have to violate general principles relating to national parks, because Congress can only establish this area as a national park if it makes special provision for mining.

I wish to read to the Senate the testimony of the Secretary of the Interior given August 3, 1961, before our committee with respect to this particular park:

> As I have already stated, the area proposed for park establishment by S. 1760 would be subject to use for mining and mineral leasing activities. I believe it worthy of special mention, however, to point out that there could be no acquisition by locators or entrymen of title to the land or lands containing them. This is the formula prescribed by the Congress for mining activities within the Glacier Bay National Monument in Alaska. We believe this approach is both reasonable and workable because it makes possible the utilization of important mineral resources and yet assures protection of the scenic, scientific, recreational, and other natural values of the lands containing them. In furtherance of the objective to preserve these values within the proposed Great Basin National Park, the removal of mineral and vegetative materials under the act of July 31, 1947 (61 Stat. 681), as amended, would be precluded.

The Secretary of the Interior himself has illustrated the necessity for keeping control in the Congress. In two instances he cites the specific need for making broad exceptions. Unless Congress retains control it will be faced with a "take it or leave it; veto it if you will" proposition.

Under the present form of the bill Congress would be legislating in the dark. With respect to the primitive areas, Congress has no accurate information on the characteristics of the resources of the 39 primitive areas. I have attended a great many meetings of the Committee on Interior and Insular Affairs in the past few years. I must say I become even more confused at each meeting, when I try to learn what are the resources of the primitive areas, or whether there are any.

The Department of Agriculture itself apparently does not have that information. I spoke at some length yesterday about the fact that the Department was unable to give us even a legal description of these areas. If the Department cannot give us a legal description, it is hard to imagine how the Department could give us a description of the resources or tell us for what purpose the land is most valuable.

Will we be locking up rare minerals which we need to advance our missilry, to advance our space program, to advance our technological and scientific development? We do not know. The Department does not know. This is another reason why Congress must retain the positive, affirmative power to act.

According to information contained in a Forest Service brochure distributed January 16, 1961, which referred to the primitive areas established between 1929 and 1939:

> Many of these areas * * * were selected with the idea that further study and possible changes would be necessary before some could be completely qualified as having true primitive conditions.
>
> Boundaries were drawn to include all parts of an area which might qualify. The boundary lines were, of necessity, based on then existing general knowledge of the area rather than on thorough, on-the-ground surveys.

The Forest Service itself has admitted it does not know with what it is dealing, yet Congress is asked, for the future, based upon a negative veto power, to blanket all of these areas into the wilderness system.

During the 20 to 30 years these areas have been designated as primitive, on-the-ground surveys still have not been completed and resource inventories have not been made. If the Department of Agriculture is now in a position to complete these on-the-ground surveys and to inventory the resources in the primitive areas, it should complete these tasks and report its findings to the Congress before restrictions are imposed by the Congress. If the statement to which I have referred is true, these primitive areas should not be initially included as wilderness areas.

Congress should not be asked to legislate in the dark.

I wish to say a word or two about national park lands. At least in recent years whenever Congress has been asked to approve the establishment of a national park, the Park Service has been very emphatic in pointing out that all of the lands proposed to be included in the national park were necessary for park purposes. It has been assumed that this has always been the practice and that all lands included within our national parks are necessary for the purpose of the parks. However, now we are asked to lock up in the national parks all areas of 5,000 acres or more which are without roads. This leaves a supposition that the lands are not necessary for park use but are only necessary for wilderness use.

Before such is done we should know, in each instance, the nature of the land and how much land is involved. We need to examine the proposals to determine whether too large a portion of our national parks is being closed to the 98 percent of the American people who do

not or cannot pack into a wilderness area.

Mr. President, in concluding my remarks I repeat that which I have said many times. I wish to make it clear that if the amendment is agreed to I shall vote for the bill.

I introduced into the RECORD the resolutions of numerous States concerning the bill. My own State legislature has memorialized Congress three times against the bill.

Despite what I have said, if we will give Congress positive control so that we can be assured that the lands that will come into the wilderness system subsequently will be devoted to their highest use, and so that each State and area may be protected, I shall vote for the bill. If we do not do so, I shall have to oppose the bill. I shall oppose it not upon the ground that I do not desire wilderness areas. My position may be different from that of some others. I desire wilderness areas. I shall oppose the bill because I am not willing to place into wilderness, by bureaucratic action in the next 10 years, additional millions of acres upon a "take it or leave it" basis. We have already surrendered too much power to the bureaucrats. I think it is time to take control back for the protection of the American people. As has been pointed out, we do not seek the protection of a few economic interests.

A while ago a Senator said that he had been threatened politically. I also have been threatened politically on this question, not once but hundreds of times. I believe that the future of this country needs not only recreational facilities and wilderness, but also other facilities. I believe that in the West we cannot exist unless we develop the land, unless we provide means of conserving water, build dams, and take means toward conservation that are not provided for in the bill. The future of the West is still great, but it can be great only if it is allowed to grow. I do not want these areas tied up without giving Congress an opportunity to study their use.

Mr. PROXMIRE. Mr. President, I oppose the amendment designated "8–18–61—D," the pending amendment. Before I discuss it, I should like to call attention to a section of the committee report which I think puts a little different emphasis on the uses of wilderness areas than has been put on them in the colloquy on the floor of the Senate a few minutes ago. At the bottom of page 20 of the report the following appears:

> Wilderness areas, as distinguished from park-type facilities where mass recreation is available, are being used by 2 to 3 million persons annually.
>
> The use is less casual than use of other types of recreational facilities. Trips into wilderness are frequently of many days or weeks duration. They are often a once-in-10-years event in life, or even a once-in-a-lifetime expedition to some remote scenic or historic mountain or area. As a consequence of the nature of wilderness use, annual visitor figures—even if more adequately and reliably gathered—would not be indicative of the proportion of citizens interested in wilderness recreation.

Mr. CHURCH. Mr. President, will the Senator yield at that point?

Mr. PROXMIRE. I yield.

Mr. CHURCH. In the course of the debate on the bill there has been much reference to the fact that wilderness areas constitute some form of class legislation. It has been asserted and reasserted that it is the rich people who will get the major benefit to be derived from wilderness areas, apparently upon the theory that only the rich will be able to afford the horses, tents, and camping equipment that would be required for organized safaris into the primitive areas of the country.

I submit that such argument is nonsense. In Idaho there are 3 million acres of primitive areas. Every year thousands of people go back into the high country of the Idaho Primitive Area, the Bitterroot Primitive Area and the Sawtooth Primitive Area. They are ordinary farmers, ordinary working people, ordinary hunters and fishermen from the farms and cities of Idaho. They constitute the great majority of people who are enjoying these primitive areas. It is not an exclusive group of rich people, capable of affording all the paraphernalia of horses, equipment, and professional guides that we have heard so much about.

Of course, there are organized expeditions. As a Senator who represents a State to which people are attracted from afar, by the unique values to be found in the primitive areas of Idaho, I believe that tourists, wherever they come from, are welcome in my State. Their presence constitutes good business for Idaho. Nevertheless, the fact remains that the great majority of people who go into the Idaho primitive areas are Idahoans, and not wealthy ones either. One need not go to the center of a primitive area to enjoy it. Where does such an area begin? It begins where the road ends; and if the roads never end, there never will be any wilderness.

Anyone can go into the wilderness as far as he wants to go. He may stay as long or as short a time as he desires, depending upon his own resources and the time available to him. The area is as much wilderness 3 miles inside the boundary as it is 30 miles inside.

So I reject the argument that the proposed legislation is class legislation for the privileged few.

It has been said that the wilderness areas will not be enjoyed by the majority of our people because the majority of our people have become car travelers. They like to take their vacations by automobile. They like to go into managed, organized camping grounds to pitch their tents or park their trailers.

It is said that most vacationers like motels, resort hotels, and dude ranches with the comparative comforts of organized life, and that only a minority of our people are interested in the spiritual values, the enrichment that comes from the solitude to be found in the wilderness.

I concede this to be the case. I suppose the majority of our people do like to go by automobile to campgrounds near paved roads. I suppose the majority do prefer the comforts of motels, resort hotels, and dude ranches.

But is it not a novel doctrine that the majority should thereby be entitled to trample upon the rights of the minority? Have the minority no entitlement? Have those who seek the sanctuary of the wilderness no right to it in a country as vast and rich as the United States? We will deny those people their right if we fail to act in a timely fashion upon a wilderness bill.

Most of the people in the eastern United States are denied that right now because the wilderness has largely disappeared. It is vanishing in the West. Unless we take some action to establish legislative safeguards around it, within a few years it will disappear entirely. Once it has been dissipated, once roads have been built, once organized life starts, it is gone forever. It is not a renewable resource. So if we are to preserve for future generations the uplifting experience which has come to those of us who have known the wild lands, we must act now, else our children and grandchildren will be forever deprived.

So I say that, in a country which has come to be characterized by the congested life of cities, by the domesticated life of nicely clipped countrysides, let us reserve some place here and there and elsewhere around the country, where the land remains as God gave it to us, and make sure that it stays that way, so that those who want to escape from the banality of beer cans and cigarette commercials will have a chance to do so.

Mr. President, without wilderness this country will become a cage. I commend the Senator from Wisconsin for the fine statement that he has made.

Mr. PROXMIRE. I thank the Senator from Idaho for his brilliant and eloquent statement. It mirrors the assertion that was made recently by Senator ANDERSON, the chairman of the Committee on Interior and Insular Affairs.

There is one other point which was made by the eloquent Senator from Idaho, which I should like to stress also. The President of the United States has emphasized to the country the importance of physical fitness.

As the Senator from Idaho has said, it is true that the American people no longer travel on foot or horseback; that they travel by automobile. The softness of too many Americans is becoming very evident to us. It is a great national shame. Some of us, I suppose, like to get our exercise by pushups, swimming, weightlifting, walking, running, farming, tennis, or golf. But there are people who would rely on what is perhaps the most effective conditioner of all, and that is to go out into a wilderness area and camp, as the committee report points out, for a week or 10 days or 2 weeks. They do that not only to test their physical capacity and endurance and strength, but also their spiritual attitude. It seems to me that the argument in favor of preserving and extending the wilderness areas of America is especially overwhelming today in a nation in danger of going soft.

In opposition to the specific amendment we are now considering, the bill provides, as I understand, that Congress should preserve primitive areas, wilderness parts of wildlife refuges, and 5,000-acre roadless areas within the national parks system, in addition to the wild and wilderness lands in the national forests system that have been set aside by Executive action already. Congress will have veto power over each recommendation that a primitive area, part of a wildlife refuge, or a roadless area within a national park be set aside. The veto power may be exercised, not by a concurrent resolution, as provided in earlier versions of the bill, but by a resolution of either House.

It seems to me that the amendment completely defeats the purpose of the wilderness bill by providing in effect that primitive areas may not be protected as wilderness by Presidential action unless Congress approved by concurrent resolution.

The supporters of the bill clearly intend that the area will be protected unless either House vetoes such protection. In earlier versions provision was made that both Houses would have to act concurrently to prevent the inclusion of an area under the protection of the Congress. The bill in its present form already represents a compromise with the point of view proposed in this amendment by providing that only one House of Congress, instead of both Houses, can veto wilderness protection.

Mr. President, if we are to cover additional areas into the wilderness protection, this streamlined, one-House veto is enough. Under the amendment of the senior Senator from Colorado the well-known capacity of Congress, especially the Senate, to kill progress by inaction, whenever a strong economic vested interest is involved, would strangle the preservation of America's wilderness areas. The amendment would choke off wilderness protection not because a majority wished to do so, but because a small minority in the Senate desired to protect a vested economic interest. It is no secret that a small minority in the Senate, if they wished to do so, can stop virtually any legislation. This amendment would kill wilderness extension by the nationally known Senate stalling technique. I hope the amendment will be defeated.

I yield the floor.

Mr. CARROLL. Mr. President, I should like to address an inquiry to the Senator from Idaho and to the Senator from California. I have tried to study very carefully the bill before the Senate. Of course all of us are interested, as representatives of our States what a bill like S. 174 will do. I am looking at page 214 of the hearing. Let us take, for example, the State of Colorado. The primitive areas in Colorado are listed on that page. Under the bill, if we pass it, all primitive areas will be considered for inclusion by the Secretary of Agriculture, and within a 10-year period the Secretary of Agriculture is required to act. If he does not act, all areas presently designated primitive areas revert after 14 years to the national forest reserve.

Mr. CHURCH. The Senator is correct. The Secretary has 10 years after the enactment of the bill to review those areas that have already been withdrawn and designated as primitive areas on the effective date of the bill, the purpose of the review to be to separate out from these primitive areas any portion found to be more suitable for multiple use, and then to recommend for permanent retention within the wilderness system the balance which is predominantly wilderness in character and of value for recreational use alone. That recommendation then comes to Congress, where it is subject to the review of both Houses and to a veto in either House. So the full power of Congress is retained.

Mr. CARROLL. The point I wish to make is that all areas that are designated today are set forth in the hearings as primitive areas or wild areas, and therefore each Senator and each Representative of a State will know what is under consideration in the bill.

Mr. CHURCH. The Senator is correct.

Mr. CARROLL. In the event that a new area is designated as wilderness, the Secretary of Agriculture must come back to Congress for approval. It is then that we do not use the veto, but the Congress must approve the designation by affirmative action.

Mr. CHURCH. The Senator is correct. If I may restate it, I should like to put it this way. The Interior Committee wanted to make certain that the wilderness system to be established would be confined to those areas that have already been withdrawn for recreational purposes. Therefore the proposed wilderness system is based upon such areas in the national parks, the national monuments, the game refuges, and the national forests that have already been withdrawn for recreational purposes.

In the national forests, these areas are known as primitive areas. Upon the enactment of the bill, procedures are established for review to determine what part of these primitive areas will be permanently retained within the wilderness system. But once the system has been established, once the review has been accomplished, and once Congress has finally approved it, in accordance with the processes set forth in the bill, then any additions to the system could be made only by affirmative enactment by Congress.

Mr. CARROLL. I wish to reemphasize my point, so that every Senator and Representative who reads the RECORD will know exactly what will take place within his area.

In Colorado on the Arapaho and White River Forests, the Gore Range-Eagle Nest Primitive Area was designated a primitive area in 1933.

On the Gunnison Forest, the West Elk Wild Area was designated as such in 1932. It was under Secretary Benson, in 1957, that it became classified permanent as a wild area. No protest was made to me and I know of no protest made to a committee, either in the 5 years we considered wilderness bills or in the form of any bill introduced by any Member of Congress, to the designation of this region as a wild area.

What will the bill do? If the bill is passed, that area will become permanently the West Elk Wild Area. Is that not correct? It contains 62,000 acres.

Mr. CHURCH. The Senator is correct.

Mr. CARROLL. Therefore, the area being under 100,000 acres, it immediately becomes a part of the wild area. If an area contains more than 100,000 acres, it is called a wilderness area.

On the Rio Grande Forest, the La-Garita-Sheep Mountain primitive area was designated as such in 1932. That is a long time ago. It was 29 years ago. What will happen under the bill? That area will still remain a primitive area to be reclassified in the next 14 years.

I am perfectly willing to be corrected, but my understanding of the terms of the bill is that whether an area is a wilderness, wild area or a primitive area, if cattle are grazing on that land today, they may continue to graze there. Is that not so?

Mr. CHURCH. That is so. Grazing rights are not affected by the bill.

Mr. CARROLL. I have been informed by the Department of Agriculture that in my State of Colorado ranchers have 150,000 cattle and horses grazing on the national forest lands in that State. Only 1,500 are grazing on proposed wilderness lands. And it is my understanding that the particular area where most of the 1,500 are now grazing is probably going to be withdrawn from the wilderness system.

To reemphasize the point, I shall go down the list. The Upper Rio Grande Primative Area will not be changed by the bill.

The Rawah wild area was established in 1932 and approved by Secretary Benson in 1953. It was not protested by local people.

The Mount Zirkel Dome Peak wild area was established in 1931 and approved by Secretary of Agriculture Brannan in 1949. Neither protests nor legislation have been proposed to change the designation of any of that land.

Actually, in my State, I could go down the list area by area. There is nothing in the bill that would take away any of the rights of the people of Colorado. As a matter of fact, there has never been a single protest made to me on a specific area, as I read the areas listed in the hearings. There has never been a protest filed with Congress nor a bill introduced in Congress, at least within 29 years, to change the picture.

I do not understand what all this hubbub is about. It is true that if we pass the bill, some permanency will be given to the wild areas. What else will occur when the bill is passed? We will say to the Secretary of Agriculture, in effect, that for a period of 10 years we will ask him to make a determination with respect to primitive areas. If he does not do so, the lands after 14 years will revert to the national forests.

Has the junior Senator from Colorado oversimplified the issue?

Mr. CHURCH. The junior Senator from Colorado has accurately stated the basic facts. The purpose of the bill is to create a wilderness system comprising those areas which have already been

withdrawn in the national parks, wildlife refuges, and primitive areas in the national forests, for what are primarily recreational purposes. Not only are the areas named in the printed hearings, but there are maps of the States affected, showing exactly where the areas are located.

So the junior Senator from Colorado is quite correct: We will not be establishing, by virtue of the proposed legislation, new intrusions upon the public domain. We will not be withdrawing from the national forests any areas which have not already been designated as wild or primitive areas.

Mr. CARROLL. That is the important point. The hearing record shows that Colorado has 13,722,000 acres in the national forests, and only 799,000 acres in national forest wilderness type areas. These areas were designated and approved in 1931, 1932, and 1933; none since 1933. Four primitive areas have been made wild areas since 1933. Who did all this? The Secretary of Agriculture. Under what authority did he make them wild or primitive areas? He did this under his general authority without a specific act of Congress. It is said that this is constitutional. I think it is. So what are we doing? We are withdrawing authority from the Secretary of Agriculture. If he designates a new area, he must come to Congress to receive approval. If we do not like his plan we will reject it.

We are saying, in effect, "Mr. Secretary, you have done very well in the past. We have not heard protests"—at least, my State has not—"but, in a sense, from now on, when you make a change in any of the primitive areas, we will want to take another look at it. No longer will you be able to act by regulation alone." Is not that so?

Mr. CHURCH. The junior Senator from Colorado is eminently correct. I have listened with dismay to the argument made on the floor of the Senate, in which it has been stated and restated that by this bill we are somehow reducing or withering away the prerogative of Congress. Just the reverse is the case.

Under existing law, any one of these areas can be enlarged or new primitive areas created——

Mr. CARROLL. By Executive action.

Mr. CHURCH. By Executive action alone. I simply cannot understand all this talk about the Executive arrogating away from Congress its constitutional powers. Congress has already delegated all power under existing law to the Secretary of Agriculture and the Secretary of the Interior. Their action is never brought back to Congress for any kind of review or approval; it is never subjected to any kind of congressional authority or consent. These areas can be established, enlarged, or abolished by the executive departments of the Government.

What is sought to be done by the bill? To recover some of the congressional power which has been delegated away.

We say, with respect to the primitive areas, that before being permanently retained in the wilderness system, they are to be submitted to Congress to review, and each House will have veto power over the recommendations made.

We further say that once the system is so established, the Departments may not add to it unless they come to Congress and get affirmative action. We are recovering congressional power. That is one of the virtues of the bill.

I thank the junior Senator from Colorado for pointing up this fact, because I am sure the wrong impression is being created by much of the argument which has thus far taken place.

Mr. CARROLL. I thank the able Senator from Idaho. In my opinion, this issue is not complex. The Committee on Interior and Insular Affairs has devoted a great amount of time and study to the bill. As I said yesterday, it is a modest bill. It sets our clear ground rules to guide the Secretary and for the first time assures congressional control.

In a sense the bill protects the cattle industry's grazing permits on wilderness tracts. We do not modify that arrangement at all. As far as mining is concerned, in Colorado there are 5 active mines and some 1,427 mining patents and some 7,675 mining claims, all on proposed wilderness tracts; and all of these are safeguarded by section 3a in the pending bill. This protects existing private rights. The mining industry is protected.

But I think confusion exists in respect to the following: In the event that a new primitive area is established, in addition to those set forth on pages 214 and 215 of the hearings which were held in connection with the bill, a new practice is to be instituted; the Secretary of Agriculture is to be told, "You may not designate any new areas; you must obtain affirmative action by Congress." I think considerable confusion has developed in connection with this point, although certainly there has been no confusion on the part of the Senator from Idaho [Mr. CHURCH], because he has hit this point squarely time and time again.

But I believe it important that we make this matter clear. The list on pages 214 and 215 of the hearings is quite clear, and can be examined by any Senator.

As far as lumbering is concerned there is no timber harvest today from any of the lands being considered in this bill for inclusion in the wilderness system.

The timber industry is protected. They have 6,272,000 acres of national forest outside wilderness. They cut 218 million board feet of timber. Last year they cut only 156 million. In contrast, we could get less than 7 million board feet from logging the wilderness. Today timbermen could get another 62 million board feet each year from our forests.

But water and power have needed special attention.

During the hearings in February, Mr. President, I explored at some length with several witnesses the question of development of water and power sites.

At one point, on February 27 I questioned Mr. Ed Crafts, Assistant Chief of the Forest Service, in regard withdrawal of power sites in the national forests.

I ask unanimous consent, Mr. President, that a portion of that questioning, beginning with a remark on page 61 by the chairman of the Interior Committee, Senator ANDERSON, be included at this point in the RECORD.

There being no objection, the answers and questions were ordered to be printed in the RECORD, as follows:

The CHAIRMAN. If you would please, Mr. Secretary, have your crew go over this testimony this morning about this, particularly with reference to the case raised by Senator CARROLL, and attempt to have them give us a memorandum as to whether or not any provision in S. 174 would change the rights of the city of Denver in any powersite withdrawal it may have in the State of Colorado, unless you care to comment on it now, Mr. Crafts.

Mr. CRAFTS. I think I can answer that. I will try to right now, Senator ANDERSON.

The CHAIRMAN. Surely.

Mr. CRAFTS. Under a powersite withdrawal now, if the Federal Power Commission decides to issue a license, which it could do against the recommendation of the Secretary of Agriculture should it elect to do so, then even though this were in a wilderness area the development would go forward. If this bill were enacted and the Federal Power Commission wished to issue a license, as I construe it, it could not do so unless the President decided it was in the public interest to do so.

Then the President could authorize the licensing of these works. That is the difference between the two.

The CHAIRMAN. Couldn't Congress also authorize it?

Mr. CRAFTS. Congress at all times could, of course, authorize.

The CHAIRMAN. We couldn't, by this law, limit what a future Congress might do?

Mr. CRAFTS. No, by no means.

Senator CARROLL. I think, Mr. Chairman, that is very important, because this is precisely what the Federal Power Commission did, issue its license, but I might say, over the objection of some members of the Department of Interior who were in the Fish and Wildlife Service.

You are now saying that this legislation would take away from the Federal Power Commission its authority to issue a license and that we now vest that in the President under this legislation?

Mr. CRAFTS. That is correct.

Senator CARROLL. And, as the able Senator from New Mexico says, we also have this safety valve; we can always come to the Congress and the Congress can do it.

Mr. CRAFTS. That is correct.

The CHAIRMAN. And what he says relates to those areas which are now primitive which are subsequently brought into the wilderness system with the approval of the Secretary of Agriculture, with a subsequent review by the President, and with a final review by the Congress.

Mr. CRAFTS. It applies to the entire wilderness system.

Mr. CARROLL. Mr. President, the witness, Mr. Crafts, agreed that under the proposed legislation the Congress, in his opinion, could at all times authorize power licenses, but he argued that under the bill the Federal Power Commission would be limited to issuing power licenses only if the President decided it was in the public interest. Mr. Crafts was referring to future powersites.

The Federal Power Commission takes a slightly different position in its February 24 report on S. 174 to the Senate Interior Committee. The Commission feels that both present and future power

withdrawals from a wilderness area are protected in the present bill.

The Commission takes this position:

It is noted that the bill contains no language which would expressly vacate or rescind any power withdrawal or power reservation created prior to enactment or which would expressly modify, repeal, or otherwise affect the Commission's authority to issue licenses in the future to use lands in the wilderness system for power purposes provided the above-discussed finding of consistency and noninterference can be made under section 4(e) of the Federal Power Act with respect to the use of reserved lands.

However, the Federal Power Commission suggests that "to eliminate any misunderstanding that may otherwise exist" the following language be added to the bill:

Nothing in this Act shall be construed as superseding, modifying, repealing, or otherwise affecting the provisions of the Federal Power Act (16 U.S.C. 792–825r).

In view of the Federal Power Commission position that present power site withdrawals in wilderness areas could be developed under S. 174 and in view of its position that its authority to issue licenses in the future in wilderness areas is not abridged, I am not sure that the amendment is needed.

However, this is something I have long been concerned about, as I stated in the Senate hearings, going back to my interest in reservoir No. 22 in the Colorado mountains, which furnishes municipal water to the city of Denver.

My colleague, the senior Senator from Colorado, Senator ALLOTT, is prepared to offer the amendment suggested by the Federal Power Commission and, Mr. President, I am prepared to support this amendment when offered. I consider it a wise amendment.

I do not think we will have lost any rights to power withdrawals if the amendment is defeated, but I consider the amendment an additional safeguard.

The Federal Power Commission at my request, Mr. President, prepared a list of existing powersite withdrawals in Colorado areas that might be included in the wilderness program.

At this point, Mr. President, I ask that the Federal Power Commission letter to me of March 16, 1961, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERAL POWER COMMISSION,
Washington, D.C., March 16, 1961.

Hon. JOHN A. CARROLL,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CARROLL: The following information with respect to the existence of project or powersite withdrawals in the wilderness areas in the State of Colorado is supplied in response to a request made on your behalf by Mr. Wolf of the staff of the Committee on Interior and Insular Affairs:

1. Existing projects: None affecting national monuments, national parks, or areas within national forests classified by the Department of Agriculture as wild, wilderness, primitive, or canoe areas.

2. Proposed projects:

(a) Emerald Lakes project, to be located on Los Pinos River and Lake Creek, will affect the San Juan Primitive Area within the San Juan National Forest. Extent of acreage affected is not available. Project proposed in U.S. Bureau of Reclamation Colorado River Report dated 1946.

(b) Sweetwater project, to be located on tributaries of the Colorado River, will affect the Flat Top Primitive Area within the White River National Forest to the extent of a tunnel under the area about 4 miles long. The surface of the wilderness area would not be disturbed in any way. The project is proposed by the Rocky Mountain Power Co. who has filed an application for license with the Commission as project No. 2289.

(c) Echo Park project, to be located on the Green River 3 miles below the mouth of the Yampa River, will affect the Dinosaur National Monument. Project proposed in U.S. Bureau of Reclamation Report on the Colorado River storage project dated December 1950. Extent of acreage affected is not available.

3. Power site withdrawals: From available information the following power site withdrawals have been made in areas now designated as primitive areas within national forests and national monuments:

Flat Top Primitive Area, 1,160 acres.
San Juan Primitive Area, 8,260 acres.
Uncompahgre Primitive Area, 1,320 acres.
Wilson Mountain Primitive Area, 240 acres.
Dinosaur National Monument (Colorado only), 37,330 acres.

If you desire any further information in this regard, please do not hesitate to request it.

Sincerely yours,
JEROME K. KUYKENDALL,
Chairman.

Mr. CARROLL. Mr. President, in regard the question of how the primitive areas will be brought into the wilderness system, we have considered at great length in committee several alternatives.

I think the final language of the bill as reported from committee gives complete protection of all western interests.

The chairman of the Interior Committee, Senator ANDERSON, took exacting pains to make sure that the interest of Western States were safeguarded. He has advocated this type of legislation for 30 years. I am confident that the resource base in Colorado is not affected by this proposed legislation, while at the same time we are providing recreation areas for the multitudes. In the words of Senator ANDERSON we are "preserving some of our great, natural scenic areas in their primitive, wilderness state."

Senator ANDERSON has called this "a milestone in national public lands policy."

The method by which wilderness areas will be brought into the system is practical, sensible, and workable. It puts the burden on the executive agencies to make the determination of the areas to be included. Then, similar to the Reorganization Act procedure, each proposed area is subject to review by either body of the Congress. If either the House or the Senate disapproves of the judgment of the executive department that particular wilderness area is rejected and returns to the national forest.

Mr. President, lest there be any question about the effectiveness of the Congress operating under this method, I point out that from 1949 to 1957, 27 percent of the reorganization plans proposed by the Executive were turned down by the Congress.

At this point, Mr. President, I ask that there be printed in the RECORD a table showing the year-by-year disposition of reorganization plans under the congressional veto method.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Disposition of reorganization plans under Reorganization Act of 1949

	Approved	Rejected
1949	6	2
1950	20	7
1951	1	0
1952	2	3
1953	10	
1954	2	
1955	0	0
1956	0	2
1957	1	0
1958	1	0
1959	0	1
Total	43	15

Mr. CARROLL. Mr. President, it is clear from the above chart that the sovereignty of the Congress is preserved under this method and at the same time the executive departments are permitted freedom to move expeditiously.

I believe the pending amendment should not be adopted. If it were adopted, the result would be that Congress would have to take piecemeal action in regard to primitive areas in Colorado which have been established for 29 years.

I hope that we have laid to rest some of the ghosts which have been raised, we can proceed to consider the bill on its merits.

As I said yesterday, I do not want the Secretary of Agriculture or the Secretary of the Interior or any other agency of the Federal Government to restrict the growth and development of Colorado. In Colorado water is the lifeblood of the people. And I am interested especially in protecting our right to develop our water resources in Colorado.

I wish also to reiterate my position again on withdrawal of powersites. Authority to withdraw sites is now vested in the Federal Power Commission. The pending bill might remove it from the Federal Power Commission, and vest it in the President of the United States. I shall support the bill, although I see no particular reason why powersite withdrawals should not remain in control of the Federal Power Commission, where it now resides under existing law. I would just as soon have it remain there.

But certainly in the future we shall not permit the Secretary of Agriculture to institute land grabs for so-called primitive areas which would prevent the growth and development of our State. This could not be done without affirmative action of the Congress.

This is why I say that so far as Colorado is concerned the record is crystal clear, for during all these years there have been no protests over existence of restricted wild areas. When I return home and hold this record before my constituents, I believe they will understand my position in regard to the bill, and I believe they will understand the need to conserve some of these areas for generations to come.

For instance, in the San Juan basin there is a range which is almost inaccessible. It should be declared a wil-

derness area. The same is true of certain other sections of the State. I believe my constituents will understand the position we take in regard to such areas.

I commend the Senator from Idaho [Mr. CHURCH] for his brilliant leadership in this fight. I hope that in a small way my statement will help clarify the issues in connection with the bill. It is not nearly as complex as some would attempt to make it appear.

Of course Senators have a right to disagree, but it is most important that the basic issue not be obscured.

Mr. President, nothing in this bill should frighten anyone. The bill will be more difficult for those of us from the West to explain to our constituents, but that is our responsibility; and when we place the facts before our constituents, I believe they will understand.

Mr. President, we have debated this measure for a long period of time. I think the issue is now well understood; and I hope the Senate will now proceed to vote on the bill.

Mr. President, with all the safeguards we have written into this bill in Interior Committee I think we have an acceptable measure.

As Senator ANDERSON said on August 24th on the floor of the Senate, the U.S. Government is ultimately going to have to provide its citizens an opportunity to "get back to nature and escape the pressures of modern life." We can do it now without any expenditure of public funds.

In the years ahead it will cost us hundreds of millions of tax dollars to do what we are doing for not one cent today.

This is a measure in the public interest and in the taxpayer's interest, Mr. President, and I give it my full support.

Mr. KUCHEL. Mr. President, I am proud to be coauthor and sponsor of the wilderness bill now before the Senate.

I have been a member of the Interior and Insular Affairs Committee for the last 9 years, and for the last 6 of them legislation similar in purpose to this bill has been before our committee.

In my judgment this bill is for the benefit of the people, and supports the best interests of the people. It affects an extremely small portion of the public domain, for it deals with less than 2 percent of the total land area of the Nation in Federal ownership. It seeks to preserve—before modern life would destroy it—a small segment in the pristine beauty with which the Almight endowed the North American Continent in the beginning.

This is the first time legislation of this sort has reached the floor of the Senate. I believe it would be a tragedy if the Senate were to fail to pass the bill. I assert with equal vigor that it would be a tragedy if the Senate were to adopt the pending amendment.

I wish to make my position on this matter as clear as I can.

Mr. President, the power of Congress to act with respect to such property stems directly from the Constitution, which provides in article IV, section 3, clause 2:

> The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

On many occasions Congress has utilized that constitutional authority in connection with the passage of legislation dealing with the property of the United States.

In 1891 Congress passed the National Forest Act, which provided in part:

> The President of the United States may, from time to time, set apart and reserve in any State or Territory, having public lands bearing forests, in any part of the public lands wholly or in part covered with timber or undergrowth, whether of commercial value or not, as national forests, and the President shall, by public proclamation, declare the establishment of such forests and the limits thereof.

And in 1960, Congress passed Public Law 86–517, which provides in part:

> That it is the policy of the Congress that the national forests are established and shall be administered for outdoor recreation, range, timber, watershed, wildlife and fish purposes.

Mr. President, for emphasis I repeat that part of the congressional policy, as enacted into the law of the land: "for outdoor recreation, range, timber, watershed, wildlife, and fish purposes."

Then the act provides:

> The purposes of this Act are declared to be supplemental to, but not in derogation of, the purposes for which the national forests were established as set forth in the Act of June 4, 1897 (16 U.S.C. 475). Nothing herein shall be considered as affecting the jurisdiction or responsibilities of the several States with respect to wildlife and fish on the national forests.

Mr. President, what I have just read is the law of this land. It is an act of the Congress of the United States, enacted in 1960 and joined in by the Chief Executive. The Congress declared:

> The establishment and maintenance of areas of wilderness are consistent with the purposes and provisions of this Act.

Pursuant to this statute, the Secretary of Agriculture, under the last administration, laid down regulations, as he had the responsibility to do, for putting it into effect. This law is a total delegation of authority by the Congress of the United States to the Secretary of Agriculture to sit in complete judgment and to determine, by his own ipse dixit, what areas in our vast natural forests are to be wilderness areas and what areas would not be. And the only way the Congress of the United States could bring to task the Secretary of Agriculture, if he were to use the unlimited power delegated to him in a way to which the Congress objected, would be for the Congress to pass a bill, and to have the President sign that bill, overruling what his, the President's, Secretary of Agriculture had done.

It therefore ought to be crystal clear to the Members of the Senate that the Secretary of Agriculture, legally, and under a statute passed by Congress, can place the stamp of "wilderness" upon every single parcel of property under his jurisdiction today in the national forests. No one will gainsay that statement. That is the law. That is the fact.

What does this measure, then, seek to do? The bill provides that at the time the wilderness legislation becomes law, those areas which have previously been determined by the Secretary of Agriculture under executive fiat to be primitive or wilderness, shall be deemed a part of the wilderness system established by statute. Under the bill, however, it would be subject to a review by the Secretary of Agriculture, with clear statutory provision for a public hearing. Assuming that, on a review, the Secretary continues to stand by his prior decision to make a certain area a wilderness area, the President of the United States, under the law, has an executive responsibility to sit in judgment on it.

That is not all. I recall very well the discussion in our committee when we wrote this provision into the bill. Under it, the recommendation then comes to the Congress, and we provide that one House of the Congress, by appropriate resolution, can prevent inclusion in the wilderness system an area which has already been included—which the Secretary of Agriculture has determined shall be in it, and which the President has determined shall be in it. We provide, after all these decisions have been made, that one House of the Congress can overrule the executive branch.

What is wrong with that? How, in the interest of fairness, can anyone object to that procedure? However, some of my good friends in the Senate do object. Mr. President, I ask unanimous consent that the text of the amendment, authored and sponsored by my good friends, be printed in the RECORD at this portion of my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

> Amendment intended to be proposed by Mr. ALLOTT (for himself, Mr. BENNETT, Mr. BRIDGES, Mr. CAPEHART, Mr. CASE of South Dakota, Mr. DWORSHAK, Mr. FONG, Mr. HICKEY, and Mr. HOLLAND) to the bill (S. 174) to establish a National Wilderness Preservation System, and for other purposes, viz: On page 10, line 12, strike out all through line 7 on page 11 and insert in lieu thereof the following:
>
> "(f) Any recommendation of the President made in accordance with the provisions of this section shall take effect upon the day following the adjournment sine die of the first complete session of the Congress following the date or dates on which such recommendation was received by the United States Senate and House of Representatives; but only if prior to such adjournment Congress approves a concurrent resolution declaring itself in favor of such recommendation: *Provided*, That, in the case of a recommendation covering two or more separate areas, such resolution may be limited to one or more of the areas covered or parts thereof."

Mr. KUCHEL. Mr. President, that amendment would emasculate the wilderness legislation. The amendment would take the 1960 declaration of policy, by which the Secretary of Agriculture has a complete right to determine what is wilderness and what is not, and tear it up. It also would abrogate the longstanding policy under which the Secretary has created wilderness over many years.

The amendment would put back in a constant logrolling debate in the Senate

the consideration of every parcel of national forest area and whether it ought to be opened or closed for the benefit of the people.

Under those circumstances, I think the Senate would be performing a constructive service on this occasion if it overwhelmingly defeated the pending amendment.

I want to recall something which the able chairman of the Senate Committee on Interior and Insular Affairs, Senator ANDERSON of New Mexico, said when he spoke in the Senate last month. Senator ANDERSON said in part, as appears in the proceedings of Thursday, August 24.

> There is a very sound reason for drawing a line between handling of areas already reserved and any new areas.
>
> Inclusion of the wild, wilderness, primitive, park, and wildlife areas in the wilderness preservation system will cause little or no disturbance of individuals, communities, or economic patterns. The areas have been withdrawn for years. There have been no timber sales from forest lands involved so there are no lumber mills dependent on them which will have to close down. Established mining operations and grazing will not be disturbed.
>
> There is thus virtually no change in the status quo of the areas to be handled under the presidential recommendations procedure in the bill. The bill simply makes wilderness preservation a statutory directive and responsibility of the existing land-administering agency in its handling of already reserved lands.

Mr. President, that explanation by the committee chairman is important. It is important for the Senate to understand that the lands under the jurisdiction of the Department of Agriculture—and I speak of it particularly—that will be affected by this bill are those lands which, in his executive discretion, the Secretary of Agriculture has already determined shall be set aside as wilderness, wild, primitive, or canoe areas.

Under those circumstances, I see no reason at all why we should destroy completely what we laid down as a policy for the guidance of the Department of Agriculture in 1960. To the contrary, I think, in the interest of the people, the pending legislation ought forthwith to be passed without the adoption of the amendment, which would not only cripple the wilderness legislation, but, as I see it, would destroy it.

On that basis, I hope the amendment will be voted down.

Mr. DWORSHAK. Mr. President, will the Senator yield for a question?

Mr. KUCHEL. I yield.

Mr. DWORSHAK. Coming from the State of California, I am sure the Senator is a supporter of the multiple-use concept of our natural resources.

Mr. KUCHEL. Indeed, I am.

Mr. DWORSHAK. Does the Senator believe there are adequate safeguards of the principle of multiple use contained in the basic philosophy of the pending wilderness preservation bill?

Mr. KUCHEL. I do believe in the theory of multiple use. Indeed, that is what the Senator from Idaho and I approved when we wrote into the law in 1960 the public declaration of policy to which I have referred. That law will remain on the statute books. That law will still guide the Department of Agriculture.

I think it is important in this debate to point out that for some years the Secretary of Agriculture has been setting aside some areas as wilderness, and in those areas today there is no commercial timber operation, to use one example of a constructive public use.

The legislation which the Senate is considering today would be effective as to national forests only in those areas which the Secretary has already determined to be wilderness, wild, primitive, or canoe areas. The vast expanse of the public domain under the Department of Agriculture remains for his consideration for the other multiple uses in which the able Senator from Idaho and I both believe.

Mr. DWORSHAK. Will the Senator yield further?

Mr. KUCHEL. I yield.

Mr. DWORSHAK. Does the Senator believe that the proposed legislation would add to the prestige and the constitutional authority and power of the legislative branch to protect the public interest, rather than to delegate constitutional rights of the Congress to the executive department?

Mr. KUCHEL. I say, most respectfully, I think the Congress in 1960, when the Senator and I and a majority supported the present law on multiple use, we delegated our authority completely. I think in 1960 we gave to the Secretary of Agriculture the complete, undisputed, unreviewable right—a right he long had exercised under other, general law—to lock up as wilderness every area of the public domain classified as national forest under his jurisdiction. In my judgment, we are moving back to congressional control in the proposed legislation before us.

I disagree with the position the able Senator from Idaho and some of my other friends take, that we should move the whole way back. If we move the whole way back we shall destroy what has been done under the legislation of 1960 and in previous years.

Beyond that, I do not believe if we moved all the way back we could accomplish what we need to accomplish.

I say, in complete good faith, in my judgment the bill which is now before the Senate moves in the way the Senator from Idaho would wish to have it move, to wit, away from the complete delegation of authority which we gave to the Department of Agriculture in 1960.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield.

Mr. KEATING. I commend the distinguished Senator from California for the very clear exposition he has made of the proposed legislation and the effect of the pending amendment.

Certainly the Senator is better informed than I in this regard. If I correctly understand the proposal, under the present law, without passage of the pending bill, the Secretary of Agriculture could place additional areas of the national forests in the wilderness category without any congressional action whatever.

Mr. KUCHEL. Precisely.

Mr. KEATING. The bill seeks to give to either branch of the Congress what might be called a veto power over such authority, does it not?

Mr. KUCHEL. Not only that, but the bill also provides that in the executive branch there shall be an appropriate hearing by the Department of Agriculture with respect to parcels already determined by the Secretary to be wilderness. Secondly, the inclusion of areas in the wilderness system will have the consideration of the President of the United States. Thirdly, it can be considered by either House of the Congress under the pending legislation.

Mr. KEATING. What would be the procedure with respect to any additional area which might be added?

Mr. KUCHEL. The bill would effect only those areas which have already been designated by the Secretary of Agriculture, or are in national parks or wildlife refuges. With respect to any new areas, Congress would continue to use affirmative legislative action.

This is important. We deal here only with those areas which, on the date of enactment of the wilderness bill, already have been determined to be wilderness, wild, primitive or canoe, or are in national parks or wildlife refuges.

Mr. KEATING. If the Secretary of Agriculture decided to establish a new wilderness area what would happen? Would that have to be done by legislative act?

Mr. KUCHEL. There would be no authority for the Secretary, under the wilderness legislation, to include additional areas beyond those which have already been determined by him to be wilderness, wild, primitive, or canoe.

Mr. KEATING. In this proposed legislation?

Mr. KUCHEL. Precisely.

Mr. President, I ask unanimous consent that the text of the section beginning on page 3, line 19 of the bill, and ending on line 10, page 6, be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

(NOTE.—Matter enclosed in black brackets to be omitted; new matter in italic.)

NATIONAL FOREST AREAS

(b) (1) The wilderness system shall include all areas within the national forests classified on the effective date of this Act by the Secretary of Agriculture or the Chief of the Forest Service as wilderness, wild, primitive, or canoe: *Provided*, That the areas classified as primitive shall be subject to review as hereinafter provided. Following enactment of this Act, the Secretary of Agriculture shall, within [fifteen] *ten* years, review, in accordance with paragraph C, section 251.20, of the Code of Federal Regulations, title 36, effective January 1, 1959, the suitability of each primitive area in the national forests for preservation as wilderness and shall report his findings to the President. [Before the convening of Congress each year, the President shall advise the United States Senate and the House of Representatives of his recommendation with respect to the continued inclusion within the wilderness system, of each area on which review has been

completed in the preceding year, together with maps and definition of boundaries: *Provided,* That the President may, as part of such recommendations, alter the boundaries existing on the date of this Act for any primitive area included, to exclude portions not predominantly of wilderness value or to add any adjacent area of national forest lands that are predominantly of wilderness value. The recommendation of the President with respect to each area shall become effective subject to the provisions of subsection (f) of this section.] *Before the convening of Congress each year, the President shall advise the United States Senate and House of Representatives of his recommendations with respect to the continued inclusion within the wilderness system, or exclusion therefrom, of each area on which review has been completed in the preceding year, together with maps and definition of boundaries: Provided, That the President may, as a part of his recommendations, alter the boundaries existing on the date of this Act for any primitive area to be continued in the wilderness system, recommending the exclusion and return to national forest land status of any portions not predominantly of wilderness value, or recommending the addition of any contiguous area of national forest lands predominantly of wilderness value: Provided further, That following such exclusions and additions any primitive area recommended to be continued in the wilderness system shall not exceed the area classified as primitive on the date of this Act. The recommendation of the President with respect to the continued inclusion in the wilderness system, or the exclusion therefrom of a primitive area, or portions thereof, shall become effective subject to the provisions of subsection (f) of this section: Provided, That if Congress rejects a recommendation of the President and no revised recommendation is made to Congress with respect to that primitive area within two years, the land shall cease to be a part of the wilderness system and shall be administered as other national forest lands: And provided further, That primitive areas with respect to which recommendations are submitted to Congress on the eighth, ninth, and tenth years of the review period herein provided shall retain their status as a part of the wilderness system until the expiration, in respect to each area, of a full session of Congress, two years for resubmission of revised recommendations to Congress by the President, and, if so resubmitted, until the expiration of a full session of Congress thereafter. Recommendations on all primitive areas not previously submitted to the Congress shall be made during the tenth year of the review period. Any primitive area, or portion thereof, on which a recommendation for continued inclusion in the wilderness system has not become effective within fourteen years following the enactment of this Act shall cease to be a part of the wilderness system and shall be administered as other national forest land.*

Mr. KUCHEL. I read a sentence:

The wilderness system shall include all areas within the national forests classified on the effective date of this Act by the Secretary of Agriculture or the Chief of the Forest Service as wilderness, wild, primitive, or canoe.

Following that is the provision that this "shall be subject to review as hereinafter provided." In that review the Secretary must pass judgment a second time upon something as to which he has already passed judgment. The President must likewise pass judgment. Then, as I have said, either House of the Congress can act.

Mr. KEATING. The amendment offered by the distinguished Senator from Colorado would require both Houses of the Congress to take affirmative action in the regular legislative process before the areas which have already been set aside as wild, wilderness, canoe, or primitive actually became available as part of this wilderness system. Is that correct?

Mr. KUCHEL. That is my understanding.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. KUCHEL. Mr. President, I ask unanimous consent that I may yield to my able friend from Colorado so that he may precisely state the effect of his proposed amendment.

The PRESIDING OFFICER (Mr. PELL in the chair). Is there objection to the request of the Senator from California? The Chair hears none, and it is so ordered.

Mr. ALLOTT. The Senator has not stated the case correctly. The bill as it has been approved by committee would place all the wilderness areas in status quo. Some 7 million acres would be placed in the wilderness area, as they are now. They are now classified as such, and they would be retained as wilderness. No further action than the passage of this bill would be required to keep them as wilderness.

Mr. KEATING. Even with the Senator's amendment?

Mr. ALLOTT. Even with my amendment.

That is also true of the wilderness area within the national park system, which constitutes some 22 million acres.

With respect to the primitive areas and national wildlife and game refuges, when the Secretary sent up his recommendation to the President and to the Congress, approval would require the affirmative act of the Congress, as set out in my amendment.

Mr. KEATING. Under the bill, without the amendment, when the Secretary sent up a recommendation as to designation of wilderness areas in the future, either House of Congress could disapprove of his action. The amendment would require passage of a bill by both Houses of Congress and the signature by the President.

Mr. KUCHEL. To approve the designation.

Mr. KEATING. Yes, to approve it affirmatively.

Mr. ALLOTT. Mr. President, will the Senator yield so that I may make a correction?

Mr. KUCHEL. Mr. President, I ask unanimous consent that I may do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLOTT. I am told that I said a few moments ago the amendment would not affect the national park system areas.

The national park system areas are subject to review under the amendment. The national forest primitive areas are subject to review under the amendment. The national wildlife and game refuges are subject to review under the amendment.

The amendment would not change by one iota the status of the present wilderness system. It would not detract from it or take away 1 acre. It would not destroy one right which now attaches, or one use. It would not add any commercial enterprise or anything else. The wilderness area as now constituted would remain intact.

The amendment itself would apply to only the three categories I have mentioned.

Mr. KEATING. I believe I have a correct understanding that the discussion with the Senator from California related to the areas which the Senator referred to as primitive, wild, wilderness, and canoe.

Mr. KUCHEL. Primitive, wild, wilderness, and canoe.

Mr. ALLOTT. Wilderness, wild, primitive, or canoe.

Mr. KUCHEL. I believe I state this point accurately. The proposed wilderness legislation seeks to create a wilderness system. It provides that areas designated "wilderness, wild, primitive, or canoe" by the Secretary of Agriculture shall be reviewed. The review process shall be by the Secretary, the President, and by either House of Congress. If there is approval all the way through, Congress then would have incorporated the proposed areas previously so designated by the Secretary of Agriculture into the wilderness system. To that extent Congress under the proposed wilderness legislation will participate in the decision which has already been made, and which today is untouchable by Congress.

Some Senators have said, "No, we want more than that. We want Congress to sit in judgment, through consideration of a concurrent resolution, on every parcel of property in the national forests previously determined by the Secretary of Agriculture as 'wilderness, wild, primitive, or canoe.'" The language of the proposed amendment states:

(f) Any recommendation of the President made in accordance with the provisions of this section shall take effect upon the day following the adjournment sine die of the first complete session of the Congress following the date or dates on which such recommendation was received by the United States Senate and the House of Representatives—

In other words, the action would not take effect except under those conditions—

but only if prior to such adjournment Congress approves a concurrent resolution declaring itself in favor of such recommendation: *Provided,* That in the case of a recommendation covering two or more separate areas, such resolution may be limited to one or more of the areas covered or parts thereof.

The proposed wilderness legislation provides that within the next 10 years the Secretary of Agriculture and the Secretary of the Interior shall report annually to Congress on all the areas sought to be included in the wilderness system. If the pending amendment were agreed to and the proposed wilderness legislation were to become law, within 10 years it would mean there would not

be a single solitary area of wilderness in this Nation protected by law unless Congress, in each such instance, had passed a concurrent resolution.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield.

Mr. ALLOTT. I do not believe that is what the Senator means, because it is not the fact. What he has said is true so far as any additional areas that might be added to the national forest, wild, wilderness, and canoe areas, but his statement certainly is not true with respect to those areas in the wild, wilderness, and canoe areas which are now presently withdrawn from resource use and would remain wilderness areas. The bill as proposed does not affect the wilderness areas. The amendment of the Senator from Colorado would not affect the present wilderness areas in any way.

Mr. KUCHEL. Does my friend say that his amendment would not affect any of the areas now classified by the Secretary of Agriculture as "wilderness, wild, primitive, or canoe?"

Mr. ALLOTT. As wilderness, wild, or canoe.

Mr. KUCHEL. Does my able friend take the position that the protection that would be provided under the wilderness measure would be given to every parcel of wilderness area so classified today?

Mr. ALLOTT. Yes.

Mr. KUCHEL. I do not believe that the proposed legislation so provides.

Mr. ALLOTT. I do not think my friend has the full situation in mind, if he will yield for the purpose of explanation.

Mr. KUCHEL. I yield.

Mr. ALLOTT. First, on page 3 of the bill the Senator will notice that there is included all wilderness, wild, primitive, or canoe areas. Is that correct?

Mr. KUCHEL. The Senator is correct. I ask the Senator to read the next sentence, which provides that all areas classified——

Mr. ALLOTT. I was coming to that point in a later section:

Provided, That the areas classified as "primitive" shall be subject to review as hereinafter provided.

Mr. KUCHEL. Yes.

Mr. ALLOTT. So the primitive areas would be subject to review, but not the wilderness areas.

Mr. KUCHEL. The Senator is correct.

Mr. ALLOTT. The primitive areas would be subject to subsequent review. Is that correct?

Mr. KUCHEL. The Senator is correct.

Mr. ALLOTT. But nothing has been done with respect to wilderness or wild areas.

Mr. KUCHEL. The Senator is correct.

Mr. ALLOTT. The Senator will find on page 6 the incorporation of the national park areas, and also on page 7 he will find that the national park areas shall be included by review.

Mr. KUCHEL. The Senator is correct.

Mr. ALLOTT. On page 8 the Senator will find how national wildlife refuges and game refuges may be incorporated by review.

Mr. KUCHEL. The Senator is correct.

Mr. ALLOTT. There is no provision in the bill for review of the canoe areas. There is no provision with respect to review as to the wilderness areas. So when we pass the bill, the wilderness, wild, and canoe areas will be established.

The bill will clothe wild, wilderness, and canoe areas with statutory authority which they have never possessed, except indirectly. Even the Secretary of Agriculture, when he testified before our committee, could only say that the Department of Agriculture maintains that it has this power. He did not say it had such power.

I wish to make clear the point that the amendment does not affect wild, wilderness, or canoe areas.

Mr. KUCHEL. The Senator is correct. But the amendment of the Senator from Colorado would require the affirmative action of Congress not only with respect to primitive areas but the other two types of public property.

Mr. ALLOTT. With respect to primitive areas and also with respect to national park areas and game refuges.

Mr. KUCHEL. I respectfully say to my friend that it is that feature to which some of us object.

Returning to the point which the able junior Senator from New York [Mr. KEATING] originally raised, how does the Senator desire protection given to what in essence is a small percentage of the vast land areas owned by the Government of the United States? Under the present law, Congress delegated its constitutional authority to the Secretary of Agriculture. It did so with its eyes open and for many good reasons.

Now, when we have attempted to fashion a piece of wilderness legislation that would be in the public interest, we have taken back a portion of the congressional authority which had previously been delegated to the Secretary of Agriculture. I make that statement to my friends who still object that a half loaf is better than no loaf, because by this bill we would actually restore to either House of Congress some of the authority of which we divested ourselves only a year ago, and also take from the Executive authority exercised for many, many years in the designation of wilderness.

Mr. KEATING. I thank the Senator from California. What he said has helped to clarify the situation in my mind. Deep as is my affection for my distinguished colleague from Colorado, I believe his amendment would have a serious destructive effect on the bill. I am very much in favor of the bill. It had been my intention to say a few more words for the bill, but I have another engagement which will require me to speak on that subject a little later. I thank my friend for his clarification, as I also thank my friend from Colorado.

Mr. KUCHEL. I must say, as I yield the floor, that there is no better lawyer in the Senate than the senior Senator from Colorado. His participation in the labors of the Committee on Interior and Insular Affairs have been excellent, and on many occasions I have followed him.

Mr. KEATING. I agree with the Senator on that also.

Mr. KUCHEL. I do not quarrel with those in the Senate who say that Congress ought to exercise its authority over the publicly owned lands of the United States completely. I simply disagree, because I think the public interest was demonstrated when the Senate with no opposition, in 1960 said to the Secretary of Agriculture, "Take it all. You do it." At that time not a single voice was raised in the Senate against it. In that legislation we affirmed the power the Secretary of Agriculture had exercised for a half century or so in the designation of wilderness areas.

Therefore I do not agree with those who are insisting, now, when we withdraw some authority back to Congress in this bill, that we ought to go further.

Mr. BENNETT. Mr. President, on May 24, 1961, the western Governors' conference was held in Salt Lake City. The assembled Governors unanimously approved a resolution opposing the lockup of mineralized areas in our public lands in the wilderness system. The Governors correctly pointed to the great economic potential of such mineralized public lands to the future of the Western States. They likewise noted that such lands comprise only 1 percent of the total area of the public domain.

I ask unanimous consent that the text of the Governors' resolution be printed in the RECORD at the conclusion of my remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

As to public lands: (1) Since the mineralized area of economic potential in public lands makes up but a small fraction of 1 percent of the total area, it is not to the advantage of Western States or the Nation as a whole that these mineralized areas be withdrawn for all time or locked up in wilderness systems or other Federal reserves. Furthermore, under no circumstances should there be any permanent withdrawals of any Federal lands without the concurrence of the Governor of the State in which the lands are located.

Mr. BENNETT. Mr. President, the Utah Junior Chamber of Commerce, at its August 1961 quarterly conference, adopted a resolution opposing the wilderness bill, S. 174, in its present form.

Specifically, the Utah Junior Chamber is opposed to the provisions contained in section 3(f) of S. 174, which permit the blanketing into the wilderness system of millions of acres of public lands without congressional approval. Secondly, the chamber opposes section 3(c) which erects a statutory barrier to the ultimate construction of the Echo Park Dam in Dinosaur National Monument.

As a sponsor of amendments to correct both of these serious defects in the bill, I was particularly pleased to learn of the resolution passed by the Utah junior chamber, and ask unanimous consent that the complete text of the resolution appear in the RECORD following my remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas we believe in the efficacy and need of a wilderness program and recognize our responsibility to future generations to preserve wilderness areas for their recreational and other needs; and

Whereas we believe that government should be of laws rather than of men; and

Whereas Senate bill 174 in its present form constitutes an abdication by Congress of its responsibility over public lands by giving bureaus and administrators the almost unfettered power to designate the areas to be incorporated into the wilderness system with the consequence and possible adverse effects upon mining, water and power development, fish and wildlife management, hunting and fishing, water and soil conservation; and

Whereas over 70 percent of the land in Utah is Federal land and eligible for inclusion in the wilderness system; and

Whereas virtually all existing wilderness areas are in the Western United States and practically all wilderness areas will come from the West; and

Whereas under Senate bill 174 the only check upon administrative selection of wilderness lands in the form of legislative veto requires the majority vote of the Senate and the House and the West's proportionately greater representation in the Senate will thereby be negated and decisions relating to and vitally affecting the West will be decided without western voice: Now, therefore, be it

Resolved by the Utah Junior Chamber of Commerce in convention assembled at the annual August quarterly conference—

1. That we are unalterably opposed to the passage of Senate bill 174 in its present form.

2. That we are particularly opposed to the provisions contained in section 3(f) of said bill.

3. We believe the correct procedure to be followed in designating wilderness areas is for the President of the United States to propose and recommend legislation which would require majority approval of both Houses before any lands shall be embraced in the wilderness system.

4. That Senators and Representatives from Utah and the West and all members of the Interior Committee of both Houses of Congress and the President of the United States be furnished copies of this resolution and that all of such persons be and they hereby are further requested to give additional consideration to the provisions of section 3(c) of Senate bill 174 which in our opinion endangers the eventual construction of Echo Park Dam in the Dinosaur National Monument.

Mr. HICKEY. I should like to ask a question of the Senator from California.

Mr. KUCHEL. I hope I can answer the Senator's question.

Mr. HICKEY. The Senator has indicated by his reference that at this point a half loaf is being offered, and some of us want a full loaf. I believe that characterizes the difference between people who support the Allott amendment and the people on the side of the Senator from California.

My understanding is that the Senator's reluctance to take the full step, to get the full loaf, stems from the fact that in his opinion at some prior date a law was passed which gave the Secretary of Agriculture the full authority.

Is it not a fact that Congress for years has repealed laws completely, and that the reason behind that cannot be the full reason for the reluctance on the part of some Members of Congress to take the full step?

Mr. KUCHEL. First of all I acknowledge the good faith of all sides in this controversy. My philosophy is this, however. I am jealous of the prerogatives of Congress. Like my friend from Wyoming I am proud to be a Member of Congress.

However, Congress sometimes has exercised real wisdom in delegating constitutional authority to the executive branch.

I remember as a boy reading about how tariff legislation was logrolled back and forth through the legislative branch, almost to the point of actually becoming a scandal. That is when our predecessors in Congress began writing legislation to provide for the development of quotas and trade regulations by the executive branch under a delegation of our authority.

I think that delegation of power was in the public interest.

Sometimes delegated authority has been traduced downtown. But here we have a situation where if Congress were required to determine, every time that someone suggested that a few acres of God's earth on the North American Continent, which belongs to the people of the United States and to the Government of the United States, be given special protection in the interest of the people, I am afraid we would be burdening ourselves with the same troubles which have plagued Congress in the past.

So I believe we did a good thing when we adopted the 1960 legislation. However, I think that we ought now to give some congressional approval to the excellent work that the Secretary of Agriculture has done and, incidentally, also the work which the Secretary of the Interior has done in connection with this wilderness system, by approving what would do just that. At the same time, we would give to either House of Congress the power which I know my friend understands is in the bill.

Mr. HICKEY. I thank the Senator.

UNANIMOUS-CONSENT REQUEST TO LIMIT DEBATE AND TO VOTE ON THE PENDING AMENDMENT AT 5:10 P.M.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at 10 minutes after 5 a vote be taken on the pending amendent; in the meantime 10 minutes to be allocated to the distinguished Senator from Idaho; then to have a quorum call, to consume not less than 5 minutes; and the last 10 minutes to be allocated to the distinguished Senator from Colorado.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. I ask that the attachés of the Senate on both sides of the aisle notify Senators that a vote will be taken in 25 minutes. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills and joint resolution of the Senate:

S. 48. An act to authorize the Secretary of the Army to modify certain leases entered into for the provision of recreation facilities in reservoir areas;

S. 203. An act to declare that the United States holds in trust for the pueblos of Santa Ana, Zia, Jemez, San Felipe, Santo Domingo, Cochiti, Isleta, and San Ildefonso certain public domain lands;

S. 322. An act to make certain funds available to the Nez Perce Tribe of Idaho;

S. 344. An act to amend the Seneca Leasing Act of August 14, 1950 (64 Stat. 442);

S. 541. An act to amend the Act of June 1, 1948 (62 Stat. 281), to empower the Administrator of General Services to appoint nonuniformed special policemen;

S. 931. An act to repeal that part of the act of March 2, 1889, as amended, which requires that grantors furnish, free of all expenses to the Government, all requisite abstracts, official certifications and evidences of title;

S. 935. An act for the relief of certain members of the Army National Guard of the United States and the Air National Guard of the United States;

S. 1368. An act to amend the Shipping Act, 1916, to provide for licensing independent ocean freight forwarders, and for other purposes;

S. 1501. An act to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs;

S. 1518. An act providing for the disposition of judgment funds of the Omaha Tribe of Indians;

S. 2016. An act to give to the Walker River Paiute Tribe the reserved minerals underlying its reservation;

S. 2216. An act to authorize the transfer of three units of the Fort Belknap Indian irrigation project to the landowners within the project;

S. 2224. An act to grant minerals, including oil, gas, and other natural deposits, on certain lands in the Northern Cheyenne Indian Reservation, Mont., to certain Indians, and for other purposes;

S. 2422. An act concerning the White House and providing for the care and preservation of its historic and artistic contents; and

S.J. Res. 98. Joint resolution to provide for the observance of the centennial of the enactment of the Homestead Act.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 4998) to assist in expanding and improving community facilities and services for the health care of aged and other persons, and for other purposes; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HARRIS, Mr. ROBERTS, Mr. RHODES of Pennsylvania, Mr. O'BRIEN of New York, Mr. BENNETT of Michigan, Mr. SCHENCK, and Mr. NELSEN were appointed managers on the part of the House at the conference.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 8102) to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such act, and for other purposes; agreed to the conference asked by the Senate on the

disagreeing votes of the two Houses thereon, and that Mr. HARRIS, Mr. WILLIAMS, Mr. FRIEDEL, Mr. JARMAN, Mr. BENNETT of Michigan, Mr. SPRINGER, and Mr. COLLIER were appointed managers on the part of the House at the conference.

ESTABLISHMENT OF NATIONAL WILDERNESS PRESERVATION SYSTEM

The Senate resumed the consideration of the bill (S. 174) to establish a national wilderness preservation system for the permanent good of the whole people, and for other purposes.

Mr. CHURCH. I rise to oppose the pending amendment. Since the subject has been discussed at some length and in some detail, I shall be brief. At no time during the deliberations in the Committee on Interior and Insular Affairs did anyone on either side dispute the desirability of establishing and preserving wilderness areas in the United States. The only problem before us has been how to do this in a way which will be equitable to all, which will constitute no encroachment upon the legitimate business interests of the people of the Western States, and which at the same time will establish a uniform wilderness system embracing tracts of public land that are variously denominated under existing law.

The committee concluded, after very detailed and exhaustive hearings, that the method proposed in the pending bill would be the fair method.

First of all, we undertake to confine the proposed wilderness system to those areas of public land that have already been set aside for recreational use. Thus the system could only include areas already designated as wild areas, wilderness areas, canoe areas, primitive areas in national forests, primitive-type areas in national parks and in national monuments, and such areas in wildlife refuges and game ranges.

That is the maximum possible scope of the wilderness system to be established by the bill.

With respect to the tracts which have already been designated as "wild, wilderness, or canoe areas," these will be incorporated in the wilderness system upon the enactment of the bill. As to these areas, there is no dispute.

The dispute arises over the treatment to be given to the primitive areas in the national forests and the wilderness type areas in the national parks and in the game refuges. The committee believed these areas should be carefully reappraised, so that any portion having merchantable timber or being more susceptible to multiple use would be excluded, and the remainder not susceptible to merchantable use, would be retained. On the basis of such a review, the recommendations would then be made to Congress, and Congress would reserve the final judgment, in that either House could exercise a veto of any such recommendation. The committee felt that this would be the orderly way to proceed; and we believed it the best way to recover Congress' prerogatives which have heretofore been delegated away. As has often been stated in the course of the debate, the executive branch now has the full authority to establish wilderness areas without any kind of congressional review or congressional consent. The bill returns to Congress the right of review and the right of veto with respect to these withdrawn portions of the public lands.

Finally, the bill provides that once the wilderness system is established, once the review is completed by Congress, then any new additions to the system will have to be made by affirmative enactment of Congress, thus completely restoring congressional control.

I think the chairman of the Committee on Interior and Insular Affairs, the distinguished Senator from New Mexico [Mr. ANDERSON], has made it plain why these two separate types of treatment were decided upon.

In the statement he made, which appears in the CONGRESSIONAL RECORD of August 24, 1961, he set forth clearly and succinctly the reason why the committee provided for the two methods, the one relating to areas already withdrawn as wilderness, the other relating to new additions to the wilderness system, once it has been established.

Mr. President, I ask unanimous consent that the statement by the chairman of the committee be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ANDERSON

There is a very sound reason for drawing a line between handling of areas already reserved, and any new areas.

Inclusion of the wild, wilderness, primitive, park, and wildlife areas in the wilderness preservation system will cause little or no disturbance of individuals, communities, or economic patterns. The areas have been withdrawn for years. There have been no timber sales from forest lands involved so there are no lumber mills dependent on them which will have to close down. Established mining operations and grazing will not be disturbed.

There is thus virtually no change in the status quo of the areas to be handled under the Presidential recommendations procedure in the bill. The bill simply makes wilderness preservation a statutory directive and responsibility of the existing land-administering agency in its handling of already reserved lands. It does not set up any new agency, or entirely new category of land classification.

The designation of new areas usually does mean disturbance of individuals, communities, and economic patterns. The Interior Committee has found many special problems to consider in the creation of seashore areas, such as Cape Cod, Point Reyes, and Padre Islands. We have an almost unsolvable problem at the Indiana Dunes on the southern tip of Lake Michigan, but we still hope to save some of the area.

Under the provisions of the wilderness bill, the committee has provided that reservations of such new areas for wilderness which may require adjustments from the status quo, even though they are public lands, shall occur only after affirmative legislative action.

Only the existing wilderness-type areas are to be handled on recommendations which become effective unless vetoed by Congress. Behind the use of this procedure is a very practical consideration.

Chairman CLARENCE CANNON of the House Appropriations Committee and author of Cannon's Rules of Procedure in the House, tells some of his audiences that there are 27 steps involved in passing a bill through Congress, including introduction in two Houses, subcommittee hearings, subcommittee consideration, full committee consideration, Rules Committee consideration, calendaring, action on the floor, conferences, ratification of conference reports and, finally, approval by the President.

There are about 100 prospective wilderness tracts to be processed. On the basis of Chairman CANNON's estimate, it would involve at least 2,700 separate actions here in Congress to pass a bill on each and every one of the prospective wilderness tracts. There is going to be little objection to the inclusion of a great majority of these existing wild areas in the wilderness preservation system, so a vast workload will be avoided, without sacrificing any of the power of either House of Congress to work its will.

Mr. CHURCH. Mr. President, for the reasons I have stated, I hope the Senate will reject the pending amendment. If the amendment is approved, I believe it will do great damage. The virtue of the bill's method has been borne out again and again, because the formula provided is the same as the veto formula which has been written into the Reorganization Act and which, time and time again, has been used so effectively in connection with the reorganization of various agencies of the Government.

Fifteen different reorganization plans have been vetoed by Congress. Congress has had a most successful, orderly experience with this particular method. Moreover, this method of review, since it gives the power of veto to either House of Congress, retains the full prerogative of Congress. When we move upon the affirmative enactment of any given law, either House can exercise the power of veto; and we have carefully preserved the same power in the formula contained in this bill.

Finally, the method provided in the bill means that the review will be completed within the 10-year period in the most orderly possible way, retaining the full prerogative of final decision in Congress, thus establishing the wilderness system which the bill contemplates.

If that formula is disrupted by the approval of the pending amendment, then I think we will seriously weaken the bill and will cause to be brought before Congress 100 to 150 separate acts, each requiring the full legislative process. That is unnecessary with respect to land already withdrawn as wilderness. That would be a disruption of the orderly process contemplated in the bill. I think it would seriously weaken the bill.

Mr. President, for the reasons I have stated, I urge the Senate to reject the amendment and to support the position taken, after long and careful deliberation, by a large majority of the members of the Committee on Interior and Insular Affairs.

Mr. ALLOTT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ALLOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLOTT. Mr. President, in closing the debate on my amendment which provides for affirmative congressional control, I wish to state that I believe we have come a long way in clearing up some of the misapprehensions which have existed.

First of all, I believe it is now clear to all that the so-called affirmative congressional review provided for by my amendment would not affect in any way the wilderness system which is now established.

I was surprised when, a few minutes ago during the debate, I found that even some Senators who attended all the hearings do not comprehend that my amendment does not affect the wilderness areas as they are now constituted. I have been surprised to find among Senators a misapprehension as to this fact. Let no one misunderstand: This amendment does not change in any way the presently constituted wilderness areas. The amendment would clothe the wilderness areas with a statutory cloak of authority which they never before have had, and as a result the present wilderness areas would be stronger and safer from violation than they have ever been before. So let no one state that this amendment would destroy them. I have heard it said again and again that if the amendment were adopted it would destroy the wilderness areas. But it would not. It would leave the wilderness areas as they are at the present time, and give them a statutory cloak of authority which they do not now have.

Furthermore, as I have stated, even the Secretary of Agriculture does not claim such authority now exists; he only states that the Department maintains it has authority to take such action under the 1897 act. So by means of this amendment we would provide the authority and give the wilderness areas a status they have never before had.

Let me make perfectly clear that my amendment would not affect the existing wilderness areas. My amendment would relate only to the areas in the national park system, the primitive areas, and the national wildlife refuge and game areas—these three, which already are dealt with by the bill. My amendment would not change the form of the review or any other provisions in regard to any of these areas. My amendment only provides that when the President makes such a recommendation, Congress shall have an opportunity to work its will upon it.

This provision has many practical effects. Among the most important, I point out that if Congress acts by means of the so-called negative review—as now provided by the bill—it may never have an opportunity for a hearing respecting any of these recommendations. If the chairman of the committee or the chairman of the subcommittee were to decide not to hold a hearing, the only remedy then would be under the Administrative Procedure Act and that remedy would offer only a negative review by the Congress, with up to 10 hours of debate, and without one bit of evidence, testimony or hearings upon which to base a case. So the interests of a State which might be vitally affected would have to be subject to debate under the 10-hour limitation, without any evidence, hearing or testimony; and Senators from the affected State would have to make their case as best they could. That is the No. 1 reason for the adoption of my amendment.

Secondly, and equally as important, Congress must have the right to act upon these questions. As the bill now stands, the only change made by my amendment would be that as to the park system areas, the primitive areas, and the wildlife areas, the Congress would have a right to act in an affirmative way, rather than surrender more of its prerogatives and responsibilities to the Department of Agriculture and to the Department of the Interior.

These are very important reasons why Congress must preserve its right to make an affirmative review.

My amendment provides for the only effective action which Congress could take in such cases, because it is the only action which would result in public hearings; and it is the only action by which all Members of Congress, both the Members of the House and the Members of the Senate, may be assured that the people of the affected areas will be heard.

The amendment simply seeks to restore the power to Congress. Thus, the Members of Congress would not be handicapped—as they would be under the bill as it now stands—by a legislative deadline.

This amendment would not be burdensome. Again and again I have pointed out during the debate that there are 39 national parks, and Congress has worked its will on each one of them; and at the present time the Senate and House Committees on Interior and Insular Affairs are considering such matters.

Under the bill as it now stands Congress would have to legislate in the dark, because since 1939 the areas included in the general wilderness system have remained about the same in acreage, and the Department of Agriculture has been unable to determine the classification of these lands. If Congress is to surrender its right to determine the classification of these lands, if Congress is to surrender its right to determine the highest use to which these lands can be put, if Congress is to surrender its right to have an opportunity to determine, as to these lands, what minerals may be developed in them, what water conservation works may be developed, and for what other purposes these lands and areas may be used, then Congress will have surrendered virtually all its power over these lands.

My amendment would do no damage to the wilderness system. Under the terms of my amendment Congress would retain better control, and the people affected by these areas would have an opportunity to speak. In that way we should have actually strengthened, rather than weakened, the wilderness system.

Mr. DWORSHAK. Mr. President, will the Senator from Colorado yield for a question?

Mr. ALLOTT. I yield.

Mr. DWORSHAK. I commend the Senator from Colorado for the courageous work he has done as a member of the Committee on Interior and Insular Affairs in trying to devise satisfactory safeguards in connection with the wilderness preservation system.

I invite his attention to a resolution adopted unanimously by the Western States Land Commissioners Association, calling attention to the fact that the wilderness bill now before us would create many difficult problems for this association.

Does not the Senator believe this proves the contention he has been constantly making throughout the debate, that there is little justification for the Federal Government to move into areas of conflict with the Western States, where there are large holdings of public domain?

Mr. ALLOTT. I do, without Congress having an opportunity to work its will upon the question.

The PRESIDING OFFICER. The time of the Senator has expired. All time on the amendment has expired.

The question is on agreeing to the amendment offered by the Senator from Colorado [Mr. ALLOTT] for himself and other Senators. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BEALL (when his name was called). On this vote I have a pair with the Senator from West Virginia [Mr. RANDOLPH]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." Therefore, I withhold my vote.

Mr. COOPER (when his name was called). On this vote I have a pair with the senior Senator from Oregon [Mr. MORSE]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." I therefore withhold my vote.

The rollcall was concluded.

Mr. BARTLETT (after having voted in the affirmative). Mr. President, on this vote I have a pair with the distinguished junior Senator from New Mexico [Mr. ANDERSON]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." I therefore withhold my vote.

Mr. MANSFIELD (after having voted in the negative). Mr. President, on this vote I have a pair with the distinguished minority leader, the Senator from Illinois [Mr. DIRKSEN]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

Mr. HUMPHREY. I announce that the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Washington [Mr. MAGNUSON], the Senator from Oregon [Mr. MORSE], and the Senator from

Georgia [Mr. RUSSELL] are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON] and the Senator from New Mexico [Mr. CHAVEZ] are absent because of illness.

I further announce that the Senator from West Virginia [Mr. RANDOLPH] is necessarily absent.

On this vote, the Senator from New Mexico [Mr. CHAVEZ] is paired with the Senator from Washington [Mr. MAGNUSON]. If present and voting, the Senator from New Mexico would vote "nay," and the Senator from Washington would vote "yea."

I further announce that, if present and voting, the Senator from Arkansas [Mr. FULBRIGHT] would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON], are absent because of illness.

The Senator from Illinois [Mr. DIRKSEN] and the Senator from North Dakota [Mr. YOUNG] are necessarily absent.

The pair of the Senator from Illinois [Mr. DIRKSEN] has been previously announced.

If present and voting, the Senator from New Hampshire [Mr. BRIDGES], the Senator from Kansas [Mr. CARLSON] and the Senator from North Dakota [Mr. YOUNG] would each vote "yea."

The result was announced—yeas 32, nays 53, as follows:

[No. 186]

Beall	Dirksen	Randolph
Bridges	Fulbright	Russell
Carlson	Magnuson	Young, N. Dak.

So the amendment offered by Mr. ALLOTT for himself and other Senators was rejected.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KUCHEL. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ALLOTT. Mr. President, I call up my amendment "8–25–61—B," and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 14, line 24, it is proposed to strike out the word "President" and substitute in lieu thereof the words "appropriate Secretary".

Mr. ALLOTT. Mr. President, for the information of Senators, though I have several other amendments to offer, I shall not detain the Senate for a long period of time.

The series of amendments I shall offer to the bill deserve very careful consideration. I shall try to be as brief as possible. It will be necessary to have yea and nay votes on at least two of the amendments. I also believe we should have a yea and nay vote on the question of final passage of the bill.

Mr. President, I ask for the yeas and nays on the question of final passage of the bill.

The yeas and nays were ordered.

Mr. ALLOTT. Mr. President, I ask for the yeas and nays on the pending amendment.

The yeas and nays were ordered.

Mr. ALLOTT. Mr. President, the pending amendment is designated "8–25–61—B." It refers to page 14, line 24 of the bill. In my opinion, this section of the bill carries one of the biggest glittering hopes with the smallest prospects of performance of anything in the bill.

(At this point Mrs. NEUBERGER took the chair as Presiding Officer.)

Mr. ALLOTT. On page 14 of the bill, there is reference to "Special Provisions." It is provided that under certain circumstances certain uses may be authorized in the wilderness system.

The bill provides:

(2) Within national forest and public domain areas included in the wilderness system, (A) the President may, within a specific area and in accordance with such regulations as he may deem desirable, authorize prospecting (including exploration for oil and gas), mining (including the production of oil and gas), and the establishment and maintenance of reservoirs, water-conservation works, transmission lines, and other facilities needed in the public interest, including the road construction and maintenance essential to development and use thereof, upon his determination that such use or uses in the specific area will better serve the interests of the United States and the people thereof than will its denial.

The provision I have read would set up certain exceptions to the rather extreme limitations that are established in a previous provision with relation to wilderness areas. In line 24 of the bill the amendment would merely substitute the words "appropriate Secretary" for the word "President." I think it must be perfectly obvious to anyone that if a man should discover a very valuable vein of ore or rare minerals, for which we are very avidly hunting all over the country today, he would have a very difficult, if not impossible, time getting to the President in order to get the President's assent that he might prospect for, or even mine the metal within a given area.

There are also other activities, such as road construction, water conservation works, and the building of small dams that might be necessary to water and land conservation and the forestation and conservation of a certain area. Yet we know that a person who was aware of that condition could not possibly get to the President.

Sometimes I think it is difficult enough to communicate with the Secretary of the Interior or the Secretary of Agriculture. I am not being political in this statement. That is a fact. For the average man on the street it is a pretty big task. It seems to me that if we would make the bill workable, we should put the power in the hands of the appropriate Secretary rather than in the hands of the President.

From a practical standpoint, this is the way the provision would work: If an applicant ever got to the President, the President would call upon the appropriate Secretary to advise the President, and the President would then advise the man. So rather than go into the question in a roundabout way, and since the measure would give the power to the President alone, it seems to me that the amendment suggests a practical and good way to handle this question in order that the provision may be made meaningful and in order that we may accomplish what I am sure is the intent of the bill. If we do so, we shall make this particular section workable. Without the language suggested, I say that the section would hold out only hope, and it would be as elusive as the pot at the end of the rainbow.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

Mr. CHURCH. Madam President, I wish it were possible for me to accept the amendment. As the distinguished Senator from Colorado knows, yesterday we accepted several of his amendments that we felt were constructive and helpful to the purposes of the bill.

I cannot accept this amendment for a reason that can be very briefly stated.

The provision of the bill to which the pending amendment relates reads as follows:

(2) Within national forest and public domain areas included in the wilderness system, (A) the President may, within a specific area and in accordance with such regulations as he may deem desirable, authorize prospecting (including exploration for oil and gas), mining (including the production of oil and gas), and the establishment and maintenance of reservoirs, water-conservation works, transmission lines, and other facilities needed in the public interest, including the road construction and maintenance essential to development and use thereof, upon his determination that such use or uses in the specific area will better serve the interests of the United States and the people thereof than will its denial.

The amendment would merely take the authority to grant such permissive uses away from the President and place the authority in the hands of the appropri-

ate Secretary, which would be either the Secretary of Agriculture or the Secretary of the Interior.

We had a reason for placing the proposed authority in the hands of the President. It is the same kind of authority that applies in any zoning ordinance that I know anything about within any community in which there is a competition for the use of land. We have zoning ordinances to determine what parts of the community shall be residential and what parts of the community shall be commercial, and so on.

We recognize the very special interest that realtors might have, for instance, in building an apartment development or a supermarket in a given area. But we do not give authority to the realtors to determine whether or not a zoning ordinance should be amended to permit the building of the supermarket or the apartment house, nor do we leave the power of decision in those appointed public officials who deal with the realtors. We leave the authority of final decision to the elected representatives of the city who are responsible, not to any particular group, but to all the people of the city. We leave that authority either to the mayor or to the city council—the elected representatives of the entire people.

We have adopted the same principle in this bill. We leave the authority for making a final decision as to uses inconsistent with wilderness, where a higher public interest may so require, to the uppermost elective official of the land, the President, who is responsible to the whole people, and to the Congress, the elected representatives of the people. That is where the authority belongs.

We all know that in accordance with the procedures of government the various agencies will make their recommendations to the President. We know that regulations will be established that will govern most cases where intrusions are to be permitted. In most instances the President will act through the Secretary of Agriculture or the Secretary of the Interior. But conflicts can arise between agencies, and this bill properly vests final judgment in the man who is responsible to the whole people—the President of the United States. That is where the authority belongs. It is consistent with the practice in any small community where there is a zoning ordinance. It is a good democratic principle. I hope the principle will be upheld and that the amendment will be rejected.

Mr. ALLOTT. Madam President, I should like to reply briefly to the argument of the junior Senator from Idaho.

I ask, What is proposed? Should we write language in a bill which would hold out an idle dream to someone? The bill sets out very rigid standards for the areas that will actually be wilderness areas. I have no objection to those standards. But certain exceptions to those standards would be provided when it is found to be in the national interest to make them.

Can any Senator tell me how a stockman, a small lumber operator up in the corner of my State or, what is most important, a man who knows minerals and has found a rare mineral that we need badly in this country, can get to the President to give his approval of the exception? If so, I will gladly throw in the sponge and ask unanimous consent to withdraw my amendment. The fact is that it cannot be done without great difficulty.

If we are going to be completely fair about the bill, let us provide that the applicant may go to the appropriate Secretary. The argument of the Senator from Idaho now is that there is only one man to whom such an applicant should go, and that is the President of the United States. But only a few moments ago we were listening to an argument that no one but the Secretary of Agriculture could do all these things, and that he was omniscient.

In this instance, if these special provisions mean anything, we shall have to modify them. The amendment I have proposed is reasonable. The President, in any instance, would have to act on the advice of the appropriate Secretary. All that the amendment does is to put the responsibility where it belongs. I am sure that if the Secretary should in any case overstep his prerogatives or his judgment, the President would take him to task in short order.

Mr. LONG of Louisiana. Madam President, will the Senator yield?

Mr. ALLOTT. I yield.

Mr. LONG of Louisiana. Are there not a great many functions of government with respect to which the decisions are placed on someone of lesser rank than the President? I have in mind the granting of television channel licenses, the granting of a permit to construct a pipeline across the country, and similar situations. The responsibility for a great number of decisions is placed on someone less than the President. Many officials in the Federal Government have authority to grant permits with respect to property rights. Is that not so?

Mr. ALLOTT. The Senator is correct.

Mr. LONG of Louisiana. If we look at some of the vast powers that are vested in Federal regulatory agencies with respect to the granting of permits to do various and sundry things, such as the construction of transmission lines or the construction of pipelines, it would hardly seem appropriate to ask the President to make the decision as to whether or not a man may graze cattle on 50 acres of land.

Mr. ALLOTT. It does not seem necessary to me. Consider, for example, the establishment and maintenance of reservoirs, which are very necessary to conservation. It is claimed that this is a conservation bill. However, the man who wanted to establish such a reservoir would have to go to the President with his application. Out West, for example, a powerline will come up from Glen Canyon into the Four Corners area and up into Colorado. It will pass over some wilderness areas in southwestern Colorado, or close to them. I am not sure of the exact route.

However, the REA's would have to go to the President to get permission to do this, although the decision would no doubt have to be made in the Office of the Secretary of the Interior.

Mr. LONG of Louisiana. Reference is made, if I understand the section, to water conservation works or the building of a small, ordinary dam that might be of some benefit to fish and wildlife in the area, involving many millions of acres. That would have to be approved by the President. Does not that language tend to defeat the purpose of the bill? This is supposed to be some kind of escape valve to get away from rigidity in the program. As I pointed out, it would not be possible even to construct an outdoor privy. When we try to avoid the rigidity of this measure, we are told that we must go to the President of the United States to get his signature. Does that not lock up the procedure in inflexibility?

Mr. ALLOTT. The Senator is entirely correct. That is the reason I have offered the amendment. I have not offered it because I think it would loosen the effectiveness of the bill, but, rather, as the Senator and I know, because the bill as it stands would create an impossible situation. How would an individual, miner, or a man who wants to construct a reservoir, go about obtaining the consent of the President?

Our President is overburdened. I am appreciative of his great burdens, as he wrestles with the situation in Cuba, the situation in Brazil, the situation in Laos, the situation in Berlin, and the question of the resumption of nuclear testing. To put this burden on the President is absolutely silly. There is no better word to describe it. The decision should be made by the respective Secretaries.

Mr. LONG of Louisiana. I completely agree with the Senator on this question. If this section is to be used at all, it should not be required for the President to act in such situations. There are a number of matters that are of vital concern to the State of Louisiana about which I am reluctant to seek an appointment with the President in order to discuss them with him, because the President has many vital problems of war and peace on his mind. At the moment he has on his hands the responsibility of the survival of every Member of the Senate and, in fact, of every person in America. Why should he have the problem of deciding whether a man may graze cattle on certain land which has always been regarded as agricultural land, or whether a man may build a small dam, or something like that?

Mr. ALLOTT. Or build a small road which might be necessary for beetle or insect control. All those questions would have to be brought to the President for decision. I thank the Senator.

Mr. CASE of South Dakota. Madam President, will the Senator yield?

Mr. ALLOTT. I yield.

Mr. CASE of South Dakota. During the past few years we have heard a great deal about increasing the burdens of the Presidency. Proposals have been made for an Assistant President or for the delegation of his work. Various commissions have recommended that we find ways in which some of the orders the

President must sign might be delegated to other persons.

It seems surprising to me that in the pending bill it should be proposed to add to the burdens of the Presidency.

I ask the Senator who, today, has the authority to grant a permit for prospecting for oil and gas on the public domain?

Mr. ALLOTT. The Secretary of the Interior.

Mr. CASE of South Dakota. If today the Secretary of the Interior is the one who has authority for granting oil and gas prospecting permits on the public domain, why would it not be consistent for him to have the power to grant permits on those portions of the public domain which are included in the wilderness system?

Mr. ALLOTT. I think it is perfectly consistent. The Senator from Louisiana brought out the strongest point in that regard. I agree with him very strongly with respect to it. He has said that there are a great many problems relating to the State of Louisiana which are important to the State, but, knowing the pressures on the President, he will not even call for an appointment so that he may discuss those problems with the President.

I found myself in a similar situation when a President of our party was in the White House. Because we know of the great pressures on the President, I can see no reason why extra burdens should be placed on him. The Secretary of the Interior or the Secretary of Agriculture is the one who is to make the decision for the President anyway. But putting the President up in front of him, we make subparagraph (a) of this section absolutely meaningless.

Mr. CASE of South Dakota. Is it not the Secretary of the Department concerned who would normally have a staff to investigate the feasibility and advisability of granting a permit with respect to prospecting or the establishment of a reservoir or a water conservation works?

Mr. ALLOTT. Yes. I am sure there is no such established staff in the Executive Office of the President which would be qualified to do it.

Mr. CASE of South Dakota. Would not the result be one of three things—either the President would turn to the Secretary who has in his office the administration of the act, or he would turn to the Bureau of the Budget and expect the Bureau of the Budget to provide the advice on which a finding could be made, or finally he would have to establish within the Executive Office of the President a new staff to process these applications?

Mr. ALLOTT. That is true. The only logical way, I am sure, would be for him to refer the problem to the Secretary of Agriculture or the Secretary of the Interior.

Mr. CASE of South Dakota. If that be true, why not place the responsibility there in the first place? I am not sure that I agree with the Senator from Colorado that that is where the President would turn. I would be a little suspicious that perhaps he might set up a new office in the White House Executive Offices, or turn to the Bureau of the Budget and give to the Bureau of the Budget another executive administrative responsibility.

In any event, it seems to me that the amendment offered by the Senator from Colorado is the logical answer. I hope it will be agreed to.

Mr. ALLOTT. I thank the Senator from South Dakota.

Mr. LONG of Louisiana. Madam President, will the Senator from Colorado yield?

Mr. ALLOTT. I yield.

Mr. LONG of Louisiana. If the Senator's amendment is defeated upon the logic offered, we are confronted with ridiculous hiatuses. Speaking as one who comes from an oil-producing State, the less oil produced in Colorado, Montana, and Wyoming, the more that can be produced in Louisiana, because the amount of oil which can be produced is limited by the storage facilities above ground. If storage space is not available, the oil is not permitted to be taken out of the ground.

The amusing thing is that the Secretary of the Interior already has power to grant oil leases on the Continental Shelf. Such leases might be worth hundreds of millions of dollars. By contrast, this amendment would not let him grant even a grazing permit or a permit for someone to build a small pond to try to trap a little water or produce some fish in a wilderness area.

Certainly the President of the United States will never have the time to study the request at first hand so as to know what the decision should be. To insist on keeping that provision in the bill will mean that the man who makes the decision will never have a first hand opportunity to know whether he is right or wrong.

Mr. ALLOTT. I believe the Senator from Louisiana is entirely correct.

Madam President, I hope the amendment will be agreed to. I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado [Mr. ALLOTT]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Louisiana [Mr. ELLENDER], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Washington [Mr. MAGNUSON], and the Senator from Oregon [Mr. MORSE], are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ], and the Senator from New Mexico [Mr. ANDERSON], are absent because of illness.

I further announce that the Senator from West Virginia [Mr. RANDOLPH], is necessarily absent.

On this vote, the Senator from New Mexico [Mr. ANDERSON] is paired with the Senator from Arkansas [Mr. FULBRIGHT]. If present and voting, the Senator from New Mexico would vote "nay," and the Senator from Arkansas would vote "yea."

On this vote, the Senator from New Mexico [Mr. CHAVEZ] is paired with the Senator from Louisiana [Mr. ELLENDER]. If present and voting, the Senator from New Mexico would vote "nay," and the Senator from Louisiana would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES], and the Senator from Kansas [Mr. CARLSON], are absent because of illness.

The Senator from Illinois [Mr. DIRKSEN], and the Senator from North Dakota [Mr. YOUNG], are necessarily absent.

The pair of the Senator from Illinois [Mr. DIRKSEN], has been previously announced.

Mr. BEALL. On this vote I have a pair with the senior Senator from West Virginia [Mr. RANDOLPH]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." I withhold my vote.

Mr. EASTLAND. On this vote I have a pair with the senior Senator from Oregon [Mr. MORSE]. If he were present and voting, he would vote "nay"; if I were at liberty to vote, I would vote "yea." I withhold my vote.

Mr. MANSFIELD. On this vote I have a pair with the senior Senator from Illinois [Mr. DIRKSEN]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

The result was announced—yeas 35, nays 51, as follows:

[No. 187]

So Mr. ALLOTT's amendment was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ALLOTT. Madam President, I call up my amendment identified as "8-25-61—C."

The PRESIDING OFFICER. The amendment of the Senator from Colorado will be stated.

The CHIEF CLERK. On page 20, after line 8, it is proposed to insert the following:

SEC. 10. Nothing in this Act shall be construed as superseding, modifying, repealing, or otherwise affecting the provisions of the Federal Power Act (16 U.S.C. 792–825r).

Mr. ALLOTT. Madam President, this amendment does not originate with me; and perhaps some Senators on the other side of the aisle may be disposed to join me in sponsoring the amendment, because it originates with one of the agencies of the Federal Government.

I know of no better way to explain the amendment than to read the letter which the chairman of the Federal Power Commission sent to the committee:

FEDERAL POWER COMMISSION,
Washington, March 3, 1961.

Hon. CLINTON P. ANDERSON,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: On Monday last, during the testimony given by John C. Mason, General Counsel of this Commission, regarding S. 174, the wilderness bill, you requested additional comments as to how the bill would affect waterpower projects presently administered under the Federal Power Act. More specifically you suggested that we might submit a new saving clause which would not be as broad as the one presented in our report.

The role of the Federal Power Commission with respect to water-resources development is defined and limited by congressional enactments. Its licensing function originated in the Federal Water Power Act of 1920, which antedated any wilderness-type areas, and is now encompassed in part I of the Federal Power Act. Pursuant to that authority the Commission issues licenses to non-Federal interests, including citizens, corporations, States, and municipalities authorizing the construction, operation, and maintenance of waterpower projects on U.S. lands (except national parks and national monuments) and on streams over which Congress has jurisdiction, as well as licenses to non-Federal interests for the purpose of utilizing surplus water or waterpower from a Government dam. These licenses are issued for a term of years not exceeding 50 and contain certain conditions which protect both the public and the licensee.

A license for project works on reserved lands of the United States may be issued by the Commission under section 4(e) of the Federal Power Act "only after a finding * * * that the license will not interfere or be inconsistent with the purpose for which such reservation was created or required." In addition, such licenses contain conditions deemed necessary for the adequate protection and utilization of any reservation involved. We interpret section 4(e) to provide this Commission with authority to issue licenses for construction of power facilities in presently designated primitive, wilderness, wild, or canoe areas, except in the boundary waters canoe area of Minnesota, and we believe that S. 174 would not preclude the continued exercise of that jurisdiction within the wilderness system established by the bill. However, in light of the conclusion expressed at the hearing by the Chief of the Forest Service that the bill precludes any licensing under the Federal Power Act in the wilderness system that would be created by the bill, we can foresee serious administrative difficulties in attempting to license hydroelectric facilities in those areas, if S. 174 is enacted.

At the hearing you inquired as to the location of 748,000 kilowatts of existing licensed capacity mentioned on page two of the Commission's report on the bill. Our information reveals that the Commission has presently under license three power facilities now in operation (748,000 kilowatts) and one under construction pursuant to a license (257,000 kilowatts), all of which are affected by licensed reservoirs located in primitive areas, as those areas are presently classified by the Secretary of Agriculture and the Chief of Forest Service.

In view of the very limited hydroelectric potential in existing wild, underness, or canoe areas, we believe that the public interest in the development of waterpower resources through licenses issued under the Federal Power Act will be adequately protected if the saving clause we previously recommended is made applicable only to primitive areas. Therefore, the Commission recommends that the bill be amended by adding a new subsection 6(c)(8) to read as follows:

"To the contrary notwithstanding, no provisions of this act shall be construed as superseding, modifying, repealing, or otherwise affecting the provisions of the Federal Power Act (16 U.S.C. 792–825r) with respect to primitive areas as referred to in section 3(b)(1) of this act."

We hope this information will be of value to you and your committee, and if this Commission can be of further service, please do not hesitate to call on us.

Sincerely yours,

JEROME K. KUYKENDALL,
Chairman.

Madam President, in view of the very limited hydroelectric power potential existing in these areas, I believe that the public interest in the development of the waterpower resources of the country, through licenses issued under the Federal Power Act, will be adequately protected if the saving clause I have recommended, and which the Chairman of the Federal Power Commission has recommended in his letter to the committee, be included in this measure. In fact, the Chairman of the Federal Power Commission recommended it by stating that:

Therefore, the Commission recommends that the bill be amended by adding a new subsection 6(c)(8) to read as follows:

"To the contrary notwithstanding, no provisions of this act shall be construed as superseding, modifying, repealing, or otherwise affecting the provisions of the Federal Power Act (16 U.S.C. 792–825r) with respect to primitive areas as referred to in section 3(b)(1) of this act."

We hope this information will be of value to you and your committee, and if this Commission can be of further service, please do not hesitate to call on us.

Sincerely yours,

JEROME K. KUYKENDALL,
Chairman.

The amendment I have offered would accomplish exactly the same thing. It is almost exactly in the same words. The amendment is designed to assure that the purposes of the act shall not contravene the purposes of the Federal Power Act as now written, so the Federal Power Commission will retain the power it has.

Mr. HUMPHREY. Madam President, will the Senator yield for a question?

Mr. ALLOTT. I yield.

Mr. HUMPHREY. Does the Senator understand, under his amendment, that the Federal Power Commission, which would be permitted under the Federal Power Act, to exercise its present jurisdiction in the wilderness areas, would grant a license, and then the actual construction would have to be by Presidential order?

Mr. ALLOTT. That is a question. I doubt it would be by Presidential order if this amendment were adopted. The question arose because the understanding of the various departments about the law seems to be that at the present time the Commission has power to grant such licenses.

Mr. HUMPHREY. Yes.

Mr. ALLOTT. In committee there was much discussion as to whether or not the amendment affected that power. Then the Department of Agriculture stated that, in its opinion, the passage of the bill would supersede the authority of the Federal Power Commission to grant licenses. It is for that reason, therefore, that I have brought forth the amendment at this time.

I notice that the junior Senator from Colorado [Mr. CARROLL] has returned from conference. I wanted him to be present when this discussion was had.

Mr. HUMPHREY. My questions are designed merely for information, because, frankly, the Senator is well acquainted with the question as a result of the hearings, and I am not. Am I correctly informed that the Federal Power Commission said it would be satisfied, in terms of its jurisdiction, under the provisions of this bill if that jurisdiction could be exercised in only what are known as primitive areas?

Mr. ALLOTT. As I understand them, yes. In fact representatives of the Commission said that they interpret the original section of the Power Act to provide the Commission with authority to issue licenses for construction of power facilities in presently designed primitive, wild, or canoe areas except in the boundary waters area of Minnesota. Now I shall have to revise my previous answer. I believe that the proposal would amend it only as to primitive areas.

Mr. HUMPHREY. Would the Senator be willing to modify the amendment accordingly? I think the purpose of the amendment is worth while. I am not arguing with the purpose of it. I wanted the RECORD to be clear that it would be essentially in the primitive areas where the powersites were to be found. If the Senator will modify his amendment on that basis, I think there will be very little reason to have any objection to the amendment.

Mr. ALLOTT. If the Senator will refer to the plat at the rear of the Chamber, he will see that within the State of Colorado there is the Flat Top Primitive Area. There is a project underway at this time which the Federal Power Commission has under consideration. I do not remember the name of the corporation involved. It is the Western Power Co., if I recall correctly. It would definitely involve the Flat Top Primitive Area.

I had overlooked this aspect of the question. I suppose it is because of the length of time we have been discussing this subject on the floor. I would not

be willing to modify my amendment to specify primitive areas, because this particular project, for example, includes one of the few remaining potential power and reclamation sites in Colorado.

I could be mistaken, but as I look at this particular question, if I placed in the amendment a qualification with respect to primitive areas only, we would preclude the development of this great area, which is one of the few remaining potential sites in our State.

Mr. CARROLL. Madam President, will the Senator yield?

Mr. ALLOTT. I shall be glad to yield the floor or yield for a question.

Mr. CARROLL. Madam President, I support the amendment of the senior Senator from Colorado, for this reason. As we began our consideration of the wilderness bill, it occurred to me that perhaps we ought to find out what would happen to Federal powersites. Some years ago I represented the city of Denver, which had purchased water in Colorado and sought to bring that water over the mountains and place it in a dam for the use of the people of Denver. I found certain persons in the Department of the Interior—I think it was in the Fish and Wildlife Service—were objecting to Denver's using its own water, which it had purchased. We learned that a powersite had been withdrawn by Theodore Roosevelt many years ago. We proceeded under vigorous opposition by the Department of the Interior. Fortunately, the Federal Power Commission had authority to grant a license for the use of that site because it had been previously withdrawn.

As we were studying the wilderness bill I insisted that we carefully examine what would happen to water development in the wild and primitive areas in the years ahead. We therefore put several questions to the Department of the Interior and the Department of Agriculture. It was their theory that this bill removes the licensing power of the Federal Power Commission and invests it in the President. I thought we ought to leave the authority where it is now.

There is no conflict between Agriculture, Interior, and the Federal Power Commission, and I think it is a proper safeguard for those of us in the West and the semiarid States where, as I have said two or three times in debate earlier today and yesterday, water is our life's blood. We can protect ourselves, and will not do injury to the bill.

I have in my hand a report from the Federal Power Commission to the Interior and Insular Affairs Committee, dated February 24, in which it suggests an amendment identical to that proposed by my colleague, the gentleman from Colorado [Mr. ALLOTT]:

> Nothing in this act shall be construed as superseding, modifying, repealing, or otherwise affecting the provisions of the Federal Power Act.

It does not diminish the wilderness areas, but gives assurance to some of us who seek to protect future water and hydroelectric power-site developments in the semiarid West.

I think this is a sensible and necessary amendment. The Senator from Minnesota said we might limit it to primitive areas. Perhaps that could be done, but let us not do that at this time. It will go before the other body. I suggest we keep it in reference to wildlife areas, wilderness areas, and primitive areas.

I think we can protect the water and power rights not only of Colorado, but also of any other State of the Union which may have powersite withdrawals made by the Federal Power Commission, whose jurisdiction arises from an act passed in the days of Theodore Roosevelt. I support the amendment. I think it is a good amendment.

Mr. CHURCH. Madam President, will the Senator yield?

Mr. CARROLL. I yield.

Mr. CHURCH. The junior Senator from Colorado has made a very convincing statement, as is typical of him. It is true that in arid States like Colorado, Idaho, and other States of the Intermountain West the proper development of water resources is of crucial importance. We have established, under law, a Federal Power Commission for the purpose of licensing the construction of dams and power projects found to be in the public interest and consistent with the comprehensive development of our water resources.

I see no particular objection to the amendment. It is true the Federal Power Commission asked for it. It is true also that the Federal Power Commission Act does not extend to national parks or national monuments. The only areas which could be affected would be the forest areas, principally the primitive areas.

Offhand I cannot see that the amendment would do any damage. I think it would serve a useful purpose. No one believes the House of Representatives will act upon this proposed legislation in precisely the same way as the Senate. There is a likelihood of a conference, which would enable us to review the amendment. If there is something we ought to consider further, as a result of some complication not now apparent, we shall have full opportunity to do so in conference.

I hope the Senate will approve the amendment.

Mr. CARROLL. Earlier today I dealt with this issue in extensive detail. But if necessary later I shall place an even more expanded legislative history into the RECORD—not only for our protection, but also for the benefit of the other body—setting up, item by item, the position of the Secretary of Agriculture, of the Secretary of the Interior, and of the Federal Power Commission on this issue. I hope the Senate will approve the amendment and send it to the other body for their consideration.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the senior Senator from Colorado [Mr. ALLOTT].

The amendment was agreed to.

Mr. BENNETT. Madam President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The CHIEF CLERK. On page 6, line 23, before the period insert a comma and "except that no national monument (in whole or in part) shall be included in the wilderness system if in the reservation of any part of such monument it was provided that (1) such reservation should not affect the operation of the Federal Power Act, and (2) the administration of such monument should be subject to one or more withdrawals for reclamation purposes."

Mr. BENNETT. Madam President, my amendment provides that the wilderness bill shall not include national monuments if in the reservation withdrawing the land for the monument it was provided that the reservation should not affect the operation of the Federal Power Act, and the administration of such monuments should be subject to one or more reclamation withdrawals.

Section 3(c) of S. 174 makes it possible to blanket all national parks, national monuments, and other park units into the wilderness system without the affirmative approval of Congress. We fought that fight this afternoon. With respect to one national monument, this would be grossly unfair, inequitable, and would be a denial of solemn promises made by the Government of the United States. I refer to the Dinosaur National Monument.

The original 60-acre Dinosaur National Monument was created by Executive order on October 4, 1915. It was established to preserve and protect the remaining dinosaur remains in the area. On July 20, 1938, President Roosevelt issued an Executive order expanding the Dinosaur National Monument by over 200,000 acres in the vicinity of the confluence of the Green and Yampa Rivers. This action was taken after public hearings were conducted in the area by the National Park Service, at which time the people of eastern Utah and western Colorado were expressly promised that the creation of the enlarged national monument would not bar subsequent water and power projects within its borders.

President Roosevelt's Executive order expressly embodied the promises made by the National Park Service. The order states:

> This reservation shall not affect the operation of the Federal Water Power Act of June 10, 1920 (41 Stat. 1063), as amended, and the administration of the monument shall be subject to the reclamation withdrawal of October 17, 1904, for the Brown's Park Reservoir site in connection with the Green River project.

According to former Assistant Secretary of the Interior George W. Abbott, who wrote me in his official capacity in 1959 as the then Solicitor of the Department of Interior, the wilderness bill's provisions prohibit power and reclamation development within the Dinosaur National Monument. There is no provision within S. 174 which would authorize the President to provide for the establishment of reservoirs and water conservation works within the national parks and monuments.

While water development in Dinosaur may not be needed for decades, I as a Senator from Utah must consider the

welfare of Utahans yet unborn and not just the casual esthetic enjoyment of a few wilderness lovers. We in Utah also love wilderness, but we love life more, and we shall have hundreds of thousands of acres of wilderness whether this bill is passed or not, because the Creator made it so. I therefore take strong exception to S. 174, which could bar water development in Dinosaur and perhaps destroy Utah's right to 500,000 acre-feet annually under the Upper Colorado River compact approved by Congress in 1948. In the words of the Salt Lake Tribune, which has been a leading voice for sound conservation, in an editorial for June 5, 1959:

A special problem keeps most Utahans opposed to the wilderness bill. The wilderness backers are dedicated to preventing any water storage inside Dinosaur National Monument and this, if continued, will deprive Utah of its fair and guaranteed share of Yampa River water in the upper Colorado reclamation program. Solemn guarantees from the U.S. Government and its agents were made prior to and at the time the Dinosaur Monument was expanded up the Green and Yampa Rivers.

The wilderness bloc is doing everything possible to seal up this source of precious water from Utah.

In the interest of justice and fairness, so that the promises of the Federal Government may be kept to the people of Utah and Colorado, I urge the adoption of my amendment, and I ask unanimous consent that the Executive orders to which I have referred be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah? The Chair hears none, and it is so ordered.

(See exhibit 1.)

Mr. BENNETT. Madam President, the effect of my amendment would be to require affirmative action by Congress before any portion of the Dinosaur National Monument could be designated as part of the wilderness system. It does not prohibit wilderness development in the monument, but merely makes certain that the Secretary of Interior cannot bypass Congress.

EXHIBIT 1

PROCLAMATIONS, 1915

BY THE PRESIDENT OF THE UNITED STATES

A proclamation

Whereas in section 26, township 4 south, range 23 east of the Salt Lake meridian, Utah, there is located an extraordinary deposit of dinosaurian and other gigantic reptilian remains of the Juratrias period, which are of great scientific interest and value, and it appears that the public interest would be promoted by reserving these deposits as a national monument, together with as much land as may be needed for the protection thereof.

Now, therefore, I, Woodrow Wilson, President of the United States of America, by virtue of the power in me vested by section 2 of the act of Congress entitled "An Act for the Preservation of American Antiquities," approved June 8, 1906, do hereby set aside as the Dinosaur National Monument, the unsurveyed northwest quarter of the southeast quarter and the northeast quarter of the southwest quarter of section 26, township 4 south, range 23 east, Salt Lake meridian, Utah, as shown upon the diagram hereto attached and made a part of this proclamation.

While it appears that the lands embraced within this proposed reserve have heretofore been withdrawn as coal and phosphate lands, the creation of this monument will prevent the use of the lands for the purposes for which said withdrawals were made. Warning is hereby expressly given to all unauthorized persons not to appropriate, excavate, injure or destroy any of the fossil remains contained within the deposits hereby reserved and declared to be a national monument or to locate or settle upon any of the lands reserved and made a part of this monument by this proclamation.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this 4th day of October, in the year of our Lord 1915 and the independence of the United States the 140th.

WOODROW WILSON.

By the President:

ROBERT LANSING,
Secretary of State.

ENLARGING THE DINOSAUR NATIONAL MONUMENT—COLORADO AND UTAH

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A proclamation

Whereas certain public lands contiguous to the Dinosaur National Monument, established by Proclamation of October 4, 1915, have situated thereon various objects of historic and scientific interest; and

Whereas it appears that it would be in the public interest to reserve such lands as an addition to the said Dinosaur National Monument:

Now, therefore, I, Franklin D. Roosevelt, President of the United States of America, under and by virtue of the authority vested in me by section 2 of the act of June 8, 1906, chapter 3060, 34 Stat. 225 (U.S.C., title 16, sec. 431), do proclaim that, subject to all valid existing rights, the following-described lands in Colorado and Utah are hereby reserved from all forms of appropriation under the public-land laws and added to and made a part of the Dinosaur National Monument:

Colorado

Sixth principal meridian

T. 6 N., R. 99 W.,
sec. 5, W½,
secs. 6 and 7,
sec. 8, W½,
sec. 17, W½,
secs. 18 and 19,
sec. 20, W½,
sec. 29, W½,
secs. 30, 31,
sec. 32, W½; (partly unsurveyed)
T. 6 N., R. 100 W., secs. 1 to 30 and 33 to 36, inclusive;
T. 6 N., R. 101 W., secs. 1 to 30, inclusive; (partly unsurveyed)
T. 7 N., R. 101 W., secs. 25 to 36, inclusive; (partly unsurveyed)
T. 6 N., R. 102 W., secs. 1 to 30, inclusive; (partly unsurveyed)
T. 7 N., R. 102 W., secs. 5 to 8, 17 to 20, and 25 to 36, inclusive; (partly unsurveyed)
T. 8 N., R. 102 W., secs. 5 to 8, 17 to 20, and 27 to 34, inclusive; (partly unsurveyed)
T. 9 N., R. 102 W., secs. 16 to 21, and 28 to 33, inclusive; (partly unsurveyed)
T. 6 N., R. 103 W.,
secs. 1 to 14, inclusive;
secs. 23 and 24;

T. 9 N., R. 103 W., secs. 13, 24, 25 and 36;
T. 6 N., R. 104 W., secs. 1, 2, 11 and 12; (partly unsurveyed)
T. 7 N., R. 104 W., all;

Utah

Salt Lake meridian

T. 4 S., R. 23 E.,
secs. 9 to 16 and 21 to 25, inclusive;
sec. 26, N½, E½SE¼, SW¼SE¼, W½SW¼, SE¼SW¼
secs. 27, 28, and those parts of secs. 34 and 35 north of Green River; (partly unsurveyed)
T. 3 S., R. 24 E., secs. 25, 26, 35 and 36;
T. 4 S., R. 24 E., secs. 1 to 3, and 7 to 30; inclusive; (partly unsurveyed)
T. 3 S., R. 25 E.,
sec. 11, E½,
secs. 12 and 13,
sec. 14, E½,
secs. 20 to 36; inclusive; (partly unsurveyed)
T. 4 S., R. 25 E., secs. 1 to 12, inclusive; (partly unsurveyed)

aggregating 203,885 acres.

Warning is hereby expressly given to any unauthorized persons not to appropriate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

The reservation made by this proclamation supersedes as to any of the above-described lands affected thereby, the temporary withdrawal for classification and for other purposes made by Executive Order No. 5684 of August 12, 1931, and the Executive order of April 17, 1926, and the Executive order of September 8, 1933, creating Water Reserves No. 107 and No. 152.

The Director of the National Park Service, under the direction of the Secretary of the Interior, shall have the supervision, management, and control of this monument as provided in the act of Congress entitled "An act to establish a National Park Service, and for other purposes," approved August 25, 1916, 39 Stat. 535 (U.S.C., title 16, secs. 1 and 2) and acts supplementary thereto or amendatory thereof, except that this reservation shall not affect the operation of the Federal Water Power Act of June 10, 1920 (41 Stat. 1063), as amended, and the administration of the monument shall be subject to the reclamation withdrawal of October 17, 1904, for the Brown's Park Reservoir site in connection with the Green River project.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this 14th day of July, in the year of our Lord 1938, and of the independence of the United States of America the 163d.

FRANKLIN D. ROOSEVELT.

By the President:

CORDELL HULL,
The Secretary of State.

[No. 2290]

Mr. CHURCH. Madam President, on page 13 of the bill, beginning in line 3, it is expressly provided:

Nothing in this Act shall be interpreted as interfering with the purposes stated in the establishment of, or pertaining to, any park, monument, or other unit of the national park system.

That language was included in the bill in order to leave the authorizing legislation establishing any given park or national monument in status quo.

It was not the purpose of the committee to interfere with existing law as it applies to any national park or national monument. Therefore there is no need to amend the bill as the Senator from Utah asks. Nothing would be changed by the bill. Whatever may be

applicable to any monument in Utah or in any other State, as found in the authorizing legislation will continue to be applicable after the passage of the bill. Therefore the amendment is unneeded. I think it would be an unwise precedent to put in a bill of this type an amendment that would relate to one particular monument, establishing special rules for it. I hope the amendment will be rejected.

Mr. BENNETT. Madam President, will the Senator yield for a question?

Mr. CHURCH. I yield.

Mr. BENNETT. Is it not true that the bill does select particular areas in the State of Minnesota for special treatment? The amendment would not establish a precedent. It would follow a situation that exists in the bill now.

Mr. CHURCH. I do not agree with the statement of the Senator from Utah. The provisions in the bill relating to the Minnesota area merely makes clear that existing law enacted specifically by Congress on previous occasions will not be altered by the wilderness bill.

Mr. BENNETT. I am happy to understand that the bill so states.

Mr. CHURCH. The statement I have read from the bill makes it clear that existing law as it relates to the establishment of national monuments and national parks in any given State, including Utah, will not be altered by the bill. Therefore I see no need for the amendment.

Mr. BENNETT. I read the words of the bill that follow those read by the Senator from Idaho, "except that any agency administering any area within the wilderness system shall be responsible for preserving the wilderness character of the area and shall so administer such area for such other purposes as also to preserve its wilderness character."

If I am mistaken, I should be delighted to have the Senator handling the bill make a legislative history which would, for the sake of the situation in which Dinosaur National Monument is involved, show that it is very clearly the intent of Congress that the power and reclamation withdrawals in the monument to which I have referred are to be preserved. If the chairman will assure me that what I have said is in effect the intent of the bill and that such rights will be preserved, then, of course, I shall not request a vote on the amendment.

Mr. CHURCH. In connection with the language I have quoted, some question arose in the committee as to whether or not that language was sufficient to permit mining activity in four national parks in which authorizing legislation specifically permits that kind of activity. We put the inquiry to the Secretary of the Interior, Mr. Udall, and he wrote a letter to the committee setting out his interpretation of the language. The letter appears on page 13 of the report: The first two paragraphs of the letter read as follows:

DEAR CLINT: Your letter of June 13, 1961, addressed to Director Wirth of the National Park Service states that a suggestion has been made that the wilderness bill, S. 174, should be amended so as not to interfere with mining activities in park areas where mining is now permitted.

In our opinion, such an amendment is unnecessary in order to permit mining activities in those few park areas where mining is now permitted. We believe that sufficient protection is afforded to mining by the language of the bill on page 6, lines 16 through 22, as recommended by our report of February 24, 1961, to your committee. Also, section 6(a) contains further assurance that such limited mining would be continued. Inclusion of specific provision on mining might cast doubt as to the retention of other uses under the language cited.

I think that statement makes clear enough what was intended by the language I have cited; and if mining activities in those special parks is considered within the protection of that language, I think that the particular reservations to which the Senator from Utah has reference would also be included.

Mr. BENNETT. Then it is the opinion of the Senator from Idaho that if the time ever came, the proposed language would permit the development of a reservoir inside the Dinosaur National Monument.

Mr. DOUGLAS. Madam President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. DOUGLAS. Did we not settle this issue several years ago? Did not Congress decide that the beauties of Dinosaur National Monument were such that they should not be endangered by reservoirs or power developments? I thought that issue had been settled. Am I incorrect in my memory?

Mr. CHURCH. I think the Senator is correct. I shall ask the distinguished junior Senator from Utah to reply because he is very familiar with the particular areas involved.

Mr. MOSS. In the Colorado River Storage Act, as it was passed by Congress and signed into law by the President, there was a prohibition against the building of the Echo Park Dam and the Split Mountain Dam. So that is the law at the present time. To overcome that restriction that was placed in the law would require an act of Congress.

With my senior colleague from Utah I agree that there is reason to have such a dam and that we should have the water. But the fact remains that what I have stated is in the law at the present time. Therefore, whether any provision relating to the Dinosaur National Monument would go into the wilderness bill would not either enhance or degrade the present limitation. That is the situation as it exists. Therefore, I do not think it is important whether or not the features of the wilderness bill attach to any part of the Dinosaur National Monument, because we would have the same problem in either event.

Mr. BENNETT. Madam President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. BENNETT. I should like to point out to my junior colleague, my friend from Illinois, and the Senator from Idaho, who is handling the bill in the Senate, that Congress placed one barrier against the ultimate development of water in Dinosaur when it adopted the language that exists in the Upper Colorado River Act. We are about to place another barrier, so that if the time should ever come when we would find it necessary, for the life of the people of Utah to have the water in that area, which is ours by right, we would then have two barriers to overcome. First, we would have the barrier that exists in the Upper Colorado River Act. Second, the area would be blanketed into a wilderness area. Therefore, I hope that the Senate today will not erect the second barrier.

Mr. MOSS. Madam President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. MOSS. My senior colleague and I agree on the objective that the people of Utah should seek. But I think the language of this bill makes clear that a second barrier would not be erected, because the bill would preserve any right that exists at the present time. Of course, we could go into the history of the creation of the Dinosaur Monument and its extension. When it was extended by Executive order, the President specifically provided in his order that the sites reserved should remain and should not be impaired by the extension of the monument. But that is another argument. The rights are preserved in the bill. We would not give up anything in the bill because the bill provides that whatever rights exist shall continue to exist and will not be derogated by the bill. Therefore, whether the area should go into or remain outside a wilderness area, the original reservation that was made would not be changed.

Mr. DOUGLAS. Madam President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. DOUGLAS. I think a very important point underlies all these questions: To whom do the water and the public lands belong? I happen to be one who believes that the water which falls is not the property of the particular locality upon which it falls but is the property of the United States of America.

I also believe that the public lands belong to the people of the United States. Then when my friend from Utah speaks of "water that is rightfully ours"——

Mr. BENNETT. Madam President, will the Senator yield?

Mr. DOUGLAS. I believe beauty has value, too, in this world, as well as utility. I have never had the privilege of going into Dinosaur National Monument, but I have seen motion pictures of the area and of canoe trips there. I have talked with people who have made the trip. I think it is one of the great beauty spots of the Nation. Its beauty might be appreciably reduced and possibly destroyed if we carried this reservoir theory too far. There ought to be some place in the world for rushing waters and the beauties of nature. Some people may laugh, but beauty is as much a part of life as drinking water.

Mr. BENNETT. Five hundred thousand acre-feet of water of the reservoir were granted to the State of Utah under the Colorado River compact which was ratified by Congress in 1948. With this legal right to the water, Colorado has it in the most effective way in which we can acquire it.

I should like to continue to question my friend from Idaho. I am very much interested in his assumption that the language in the bill absolutely preserves whatever rights may be left after the passage of the Upper Colorado Storage Act, and does not in fact weaken or eliminate them. Is that the feeling of the Senator?

Mr. CHURCH. Originally I tried to indicate that whatever the existing law may be with reference to national parks and national monuments, and the purposes for which they were created and the uses to which they might be put, the language in the pending bill is meant to preserve the applicability of such laws. In the course of the colloquy it developed that under existing law there is a prohibition against construction of the Echo Park Dam. Therefore, I would say that the language of the pending bill affects that prohibition neither one way nor another. Existing law is left intact.

Mr. BENNETT. Is it the impression of the Senator from Idaho that the withdrawals to which I have referred within the Dinosaur National Monument are also preserved to the extent that they now have any validity?

Mr. CHURCH. To the extent that they now have any validity, as I have tried to indicate, they would continue to have validity. To the extent that they now have no validity, they would continue to have no validity.

Mr. BENNETT. The Senator from Idaho has recognized what happened when the bill for the Upper Colorado River storage was passed. We in Utah cling to the hope that some day conditions will make it possible for us to restore the full validity of those early withdrawals. It is my present understanding that the Senator from Idaho feels that nothing in the bill would affect existing rights with respect to these withdrawals, and therefore there is no need for the amendment. On the basis of that assurance, the Senator from Utah will be happy to withdraw the amendment.

Mr. DOUGLAS. In order that the RECORD may be clear on this point, does not the Senator from Idaho also say that the prohibitions which were imposed in the Upper Colorado Act still apply?

Mr. CHURCH. Yes.

Mr. METCALF. Madam President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. METCALF. Under the provisions of the bill for the incorporation of national monuments into the systems, all of that can be accomplished at the time that the question of incorporation of the monuments arises. The bill, in subsection (c) (1) provides:

> There shall be incorporated into the wilderness system, subject to the provisions of and at the time provided in this section, each portion of each park, monument, or other unit in the national park system—

And so forth. This is different from the national forest section. This will have to come under discussion at the time the President suggests that Echo Park National Monument be incorporated into the system.

Mr. MANSFIELD. Madam President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. MANSFIELD. Until that time the law as it is now in effect remains in effect. Is that correct?

Mr. METCALF. The monument is not incorporated into the system. The existing law is applicable and continues in existence without change so far as this bill is concerned.

Mr. BENNETT. Until it is——

Mr. METCALF. Until the proposal comes from the President——

Mr. BENNETT. To include it in the system.

Mr. METCALF. That is correct.

Mr. BENNETT. I appreciate the additional right. I have withdrawn my amendment. Therefore this question is no longer before us.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ALLOTT. I am very happy to hear of the great interest of the Senator from Illinois in the Dinosaur National Monument. For 3 years the Senator from Colorado has had pending a bill in the Interior Committee on which he has not been able to obtain a hearing. The bill would make a national park of the Dinosaur National Monument. I would be very happy to have the Senator from Illinois join me in my efforts.

Mr. DOUGLAS. I shall be very happy to join the Senator in his efforts unless he has some Greeks contained within the wooden horse.

Mr. ALLOTT. I do not know what the Senator means by Greeks. I assure the Senator that there are no rotten apples there. I must say that I think the Senator's remarks are uncalled for, and that they imply an impugning of the motives of the Senator from Colorado, which I resent. Let us leave it at that. Let us leave the RECORD as it is, and not rewrite it.

Madam President, I call up my amendment identified as "8–25–61—D."

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 11, lines 17 and 18, it is proposed to strike out the word "Congress" and to substitute in lieu thereof the words "Senate or the House of Representatives."

Mr. ALLOTT. I am sure the junior Senator from Idaho will accept this amendment. It was made necessary by some amendments which were made in committee. Unless the amendment is adopted, the language in the bill is inconsistent. I do not see any point in discussing it further.

Mr. CHURCH. The Senator is correct. I am happy to accept it, and I urge the Senate to adopt it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Colorado.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MILLER. Madam President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. At the end of line 2 on page 11 it is proposed to add the following words:

> *Provided further*, That where a resolution of opposition to any such recommendation has been introduced, a hearing thereon shall be held within 30 days by the committee to which such resolution has been referred.

Mr. MILLER. One of the principal points in the major amendment offered by the Senator from Colorado [Mr. ALLOTT] was that in the negative procedure which the bill provides, a resolution in opposition might be introduced without the benefit of a hearing, and that under the Reorganization Act procedure when an effort would be made to pry loose from the committee the resolution, the proponent of the motion would not have the benefit of the record of the hearing before the committee to sustain his motion. I feel quite sure that Members of the Senate would not like to have such a situation arise, and that the intent of the Senate is that if a resolution of opposition to a recommendation is presented, at least it should be given a hearing. All my amendment provides is that such opportunity shall be granted, and that the hearing shall be conducted by the committee within 30 days.

I have discussed the amendment with the distinguished Senator from Idaho [Mr. CHURCH], who is in charge of the bill, and I understand it is acceptable to him. I have no further comments to make on the amendment. If Senators have any questions, I shall be happy to yield to them and shall try to answer the questions.

Mr. CHURCH. Madam President, the Senator from Iowa is correct in his assumption that the amendment is acceptable to me. I believe the amendment improves the procedures for review which are now incorporated in the bill, by making it certain that in every case a hearing will be held, so that all the facts can be brought to light and a proper record made to support a resolution of opposition when it is brought to the floor.

I think the amendment is a good amendment and a fair amendment. It reaches one of the principal objections raised by the Senator from Colorado [Mr. ALLOTT] earlier in the debate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

Mr. GRUENING. Madam President, I call up my amendment which is at the desk and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 19, line 24, after the word "and" it is proposed to insert "at least".

On page 20, line 1, after the word "Interior" insert "and the Secretary of Agriculture"; in line 3, after the word "the", where it appears the first time, insert "appropriate"; in line 5 strike the word "Congress" and insert the word "President"; in line 6 after the word "Interior" insert "or the Secretary

of Agriculture and any recommendations made to the Congress by the President."

Mr. GRUENING. Madam President, this is in the nature of a perfecting amendment. The committee adopted an amendment providing for a Land Use Commission in States where the Federal Government owns more than 90 percent of the total land area, and provided that the recommendations of the Commission should be referred to the Secretary of the Interior. It was, of course, intended that recommendations having to do with public lands should go to the Secretary of the Interior, and reservations and withdrawals having to do with the Forest Service should go to the Secretary of Agriculture. The amendment merely provides that the appropriate Secretary shall have jurisdiction.

The other amendment is that the Commission shall have three members who shall be residents of the State concerned, and the words "at least" provide that the President may appoint three or more members.

I understand the amendment is acceptable to the Senator from Idaho, who is in charge of the bill.

Mr. CHURCH. Madam President, the amendment is acceptable. It implements what was intended by the committee at the time the amendment was first taken up.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment was agreed to.

Mr. BENNETT. Madam President, yesterday the distinguished junior Senator from Idaho [Mr. CHURCH] and I engaged in a colloquy over the problems involved in State-owned lands included in the wilderness areas. With that in mind, and with the understanding of the junior Senator from Idaho, I should like to offer my amendment:

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 12, between lines 6 and 7, it is proposed to insert the following:

STATE LANDS SURROUNDED BY WILDERNESS SYSTEM

(j) In any case where State-owned land is completely surrounded by lands incorporated into the wilderness system such State shall be given either (1) such rights as may be necessary to assure adequate access to such State-owned land by such State and its successors in interest, or (2) vacant, unappropriated, and land in the same State, not exceeding the value of the surrounded land, in exchange for the surrounded land.

Mr. CHURCH. Madam President, I am very happy that the original amendment offered by the distinguished Senator from Utah has been so modified. In its modified form, it is acceptable to me.

The RECORD should show that there are 7,599 acres of State land in six wilderness-type areas in the national forests in the West. There are 110,000 acres of State lands in the boundary waters canoe area in Minnesota.

The six western areas and the State acreage in them are as follows:

South Absoraka, Wyo., 160 acres.
Teton, Wyo., 40 acres.
Cloud Peak, Wyo., 120 acres.
Rawah, Colo., 1,218 acres.
San Juan, Colo., 1,920 acres.
Idaho Primitive Area, Idaho, 4,144 acres.

I am also told that the precise acreage of State holdings in national parks and wildlife areas is being determined, but that it is comparatively quite small. I am sorry I do not have the precise figures. However, I think the amendment is fair to the States involved. If they need rights of access, they should have them; if they want to relinquish the land, they ought to have the right to acquire other land of comparable value.

Mr. BENNETT. That is all I was hoping to accomplish.

Mr. CHURCH. I am happy to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment was agreed to.

Mr. HUMPHREY. Madam President, I am pleased to have this opportunity after prolonged debate on numerous amendments to speak in support of the wilderness bill, S. 174. I commend especially the Senator from New Mexico [Mr. ANDERSON] for his leadership in developing this legislation and advancing its consideration. I also wish to commend the Senator from Idaho [Mr. CHURCH] who has managed the bill, along with the Senator from Montana [Mr. METCALF]. I am proud to be a cosponsor of this important measure.

This is an excellent measure, one that should make sure that some parts of America may always remain unspoiled and beautiful in their own natural way, untrammeled by man and unmarred by machinery. I am happy to be among its cosponsors. It is a measure that gives expression to a policy which has long been a reality in the minds and hearts of the American people but has never yet been embodied in legislation. Enactment of this congressional charter for wilderness will long be looked upon as one with historic significance.

After the conference on Northwest wilderness held in Portland, Oreg., in April of 1956, when we were developing a wilderness bill in draft form for the first time and submitting it for criticism and suggestions—2 months before its first introduction—one of the participants in the conference wrote me a letter and said: "The proposal to establish a national wilderness preservation system, in which your role is so prominent, was presented to us and talked about in great detail at the conference banquet—its first unveiling before the general public. Then, and all the following day," said this letter, "there was something that made us sense that we were participating in an event of special significance."

Madam President, I think we feel that way here today. After a decade of earnest study on the part of organizations and individuals devoted to the public interest in preserving some of the remnants of primeval America that are still within our keeping as citizens, we undertook some 5 years ago to formulate a legislative program that would accomplish our preservation purposes without damaging any other public program or sacrificing any other existing interests. For 4 years, through two Congresses, this measure has been subjected to hearings, criticisms, revisions, and reintroductions. We now have in Senator Anderson's S. 174 the culmination of all this that has gone before.

Four years ago, when I addressed the first hearing on this measure, I had the feeling that we were approaching this undertaking just in the nick of time. I was convinced then that the chance to provide for wilderness preservation without interfering with other programs will not last very long. Four years later I feel this even more strongly and consider it fortunate that our opportunity is still as good as it is. We should indeed act promptly.

Our conservation situation becomes constantly more difficult. Those of us in the Congress who are vitally interested are indeed worried, and with good cause. We see the pressure that is coming, and, as elected representatives, we see our duty to do something before all the horses have been driven out of all our barns. There seems to be a crisis every day in the world in which we live, and the only way we are going to change this is by looking ahead and taking timely action.

This is what this wilderness bill proposes to do. Instead of waiting until the crisis has engulfed us, we can, through this legislation, make secure the preservation of these areas that do now, in effect, constitute our national wilderness system, the areas that are now, in fact, handled as wilderness, even though they serve other and consistent purposes also. Doing that now means providing security for what we already have, perpetuating the multiple-purpose programs we now have on those areas, and making sure that multiple purpose on these lands always includes wilderness preservation.

Let me hasten to emphasize that the situation which puts us under such a pressing obligation to provide wilderness protection also still presents us a remarkably rich opportunity.

It is indeed fortunate that, after the centuries we have spent in developing this continent, we do still have some large areas of wilderness. It is doubly fortunate that many of these areas are federally owned and are also included in parks, forests, or refuges, or other kinds of reservations within which the wilderness has so far been preserved in keeping with the purposes of the reservations.

Some 48 or so national parks and monuments have within them unspoiled areas large enough to be called wilderness. It is estimated that some 20 or so of the national wildlife refuges and ranges do too. Within the national forests there are some 82 areas that have been designated by the Forest Service for protection as wilderness.

Putting all these together, we have 150 or so areas of wilderness in Federal ownership that are also inside areas within which wilderness can be preserved

consistently with other purposes, as part of what might be called a multipurpose wilderness-preservation program.

At present, however, there is no law of Congress which protects these areas of wilderness as wilderness, although the Multiple Use-Sustained Yield Act passed last year does make plain that the preservation of wilderness within the national forests has congressional endorsement, and wilderness preservation is indeed an assumed purpose of our national parks.

Even in the national parks and monuments, however, the pressures for roads and nonwilderness recreational and tourist developments threaten in many places to destroy the primeval backcountry wilderness. In the national forests, the wilderness, wild, primitive, and canoe areas have been set up administratively and could be abolished or greatly reduced by a future Secretary of Agriculture. In fact, none of our Federal wilderness has the protection which Congress could give by providing for wilderness preservation as a national policy applied to a definite system of areas.

This wilderness bill will provide this needed protection, and in such a way as to be integrated without violence into the land-management policies and programs that have already been so carefully developed. This bill shows how we still can preserve in America an adequate system of wilderness areas without sacrificing any other program. But there will not long be any such areas unless we do deliberately preserve them as wilderness. So I consider this program both readily feasible and also urgent.

It appears to me to be as easy to accomplish as it is important. It will be part of an overall land-management program that encompasses also our other needs.

There need be no essential conflict. No area now devoted to any economic purpose, or to any other development program, is withdrawn from its use by this legislation. The proposed legislation, rather, is based on the understanding that we in America still have the opportunity for preserving wilderness while at the same time meeting, outside our wilderness reserves, all our needs for commodities and for developed recreation areas. It is, for example, in no sense in conflict with, or in competition with, forestry for timber and other economic products. On the contrary, foresters are among those upon whom our wilderness program is, in reality, dependent for its success.

If ever the American people come to the borders of our wilderness areas with a need for timber that cannot be met elsewhere, then our wilderness areas will be doomed.

Thus, it is to the foresters of America, and to their effective programs for sustained yield cutting on their production forests, that we must look for success in wilderness preservation.

We recognize this, and we face our program in a spirit of cooperation and with a feeling of dependence on the intelligent foresters of America for support.

Similarly, we contemplate cooperation and integration with other enterprises that may likewise be inconsistent within a wilderness and yet thoroughly consistent with the preservation of wilderness as a part of an overall program.

Not only in a general or overall sense, but also, specifically, with regard to each area involved, this proposal is one that respects the importance of other programs. It is a multiple-purpose wilderness program. Every area included in the proposed national wilderness preservation system is now serving some other purpose, or purposes, consistent with the continued protection of the area as wilderness. Under this legislation, these areas will continue to serve these purposes, and they will be administered by the same agencies that now handle them.

The central concept of this measure, as I see it, is that our present areas of wilderness can be preserved within the existing land-management pattern if the preservation purpose is made a matter of fundamental policy.

Rather than upsetting the multiple-use program of the Forest Service, for example, this legislation should help prevent the upset that would result if the wilderness areas are not protected from the uses that would destroy them as wilderness.

As to national park and monument areas to be included, the bill gives added protection as wilderness for the portions not needed for roads and accommodations, and yet sets no limitation on the portions that may be designated for such use, as needed. Park areas will continue to serve park purposes, just as forest areas will continue to serve forest purposes.

The areas in national wildlife refuges and ranges to be included will continue to serve their wildlife purposes. Some wilderness is essential for the preservation of our native species of wilderness wildlife. This measure, accordingly, will help insure our having a few areas devoted primarily to the preservation of wildlife through the protection of their wilderness environment.

Thus for every area to be included in this system, wilderness preservation will be an aspect of its management for some other concurrent purpose.

I might also emphasize this in the negative, by pointing out that the bill does not establish any special-use privilege, nor does it provide for any special users. Rather than being concerned with any special use or user, it relates instead to the character of the areas involved. Hunting, for example, although it is not mentioned in the bill, will continue to be a major recreation within many national-forest units of the system and will be prohibited in national parks. Wherever there is hunting, it will be wilderness hunting. That is the force of this measure.

Uses of all the various kinds of lands involved will continue to vary. The common concern is that wilderness conditions will persist, whatever the uses.

The first achievement of this bill, in my opinion, will be its establishment of a clear-cut national policy for preserving, for both the present and the future, some of what remains of our resource of wilderness. In line with such a policy, the Congress as I read the bill, gives sanction to the policies and programs of the Agriculture and Interior Departments under whose wise administration our great resource of wilderness has so far been preserved. And the measure provides a way whereby this policy and this sanction can take effect in a practical program.

I view as of central importance in this program the establishment of the national wilderness preservation system, to be made up of areas of primeval America that are still wilderness and in Federal ownership and capable of being kept that way without interfering with other present purposes now being served by these lands. This will not mean any transfer of areas from one agency of government to another, nor any change of jurisdiction. No new land-administering agency will be created.

The fact should be emphasized that this national wilderness preservation system will be made up of areas that are already in Federal ownership and are already within parks, forests or refuges.

Each such area will remain as at present, park, forest, or refuge, as it is now administered. It will continue to serve the multiple purposes it now serves and under the jurisdiction of the same agency that now protects it. The difference will lie on the fact that from now on the agency having jurisdiction over any areas within this system will have the sanction and encouragement of Congress and the legal responsibility for preserving the area's wilderness character. It will have the responsibility for seeing that other purposes continue to be served in such a way as to prevent damage to the wilderness.

Each such area will thus come under special protection as part of the Nation's still unspoiled heritage of the primeval.

Besides giving expression to a national policy and providing for the establishment of a wilderness preservation system, this bill also describes and provides for the proper use of the areas of wilderness it is designed to preserve.

In this connection, I should like to emphasize again that this proposal is not one for any special-use or special-privilege legislation.

The first and topic sentence of the section of this bill that relates to uses of the areas within this system—section 6—expresses a key concept in this proposal. It states firmly that—

> Nothing in this act shall be interpreted as interfering with the purposes stated in the establishment of, or pertaining to, any national park or monument or other unit of the national park system, or any forest, wildlife refuge, game range, or other area involved, except that any agency administering any area within the wilderness system shall be responsible for preserving the wilderness character of the area and shall so administer such area for such other purposes as also to preserve its wilderness character.

Under this proposal, for example, the parts of the national forests involved would continue under the same kind of

administration they now have. Grazing permits, for instance, could be continued as at present. The basic multiple purposes of the national forests would be maintained.

National parks, national wildlife refuges, and any other areas would also, as already pointed out, continue to serve their own distinctive purposes.

No use privileges of any kind will be created by this proposed law. The only added responsibility of each administering agency will be to see that the areas in the system under its jurisdiction remain wilderness—as they are now. I reiterate, this bill deals only with preserving wilderness as such in connection with various other land uses and does not create any special privilege, or provide for any special users.

Our civilization moves fast. Our population pressures are growing. The time when we still have the opportunity to provide for the preservation of wilderness without having to interfere with other programs will not be with us long.

This is a far-reaching, carefully thought out proposal. It deserves and requires the consideration of all who are concerned with the values that we place on our wilderness. While certain amendments have been adopted, they have not seriously changed or weakened the measure.

At the 1954 annual meeting of the Society of American Foresters, Dr. James P. Gilligan, then a member of the forestry department of the Oklahoma Agricultural and Mechanical College, speaking on wilderness preservation, commented as follows:

> Wilderness supporters have been chiefly defense minded, rushing to prevent developments that may have been carefully drawn and justified. The majority of areas now called wilderness exist because recreational or industrial development have not, as yet, been economically feasible. If there were well-defined purposes and plans for a national wilderness system which could generate common support, the wilderness movement might well be irrepressible. As it is, the disagreement among wilderness proponents is a highly important deterrent to wilderness preservation in this country.

Here is a bill which I trust can generate common support and firmly establish a sound wilderness preservation policy and program. It is good legislation. It is needed today and for the future.

Madam President, I ask unanimous consent to have printed at this point in the RECORD the text of the several amendments offered and a statement with respect to each.

There being no objection, the amendments and statements were ordered to be printed in the RECORD, as follows:

On page 17, strike out all of lines 6 through 11 and insert in lieu thereof the following:

"(8) Nothing in this Act shall be construed to prevent, within national forest and public domain areas included in the wilderness system, any activity, including prospecting, for the purpose of gathering information about mineral or water resources or to prevent the completely subsurface use of such areas, if such activity or subsurface use is carried on, in a manner which is not incompatible with the preservation of the wilderness environment."

COMMENTS ON S. 174 AMENDMENTS—NO. 1

Amendment "8–18–61—C" to S. 174 by Senator ALLOTT and others I believe to be undesirable. It would amend section 6(c)(8) by permitting subsurface use of wilderness areas and fact-finding activity in wilderness areas regarding water resources. Section 6(c)(8) was itself an amendment added in committee to permit prospecting and other fact-finding activity regarding mineral resources. Every such concession is a weakening of the wilderness preservation policy and program to be established by S. 174. The vague permission proposed in this amendment for subsurface use of wilderness areas, coupled with its extension of investigations, would weaken a preservation program which includes only a small portion of our land and which already has been modified even for this small portion by many special provisions.

On page 10, line 12, strike out all through line 7 on page 11 and insert in lieu thereof the following:

(f) Any recommendation of the President made in accordance with the provisions of this section shall take effect upon the day following the adjournment sine die of the first complete session of the Congress following the date or dates on which such recommendation was received by the United States Senate and the House of Representatives; but only if prior to such adjournment Congress approves a concurrent resolution declaring itself in favor of such recommendation: *Provided*, That, in the case of a recommendation covering two or more separate areas, such resolution may be limited to one or more of the areas covered or parts thereof.

COMMENTS ON S. 174 AMENDMENTS—NO. 2

Amendment "8–18–16—D" to S. 174 by Mr. ALLOTT and others is extremely undesirable as seriously obstructive to the program to be established by this bill. It was voted down by the Committee on Interior and Insular Affairs. It has been earnestly opposed by the committee chairman, Senator CLINTON P. ANDERSON, and by other leading proponents of wilderness preservation. It has been strongly urged on Senators by commercial interests who have long opposed the wilderness bill.

This amendment would require a concurrent resolution (or act of Congress) as the final step in approving, in the future, each of more than a hundred separate tracts that this act itself (S. 174) authorizes for inclusion in the wilderness system.

S. 174 provides in subsections 3(b), 3(c), and 3(d) for the areas that may be included in the wilderness system. Forty-four national forest areas are immediately included. Thirty-nine other national forest areas (now classed as "primitive") are included but made subject to further review in a 10-year review program. Areas in the National Park System that are 5,000 acres in size or larger and without roads are similarly included and similarly subject to review in a 10-year review program. So also are areas in wildlife refuges and ranges recommended by the Secretary of the Interior for inclusion. These areas authorized for preservation as wilderness are to be included in the wilderness system following review, public notice, public hearing if demanded, recommendation by the President, and scrutiny by Congress.

Upon recommendation by the President, these areas will be incorporated finally in the wilderness system if Congress does not reject the President's recommendations. Either a Senate or a House of Representatives resolution will reject a recommendation. Under provisions adopted from the Reorganization Act, such a resolution of rejection will receive prompt attention.

Committee on Interior and Insular Affairs chairman, Senator CLINTON P. ANDERSON, of New Mexico, predicted in his address of August 24, 1961, to the Senate on the wilderness bill that "there is going to be little objection to the inclusion of a great majority of these existing wild areas in the wilderness preservation system" following the review procedure and Presidential recommendation.

"So," Senator ANDERSON pointed out, "by the procedures of S. 174, a vast workload will be avoided, without sacrificing any of the power of either House of Congress to work its will."

These procedures with Presidential recommendations becoming effective if not disapproved by the Senate or House of Representatives are limited to the areas that are specifically dealt with in subsections 3(b), 3(c), or 3(d) of S. 174. As the committee report points out on page 12, second paragraph, "beyond those areas, no Federal lands can become a unit of the wilderness system except by the enactment of a law to that effect." This is provided for in subsection 3(h) of the bill, S. 174.

Amendment "8–18–16—D" by Senator ALLOTT and others would require a new act not only for the areas beyond those that Congress provides for in S. 174 but also for those which are provided for in S. 174. This amendment would substitute for the final step in the S. 174 procedure the requirement of a concurrent resolution. Such a concurrent resolution approving a Presidential recommendation would be fully equivalent to an act of Congress. This amendment thus proposes for each area not only the authorization given in S. 174 but also a later further act of Congress.

"There are about 100 prospective wilderness tracts to be processed," Senator ANDERSON told the Senate on August 24. Citing Representative CLARENCE CANNON'S statement that there are 27 steps involved in passing a bill through Congress, Senator ANDERSON estimated "it would involve at least 2,700 separate actions here in Congress to pass a bill on each and every one of the prospective wilderness tracts."

The procedure of S. 174 insures prompt action on a resolution to reject a recommendation of the President regarding a wilderness unit. The concurrent resolution that Senator ALLOTT'S amendment "8–18–16—D" would require would be subject to all the delays of congressional legislation. Its effect would be obstructive, and the support it has received suggests that its advocates would be pleased by such an effect.

Its defeat in committee should be sustained by rejection on the floor of the Senate.

On page 3, line 19, strike out all through line 10 on page 6 and insert in lieu thereof the following:

"(b)(1) The wilderness system shall include all areas within the national forests classified on the effective date of this Act by the Secretary of Agriculture or the Chief of the Forest Service as wilderness, wild, or canoe: *Provided*, That the areas within the national forests classified as primitive may be included in the wilderness system as hereinafter provided. Following enactment of this Act, the Secretary of Agriculture shall, within ten years, review, in accordance with paragraph C, section 251.20, of the Code of Federal Regulations, title 36, effective January 1, 1959, the suitability of each primitive area in the national forests for preservation as wilderness and shall report his findings to the President. Before the convening of Congress each year, the President shall advise the United States Senate and House of Representatives of his recommendations with respect to the inclusion within the wilderness system of each primitive area on which review has been completed in the preceding year, together

with maps and definition of boundaries: *Provided*, That the President may as a part of his recommendations, alter the boundaries existing on the date of this Act for any primitive area to be included in the wilderness system, recommending the exclusion and return to national forest land status of any portions not predominantly of wilderness value, or recommending the addition of any contiguous area of national forest lands predominantly of wilderness value: *Provided further*, That following such exclusions and additions any primitive area recommended to be included in the wilderness system shall not exceed the area classified as primitive on the date of this Act. The recommendation of the President with respect to the inclusion in the wilderness system of a primitive area, or portions thereof, shall became effective subject to the provisions of subsection (f) of this section: *Provided*, That if Congress fails to approve a recommendation of the President and no revised recommendation is made to Congress with respect to that primitive area within two years, the land shall cease to be a primitive area and shall be administered as other national forest lands: *And provided further*, That primitive areas with respect to which recommendations are submitted to Congress on the eighth, ninth, and tenth years of the review period herein provided shall retain their status as primitive areas until the expiration, in respect to each area, of a full session of Congress, two years for resubmission of revised recommendations to Congress by the President, and, if so resubmitted, until the expiration of a full session of Congress thereafter. Recommendations on all primitive areas not previously submitted to the Congress shall be made during the tenth year of the review period. Any primitive area, or portion thereof, on which a recommendation for inclusion in the wilderness system has not become effective within fourteen years following the enactment of this Act shall cease to be a primitive area and shall be administered as other national forest land.

COMMENTS ON S. 174 AMENDMENTS—NO. 3

Amendment "8–18–61—E" to S. 174 by Senator ALLOTT and others is extremely undesirable. It leaves the 39 national forest areas of wilderness now classified as "primitive" out of the wilderness system. It thus removes from these 7,890,973 acres of national forest land the wilderness protection that S. 174 would give them at once, and during the 10-year review program provided for their study and final delineation. To be protected as wilderness any of these areas would have to be added to the wilderness system during the 10-year review period.

All of the sponsors of this amendment are likewise sponsors of the amendment "8–18–61—D" which would require a concurrent resolution of Congress as the final step in the procedure for including a primitive area in the wilderness system. Thus these two amendments would greatly impede the establishment of these areas of wilderness in the system for their protection under S. 174.

This amendment "8–18–61—E" as printed seems extensive and carefully constructed. Actually it merely omits certain important words and phrases from S. 174 as reported to the Senate. These omissions should not be obscured.

On page 12, between lines 6 and 7, insert a new subsection as follows:

ADDITIONAL REQUIREMENTS WITH RESPECT TO RECOMMENDATIONS

(l)(1) The Secretary of Agriculture and the Secretary of the Interior shall each, in submitting any recommendations to the President with respect to any area's retention in or incorporation into the wilderness system, include with such recommendations the independent views of the Governor of the State in which such area is located with respect to the Secretary's recommendations generally, unless no reply is received from such Governor within ninety days after such recommendations are submitted to him and his views thereon requested.

(2) Views submitted to the President under the provisions of (1) of this subsection with respect to any area shall be included with any recommendations to Congress with respect to such area.

COMMENTS ON S. 174 AMENDMENTS—NO. 4

Amendment "8–18–61—F" to S. 174 by Senator ALLOTT and others is undesirable. It would delay and interfere with the establishment of the wilderness preservation system by requiring the Secretary of the Interior and the Secretary of Agriculture to seek the views of the Governors of the States regarding the areas of wilderness authorized for preservation by subsections 3(b), 3(c), and 3(d) of S. 174. All of the areas so authorized are already in Federal ownership and are already being protected as wilderness in the national park system, in wildlife refuges and ranges, and in certain portions of national forests classified as wilderness, wild, primitive, or canoe. There is thus no need for seeking the views of State Governors. These views, of course, can be expressed and will thereupon receive due attention by the President and the Congress. However, the amendment would do no harm and might encourage greater State participation in wilderness area preservation and effective conservation.

On page 9, line 2, beginning with ", and" strike out all to the period in line 8.

COMMENTS ON S. 174 AMENDMENTS—NO. 6

Amendment "8–23–61–A" to S. 174 by Mr. Moss is acceptable. It makes the provisions relating to wildlife refuges and ranges conform to the 10-year provisions as to other parts of the wilderness system. It does this by removing from S. 174 a provision permitting the incorporation in the wilderness system of portions of refuges or ranges that may be newly established in the tenth to fifteenth years following enactment of the wilderness bill. It is not, of course, possible now to know what areas of land may so be added to the refuge system during these years. This amendment thus removes from the authorizations of S. 174 the only areas that are not specifically provided for in this bill. Such areas as might be covered in phraseology removed by this amendment would (with the adoption of this amendment) be subject to an act of Congress as provided in section 3(h).

On page 14, line 24, strike out the word "President" and substitute in lieu thereof the words "appropriate Secretary".

COMMENTS ON S. 174 AMENDMENTS—NO. 7

Amendment "8–25–61–B" to S. 174 by Mr. ALLOTT is undesirable. It would permit a Secretary of Agriculture or Secretary of the Interior to authorize nonconforming uses of wilderness areas that S. 174 now makes a responsibility of the President. The apparent purpose of the amendment is to make such authorizations easier. The purpose of the provision in S. 174 is to provide for nonconforming uses of wilderness areas if these truly are in the public interest but to place such a decision at the highest level. The present language says that "the President may, within a specific area and in accordance with such regulations as he may deem desirable, authorize prospecting (including exploration for gas and oil), mining (including the production of oil and gas), and the establishment and maintenance of reservoirs, water-conservation works, transmission lines, and other facilities needed in the public interest, including the road construction and maintenance essential to development and use thereof, upon his determination that such use or uses in the specific area will better serve the interests of the United States and the people thereof than will its denial." Such a decision should be at the highest level.

On page 20, after line 8, insert the following:

"SEC. 10. Nothing in this Act shall be construed as superseding, modifying, repealing, or otherwise affecting the provisions of the Federal Power Act (16 U.S.C. 792–825r)."

COMMENTS ON S. 174 AMENDMENTS—NO. 8

Amendment "8-26-61—C" to S. 174 by Senator ALLOTT is undesirable. It tends to remove from the wilderness preservation system such protection against impoundments and other installations as is provided by S. 174. The bill in section 6(c)(2)(A) does provide for "reservoirs, water conservation works, transmission lines, and other facilities needed in the public interest" when these may be determined by the President to "better serve the United States and the people thereof" than would their denial. I regret that this amendment was adopted.

On page 11, lines 17 and 18, strike out the word "Congress" and substitute in lieu thereof the words "Senate or the House of Representatives."

COMMENTS ON S. 174 AMENDMENTS—NO. 9

Amendment "8–25–61–D" to S. 174 by Mr. ALLOTT is a clarifying or correcting amendment making the language to which it relates conform to amended language elsewhere in the bill. It is thus helpful and acceptable.

On page 20, after line 8, add the following:

SEC. 10. At the opening of each session of Congress, the Secretaries of Agriculture and Interior shall jointly report to the President for transmission to Congress on the status of the wilderness system, including a list and descriptions of the areas in the system, regulations in effect, and other pertinent information, together with any recommendations they may care to make.

COMMENTS ON S. 174 AMENDMENTS—NO. 10

Amendment "8–28–61–A" to S. 174 by Mr. Moss is helpful and desirable. It requires the Secretary of Agriculture and the Secretary of the Interior to prepare a joint annual report to the President on the status of the wilderness system for transmission to Congress. The amendment actually merely restores to the bill a sentence that apparently was inadvertently dropped when the rest of the section on "Records and Reports" (sec. 7) was made more strict.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment, to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. ALLOTT. Madam President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Colorado.

Mr. MANSFIELD. Madam President, will the Senator from Colorado yield?

Mr. ALLOTT. I yield, provided I do not lose the floor.

Mr. MANSFIELD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Colorado has the floor.

Mr. ALLOTT. Madam President, before the vote on the passage of the bill, I wish to restate in a concise way my opposition, which is, I believe, adequately set forth in the RECORD. I wish to make it perfectly clear why I am now opposed to the bill.

I have repeatedly stated that I would support a wilderness bill which would give to Congress adequate provision to review the additional acres, which can be as much as 65 million acres. If the review had been left in Congress affirmatively, I would support the bill. In the recent colloquy on the floor, it was brought out in very short order that Congress would have no right except to accept the recommendations or reject them. I regard this as a direct abrogation of congressional responsibility, and I would regard it as an abrogation of my responsibility as a Member of the Senate if I voted for the bill under those conditions. Therefore, since the bill does not leave Congress with the authority it should have, since it does not leave the States which are primarily involved with the protection they ought to have for the inclusion of the millions of new acres, I shall vote against the bill for the many reasons I have previously discussed during the debate on the bill.

Mr. GRUENING. Madam President, I intend to vote for the bill. I ask unanimous consent that my individual views, as presented to the Committee on Interior and Insular Affairs, be printed at this point in the RECORD.

There being no objection, the excerpt from the report (No. 635) was ordered to be printed in the RECORD, as follows:

INDIVIDUAL VIEWS OF SENATOR ERNEST GRUENING ON S. 174, THE WILDERNESS BILL

I am unqualifiedly in favor of establishing a National Wilderness Preservation System. I think it essential that we act to set aside and preserve, in their primeval state, some of the Nation's superb natural areas. The definition of a wilderness area, as set forth in Senate bill 174, which was ordered reported favorably by the Senate Interior and Insular Affairs Committee on July 13, 1961, is one where the earth and its community of life are untraveled by man; where man himself is a visitor who does not remain.

Given our exploding population and the foreseeable disappearance of much land now virgin, it is essential that we move in the direction provided by S. 174.

The issue has been before Congress for a number of years. A massive volume, totaling 1,995 closely printed pages, representing hearings before the Senate Committee on Interior and Insular Affairs during the 85th and 86th Congresses, and indeed only a part of a longer record of hearings, discussions, reprints, resolutions, and addresses, testifies to the amount of interest in and intensive work that has gone into the preparation of the bill which finally has been approved by the Senate committee and which, I have no doubt, will be by the Senate.

Of course, it would be impossible, with the various conflicting interests involved, to secure the draft of a bill which would be wholly satisfactory to everyone, indeed to anyone. Some of the more extreme, and, I regret to say, even fanatical, of my fellow conservationists would like to keep all of Alaska a wilderness—even to denying the accessibility upon which the enjoyment of wilderness is predicated. They oppose the harnessing of rivers and lakes for hydro. They are more concerned for a nesting duck and an anadromous salmon than for the economic welfare of a multitude of people. Their error, as I see it, is that they do not believe, as I do, that we conserve natural resources, whether wildlife, timber, water courses, soil and scenic beauty, not for themselves but for the future enjoyment of human beings. We preserve moose not for the sake of the moose, but so that coming generations can ever see moose, photograph moose, hunt moose—in undiminished supply. A wilderness that few, if any, can ever get to and hence enjoy, may furnish a snobbish and selfish pleasure to the few exceptional ones who can manage, at great expense not available to their fellow citizens, to get there, but it is not in keeping with what I deem the premise of our national park system, of our national forest wonderlands, and, indeed, of the proposed wilderness preservation system. Kings enjoyed such solitary monopolistic privileges in the Old World, in the days of feudalism, but they are unsuited to a contemporary and future democracy.

There is, on the other hand, the fear—a legitimate fear—on the part of various interested groups that natural resources which may well be needed by the Nation—resources of timber, waterpower, minerals, oil—may be locked up in such a way that when the Nation needs them, they may not be available. However, an escape clause in the bill provides that in that situation, the President of the United States may move to release such resources.

The bill provides, in general, that within three vast categories of federally owned lands, wilderness areas may be established. They are in the national forests, the national parks, and in the national wildlife refuges and game ranges. The bill authorizes the Secretary of Agriculture to withdraw areas of the national forests forever for wilderness purposes, and provides that the Secretary of the Interior may do so within the national parks and national wildlife refuges.

This is subject to the limitation that the establishment of such wilderness areas could be rejected by passage of a resolution of disapproval of either House of Congress. This, it should be understood, is a very dubious protection, since it might be extremely difficult to mobilize either House of Congress to reject a withdrawal that in only one State was considered injudicious. Needless to say, I would much prefer affirmative action by Congress in all such cases and throughout the legislation.

My special concern about this bill is what may happen in Alaska. There, in an area one-fifth as large as the older 48 States, conditions pertinent to this legislation are totally different from those which exist in the 48 older States. Alaska is a vast area of sensational scenic beauty, of the loftiest mountains in North America, of a million lakes, of virgin forest, of high waterfalls, of untamed rushing rivers and streams, the greater part of it still wilderness, and there is much in it that is wonderful and entitled to permanent wilderness status. The problem that Alaska confronts is that this 49th State is merely in its infancy, with a population of only 225,000 people, or 1 to approximately every 3 square miles, as compared with a density of population for the United States of 50.5 for every square mile.

Despite the present sparsity of population, the withdrawals already made in Alaska eligible for wilderness areas are tremendous and contrast not only with those made in any other State, but indeed with the entire Union. For example, in Alaska a total of 18,974,731 acres—virtually 19 million acres—have been withdrawn for wildlife refuges and game ranges. This contrasts with the total of 10,194,040 for the other 49 States. In other words, Alaska alone has been subject to wildlife and game range withdrawals almost double those in the entire rest of the Nation—an area five times larger.

Alaska's national forest area—with the Tongass and Chugach National Forests—is greater than that of any other State in the Nation. It totals 20,742,224 acres (Idaho comes second, California third, and Montana fourth).

ALASKA'S NATIONAL PARKS

Alaska has three national parks or monuments, the largest of which, Katmai, with 2,697,590 acres, is larger than the largest park in the national park system—Yellowstone with 2,213,207 acres. Katmai National Monument, with 2,697,590 acres, Glacier Bay National Monument, with 2,274,595 acres (also larger than Yellowstone), and Mount McKinley National Park, with 1,939,334 acres, total 6,911,519 acres, exceeding by more than 50 percent the next most generously endowed national park State, California, which has 4,050,346 acres in national parks and monuments, and representing for Alaska a total which is approximately two-fifths of the total national park and monument areas of the rest of the country.

Let me say, at this point, that I consider these three Alaska parks and monuments highly desirable, and that I rejoice in their creation. Each of them contains natural phenomena and other qualities which are unique and fully deserve their status in the national park system. However, it should be pointed out that these have suffered a lack of attention and lack of even minimal development which is peculiarly pertinent to the provisions of the wilderness bill. This lack is part and parcel of the neglect and discrimination which Alaska suffered during its 91 years as a territory. The wilderness bill has a distinct bearing on the question of whether this will be remedied.

The wilderness bill provides that in the national park system, the Secretary of the Interior may set aside any continuous area of 5,000 acres or more without roads. There are no roads whatever in the Katmai National Monument. The Federal Government has not built even a trail there. The absurdity of this neglect lies in the fact that the Katmai National Monument was created as a result of the cataclysmic volcanic explosion in 1912 which sent ash around the world's atmosphere and in Alaska created the Valley of 10,000 Smokes and much else. Yet today, visitors to Katmai cannot reach this valley either on a motor vehicle or boat, and unless they are prepared to camp out for weeks and carry their own subsistence, cannot walk into these areas. They are, in effect, inaccessible to the park public. Visitors to Katmai—which is being ably developed, in the matter of accommodations, by one of Alaska's local airlines—must get their satisfaction and recreation from fishing, which is indeed, excellent, but leaves totally unutilized and unenjoyed the original values for which this mammoth monument was set aside. Yet, if some future Secretary of the Interior 10 years hence saw fit to blanket this whole area into wilderness, reasonable access to tourists and visitors to the volcanic phenomena for which the park was created would be permanently denied. (Unless, as stated before, it could be possible to mobilize one House of Congress to reject such action.)

The situation is only a little better in Mount McKinley Park. Set off arbitrarily without adequate surveying in 1917 with straight boundary lines running east and west and north and south, this park is

roughly a rectangle 200 miles long from east to west and 50 miles from north to south. The only road extends half the park's length along its northern edge. It was never planned as a park road, but before the park was created, was a trail leading into the Kantishna mining district, which lies just north of the central portion of the northern park boundary. From that trail, the road was gradually developed. It completely misses some of the truly finest areas in the park. Visitors never see them.

Mount McKinley, North America's loftiest summit, 20,300 feet, and the raison d'être of the park, is not visible from the only entrance to the park on the Alaska Railway. A brief glimpse of its summit is obtained as one drives along the road at about the 15-mile mark. It is then again invisible until one gets to the sixties and continues to be visible until the end of the road 90 miles from the entrance. During those last 30 miles, the road continues at a distance of about 25 miles from the mountain.

If the visitor wishes to approach this noblest of mountains, he has to ford the McKinley River, a torrential glacier stream passable by the hardy at various times of low water (as I have), but frequently dangerous and impassable when the water is high and the current swift and, therefore, really not possible for tourists.

Under the provisions of S. 174, a future Secretary of the Interior could include practically the entire area of the park as wilderness and prevent even a footbridge from crossing the McKinley River, thus denying, to all intents and purposes, even the pedestrian access to Mount McKinley.

Mount Foraker, 17,340 feet, also located in the park—the third highest mountain in Alaska, and far higher than any peak in the lower 48 States—is at no time visible from the existing highway. For the visitors, it might as well not exist. To go to a point where it can be even seen, numerous unbridged and unfordable rivers would have to be crossed—an assignment impossible for the ordinary tourist.

Glacier Bay National Monument is in a different category but will require marine transportation facilities if it is to be seen. To date, there are none except a small boat used by the Park Service officials. If it becomes wilderness, motorboats will be forbidden and its galaxy of glaciers largely invisible.

So much for Alaska's national parks.

ALASKA'S GAME RANGES

In 1940, Secretary of the Interior Harold Ickes withdrew 2 million acres on the Kenai Peninsula and created the Kenai National Moose Range. No hearings were held on this withdrawal, and no information was given to the public about it. I was Governor of Alaska at the time, and was not even notified concerning this action until it had been consummated. It so happened that a former Governor of Alaska—George A. Parks—who had served as the Territory's chief executive from 1924 to 1932, was the cadastral engineer of the Federal Land Office, and thus the matter came to his attention. He registered an emphatic protest, urging that at least hearings be held, but this was ignored.

This great withdrawal for moose—by the latest count 500 acres per moose—aroused little opposition at the time, first because few people knew about it and because the area was then roadless and inaccessible. Now, two important highways connect Anchorage with Seward, and Anchorage with the rapidly growing communities on the thin fringe of land along the Kenai Peninsula's west coast along the shore of Cook Inlet, where human habitation is permitted: Kenai, Soldotna, Kasilof, Cohoe, Ninilchik, Clam Gulch, Anchor Point, and Homer.

The purpose of this withdrawal was to make it a moose range, on the assumption which appeared valid at the time, that it was the habitat of the largest species of moose. It is not, of course, a refuge, and moose are hunted there, as elsewhere in Alaska, under existing game laws. However, the area, with an exception to be noted subsequently, is withdrawn from any other form of development. It is not possible for a lodge to be built on one of the two great and beautiful lakes in this area, Lake Tustumena and Skilak Lake, nor is it permitted to build a dock on their shores so that needed larger boats, safer than canoes, can be utilized there.

One tragic consequence of that restriction was that two employees of the Fish and Wildlife Service lost their lives when a canoe they were paddling was upset by the turbulent waves in these very considerable, at times windswept, bodies of water, which cannot safely be navigated by such frail craft. It has been forbidden for anyone to bring into this vast area of mountains, lakes, and rivers anything bigger than a sleeping bag or a pup tent. Not even a shelter cabin can be constructed. In fact, except for the Anchorage-Homer Highway through it and but for an exception about to be noted, it is a wilderness area now.

However, the exception took place in 1957, when it became known that a vast oilfield underlay the Kenai National Moose Range, and a group of Alaskan citizens interested in developing this resource took what steps they could to promote oil exploration and drilling in this area. This was violently opposed by the Fish and Wildlife Service, strongly supported by a group of professional conservationists who prophesied death and destruction of the moose if oil exploration or drilling were permitted. The battlelines were closely drawn, and I was a volunteer in the combat. Fortunately, reason prevailed, and oil drilling was permitted, so that 4 years later Alaska now has 30 producing wells, all in the Kenai. In consequence, Alaska's economy, suffering the grave diminution of its formerly two major industries, fisheries and mining—the former because of salmon depletion, the latter because of the gold price—has been given an essential lift without which the State probably would have had great difficulty in satisfying the basic public needs. Meanwhile, the moose have flourished, frequenting the roads that have been built by the oil companies and suffering no damage.

However, one interesting aspect of this Kenai National Moose Range deserves mention. In 1945, a devastating forest fire destroyed some 250,000 acres of standing virgin timber in this range. Most conservationists, including myself, would naturally have considered this a disaster; but not so the guardians of the range—the Fish and Wildlife Service. They pointed out that as a result of the destruction of these 250,000 acres of virgin spruce, second growth of birch, aspen, and willow would follow, which was excellent browse for the moose. Indeed, this unfortunate so-called act of God, this tremendous conflagration, has now been followed by systematic acts of man, by which every year several hundred acres of standing virgin conifers are deliberately burned in order to make browse for the moose.

A paradoxical and relevant fact, however, is that since the establishment of the Kenai National Moose Range, in 1940, the moose have spread all over Alaska. They are far more numerous outside the range. They have penetrated the Arctic. The largest specimens have actually been found recently across Cook Inlet, on the Alaska Peninsula. Moose have invaded the Matanuska Valley, where they were nonexistent before the colonization and farming experiment launched there in 1935, under the administration of President Roosevelt. In fact, they constitute a serious problem for the farmers, on whose garden drops they enjoy feeding.

This is pointed out to indicate—among other things—that the habits of wildlife change, that game migrations take place, and that irrevocable commitments sometimes produce immutable and possibly undesirable results.

My reservations as to the wilderness bill lay and lie in the fact that the kind of arbitrary actions taken by Secretary Ickes in 1940, in disregard of any attempt to ascertain public opinion or consult anyone in Alaska, and by Secretary Seaton in December of 1960, after his party had been retired by popular vote, in withdrawing, despite adverse action by the Congress, 9 million acres of arctic wildlife range, may be repeated by their unknown successors 10 years hence under the provisions of this bill.

I am not alarmed about any similar action by a future Secretary of Agriculture. That is, I believe, without danger to Alaska. The Forest Service has consistently and wisely adopted a policy of multiple use. Moreover, in the nearly 16 million acres of Tongas National Forest and 4,800,000 acres of Chugach National Forest, are tremendous scenic areas above and below the timberline—jeweled lakes nestling under towering peaks, high meadows riotous with alpine flora, sensatorial icecaps, deep fiords, at whose farther end tidal glaciers discharge their crystal-blue cargoes into the clear salt waters, oases of majestic solitude ideal for wilderness purposes, which can safely be established without fear of interfering with economic pursuits, especially the basic timber resource, and safeguarded in a national emergency by the Presidential power to make exception in case some valuable and needed resource were ascertained to be there. These desirable and natural wilderness areas in our Alaska national forests alone total millions of acres.

The committee, in response to my presentation of the different conditions in Alaska, however, kindly agreed to an amendment, modified somewhat from the original form in which I introduced it, which offers, I believe, a reasonable safeguard to the fear I have that distant men, without adequate knowledge of Alaska's needs, will act in such a way as both to limit the possibilities for enjoyment of our parks, wildlife refuges, and game ranges, and also interfere needlessly with required economic development. The amendment reads as follows:

"LAND USE COMMISSIONS

"SEC. 9. With respect to any State having more than 90 percent of its total land area owned by the Federal Government on January 1, 1961, there shall be established for each such State a Presidential Land Use Commission (hereinafter called the Commission). The Commission shall be composed of five persons appointed by the President, not more than three of whom shall be members of the same political party, and three of whom shall be residents of the State concerned. The Commission shall advise and consult with the Secretary of the Interior on the current utilization of federally owned land in such State and shall make recommendations to the Secretary as to how the federally owned land can best be utilized, developed, protected, and preserved. Any recommendations made to the Congress by the Secretary of the Interior pursuant to the provisions of this Act shall be accompanied by the recommendations and reports made with respect thereto by the Commission."

With the inclusion of this amendment in any law finally enacted, I would be willing to risk passage of this bill because I think it is clear that three residents of Alaska,

constituting a majority of the Commission of five, would bring a rational and intelligent understanding to the task devolving upon the Secretary of the Interior.

The committee also agreed to an amendment, at my request, that any additions to the wilderness system not specifically provided for under the provisions of the act could be made only after specific affirmative authorization by law for such addition—that is, by an act of Congress.

Existing rights in any area which is to be declared wilderness are safeguarded. That protects the present provisions for mining in Mount McKinley National Park and in Glacier Bay National Monument. An amendment which I proposed, to spell out this protection more specifically, was withdrawn on the chairman's and the Secretary of the Interior's assurance that the language in section 6(b) provided that safeguard. Likewise, I supported an amendment by Senator CHURCH, which reads:

"Nothing in this Act shall be construed to prevent, within national forest and public domain areas included in the wilderness system, any activity, including prospecting, for the purpose of gathering information about mineral resources which is not incompatible with the preservation of the wilderness environment."

Which was adopted. That makes ascertainable the existence of potentially highly valuable subsoil resources even though an area has been included in the wilderness system, and would make possible the utilization of such resources in case of need under the Presidential power provided in the bill.

I believe that the act should be further amended by a provision that any withdrawals, whether in parks, monuments, wildlife refuges and game ranges in excess of 100,000 acres, be subject to an affirmative act of the Congress—in other words, a special bill for each such area. I presented this amendment in the committee and it was defeated 9 to 7. I intend to offer it again on the floor. One hundred thousand acres is a very large area, and unless Congress wishes, in this instance as it has in so many others, to abdicate its powers and delegate them to unseen and unknown men in a vague future, I believe this amendment should be enacted and that amount of control retained by the people's elected representatives.

It is my belief that when the program is finally completed, Alaska should, can, and will have wilderness areas far in excess of those of any other State—areas of superb attractiveness to residents of Alaska and to visitors from the other States and from abroad—and thereby laying an enduring foundation for Alaska as a vacationland and making possible a tourist industry that can become world famous. And these areas, if knowledgeably established after survey and study, and when the pattern of population distribution is recognizable in Alaska as in the older States, can better carry out the dual objectives of Alaska's destiny as I see them, namely: (1) to safeguard the priceless heritage of its wilderness and (2) to foster a sound economic development, utilizing Alaska's resources for the establishment of a stable, diversified, expanding economy, able to support whatever growing population the State acquires, and to support it in conformity with the high standards, cultural, social, and material, to which Americans have a right to aspire.

Mr. BYRD of West Virginia. Madam President, I endorse the proposed legislation, and commend the distinguished Senator from New Mexico [Mr. ANDERSON] and his colleagues for bringing it to us in such sound and reasonable form. For some time I have been interested in this proposal. There are many worthy and interesting aspects of it that might be discussed, and, I trust, will be. What I should like to do, briefly, is to comment on the importance of congressional attention to our wilderness preservation opportunity, and then to defend the way in which this wilderness bill (S. 174) deals with the matter.

WHY CONGRESS SHOULD ACT

When wilderness legislation was first proposed as a concern of Congress there were some who said that this should not be a matter for congressional action. There are some who still say so.

There have been statements expressed that in enacting such legislation Congress would be usurping prerogatives of the Forest Service or the Park Service.

Others have said that in such a matter Congress would be concerning itself with details of land management that might better be left to the agency handling the land.

Some comment on this matter may be helpful not only in meeting arguments against congressional action but also in clarifying our purposes and intentions in taking such action.

First of all there can be no question that the use of Federal lands to preserve wilderness is a concern of Congress. The Constitution in article 4, section 3 says:

The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

The use of Federal lands for this purpose is clearly a concern of Congress.

Furthermore, the activity of Federal agencies in preserving areas of wilderness when they are operating under congressional authorizations and appropriations is a concern of Congress.

If Federal lands are involved and Federal agencies are engaged in a wilderness preservation program Congress must be concerned.

It is doubtless true that at least some of the arguments against congressional action even on this constitutional question are not so much concerned with principles of government as with opportunities to exploit areas of wilderness. The objectors seem to consider the chances for exploitation or further development of remaining areas of wilderness better under administrative determination of land policies than under an act of Congress. They like the status quo better than the prospects of congressional endorsement of wilderness preservation.

Now I believe these opponents are right in concluding that wilderness will be more surely preserved with this legislation than without it. That is the reason I favor it. Yet I think it only fair to warn them that if we go on as in the past 30 years or so we might find administrators setting aside more wilderness. We might find ourselves with a wilderness enthusiast in an administrative seat of sufficient authority to increase greatly our wilderness reservations.

The simple governmental fact is that the American people through their Constitution have determined that they want their lands managed in accordance with laws established by their elected representatives. They want their important national policies so determined likewise.

If wilderness preservation is to be a national policy, Congress and the President are to so establish it. If wilderness is to be preserved by the land-managing agencies we now have and not by some new agency, Congress and the President should so determine. If this preservation is to be an aspect of land-management programs now underway, in categories of lands now existing, rather than in some new category of land and by some altogether new program, Congress and the President should so determine. If exceptions are to be made in favor of economic or other special uses of wilderness lands this too is something to be determined here in Congress.

That is what is proposed in this legislation—to establish basic national policies and programs and to authorize and direct existing agencies to carry them out as to day-to-day detailed operations within certain special areas of land use now existing. This is a thoroughly sound and constitutional proposal.

Not only as to constitutional principles is this a sound development of a special land-use policy and program, but also as a practical matter.

The administrative agencies involved, each with its own category of lands, have seen wilderness preservation emerging as an important objective.

The Fish and Wildlife Service on its refuges and ranges and the National Park Service in the back country of the national parks and monuments have seen in their own on-the-land experience the importance of preserving within their boundaries some areas as wilderness.

The Forest Service, in determining in accordance with their basic laws the use and occupancy of the lands of the national forests, more recently in so doing in accordance also with the Multiple Use Act, has seen a value in designating certain areas as wilderness.

Each of these agencies, on the basis of such practical experience, has seen a necessity and desirability in the enactment by Congress of legislation to recognize these purposes as national policy and to strengthen by law their realization in fact.

They all have reported favorably on this bill, and the President himself has urged its enactment.

There is no question whatever that if wilderness preservation is to be a national purpose and policy the Congress should act accordingly. Preservation of areas of wilderness should become a firm national policy

The measure now before the Senate is both competent and adequate to accomplish its purposes, and the program it will establish is feasible, reasonable, and carefully guarded with provisions for congressional scrutiny.

We deal here in Congress in this measure with lands with which we are not entirely unfamiliar. They all are lands within a national park system which we have already established, within national forests with which we have long been concerned, or within areas already known to us as wildlife refuges and ranges. They are lands regarding which the agencies involved and competent

witnesses among citizen organizations have testified to us in a whole series of hearings that have established a record with much information. We are not unaware of what the nature is of the lands with which we deal. We know what we are doing.

What we are doing is this: We are saying to the administrators of our parks, forests, and refuges: "You have within your custody certain lands that we are ready to devote to the carrying out of a national policy and program which we are now establishing for the secure preservation of a very small part of our national estate as wilderness. We are not willing for you to put all your lands into this program."

Here in Congress we are saying, "Mr. Secretary of Agriculture, out of the 186 million acres of national forests there are about 14.6 million acres which we are willing to have considered for wilderness. Some of this land we are now so establishing, and there are 39 other areas you call primitive that we want considered for this purpose."

Also we are saying, "Mr. Secretary of the Interior, within the national park system and in the wildlife refuges and ranges there are areas of 5,000 acres or more without roads now that may be so kept as wilderness. Within 10 years we want you and the Secretary of Agriculture after reviewing these areas carefully, to suggest the boundaries for the portions that you find suitable as wilderness—within these particular parks, refuge, and national forest primitive areas. After you have subjected your proposals to the public notice and public hearing processes, we want the President to advise us in Congress of his recommendations regarding these areas." If we have no objections then we shall see these areas become a permanent part of our wilderness system, for by the Wilderness Act we shall have recognized them as potential units of the system subject to such recommendations. If we do have objections either the House of Representatives or the Senate may reject the recommendations.

That is the procedure established by this measure. Most of these areas, we are confident, after such review and careful boundary determination by the Executive will become units of the wilderness system without requiring further action by Congress. If any area is questioned we shall act on it promptly. We consider this a sound, feasible, and fair arrangement.

Any such objections will be handled promptly in accordance with the wilderness bill's provision that its handling will be subject to procedures provided under sections 203 through 206 of the Reorganization Act of 1949. This is in section 3(f) of the bill. It is on page 11, in lines 3 to 7.

We do provide that for any area not specifically provided for, for review and consideration by this act, there must be another act of Congress. That is section 3(h). That is clear. That is sufficient.

Mr. HART. Madam President, I believe that the Congress can fill a gap which should have been closed years ago by passing S. 174, creating a national wilderness preservation system. To me, there is a distinct parallel with the multiple-use forestry bill which was so carefully considered by our Committee on Agriculture and Forestry, and was passed by the Congress last year, and was enacted into Public Law 86–517.

Last year we were reminded that the U.S. Forest Service long had practiced the reasonable principle of multiple use in the administration of national forests. Accordingly, the purpose of the proposed Multiple Use Act, we were told, was to give official congressional sanction to a policy which heretofore had been purely administrative.

Only the Congress, of course, can enact laws. Rules and regulations regarding our Federal land estate are issued by executive agencies only through the delegation of such authority by the Congress, the branch of the Federal Government most directly responsible to the will of the people.

I am glad that the multiple-use forestry bill was accorded the sanction of Congress, and now I hope we shall pass S. 174, the wilderness bill.

It is to the credit of the Forest Service that it long ago recognized a distinct need for the preservation of wilderness. As a direct result of this policy, areas were set aside under the classifications of wilderness, primitive, wild, and canoe, depending upon size or particular use.

This preservation of wilderness, like the principle of multiple use, now is well established. Also like the principle of multiple use, it merits and requires the official sanction of the Congress. This sanction will lend the assurance that wilderness areas so established shall be altered only by similar action by the Congress.

I should like to make it clear that this enunciation of policy by the Congress does not usurp administrative functions of the executive agencies concerned with the management of the natural resources. Needless to say, we shall continue to look to them for specific recommendations, including recommendations about the areas to be included, boundaries, and the administrative functions. Actually, the enactment of S. 174 should make for better administration and more uniformity regarding our wilderness resources on national forests, parks, and wildlife refuges.

After many revisions developed through hearings and hard work by the Committee on Interior and Insular Affairs, along with amendments accepted as this debate has progressed, the bill as now perfected and developed has the endorsement of the executive agencies and practically all major private conservation organizations. Opposition now is largely centered in certain segments of commercial logging, mining, petroleum, and grazing interests.

A favorite expression used by opponents of the bill is that it will lock up resources needed now or in the future. But this bill does not extend the wilderness classification to one additional acre of land that is not wilderness at the present time and is not already protected from commercial use.

The opposition, then, are in effect saying, "We believe we are going to have in the future a better opportunity to use at least some of these lands for our purposes if they have only administrative protection rather than congressional sanction."

In my book, this opposition is one of the best reasons for enactment of S. 174. It reveals future designs on already over-established areas of wilderness. It demonstrates a need for the legislation.

As with any law enacted by the Congress, this measure can be modified at any time in the future. However, there are in S. 174 provisions which establish regular procedures whereby areas of wilderness can be added or deleted if the occasion arises. Congressional review is provided in the bill. If, for any valid reasons, the public interest is better served by utilizing resources in such areas, rather than by maintaining them as wilderness, a provision in S. 174 establishes a regular procedure. This does not lock up resources at all.

Madam President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks the text portions of a brochure that the U.S. Forest Service has recently issued on wilderness in its multiple-use program, to which I have referred. The Forest Service, which I should note has urged enactment of this wilderness bill, S. 174, has set forth the values of wilderness and its place in the national forest program in this pamphlet, entitled—not surprisingly—"Wilderness," which is the first in a projected series on "The National Forests: America's Playgrounds."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE NATIONAL FORESTS: AMERICA'S PLAYGROUNDS

WILDERNESS

(By the U.S. Department of Agriculture, Forest Service)

(This is wilderness—created by God, molded by nature; the province of wild creatures, the far retreat of man.)

OUR WILDERNESS HERITAGE

Wilderness is an integral part of our American heritage. Our Nation was born in wilderness, and from it we took land and materials to build our country. The freedom of wild lands, their great open spaces, and their grandeur are interwoven in our history, art, and literature, and have strongly influenced the shaping of our national character.

The wilderness that witnessed the birth of our Nation and nourished its growth no longer spreads from ocean to ocean. Neither has it all been tamed. Many of these untamed lands, majestic samples of primeval America, are parts of the national forests of the United States. Here, as wild and just as free as ever, 14½ million acres of wilderness in 83 tracts are held in trust by the U.S. Department of Agriculture's Forest Service for the use, enjoyment, and spiritual enrichment of the American people.

Over 35 years ago the Forest Service pioneered in preserving America's wilderness heritage. Wilderness is irreplaceable and must not all be lost. Inherent in its primeval character are recreational, scientific, educational, and historical values of great benefit to the Nation and its people.

The Forest Service bears with pride its stewardship of these unique lands and has long been dedicated to keeping them intact for this and future generations of America.

RICHARD E. MCARDLE,
Chief, Forest Service, U.S. Department of Agriculture.

BEYOND CIVILIZATION

All of the sixth day of their wilderness trip they had ridden the wild summits of the Continental Divide, and horses and men were tiring when they rounded Palisade Peak and saw the basin a thousand feet below. Three small lakes gleamed in the afternoon sun, and around them crowded dark green timber. Rocky peaks hemmed the basin except at its upper end where a great wall of granite rose sheer. David thought it was the most beautiful valley he had ever seen.

It took an hour to get down, skirting a snowbank melting in the July sun, bypassing rimrock, and crossing a slope so steep they had to lead the horses. Once on the valley floor, they pitched camp by the middle lake.

David broke out fishing gear and climbed toward the granite wall and the lake at its base. For a moment he stood quietly, enjoying the remoteness of the rocky shore. Then deftly he cast in quest of a trout, fishing waters no other man might fish for months.

"Why wilderness?" a friend in Philadelphia had asked. "Why go where there's nothing?" David hadn't known how to answer. He had known only that he wanted something more than food and drink and the pleasures of vacations he usually took. But he could answer his Philadelphia friend now; he had been beyond civilization.

For the first time he had slept cradled by the earth in a world totally new to him. He had enjoyed living close to the land, experiencing its isolation and, standing on lofty peaks or lying warm in his sleeping bag, listening to its remarkable stillness. In ancient rocks he had glimpsed its past; in green shoots reaching above decaying vegetation he had seen the wilderness renewing itself, and in these things he had sensed its link with things eternal. He had felt his mind and spirit and every faculty of his body respond to its spell. He had found the wilderness not the empty land of his friend's imagination, but a land of beauty and life.

The last soft daylight hung over the mountain rim when David started back to camp. He walked slowly, and turned often to look at the lake. On the last high rise he turned again, and now the red gold of the setting sun reflected from fleecy clouds overhead. The basin filled with the golden glow, and David knew that one day he must come again to this unnamed lake at the base of a granite wall in America's wilderness.

PIONEERING A CONCEPT

The value of going into the wilderness to refresh the spirit and body has been understood by men since Biblical times, and before. More recently, men have realized that in the habitable areas of the world wilderness lands might not always be available as a far retreat for mankind.

One of the first Americans to sense in his country's growth a threat to its wilderness, and to speak out for the preservation of wild lands, was Henry Thoreau. Even then, just over 100 years ago, the need was not immediate. Much of the land was still wild. There seemed to be more space for growing than the country would ever need. But before many decades passed, our building Nation was reaching toward even the remotest of its lands. For a few conservationists who looked to the future, this was a warning that without protection, none of our lands would remain forever wild.

Many of these farsighted individuals were in the Forest Service. Led by Aldo Leopold, who later was to become one of the Nation's most distinguished naturalists, their thinking influenced early recognition of wilderness values and benefits to the Nation. So began the Forest Service concept of wilderness land management: that of designating as wilderness those lands predominantly valuable as wilderness so as to manage and maintain them indefinitely for their out-of-the-ordinary values.

The Forest Service pioneered this concept in the 1920's. Studies of wild lands on the National Forests began, and in 1924 a large part of what is now the Gila Wilderness in New Mexico was set aside as a special area for the preservation of wilderness. The Gila, the Nation's first designated wilderness, contains 500,000 acres of primitive American lands astride the Mogollon and Diablo mountain ranges.

Two years later, parts of the present Boundary Waters Canoe Area in Minnesota were given special protection. This area, unique among national forest lands, includes 887,000 acres of woods, rocky shores, lakes, and streams—the finest canoe country in America.

Good progress was made in the next dozen years in the monumental job of studying millions of acres of wilderness-type lands. By 1939 most of the national forest acreage primarily valuable as wilderness had been marked for protection in its primitive state. Since then studies have been made to determine those areas suitable for reclassification as wilderness. The study and classification of wilderness lands is a continuing Forest Service task.

Once an area is designated a wilderness by the Secretary of Agriculture on the recommendation of the Chief of the Forest Service, no permanent roads may be built into it, nor is mechanized equipment permitted. Timber cutting and other commercial uses, except already-established grazing of livestock, are not allowed. Resorts, organization camps, summer homes, and similar uses are not permitted. Moreover, positive management in the form of controlled grazing of pack stock, trail building and maintenance fire protection, and supervision of use and cleanup of choice camping areas is necessary to prevent damage to the soil and vegetation. Such steps keep wilderness in its natural state for the enjoyment of all who wish to journey beyond civilization.

There are now 83 separate tracts of land, about 8 percent of the more than 186 million acres of the national forest system, which are designated as wilderness and are being managed and protected for their wilderness values. They are located on parts of 73 national forests in 14 States and their combined area, 14½ million acres, equals the total acreage of New Hampshire, Connecticut, and Massachusetts. Their management is included in the overall program of multiple-use management for the national forests.

These national forest wilderness lands embrace desert country and brushland, virgin timber stands, great valleys and alpine meadows, and some of the Nation's loftiest mountains. They contain countless streams and lakes, and great quantities of pure waterflow from wilderness watersheds to our cities. They abound in fish, small animals and birds, and big-game animals such as deer, elk, moose, mountain goats, and bighorn sheep. Some are the province of the grizzly bear, which must have the wilderness habitat to survive.

These ancient lands range in size from a few thousand acres to more than a million. Some are split by deep canyons, or are otherwise distinguished by geological formations in which can be read the history of the land. In others are the homes of living glaciers.

But however they have been worn and molded by the elements, however their features have been torn and twisted and sometimes piled one upon the other by ancient cataclysms, they all share in common a primeval character, the identifying mark of wilderness.

National forest wilderness is for all Americans. Here are lands of grandeur and expanse, spreading free and wild, and rising to the heavens. Here are lands of awe-inspiring spectacle, and of solitude unlike any other. Here is a world in which we can find tranquillity, spiritual uplift, and rejuvenation of mind and body. Here are the pristine lands of our Nation, lands we can use and enjoy even as we make ready to pass them on to another generation as a cherished and enduring part of our American heritage.

INTO THE WILDERNESS

The appreciation of wilderness values is an invention of civilization. Man generally does not recognize such values until he has become separated from them; that is, when he has become civilized and a member of a dynamic and complex society.

Primitive man, living deep in the forest and fearing its mysteries, had little regard for an environment in which his life was constantly endangered. The American pioneer viewed the wilderness first as a land to be conquered and put to domestic use, for he was confined more by it than by the villages, roads, and farms he was building.

He was aware of the solitude and beauty of wild forests and the freedom of untamed lands, but his awareness was blunted; the forests were too much in abundance and too much a part of his life.

It is only recently in this century that Americans, closely confined by a highly complex civilization, have begun developing a deeper appreciation of wilderness.

Many people—those working in historical, scientific, and educational fields—are interested in these lands in relation to their work. But by far the most popular appeal of wilderness to Americans is the opportunity it provides for rugged, primitive outdoor recreation.

Those who go into the American wilderness for recreation—whether spiritual or physical—are as diverse in character as are the wild lands they visit. They come from every section of the United States, men and women of many ages and backgrounds. They come for various reasons; wilderness means many different things to people. And they come prepared. They have made careful plans and detailed arrangements, both essential for a successful and enjoyable trip, for in the wilderness their way is the arduous, virile travel of the pioneers. On foot, on horseback, or by canoe—there is no other way to travel—they seek out the unusual outdoor experiences only these primitive lands can give.

They may go into the wilderness to hunt big game or to fish in waters seldom visited by other fishermen. Perhaps their hobby is photography and they wish to document America's primitive landscapes or to capture on film the wild animals and birds. Others may only seek the solitude of great space and distance. Some may desire to conquer a towering mountain peak thrust skyward millions of years ago and then, standing high on the peak, say to themselves that no man has stood here before.

But for most people, it is thrill enough and satisfying enough just to travel in primitive lands, camping where night falls and enjoying the soul-healing freedom of living in a world apart from the pressures of their daily lives.

Whatever his interest, the first-time wilderness visitor will find his days in the wild lands adding up to an experience of special significance to him, though perhaps unexplainable to another person. The wilderness environment will be unlike any he has ever known, and his emotional and spiritual reactions to it will be completely, uniquely his.

WILDERNESS UNDER FOREST SERVICE MANAGEMENT

The national forests are America's playgrounds—but they also are lands of many other uses. These public lands are producing high-level, sustained yields of water, timber, forage, wildlife, and forest recreation opportunities of all kinds, including those enjoyed in wilderness areas.

In the next few years, however, the Nation's rapidly expanding population will need even greater resource yields from the 155 national forests in 39 States and Puerto Rico. This rising need is being met by the program for the national forests. Popularly known as Operation Multiple Use, this program is conserving the land, the basic resource, while intensifying resource management and development to produce more forest products and services.

Management for multiple use takes positive action before, not after a need arises. It is the deliberate and carefully planned integration of various forest land uses so that each interferes with the others as little as possible and supplements the others as much as possible.

Multiple-use management coordinates the development and use of the renewable resources. It calls for sustained yields of the resources at as high a level of productivity as can be reached without impairment of the land's ability to produce.

Multiple-use management serves better than any other form of land management the basic purpose of conservation, which is a social one—the satisfaction of both the tangible and intangible needs of people.

The guiding principles of multiple-use management insure that all resources, all uses, and all users are considered in developing management plans for the national forests. Within this framework and consistent with policy of over 35 years' standing, the Forest Service is protecting and maintaining in their natural state those parts of the national forests which have been designated as wilderness.

Multiple-use management, then, is providing this generation of Americans with optimum opportunities for wilderness recreation. And for the benefit of those generations of Americans yet to come, it is making certain that these irreplaceable wilderness lands shall endure.

INFORMATION

For detailed information on visiting the national forest wilderness, see the wilderness map for the number of the Forest Service region administering the wilderness lands in which you are interested and write to the appropriate regional forester, Forest Service:

(1) Federal Building, Missoula, Mont.; (2) Denver Federal Center, building 85, Denver, Colo.; (3) New Federal Building, 517 Gold Street SW., Albuquerque, N. Mex.; (4) Forest Service Building, Ogden, Utah; (5) 630 Sansome Street, San Francisco 11, Calif.; (6) 729 Northeast Oregon Street, Post Office Box 4137, Portland 8, Oreg.; (7) 6816 Market Street, Upper Darby, Pa.; (8) 50 Seventh Street, Atlanta 23, Ga.; (9) Carpenter Building, 710 North 6th Street, Milwaukee 3, Wis.; (10) State Capitol Building, Box 1631, Juneau, Alaska.

For licenses to hunt or fish on the national forests, apply to the fish and game department of the State that includes the area you plan to visit.

Mr. JACKSON. Madam President, as acting chairman of the Committee on Interior and Insular Affairs, I wish to express my very great appreciation of the wonderful way in which the distinguished junior Senator from Idaho [Mr. CHURCH] has handled the bill during the last several days. In one form or another, this bill has been pending in the Senate for several years. I believe it most commendable that the distinguished junior Senator from Idaho undertook to handle this very difficult piece of legislation. He has handled it in admirable fashion, and has demonstrated a complete grasp of this complex subject. All of us are indeed very proud of him. I also want to commend and thank the junior Senator from Montana [Mr. METCALF] for his outstanding efforts in behalf of the bill. He has indeed made a most valuable contribution during the long and arduous debate on this legislation.

Mr. GRUENING. Madam President, will the Senator from Washington yield?

Mr. JACKSON. I yield.

Mr. GRUENING. I should like to join the Senator from Washington in commending the junior Senator from Idaho [Mr. CHURCH] for the admirable way in which he has handled the bill, both on the floor of the Senate and in the committee.

I also wish to commend the junior Senator from New Mexico [Mr. ANDERSON], who—although unfortunately required to be absent at this time, because of illness—has guided the bill during this session. The bill represents the culmination of many years of work by a number of Senators, including the late Senator Tom Murray, of Montana, the late Senator Dick Neuberger, of Oregon, and other Senators. The bill is the result of their outstanding work. Their achievements in this respect have been very great, indeed.

Mr. HUMPHREY. Madam President, I wish to join in the congratulations and commendations of the junior Senator from Idaho [Mr. CHURCH] for the admirable way in which he has handled this complex piece of legislation. We are deeply indebted to him for the action the Senate is about to take on the bill. It is a very happy culmination of the work of a number of us over a period of some 5 years.

I also wish to express our commendation of the Senator from Idaho [Mr. CHURCH] and the Senator from New Mexico [Mr. ANDERSON], for seeing to it that this measure reached the Senate Calendar and was ready for action by the Senate.

Certainly this bill is very important in terms of the future of the Nation.

Mr. MOSS. Madam President, I should like to join in the commendations which Senators have expressed because of the fine work done by the junior Sentor from Idaho [Mr. CHURCH] in managing the bill here on the floor of the Senate.

I know that the chairman of the committee, the junior Senator from New Mexico [Mr. ANDERSON] would like very much to be here at this time, now that we have reached the point of taking final action on the wilderness bill. I commend him for his long and faithful service and for his brilliant leadership in bringing the bill out of committee and to the floor.

I also wish to comment on the political courage of the junior Senator from Idaho [Mr. CHURCH]. The wilderness bill has not been well understood in the Mountain States, and interests there have brought great pressures on their congressional representatives, in connection with the bill. The junior Senator from Idaho has courageously guided the bill, which not only is in the interest of his State, but also is in the interest of all the other people of the United States. I am very proud and highly honored to stand with him as we are about to vote in favor of passage of the wilderness bill.

Mr. DOUGLAS. Madam President, I too, wish to commend the Senators from the Mountain States who have worked so hard for the passage of this bill and have resisted crippling amendments. I well know the pressures to which they have been subjected by the mining interests and the timber interests of their States, and I know that that situation required of them courage of a high order, in standing up against those pressures.

As one who comes from a Plains State and wishes to have these resources conserved for the benefit of the Nation, I wish to express my deep gratitude and appreciation to these Senators who dominate the Committee on Interior and Insular Affairs, and who sacrificed narrow political advantage for the welfare of the Nation.

Mr. MILLER. Madam President, it has been my privilege, as a member of the Committee on Interior and Insular Affairs, to participate in the consideration of this measure. Thus I have had a hand in some of the amendments that were adopted and in its approval after the amendments made it, in my opinion, acceptable.

I have long been in favor of preserving some of our country in its unspoiled natural condition.

I do think that we must be careful to accomplish this purpose in ways that are sound and in accordance with our democratic processes, and respectful of all interests concerned.

Accordingly, I paid particular attention to this bill in committee, to see its purpose advanced and also to see that it was in my opinion sound legislation.

I am pleased with the results, and am happy now to commend it to the Senate.

THE OUTDOOR RECREATION RESOURCES REVIEW COMMISSION

Two of the objections raised at the time of the February 27 and 28 hearings were of special concern to me. One of these had to do with the argument that this measure should be held up until after the Outdoor Recreation Resources Review Commission makes its report, which is due early in 1962. It is my privilege to be a member of this Commission; and, accordingly, I took special note of this argument.

Madam President, this argument should be turned around. Before the Commission has to draft its final report, we should handle the wilderness bill promptly, so that the House also can pass it and it can become law.

The wilderness bill will help the Commission. It will provide the Commission with a framework for the Commission's recommendations; furthermore, it will establish procedures through which wilderness recommendations of the Commission may be realized.

On the other hand, we do not need the Commission's recommendations as a basis for such legislation as this.

We do not need a Commission to tell us that wilderness preservation should be one of our land-use policies, or what kind of procedures should be established for carrying out such a policy.

We do not need a Commission to tell us that the wilderness to be preserved should be in our national park system, in wildlife refuges or ranges, and within the wilderness, wild, and primitive areas already set aside administratively in our national forests.

We do not need a Recreation Commission to tell us that in establishing wilderness areas we also need to make some special provisions and exceptions for certain economic and other purposes.

No, Madam President, we do not need the report of the Outdoor Recreation Resources Review Commission in order to proceed with the kind of legislation which we have before us now.

GREAT VALUE OF THE REVIEW

We all do, indeed, look forward to the availability of the ORRRC report. It will be of great value to us with regard to wilderness as well as other resources on which our outdoor recreation is based.

We shall value the Commission's recommendations regarding how much wilderness we shall need, for example; and as the program established by this legislation is carried out, we shall do well to heed such recommendations.

But the areas of wilderness to be preserved under this bill are not to be blanketed in upon its enactment. They are to be determined on the basis of 10-year reviews by the Department of Agriculture and the Department of the Interior, under the scrutiny of Congress.

We shall have an entire decade, Madam President, in which to make use in our wilderness program of the Outdoor Recreation Resources Review Commission's recommendations.

Thus, Madam President, the argument that we should wait for the Commission's report before enacting the wilderness bill is an argument in reverse. We do not need to wait; but, rather, we should promptly give the Commission the advantages in their preparation of recommendations by establishing now the national policy, program, and procedures that are set forth in this legislation.

I am afraid that the delay argument is simply an argument against the wilderness bill, and not in any sense a sympathetic concern for the success of the Outdoor Recreation Review.

CONGRESSIONAL RESPONSIBILITY

My other special concern during our committee study of this was to make sure that Congress does nothing to interfere with meeting its own responsibilities.

Inasmuch as others, too, share such a concern, it may be well for me to discuss this briefly, for I am convinced that this measure with the committee's and the floor amendments is sound and proper in this respect.

First of all, the very enactment of this legislation will be in keeping with the constitutional provision in article IV, section 3, that "the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States."

As I view this provision, it is the Congress that should establish our national wilderness policy—and not the executive agencies, as at present, in taking action incidental to some other programs.

By this legislation, then, in my opinion, Congress is meeting its constitutional responsibilities. Recognizing the importance of wilderness preservation, realizing that this must be achieved on Federal lands, the Congress by this legislation determines the way in which territory belonging to the United States may be used for this purpose.

That seems right to me. The provisions of S. 174, as amended, seem right to me and in accord with my sense of congressional responsibilities.

CONGRESS AND PARTICULAR AREAS

The question that the committee's minority has raised in this regard has to do with congressional responsibility for the establishment of particular areas as wilderness. It will be well to examine the bill's provisions in this respect.

The bill does not blanket in the areas that will eventually comprise our wilderness system; it provides for their coming in over a 10-year period, or longer, following a series of studies.

Congress in this legislation does indicate what territory is available for consideration as wilderness; namely, roadless portions of the national park system, wildlife refuges and ranges, and national forest areas already administratively designated as wilderness, wild, primitive, or canoe.

From these areas, says Congress in this bill, we shall create our wilderness system. How? Well, first of all, there are 14 wilderness areas, 29 wild areas, and a canoe area—all within national forests—that have been so carefully reviewed already that the Congress by this measure establishes them as units of the wilderness system. These 44 areas total 6,773,080 acres.

Then there are 39 primitive areas in the national forests, comprising 7,890,973 acres.

Congress by this legislation says that these primitive areas also are a part of our national wilderness estate. They are units of the wilderness system. However, because of the history of their establishment and because the Forest Service is already engaged in studies for reclassifying these primitive areas as wilderness or wild, Congress in this bill says that these 39 primitive areas are to be studied during the next 10 years and included or excluded on the basis of recommendations by the President, recommendations which also would establish the boundaries of the areas to be included.

Congress further provides that these recommendations will take effect only if either the Senate or the House does not reject them by resolution. In other words any one of these primitive areas which Congress by this act declares suitable as a wilderness area may later be rejected by either House when the report on it is made during the 10-year review.

That seems reasonable to me. If any Senator sees something wrong with one of these primitive areas when it is recommended for permanent inclusion in the wilderness system, he may introduce a resolution to reject it; and if the Senate adopts the resolution the area will be excluded. Any Member of the House has the same opportunity.

Either House may thus reject an area. The safeguard against including any area improperly seems adequate.

CONCURRENT RESOLUTION PROPOSAL UNSOUND

The amendment that the minority insists upon would require that for every one of these 39 primitive areas, there would have to be adopted a concurrent resolution.

Each recommendation during the 10-year review would have to be followed by the submission of a concurrent resolution and by its adoption by both the Senate and the House.

Thus, repeatedly, the determination by Congress that these already designated primitive areas are suitable units for the wilderness system, subject to the 10-year review would have to be reexamined by Congress.

For each area we would risk such delaying tactics as those used against the wilderness bill itself these past years.

A resolution to reject a recommendation would be assured prompt attention under the bill as now amended. A concurrent resolution would be subject to all the delays that opponents, though few, can so skillfully manage.

These considerations apply not only to the 39 promitive areas, but also to all the areas in the national park system and in the wildlife refuges and ranges.

It seems totally unnecessary, Madam President, after the passage of the wilderness bill, to require separate acts for the preservation as wilderness, as provided in this act, of the areas that the National Park Service or Fish and Wildlife Service, the Secretary of the Interior, and the President find to be suitable for such preservation.

The possibility of rejection by either House seems an adequate safeguard. Requirement of separate acts seems more obstructive than reasonable.

CONGRESS SPECIFIES THE AREAS

Let me emphasize, however, that these procedures apply only to the areas which Congress specifies in this bill. As to any other areas the bill is specific as requiring, in section 3(h) as follows:

> The addition of any area to, or the elimination of any area from, the wilderness system which is not specifically provided for under the provisions of this act shall be made only after specific affirmative authorization by law for such addition or elimination.

This is a sound and carefully worked out measure. It well serves an important national purpose. I am happy to support it and to have had an opportunity to participate in its consideration.

Madam President, the recreational attractions of the areas of wilderness to

be perpetuated by this measure are well represented in an article written by the publisher of the Valley Daily News, in Tarentum, Pa., which I should like to have appear in the CONGRESSIONAL RECORD at this point. I ask unanimous consent for that purpose. This article, by Gene Simon, tells of one of the a-way-to-the-wilderness trips sponsored by the Wilderness Society. It appeared in the Valley Daily News on November 4, 1960, with the heading "Real Wilderness Still Remains in United States."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REAL WILDERNESS STILL REMAINS IN UNITED STATES

(By Gene Simon)

(EDITOR'S NOTE.—The president of the Valley Daily News and Daily Dispatch recently spent 10 days on a horseback-pack trip into the remote mountains and high country of the Pecos Wilderness area of New Mexico. The trip was conducted jointly by two organizations: "The Wilderness Society" and "A Way to the Wilderness," with cooperation of the U.S. Forest Service. Your local newspaper is considering sponsorship of similar trips as a service to interested readers.)

Yes, there is still real wilderness remaining in our United States and you can get there. A true wilderness experience will prove for anyone an enriching source of tremendous and varied benefits that defy description.

What is a wilderness?

A wilderness is a large area of sufficient size to be preserved in its natural state where man and his works do not dominate the landscape. In a real wilderness untrammeled by man, man himself is merely a visitor who comes to enjoy but does not remain. A wilderness has outstanding opportunities for solitude and a rugged, primitive, unconfined type of outdoor recreation far removed from the pressure and rush of modern civilization.

Such an area is the 165,000 acres of high peaks, clear lakes, spruce, fir and aspen forests, alpine meadows and above-timberline tundra that is known as the Pecos Wilderness. Primarily in the Santa Fe Natural Forest of New Mexico, this wild wonderland rises above the headwaters of the historic Pecos River fabled in many Westerns. Here no road construction, logging, motorized travel, resorts or summer homes are permitted. This is why the high country of the Pecos, an untouched bit of Alpine Eden, is famous for its unforgettable natural beauty, its elk, mule deer, bear, beaver, wild turkey, spruce grouse, and mountain lion.

You don't have to be a top rider to enjoy a pack trip into any wilderness area, of which there are about a dozen left in the United States. You can have a horse that suits your ability. If you can stay on a gentle, well-trained mountain horse you are ready to ride. No person in good health, regardless of age, should question his ability thoroughly to enjoy one of these trips. If you like riding and living in the great out-of-doors, a pack trip will more than fulfill your highest expectations.

On the Pecos pack trip this past September, there were 10 riders, a crew of four (wranglers, packers, and cook), and our guide, Don Clauser, a long-legged, slow-drawling Texas type who heads "A Way to the Wilderness" and who knows the Pecos like the palm of his hand.

Doug O'Bannon, owner of the Mountain View Ranch at Cowles, N. Mex., who outfitted our trip, was also with us part of the time and on one of the stopover days managed to complete his fall roundup of about 75 head of cattle. That day the rancher and his cowboys rode from daybreak until long after dark.

Included in the riders was Howard Zahniser, executive director of the Wilderness Society in Washington and editor of its magazine, the Living Wilderness, and our physician, Dr. Lawrence Lunt, M.D. of Santa Fe, who is 74 and ramrod straight in the saddle.

Others were Bob Tapscott, age 67, a retired life insurance claims attorney, and his sparkling wife, Candace; Dr. Marjorie Bond, an executive director of the National Conference of Christians and Jews in California; Jerry Geiger, Army Ordnance supply officer from Illinois; Clarence Lica, a manufacturer's planning engineer also from Illinois; Bruno Rudek, a retired Cleveland Clinic orderly, who never rode a horse in his life before this trip (he's age 67); and Charlotte Ferree, a New Mexican college student born in Pennsylvania.

That is a lot of variety, but some of those ages and professions prove that even you are up to a wilderness trip. One thing these diverse persons obviously have in common: they love the out-of-doors and the truly wide-open spaces, and that makes for a comradeship that must be experienced to be understood.

Our no-hips, flat-stomached, few-words crew included three cowboys and two cowgirls (with spurs and chaps): Jim Jordan, Lonnie Mecham, Carol Darlington, Pat Maher and ex-Navy cook Don Higgins. These wonderful westerners were the real article in every way. They rode like they were part of their horses and could skillfully rope, hobble, saddle, pack, brand, and shoe a horse. They're the best.

What do you take with you on a wilderness trip?

Besides a mountainwise western range horse to suit your ability, you need a sleeping bag and air mattress, saddle slicker or poncho, lace or riding boots, warm jackets and tough gloves, blue jeans, flashlight, toilet articles, and some woolens. A fleece-lined sweat suit with a parka hood is dandy for sleeping on cold nights, and plastic freezer bags are handy in keeping things dry and ordered in your duffle bag. Some riders also take binoculars and a fly rod in metal case. The trout aren't fished out in the high country and they taste mighty good for breakfast. And of course you should have a camera.

Each rider is limited to a bed roll and duffiebag for his gear. Together they must weigh no more than 50 pounds. These are carried on packhorses, who also transport the range tents, powersaw, food and cooking equipment, of which the most prominent items are a huge skillet and two gallon coffee pots, one eternally for hot water and the other coffee. The horses lived off the lush grass and were hobbled each night with a bell around their necks. Those ridden the hardest were grain-fed.

On the 10-day trip, we rode over 90 miles, had five campsites (three of them over 10,000 feet elevation), found ice on the water pail almost every morning, rode in rain, hail, and snow, but most of the time experienced perfect sunny, warm, clear weather, with the bluest sky ever seen.

We usually turned in before 9 and were up around 6, slept like a baby and ate like a horse, sang and talked around a campfire every night, and three of us even shed our woolens and took a quick dip in ice-cold Pecos Baldy Lake at 11,500 feet elevation one sunny afternoon with snow still lying in the shadows.

Breakfast consisted of fruit juices, bacon and eggs, flapjacks, toast and coffee. Lunch was sandwiches you fixed yourself, cookies, apples or oranges, and a thermos of coffee or tea all packed in your saddle bag and eaten on the trail.

The evening "come and get it" was usually giant thick juicy steaks (this is cow country) broiled over an open fire, with home fries, canned vegetables and fruits, biscuits and tea or coffee. That living in the open does things to your appetite.

Yes, the rewards of a true wilderness experience are sufficient in themselves—the exhilaration and sense of release that come with the feeling of space and adventure, the joy of being in untouched valleys and mountains with unspoiled waters, and the underlying realization of genuine enrichment. Such wilderness experiences are possible only as long as wilderness remains wilderness.

In the Pecos high country men and women oppressed and harassed by the claustrophobia of high tension living may attain fuller release and true enjoyment of the charms and freedom of the mountain wilderness.

Most of us need this kind of experience and are better because of it.

Mr. BENNETT. Madam President, we have heard many fine things said about the floor manager of the bill, and I am sure all of them are well deserved. Of course, usually the winner gets the spotlight after the battle is over.

I should like to express my very deep appreciation of the excellent work which has been done by the senior Senator from Colorado [Mr. ALLOTT], who led the fight in which he was joined by more than 30 Members of the Senate. He, too, has been working on the bill on this floor for more than 2 days; and he, too, has been taking the pressure. Furthermore, he does not now have the pleasure of having won his battle. I believe we are very deeply indebted to the senior Senator from Colorado.

Mr. CASE of South Dakota. Madam President, will the Senator from Utah yield?

Mr. BENNETT. I am glad to yield.

Mr. CASE of South Dakota. I should like to join in the commendations of the excellent work done by the senior Senator from Colorado [Mr. ALLOTT]. In the efforts he has made, he has demonstrated in outstanding fashion that he is a true son of the West and is determined to preserve some of its independence. He has shown great knowledge of the resources there, and has made a valiant effort to preserve them; and he has done so in a way that will bring him great credit among all true lovers of the West.

Mr. MANSFIELD. Madam President, my remarks at this time will be brief. However, I wish to take this opportunity to express our thanks to the floor manager of the bill, the distinguished junior Senator from Idaho [Mr. CHURCH], and also to my distinguished colleague [Mr. METCALF]; to the distinguished majority whip, Mr. HUMPHREY; to the ranking majority member of the committee, next to the chairman, the Senator from Washington [Mr. JACKSON]; to the Senator from Utah [Mr. Moss]; the distinguished acting minority leader [Mr. KUCHEL]; and to all other Senators who have participated during the past 2 days in bringing the wilderness bill to the point of third reading and passage.

I believe great credit also should go to the senior Senator from Colorado [Mr. ALLOTT], to the senior Senator from Utah [Mr. BENNETT], to the senior Senator from Idaho [Mr. DWORSHAK],

and to other Senators on their side, who, although they were not in favor of the bill as it was originally reported, nevertheless tried conscientiously, from their point of view, to make it stronger and more effective. I think out of that process has emerged a better bill, and I am delighted that we have now reached the point of its third reading and passage. Certainly as a result of the work that has been done there is enough credit to go all around; and I am glad to join in giving credit to these and all other Senators for their contributions.

I also wish to take this occasion to extend my thanks to two of our late distinguished colleagues, Senator James E. Murray of Montana and Senator Richard Neuberger of Oregon, who were pioneers in this field; and also to the present chairman of the Committee on Interior and Insular Affairs, the distinguished Senator from New Mexico [Mr. ANDERSON], who worked so long and so hard, and at last was successful, for the first time, in bringing this bill to the floor of the Senate for consideration.

Mr. KEATING. Madam President, I shall vote for this bill. It is the culmination of years of research and effort by dedicated conservationists throughout the United States. It provides for the determination of certain portions of Federal land as wilderness areas, to be kept untrammeled by humankind.

With the population of the United States increasing at the rate of one human birth every 7½ seconds, the need for wilderness land, completely undeveloped, is great, and the pressures upon it are becoming even greater. We cannot afford to wait any longer to take vigorous and determined measures to set aside, clearly and definitely, certain parts of our Federal Government's holdings, to be free from development, even the development of hot dog stands and sightseeing tours for recreational purposes.

Madam President, it is said by some that only a very small minority of our people will use or enjoy these wilderness areas. Perhaps, at any one time, that is true. But over the years, over the decades, over the generations, and yes, even over the centuries, the number of people who will enjoy these wilderness areas will not be so small.

Furthermore, Madam President, if we add to those who actually have used these areas, the number of all those who hope some day to get into these primitive lands, all those whose eyes light up at the thought of a canoe or hiking pilgrimage into the depths of America's virgin forests and lake country, and all those for whom these lands are a gleaming challenge and a deep, green invitation into the uncivilized, into the unknown, then there are, indeed, very, very many who care for the preservation of our wilderness heritage.

Madam President, it is also said that for 2½ centuries the American people have fought against the wilderness. The American people won, and the wilderness lost; and, therefore it is asked, "Why preserve wilderness areas today, at the expense of more profitable or more popular development possibilities?" I would answer this question, Madam President, by stating that because of the central role which the wilderness, the frontier, has played in our history, we owe it to ourselves and to our heritage to preserve vestiges of our once virgin continent in its original state, so we can better understand and appreciate the heroic efforts of our forebears in taming the wilderness. Wilderness areas will keep alive a lasting memory and a vivid memorial to our Nation's infancy and the rugged pioneering spirit which first conquered the endless forests and plains and purple mountained majesties.

Madam President, the Audubon Society has been one of the most ardent supporters of this legislation from its origin. Therefore, I ask unanimous consent to have printed in the RECORD directly following my remarks an article, from Audubon magazine for May–June 1957, written by Edwin Way Teale, and entitled "Land Forever Wild." I only regret, Madam President, that the photographs accompanying the article cannot also appear in the RECORD, for they speak, more eloquently than words, in favor of this legislation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LAND FOREVER WILD

(By Edwin Way Teale)

One early October day, 2 miles above sea level near the Montana-Wyoming line, I stood on the lofty tundra of Beartooth Plateau. To the north the peaks and forests of the Montana Rockies extended away as far as my vision reached. Here was wilderness unmarked by man. Here was wildness untouched by civilization. Here was the land as Nez Perce braves had known it crossing Beartooth Pass for centuries before the first white man. In one vast panorama here was a vision of original America, of the wilderness of old—roadless, cityless, billboardless—as wild as the early pioneers saw it.

And just so future generations may also observe it. For at least part of the inspiring vista that spread before me that October day is now designed as a "primitive area." It is included in the wilderness preservation program of the Federal Government.

When the Pilgrim Fathers landed in New England, the whole continent extended away before them in one continuous wilderness. Only a century and a half ago, when Meriwether Lewis and William Clark started up the Missouri on the first overland journey across the United States to the Pacific, the western half of the continent was still wilderness. Even a generation ago, the homesteading era was not yet over. During all the early history of this country, the wilderness stood in the popular mind as the great enemy, barring progress. Our heritage of wildness was merely something to subdue, to tame, to conquer, to destroy. Its material resources—its gold and timber, furs and fertile valleys these alone had value.

But more and more in recent years, with the swift shrinking of space and the compression of mounting population, another side of the wilderness has become increasingly recognized. For lands that have been forever wild provide spiritual as well as material resources. Wildness itself offers something of value that needs protection.

Among the recently published letters of William Blake, the English poet, there is this sentence: "The tree that moves some to tears of joy is in the eyes of others only a green thing that stands in the way." The wilderness, like the tree, produces such diverse reactions. During the history of our land, in the main, human activity has reflected the viewpoint almost entirely of those who saw only something standing in the way, something to eliminate. As mechanization has increased, the power to destroy has become magnified. As the population has multiplied, the pressure on wild lands has mounted. Every 12 seconds our population is increased by one. The figure now stands at 170 million; it is estimated it will be 200 million only a decade hence. Indicative of the consequence is one small scene I recall from a part of Long Island once famed for its violets and its upland plover, the Hempstead Plains. Last spring, on one tiny tract amid spreading subdivisions, a single upland plover perched on a sign. The sign read: "A supermarket will be erected on this site."

During the past few years, in gathering material for recent books, I have visited all 48 States of the Union. Wherever I went the impact of mechanized civilization was apparent. Forests had been sheared. Waterfalls had been reduced to a sad, attenuated flow. People spoke of wild places they had known since childhood, now vanished. Over and over again I heard the same refrain: "This used to be such a beautiful place." But amid all this devastation there was something of gain. As the wilderness had receded, the appreciation of the wilderness had grown. A current seemed strengthening all across the country. The will to save something of all that is melting away had become more apparent.

"We need," Henry Thoreau wrote in "Walden," "the tonic of wildness—to wade sometimes in marshes where the bittern and the meadowhen lurk, to hear the booming of the snipe; to smell the whispering sedge where only some wilder and more solitary fowl builds her nest, and the mink crawls with its belly close to the ground." Throughout all the 20 volumes of Thoreau's works there runs the recurring theme of the value and importance of wildness. His was the first eloquent voice lifted in its praise. "In wildness," he said, "is the preservation of the world." Since his day others have recorded similar convictions. "The clearest way into the universe is through a forest wilderness," John Muir wrote amid his beloved Sierra peaks. And in a more recent day Aldo Leopold has set forth his belief that "the opportunity to see geese is more important than television, and the chance to see a pasqueflower is a right as inalienable as free speech." Such men have spoken for more of us than is generally recognized.

At first it was only the unique and spectacular features of the wilderness, such as Yellowstone, Yosemite, and the Grand Canyon, that elicited Government protection. The idea of preserving wildness for its own sake, as opposed to the setting aside of the inspiring scene or the dramatic manifestation of nature, this was slow in developing. Many men have had a part in its growth. Frederick Law Olmsted, Sr., planning Central Park to interfere as little as possible with nature, certainly was one of the pioneers. So was Verplanck Colvin, whose activities in the 1870's led to the inclusion of an article in the New York State constitution providing for an Adirondacks forest to be left "forever wild." So was John Muir, singing of his joy in wild, western mountains but at the same time keenly aware of all that had gone and all that was going. And so, in our own day, have been such men as Stephen Mather, Aldo Leopold, Robert Marshall, Arthur H. Carhart, and Olaus J. Murie. They all have contributed toward the preservation of those living museums of primeval America, areas of untouched, unexploited wilderness.

Perhaps the underlying philosophy of wilderness preservation can best be set forth in

a kind of Socratic dialog, taking up in turn the basic questions involved.

What is wilderness?

It is, by the strict dictionary definition, an area that is uncultivated and uninhabited by man. In a larger sense it is a sanctuary for all the primal realities of nature unchanged. Nothing artificial is imposed upon it by man. It is neither developed nor prettied up. A few years ago, along one of the trails in California's Point Lobos State Park, a woman was discovered pulling up plants with both hands. She explained she was "helping clean up the place." Near New York, when the Sunken Forest on Fire Island was turned into a sanctuary recently, a troop of Boy Scouts volunteered to come out with hatchets and aid in clearing out the area. This insatiable propensity of human beings for changing nature stops at the boundary of a wilderness area. There we find the whole book of nature and not—as Thoreau pointed out nature is usually found—a book from which previous visitors and previous generations have torn whole pages and mutilated others. A wilderness area is just wilderness; just that; an area in which nature is left unchanged by man.

But do not the national parks already provide sufficient sanctuaries for wildness?

In the back country of a number of national parks there are wonderful stretches of unspoiled wilderness. However, the fundamental purpose of a national park has not been to preserve wildness as such. It is to protect and make available to the public some superb example of natural splendor, some area that is unique. The significance of the national park, in the main, lies in features it contains that are found nowhere else. The significance of the wilderness area, on the other hand, lies in characteristics that it shares with all other wilderness areas, namely natural conditions as completely untouched and unaltered as is consistent with its protection and use as wilderness.

As long as many of the remaining wilderness areas are in remote, mountainous country, why worry about them? What can happen to them anyway?

Perhaps the best answer to such questions is to quote from the report of a select committee appointed by the Ohio State Senate in 1857—just a century ago—to study the need for protection of a species of bird. The committee reported no protection at all was needed. The birds, it found, were "wonderfully prolific." They had for their breeding grounds "the vast forests of the north." They could travel daily "hundreds of miles in search of food." The report concluded that "no ordinary destruction could lessen them" and that the numbers killed would never "be missed from the myriads that are yearly produced." The bird they referred to was the passenger pigeon, now completely extinct for nearly half a century. It cannot be taken for granted, as the history of America has amply demonstrated, that any area—no matter how wild at present, no matter how removed from centers of population at present—can remain unendangered without protection.

Why do wilderness areas have to be big? Wouldn't small areas serve just as well?

The wilderness, by its nature, demands solitude. It requires as much remoteness from man and his works as possible. Only in comparatively large areas can a wilderness continue to maintain its wilderness character.

Do these areas have to be roadless?

When we speak of an unspoiled area, "unspoiled" means different things to different people. But an area that is left as it was, unchanged, absolutely unchanged, cannot be spoiled for anyone. This is the aim of those interested in wilderness preservation. The road, the jeep, the outboard motor, the airplane all are part of a mechanized civilization incompatible with the whole conception of the wilderness. By its nature a wilderness must remain trail country, canoe country, primitive country. Roads will attract mainly those who have no real interest in the wilderness, those who merely want to see the fringes of wildness while going 60 miles an hour. Wherever a road is constructed through such a region, the cutting and filling and grading disturbs the vegetation, the drainage, the wildlife—not of just a narrow strip but for considerable distance on either side. Moreover as soon as one road is built the pressure mounts for joining roads, multiplying the danger and damage.

But if a single road bisected an area why wouldn't it give two wildernesses in place of one?

In the first place, the smaller the wilderness the less it is a wilderness. Furthermore, in bisecting the area it would also bisect the range of numerous animals and thus interfere with the normal balance of life which a wilderness area provides.

What about elderly people and those who are not strong? Would not a few such roads enable them to secure a taste of wildness unobtainable elsewhere?

There is, in truth, nothing that such roads would provide that cannot now be enjoyed on established highways through national parks and along the fringes of the wilderness. Wherever a road goes it brings with it the same fringe conditions that are found elsewhere. The real wilderness always lies in solitude away from the highway. Preserving the wilderness intact without roads thus does not deprive those who are unable to travel by trail or canoe of anything they cannot find in other places. The building of roads through wilderness areas, with its destruction of wilderness, would merely add to something relatively abundant, and subtract from something relatively scarce.

But couldn't just short roads be built in from the edge to, say, ski runs on mountainsides?

Here again the problem arises of what is a wilderness and what alters it until it is no longer a wilderness. Plans to develop portions of such areas—often in themselves attractive—are manifold. But it should be axiomatic that only those uses should be permitted that do not lessen or destroy the wilderness character of the area or any part of it.

Under these conditions, is not the preservation of such areas a special privilege for a minority group, namely those who are interested in wilderness for its own sake?

I remember discussing this point one overcast January day with Howard Zahniser, executive secretary of the Wilderness Society, as we walked down a street in Washington, D.C. He observed, quite rightly, that the National Art Gallery, with all its treasures, is used by only a small proportion of the people at any one time. Someone might say: "See all this floorspace going to waste. Only the walls are being used. Let's turn this into a roller-skating rink. It will attract more people and the skaters can look at the pictures as they go by." More people, no doubt, would be attracted but the essential, higher purpose for which the gallery was erected would be lost. Anyone is free to visit the art gallery but not to turn it into something else. Similarly anyone is free to visit a wilderness area so long as its character is not altered. None of the regulations governing the areas provides for special users. As Olaus J. Murie has said: "It is not for the sake of any privileged few that we are thus working for wilderness preservation, but rather for all Americans." At present, those who fully appreciate wilderness values are, in all probability, a minority. But in time, as the pioneer attitudes of our history recede, as the pressures of civilization increase, this minority may be no longer a minority. Every test in recent years has indicated that when an issue is posed the majority of voters favors preserving the wilderness. In fact, it may be true that even now the wilderness supporters comprise no minority at all but rather a silent majority.

The tonic of wildness, contact with the realities of the unchanged wilderness, these will grow increasingly precious in years to come. For going to the wilderness is not a flight from life. It is escape—but escape to reality, escape from all that is artificial in civilization. There we have left behind the forced-draft din of the advertisers, shouting that every want is a need. There we are no longer surrounded by today's thousand and one "improved means to unimproved ends." There we are in contact only with timeless and basic things.

One last question: In a country of growing population should not every acre be put to use?

Wilderness acres are put to use. They are useful to man for many things, the most important of all being such things as—to use John Ruskin's phrase—we do not "sell or pawn or in any other way turn into money." I walked, one morning some years ago, through a woods and around a lake with a New York businessman. His interest in nature was entirely confined to two recurring questions: "What's that? What good is it?" By good he meant good to his stomach or his pocketbook. A different yardstick is needed to measure the usefulness of the wilderness. Such areas are not to be considered merely as storehouses of lumber and reservoirs of waterpower for future use. They are storehouses of wildness, and wildness will become an ever-increasing spiritual need in the crowded tomorrow. "We cannot base wilderness reservations on what is merchantable," Howard Zahniser once wrote, "and we should not think of wilderness resources in terms of commodities. In the wilderness there are acres and acres of forest but no board feet. The resources of the wilderness are of another order."

There is always the temptation, in an effort to obtain immediate acceptance for wilderness preservation, to base the appeal on a lower level. The danger in taking a short cut on a lower road is: you may get stuck there. If, for example, you seek to save songbirds entirely on the basis of the number of caterpillars they destroy, it takes only some super-insecticide to sweep away your arguments. If you plead for saving a wilderness area on the basis of its importance as a watershed, you may find that, some time later on, new method of management make only a fraction of that area needed for the purpose. If you advance the argument that the area is of no use for anything else, or that the forest is no good for timber, or that lumbermen can't get in there anyhow, new techniques and new market requirements are likely to leave these seemingly practical arguments bankrupt at a later date. Only by saving the wilderness as wilderness will the goals of its long-time preservation be achieved.

This does not mean that protection of the wilderness is divorced in any way from the overall program of conservation. It is integrated with many phases of land use and land management. The development of sound forestry practices outside the areas, for instance, is of vital importance. As long as we continue to cut timber faster than we grow it, the pressure to invade wilderness tracts will mount. Only if reforestation on a wide scale and more efficient timber management are able to achieve a sustained yield outside the wilderness areas will these preserves be safe. Even if the great forests of the Olympic National Park, one of the glories of the Nation, were thrown open to the saw, it is estimated the available trees there would sustain the local lumber economy for only about a decade and then, with the irreplaceable forests gone, the need for more trees

would be as pressing as ever. Taking the easy way and throwing open the forests of wilderness preserves to lumbering will never offer a permanent solution to the problem. That solution must be found outside such areas if it is to be found at all.

There are, at the present time, wilderness tracts of many kinds, particularly in and to the west of the Rocky Mountains. They are under the jurisdiction of the National Park Service, the U.S. Forest Service, the Fish and Wildlife Service, and—subject to the approval of the Indians themselves—the Bureau of Indian Affairs. They vary greatly in size. They vary widely in designation. Within the national forests, some are called roadless areas, some primitive areas, some wild areas, and some wilderness areas. The wilderness area is the largest. It must be 100,000 acres or more in size. A wild area, on the other hand, ranges from 100,000 down to 5,000 acres. In the national forests alone, 81 acres have been set aside, totaling 14 million acres.

The whole program of wilderness preservation, although never formulated as such by Congress, has grown steadily in importance and popular interest. Its greatest danger at present is the fact that the status of any area can be altered merely by administrative decree. A more solid foundation in law is required if the areas that have already been set aside are to continue as "land forever wild."

It is for this purpose that Senator HUBERT HUMPHREY, of Minnesota, with a group of cosponsors in the Senate, and Representatives JOHN P. SAYLOR, of Pennsylvania, LEE METCALF, of Montana, and others in the House of Representatives, have introduced into the present Congress a bipartisan bill to establish a National Wilderness Preservation System. For the first time, it would give legal recognition to wilderness preservation as a national policy. It would designate specific areas to be set aside. It would outline the public policy in regard to them—such as that "man himself is a member of the natural community who visits but does not remain and whose travels leave only trails." It would set up a central advisory and information group, a repository of files for the system, known as the National Wilderness Preservation Council. In the main, the bill would preserve the status quo. No new land would be added. No new land administration agency would be set up. Jurisdiction would continue, as in the past, in various agencies of the Government.

However, public hearings would be required before the status of any area could be altered and Congress would have a chance to review any changes in the areas. Shifts by directorial fiat would be eliminated. Such changes would have to be freely announced and freely discussed before they could be put into execution. One other major change would be included in the legislation. At present anyone who reports a mining discovery in a wilderness area not only can stake out a claim but can have a road built into the spot. This continual threat to the integrity of wilderness areas would be eliminated by the legislation proposed.

Known as the National Wilderness Preservation Act, it represents one of the most important steps forward in the history of wilderness conservation in America. Hearings planned for late spring and summer should be of paramount interest to every conservationist. The sponsoring Senators and Representatives already have been greatly encouraged by the number of letters received from citizens expressing approval of the plan. The writer of every such letter plays a cumulatively important part in providing the impetus required for passage of this needed legislation. If the conservation support that defeated the attempted invasion of the Dinosaur National Monument rallies to the support of the wilderness bill its passage appears certain.

The wilderness itself is always perishable, as perishable as a pasqueflower or a warbler. Once destroyed it is forever gone. History has decided what wilderness areas are available for us to preserve. What is done in our time will determine what will be left for succeeding generations to preserve.

In a democracy one generation does not tie the hands of the next. The ultimate disposition of wilderness lands will be made by those who come later. So it is never enough to establish sanctuaries and then sit back content. Education, continual education, that will be handed on as the land is handed on, is also required.

Land forever wild. How long will forever be? The answer to this question depends upon two things. One is how well we preserve that which we have an opportunity of preserving in our own day. The other is how well those of a later day are brought to understand the value of wildness in the lives of men and all the resources of the spirit that lie within the wilderness.

Mr. CHURCH. Madam President, I ask unanimous consent that sundry telegrams I have received during the day from citizens of the State of Idaho expressing support for the bill be printed in the RECORD at this point.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

BOISE, IDAHO, *September 6, 1961.*

Senator FRANK CHURCH,
Senate Office Building,
Washington, D.C.

DEAR SENATOR CHURCH: Appreciate your courageous and effective work for the wilderness bill today. We urge your support and encourage passage as soon as possible.

IDAHO WILDLIFE FEDERATION,
ERNEST E. DAY, *President.*

CALDWELL, IDAHO,
September 6, 1961.

Senator FRANK CHURCH,
Senate Office Building,
Washington, D.C.:

Congratulations on wilderness bill support. There are many of us rank-and-file Idaho citizens behind you in your support of the bill.

LYLE M. STANFORD.

BOISE, IDAHO,
September 6, 1961.

Senator FRANK CHURCH,
Senate Office Building,
Washington, D.C.:

The members of the Ada County Fish & Game League appreciate your efforts today on the wilderness bill. Contrary to the Statesman editorials, a vote for the bill is a vote from every free-thinking citizen of Idaho. We are all behind you and commend your efforts.

W. W. BENSON, *President.*

BOISE, IDAHO,
September 6, 1961.

Hon. FRANK CHURCH,
U.S. Senate,
Senate Office Building,
Washington, D.C.:

Proud of your advocacy of wilderness bill. Senate should credit public interest by passage without Aliott and Dworshak amendments.

BRUCE BOWLER.

CALDWELL, IDAHO,
September 6, 1961.

Hon. FRANK CHURCH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHURCH: Keep up your splendid fight to save the wilderness bill so that future generations may know what outdoor America is really like.

COLLEGE OF IDAHO,
L. L. MCCRERY.

COEUR D'ALENE, IDAHO,
September 6, 1961.

Senator FRANK CHURCH,
Senate Office Building,
Washington, D.C.:

You are to be commended for your courageous action on the wilderness bill today. We here at home are standing behind you and will give you all of our support. We trust you will vote in favor of the wilderness bill tomorrow without weakening amendments.

BILL DUFF,
Chairman, District No. 1, Idaho Wildlife Federation.

CALDWELL, IDAHO,
September 6, 1961.

FRANK CHURCH,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: We are Idaho farmers vitally interested in preserving our forests and their resources so we are behind you and the wilderness bill 100 percent. Please cast our vote "yea."

Mr. and Mrs. DONALD BLANC.

Mr. CHURCH. Madam President, I express my thanks to the Members of the Senate who have been so kind in their references to the part I have had to play in the passage of this legislation.

I should be remiss if I did not emphasize that the distinguished chairman of the committee [Mr. ANDERSON] is the man who really deserves the credit. He finally broke the logjam which held the bill in the committee for 5 long years. He brought the many questions to issue, and saw to it that the committee addressed itself to the vexatious problems which faced us, all of which resulted in the amended bill which was finally reported to the Senate. I am only sorry that the Senator from New Mexico could not be present, because of a temporary illness, to lead the debate in the Senate on a bill which is very close to his heart.

I also express appreciation to the distinguished junior Senator from Montana, the present Presiding Officer [Mr. METCALF] who was of such great assistance to all of us throughout the course of the debate, who was ever ready to help in every possible way.

The Senator from Washington [Mr. JACKSON] has long been interested in the wilderness bill. He has given great leadership to the cause. He certainly should be singled out for special commendation.

The same is true of the distinguished senior Senator from Minnesota [Mr. HUMPHREY] who has been in the Chamber whenever needed in the course of debate. The Senator from Minnesota was one of the original sponsors of the proposed legislation and has done much to promote its cause everywhere in the country. To him go our very special thanks.

I also want to specifically mention the stalwart service rendered to my friend, the junior Senator from Utah [Mr. Moss].

Mr. President, I commend all the members of the Committee on Interior and Insular Affairs, all the Senators from the States of the intermountain

West, who are so directly affected by the bill, for the role they played in bringing this cause to final fruition.

Mr. President, as I remarked in my opening statement yesterday, in the 5 years I have been a Member of the Senate I recall three bills which have come from the Committee on Interior and Insular Affairs of great historic significance. I am very proud that I have had an opportunity, in the course of the 5 years, to play a role in the passage of each bill.

The first was the bill granting statehood to Alaska.

The second was the bill granting statehood to Hawaii.

The third is the wilderness bill.

I supported the wilderness bill for the many reasons which I have stated during the course of the debate, but I must emphasize in closing that the ultimate reason, above all others, is a philosophical reason. Though we tend to feel that we are presently the owners of this country, we are not, in any true philosophical sense. We are the trustees of this country for a little time only. Our fathers and our grandfathers before us, though they may be dead and gone, still have a claim upon this country. Our children, our grandchildren, and generations yet unborn, who will come after us, have rights in this country. Our trusteeship will quickly pass, and we owe a responsibility to our forefathers before us and to our children after us to see to it that the trust is properly discharged.

Mr. President, the proper discharge of that trust is partly within the province of this bill. Unless we enact a wilderness bill, we shall soon lose the opportunity to preserve intact wild lands which, once overrun, can never be repossessed.

The great purpose of the wilderness bill is to set aside a reasonable part of the vanishing wilderness, to make certain that generations of Americans yet unborn will know what it is to experience life on undeveloped, unoccupied land in the same form and character as the Creator fashioned it. This is an experience we in the West can still know. The enactment of the bill will mean that our children will know it, too.

It is a great spiritual experience. I never knew a man who ever took a bedroll onto an Idaho mountainside and slept there under a star-studded summer sky who felt self-important the next morning. Unless we preserve some opportunity for future generations to have the same experience, we shall have dishonored our trust to posterity.

I am very proud of the step the Senate is about to take. I think the wilderness bill will go down as one of the great conservation measures, in the tradition of Theodore Roosevelt, of Gifford Pinchot, and all the dedicated conservationists who followed in their paths.

In this connection, I wish to say that the bill has had no partisan character. It has received widespread support from the Republican as well as from the Democratic side of the aisle. Time and time again, during the debate, we have relied upon the cogent arguments of the distinguished assistant minority leader from the great State of California [Mr. KUCHEL], who has given effective leadership to the cause.

To all who have had a part to play, I express my own appreciation. I think the Senate will take a noble and historic step by passing the wilderness bill.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. HUMPHREY. First, I thank the Senator for his generous remarks.

I am sure the Senator from Idaho would agree with me that if there were a way we could put a name or a title to the bill other than to call it the wilderness preservation bill we would wish to dedicate it to two of our beloved and departed colleagues who really pioneered the way.

One was the great Senator from Montana, the late Senator Murray, whose courage was second to none, and who really was a great conservationist. He loved the work in which he engaged, particularly the study, promotion, and preservation of the great wilderness areas of our Nation.

The second was the late and beloved Senator from Oregon, Dick Neuberger. I would hope that somehow or other we could look upon the bill which has been handled and managed by the extremely capable, dedicated and distinguished Senator from Idaho [Mr. CHURCH] as a memorial, in a sense, to Senator Murray and Senator Neuberger—a real living memorial to two men who literally gave of their lives for the protection of the future.

I wish to join with the Senator from Idaho [Mr. CHURCH] in saying that the proposed legislation deals not only with the present but with the future and is really a great gift to the children of tomorrow. I hope that Senators will remember the pioneering that was done by those whom I have mentioned.

If the Senator will permit me, I should like to say there is one private citizen above all others I can think of whom I have seen in and around the Senate for many years urging the adoption of this particular type of legislation. I do not say that he urged the adoption of every title, section and line of S. 174. But he urged that Congress take affirmative action to protect the great primitive and wilderness areas. That man was Howard Zahniser of the Citizens Natural Resources Committee. He is truly a conservationist, a dedicated individual and a good citizen. I wish to pay my respects to him because during the years he has been very helpful to me as we have had to plan and work in behalf of the proposed legislation.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to the distinguished Senator from California.

Mr. KUCHEL. I am grateful for the generous comment of my friend, the Senator from Idaho. I was glad in the debate today to be alined with him and others from both sides of the aisle in producing a convincing majority for a piece of proposed legislation which he so eloquently described will be in the interest of the American people and future generations who come afterward. I thank my friend for his comment.

Mr. CHURCH. I thank the Senator very much.

I wish to say that all of us on the committee owe a debt of gratitude to the staff members who have been so helpful, particularly to Ben Stong of our committee staff, and to Stewart French, our counsel, who have worked long and hard upon the bill.

I wish to associate myself fully with the statement that has been made by the distinguished Senator from Minnesota [Mr. HUMPHREY] that if the bill could carry the names of two Senators it should properly bear the names of the late great Senators Neuberger and Murray. I am very thankful that the Senator made the remarks he did on that point, because no more fitting or deserving memorial to these two great men could be proposed than that of the wilderness bill.

Mr. JAVITS. Mr. President, the State of New York has a great conservation tradition, as exemplified by the Adirondack and Catskill conservation areas.

I shall support the bill.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROUTY (when his name was called). On this vote I have a pair with the Senator from Arizona [Mr. GOLDWATER]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would note "yea." I therefore withhold my vote.

The rollcall was concluded.

Mr. HICKEY (after having voted in the negative). Mr. President, on this vote I have a pair with the senior Senator from Oregon [Mr. MORSE]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. LONG of Louisiana (after having voted in the negative). Mr. President, on this vote I have a pair with the junior Senator from New Mexico [Mr. ANDERSON]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

Mr. HUMPHREY. I announce that the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Washington [Mr. MAGNUSON], and the Senator from Oregon [Mr. MORSE] are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON] and the Senator from New Mexico [Mr. CHAVEZ] are absent because of illness.

I further announce that the Senator from West Virginia [Mr. RANDOLPH] is necessarily absent.

I further announce that, if present and voting, the Senator from Arkansas [Mr. FULBRIGHT] and the Senator from West Virginia [Mr. RANDOLPH] would each vote "yea."

On this vote, the Senator from New Mexico [Mr. CHAVEZ] is paired with the

Senator from North Dakota [Mr. YOUNG]. If present and voting, the Senator from New Mexico would vote "yea" and the Senator from North Dakota would vote "nay."

On this vote, the Senator from Washington [Mr. MAGNUSON] is paired with the Senator from Kansas [Mr. CARLSON]. If present and voting, the Senator from Washington would vote "yea" and the Senator from Kansas would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON] are absent because of illness.

The Senator from Illinois [Mr. DIRKSEN] and the Senator from North Dakota [Mr. YOUNG] are necessarily absent.

The Senator from Arizona [Mr. GOLDWATER] is detained on official business, and his pair has been previously announced.

On this vote, the Senator from Kansas [Mr. CARLSON] is paired with the Senator from Washington [Mr. MAGNUSON]. If present and voting, the Senator from Kansas would vote "nay," and the Senator from Washington would vote "yea."

On this vote, the Senator from North Dakota [Mr. YOUNG] is paired with the Senator from New Mexico [Mr. CHAVEZ]. If present and voting, the Senator from North Dakota would vote "nay," and the Senator from New Mexico would vote "yea."

The result was announced—yeas 78, nays 8, as follows:

[No. 188]

So the bill (S. 174) was passed.

Mr. CHURCH. Mr. President, I ask unanimous consent that the bill be printed as it passed the Senate today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement on the bill by the junior Senator from New Mexico [Mr. ANDERSON].

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Senator CLINTON P. ANDERSON, Democrat, of New Mexico, who introduced the wilderness bill, issued the following statement from Albuquerque, where he is recovering from a recent operation:

"Senate passage of the wilderness bill is testimony that this Nation regards the preservation of part of its sternest regions as a solemn trust to future generations.

"Support for the wilderness system came from members of both parties and was widespread among many groups across the Nation. I am optimistic about its future in the House."

Mr. JACKSON. Mr. President, as all of us know, Senator ANDERSON has worked for many years on this legislation. It is regrettable that he could not be here at this time. But I know that he, too, is indeed appreciative of the admirable way in which the Senator from Idaho [Mr. CHURCH] and others have handled the bill on the floor of the Senate.

Mr. KUCHEL. Mr. President, I have sundry editorials in connection with the wilderness bill which I ask to have printed at this point in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the San Francisco Examiner, June 26, 1961]

THE WILDERNESS BILL

The bill designed to establish a national wilderness preservation system is scheduled for a hearing before the Interior and Insular Affairs Committee of the U.S. Senate Wednesday. This is the latest of the series of hurdles it has confronted in the last 5 years.

Unless there is to be frustration again in the campaign to get final congressional approval of this important measure, there will have to be a lot of muscling up of public support.

The recent public hearings in Washington clearly established the interest in the bill and the awareness of its necessity. But the drive of commercial interests to bottle it up in committee is strong. The obvious offset is to make a sufficient show of public concern to impress the members of the committee.

There are compelling factors in the situation. The Nation cannot afford the waste of even a small part of another 5 years in bringing the wilderness program to fruition. Preservation of our wilderness resources is not merely one of the imperatives of our national life, but a matter of dwindling opportunity. Less than 2 percent of the national land area now remains in primitive state. The inroads of commerce put an unrelenting time limit on the cause of conservation.

[From the San Francisco News-Call Bulletin, July 17, 1961]

SAVING THE WILDERNESS

The wilderness bill approved by the Senate Interior Committee last week, while not perfection itself, nevertheless is a tremendous stride toward preservation of America's dwindling wild natural areas.

For the first time, it puts a congressional mantle of protection around such areas. Heretofore action was left up to the Forest Service for administrative decision. Since that branch of the Government traditionally has viewed forests as a crop to harvest, the last of our virgin lands has continued to shrink.

The bill protects 13 million acres of wilderness, a substantial fraction of which lies in California. It excludes another 8 million acres. The bill should be amended to include them. The wilderness is nearly saved. It would be a shame to have it leak away through a loophole in the bill.

We are not so rich that we can afford to throw away our wilderness, nor so poor that we must exploit it to survive.

[From the San Francisco Examiner, July 18, 1961]

WILDERNESS GAIN

The Senate Interior Committee, in giving a resounding 11-to-4 vote of approval to the wilderness bill, has at long last cleared the way for a vote by the full Senate on this vital conservation measure. We are delighted.

It has taken 5 years to get the bill out of committee. Let us hope the Senate action will be more expeditious, and also favorable.

The wilderness bill safeguards 13 million acres of national forest land against reckless commercial exploitation and devastation. It leaves the way open for preservation of eight more millions of acres of primitive park and wildlife refuge lands for the perpetual enjoyment and inspiration of future generations.

The setting aside of the Nation's small remaining assets of open space is a matter upon which much precious time has been spent. Much remains to be done within the ever-narrowing circle of time that is left.

[From the San Francisco Chronicle, July 19, 1961]

WILDERNESS BILL GAINS

For the first time in more than 5 years, a bill to create a system of wilderness areas—initially, about 13 million acres of national forest land—has cleared the Senate Interior Committee. Chairman CLINTON P. ANDERSON hails it, and so do we, as a great step in the conservation of rugged, primitive domains of our fast-disappearing wilderness.

Senator THOMAS H. KUCHEL, of California, played an essential part in getting the bill favorably considered, this despite considerable pressure from stockmen, lumbermen and miners among its opponents. He deserves credit for fighting for the larger interests of the public.

[From the Sacramento (Calif.) Bee, July 9, 1961]

PRESERVATION OF WILDERNESS AREAS IS THE RESPONSIBILITY OF CONGRESS

Ever since 1957 the wilderness bill, S. 174, has been kicking about in and kicked around by Congress.

This bill proposes that the Nation select about 30 to 40 million acres of its most scenic and primitive land from that now in national forests, national parks, wildlife refuges, and game ranges to be held untouched by ax, saw, drill, or wheel.

The current issue of the Saturday Evening Post devotes a feature article to the fight over this bill. For it has been a fight. Lumber interests, oil companies, electric power developers, miners, and irrigators are likely to approach a state of apoplexy when the bill is mentioned.

To them, especially to the lumbermen of the Pacific Northwest who have developed a system of reforestation and regard forests as crops, the impounding of so much acreage in the public domain is as wasteful as some feel the lumberman's ax to be.

In a sense the forest primeval is the Nation's first historic landmark. It alone tells what this country was like when it was owned by the Indians.

The Federal Government holds 775 million acres of land. Forested national parks cover 181 million acres of this.

Lumber interests which reforest the land have a point, of course. They call attention to the forests outside their grasp where disease, insects, and unpruned growth damage the wilderness. But forest rangers should be able to solve such problems as well as do the commercial companies.

Many exploiters of natural resources stress that only a few of the Nation's people have the stamina to use the most primitive forests set apart for posterity and that the Nation should be careful to select only those areas which are locked away from commercial use.

Some scientific users of the forests do not bar people from camping, they say, but are careful to preserve as much as possible of the wildlife and actually create recreation facilities on their holdings.

The claims of the commercial interests are partially correct. They are in a sense preservers when their methods actually conserve the forests. But the other side of the shield is equally true. Government often allows controlled grazing and oil drilling and other such commercial operations on its lands.

In 1941 the late President Franklin D. Roosevelt to protect moose in Alaska ordered 2 million acres set aside as the Kenai National Moose Range. Oil was discovered there when World War II was in progress and some oil companies were granted special permits to drill.

Wildlife people worried about the effect on the moose so the oil people promised to use all kinds of precautions so as not to scare away the moose—electric drilling equipment, noise reducing machinery, preservation of the natural cover and avoidance of stream pollution. It turned out the drillers did not disturb the moose. The friendly moose disturbed the drillers.

Workers stumbled over the curious animals, the roads opened up became their chief feeding grounds and most of the Kenai herd clustered around the drilling—foremen, no doubt.

The point Congress must keep in mind is that there is a need for scenic solitude in America and preservation of the public domain, if managed practically, is a good thing.

[From the Sacramento (Calif.) Bee, July 21, 1961]

SAVE THE WILDERNESS

The Senate Interior Committee has approved a wilderness area bill which would preserve 13 million acres of forest land from human exploitation.

Much credit for the action is due Senators THOMAS H. KUCHEL, of California, and CLINTON P. ANDERSON, of New Mexico, chairman of the group.

Conservationists have been trying to get such legislation enacted for many years. They have met with opposition from lumber, mining, and cattle interests which doubtless will continue their efforts.

Both the Senate and House should move swiftly to complete action on the measure and pass it along to the President for his signature.

The Nation's primitive areas are disappearing at a rapid rate. The sooner Congress acts, the more of them can be saved.

ROBERT E. GROSS, BOARD CHAIRMAN AND CHIEF EXECUTIVE OFFICER, LOCKHEED AIRCRAFT CORP.

Mr. KUCHEL. Mr. President, the United States this week mourns the passing of a great American. The late Robert E. Gross was connected with the Lockheed Aircraft Corp. for over a quarter of a century. He was a dedicated patriot and industrial giant. He devoted the genius and skill of his labors to bringing to the Government and the people of the United States much of the strength that was necessary to preserve this Nation in World War II.

As the executive head of Lockheed for many years, under his direction much of the marvelous development of science to protect and defend the American people came into being. There was the Agena, the first satellite to achieve polar orbit. There was the Polaris, the first successful missile ever developed for underwater launching. There was the Star Fighter, the first production airplane to fly twice the speed of sound. There were the Hercules transports, the great Constellations, and many, many other aircraft which have distinguished themselves in the service of the U.S. Air Force and in the service of commercial aviation around the globe.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to my friend and colleague from California.

Mr. ENGLE. Mr. President, Robert E. Gross stated to employees of the Lockheed Aircraft Corp. on the 25th anniversary of the company in 1957 as follows:

There is a certain feeling of courage and hope when you work in the field of the air. You instinctively look up, not down. You look ahead, not back. You look ahead where the horizons are absolutely unlimited.

These words about sum up the philosophy of Bob Gross who met an untimely death on September 3. It was this philosophy that carried Bob Gross and his company to international renown in aviation and the aerospace sciences. Bob Gross guided the development of Lockheed Aircraft Corp. from a small establishment with less than 60,000 square feet of rented factory space to a 16-million-square-foot industrial giant with yearly sales of better than $1 billion, 66,500 employees, and a record of leadership in commercial and military aviation, missiles, spacecraft, electronics, propulsion, shipbuilding, heavy construction, complect transportation and communications systems, and related activities.

With Bob's death our country has lost a distinguished and outstanding contributor to aviation progress. Bob leaves behind him a great legacy. He leaves behind him also a tremendous host of friends and coworkers who had not only an abiding respect and admiration for him but a deep affection. I would like to express my personal condolences to his family and friends in their moments of sorrow.

I ask unanimous consent that certain biographical data on Bob Gross be printed at this point in the RECORD.

There being no objection, the data were ordered to be printed in the RECORD, as follows:

ROBERT E. GROSS, BOARD CHAIRMAN AND CHIEF EXECUTIVE OFFICER, LOCKHEED AIRCRAFT CORP.

Robert Ellsworth Gross was born in Roxbury, Mass., on May 11, 1897. His parents were Robert Haven Gross, a prominent figure for a quarter century in the Nation's coal and copper industries, and Mabel Bowman Gross.

Throughout his career Gross has been guided by faith in aviation's inevitable growth. He attended Newton High School in Newton, Mass., St. George's (preparatory), and Harvard College (1916–19), where he played on the hockey and baseball teams and was active in other campus affairs.

Last March 22 at the University of California's Charter Day ceremonies, Gross was awarded an honorary doctor of laws degree. The citation described him as a "businessman, builder, patriot whose life has been dedicated to giving reality to dreams of the future," and a man "who built a small depression broken business into one of the world's industrial giants."

Conferring the degree, University of California President Clark Kerr noted not only Gross' efforts in laying the foundations of international aviation for bringing the peoples of the world closer together and his leadership in aerospace activities for a strengthened defense for America, but also his work as a "civic leader with a deep sense of human values who continues to concentrate on new projects for a peaceful, better world of tomorrow."

His record of public service and an active business life included membership on the boards of the Good Samaritan Hospital in Los Angeles and the Children's Hospital in Boston.

He was southwest area chairman and vice chairman of the United Community Campaigns of America and chairman of the U.S. savings bond campaign in 1957.

Active in the affairs of St. Alban's Episcopal Church and the Los Angeles Diocese, Mr. Gross was awarded an honorary doctoral degree by the University of Redlands for his religious and civic work. He served as a trustee for the Boys Club of Southern California and as a member of the board of the Arthritis and Rheumatism Foundation.

In June (June 22) of this year he received one of four National Brotherhood Awards at the 13th annual brotherhood testimonial dinner in Los Angeles.

Demonstrating a continuing interest in the education of America's youth, he was a member of the Art Council of the University of California at Los Angeles. He served as overseer of Harvard University during the 1950's and is now helping direct the Lockheed leadership fund in assisting worthy students studying for careers related to the aerospace industry.

In 1955 he served as president of the Institute of Aeronautical Sciences and was named California Industrialist of the Year in 1959.

Gross began his business career in Boston with Lee, Higginson & Co., a banking firm, shortly after his graduation from Harvard. Later he served in New York, then London, traveling widely on the Continent, where he received liberal training in international banking and corporate finance.

In 1928 Lee, Higginson dispatched Gross, who had become a specialist in aviation investments, to study the growth possibilities of the Stearman Airplane Co., in Wichita, Kans. Impressed with Stearman's prospects, Gross invested $20,000 of his own money in Stearman.

At that time Gross made another sally into the airplane business when he and his younger brother, Courtlandt S. Gross, launched the Viking Flying Boat Co., at New Haven, Conn. The world market collapse wiped out the demand for private flying boats, but his faith in aviation's future remained high.

Becoming interested in Varney Speed Lines, a small, swift California airline, Gross was impressed by the speed and performance of Varney's Lockheed-built low-wing Orion transports on his Los Angeles-San Francisco run. Believing that in the Lockheed Aircraft Co., then in bankruptcy, there lay the nucleus of a successful aviation enterprise,

he and a group of associates—including Walter T. Varney, Lloyd Stearman, and Cyril Chappellet, now a Lockheed senior vice president—purchased assets of the Burbank, Calif., company in June 1932.

In the middle of the most severe economic setback the United States had yet experienced, they formed the present Lockheed Aircraft Corp. with Stearman as president and Gross as treasurer and chairman of the board.

No one knew better than Gross the difficulties that lay ahead in building a strong business from what was at best a speculative investment. Gross retained the board chairmanship and took on added responsibilities as president in 1934. He became chief executive officer and chairman in 1956 when Courtlandt S. Gross was elected president of Lockheed and assumed active management of the corporation.

At the same time, D. J. Haughton assumed the post of executive vice president previously held by Courtlandt Gross.

Under the management team Lockheed has devoted itself to massive scientific and engineering endeavors. It has grown to America's 28th largest industrial firm. Its interests have spread over the free world, with offices and facilities on five continents.

Among the achievements of Lockheed under the Gross brothers' leadership: The Agena, first satellite to achieve polar orbit; the Polaris, first successful missile ever developed for underwater launching; the Starfighter, first production airplane to fly twice the speed of sound.

Hercules transports continue to come from Lockheed plant in Marietta, Ga., to fly at the top and bottom of the world, and from the same factory are coming the world's first compact jet transports for corporate and governmental uses.

Neptunes, America's longest-lived production airplanes, flow even yet from Burbank assembly lines, along with newer Orions for meeting the antisubmarine menace.

Today Lockheed employs 66,556 persons, all devoted to new advances in aviation, electronics, shipbuilding, space sciences and related fields. The company's net assets come to $548 million.

Gross was honored by France and the Netherlands with awards as Chevalier of the Legion of Honor and the Order of Orange-Nassau for his contributions to the development of the Constellation series of airliners which made intercontinental movement of people and cargo practicable.

"We have soared above into the clear colorless regions of space where the white radiance of eternity is unstained and where truth may be found pure and undistorted," he told a group of San Francisco industrialists in February.

"It is my hope that our penetration of space will bring this white radiance into the lives of all of us and that our expanding knowledge of the universe will be matched by an increasing knowledge of how to live with each other."

Mr. KUCHEL. Mr. President, I aline myself completely with the sentiments expressed by my colleague, and I ask unanimous consent that a statement concerning the late Robert E. Gross be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ROBERT E. GROSS, BOARD CHAIRMAN AND CHIEF EXECUTIVE OFFICER, LOCKHEED AIRCRAFT CORP.

"There is a certain feeling of courage and hope when you work in the field of the air. You instinctively look up, not down. You look ahead, not back. You look ahead where the horizons are absolutely unlimited."

So spoke the late Robert E. Gross to employees of the Lockheed Aircraft Corp. on the 25th anniversary of the company in 1957.

This philosophy and vision carried Bob Gross and his company to international renown in aviation and the aerospace sciences.

Robert Ellsworth Gross was born in Roxbury, Mass., on May 11, 1897. His parents were Robert Haven Gross, a prominent figure for a quarter century in the Nation's coal and copper industries, and Mabel Bowman Gross.

Throughout his career Gross was guided by faith in aviation's inevitable growth. He attended Newton High School in Newton, Mass., St. George's (preparatory), and Harvard College (1916–19), where he played on the hockey and baseball teams and was active in other campus affairs.

He looked instinctively to the skies 33 years ago and he continued to look up, and ahead, to unlimited horizons.

Gross guided the development of Lockheed Aircraft Corp. from a small establishment with less than 60,000 square feet of rented factory space to a 16-million-square-foot industrial giant with yearly sales of better than $1 billion, 66,500 employees, and a record of leadership in commercial and military aviation, missiles, spacecraft, electronics, propulsion, shipbuilding, heavy construction, complex transportation and communications systems, and related activities.

Last March 22 at the University of California's charter day ceremonies, Gross was awarded an honorary doctor of laws degree. The citation described him as a "businessman, builder, patriot whose life has been dedicated to giving reality to dreams of the future," and a man "who built a small depression-broken business into one of the world's industrial giants."

Conferring the degree, University of California President Clark Kerr noted not only Gross' efforts in laying the foundations of international aviation for bringing the peoples of the world closer together and his leadership in aerospace activities for a strengthened defense for America, but also his work as a "civic leader with a deep sense of human values who continues to concentrate on new projects for a peaceful, better world of tomorrow."

His record of public service and an active business life included membership on the boards of the Good Samaritan Hospital in Los Angeles and the Children's Hospital in Boston.

He was southwest area chairman and vice chairman of the United Community Campaigns of America and chairman of the U.S. savings bond campaign in 1957.

Active in the affairs of St. Alban's Episcopal Church and the Los Angeles diocese, Mr. Gross was awarded an honorary doctoral degree by the University of Redlands for his religious and civic work. He served as a trustee for the Boys Club of Southern California and as a member of the board of the Arthritis and Rheumatism Foundation.

In June (June 22) of this year he received one of four national brotherhood awards at the 13th annual brotherhood testimonial dinner in Los Angeles.

Demonstrating a continuing interest in the education of America's youth, he was a member of the Art Council of the University of California at Los Angeles. He served as overseer of Harvard University during the 1950's and helped direct the Lockheed leadership fund in assisting worthy students studying for careers related to the aerospace industry.

In 1955 he served as president of the Institute of Aeronautical Sciences and was named California Industrialist of the Year in 1959.

Gross began his business career in Boston with Lee, Higginson & Co., a banking firm, shortly after his graduation from Harvard. Later he served in New York, then London, traveling widely on the continent, where he received liberal training in international banking and corporate finance.

In 1928 Lee, Higginson dispatched Gross, who had become a specialist in aviation investments, to study the growth possibilities of the Stearman Airplane Co. in Wichita, Kans. Impressed with Stearman's prospects, Gross invested $20,000 of his own money in Stearman.

At that time Gross made another sally into the airplane business when he and his younger brother, Courtlandt S. Gross, launched the Viking Flying Boat Co. at New Haven, Conn. The world market collapse wiped out the demand for private flying boats, but his faith in aviation's future remained high.

Becoming interested in Varney Speed Lines, a small, swift California airline, Gross was impressed by the speed and performance of Varney's Lockheed-built low-wing Orion transports on his Los Angeles-San Francisco run. Believing that in the Lockheed Aircraft Co., then in bankruptcy, there lay the nucleus of a successful aviation enterprise, he and a group of associates—including Walter T. Varney, Lloyd Stearman, and Cyril Chappellet, now a Lockheed senior vice president—purchased assets of the Burbank, Calif., company in June 1932.

In the middle of the most severe economic setback the United States had yet experienced, they formed the present Lockheed Aircraft Corp. with Stearman as president and Gross as treasurer and chairman of the board.

No one knew better than Gross the difficulties that lay ahead in building a strong business from what was at best a speculative investment. Gross retained the board chairmanship and took on added responsibilities as president in 1934. He became chief executive officer and chairman in 1956 when Courtlandt S. Gross was elected president of Lockheed and assumed active management of the corporation.

At the same time, D. J. Haughton assumed the post of executive vice president previously held by Courtlandt Gross.

Under the management team Lockheed has devoted itself to massive scientific and engineering endeavors. It has grown to America's 28th largest industrial firm. Its interests have spread over the free world, with offices and facilities on five continents.

Among the achievements of Lockheed under the Gross brothers' leadership: The Agena, first satellite to achieve polar orbit; the Polaris, first successful missile ever developed for underwater launching; the Starfighter, first production airplane to fly twice the speed of sound.

Hercules transports continue to come from Lockheed plant in Marietta, Ga., to fly at the top and bottom of the world, and from the same factory are coming the world's first compact jet transports for corporate and governmental uses.

Neptunes, America's longest-lived production airplanes, flow even yet from Burbank assembly lines, along with newer Orions for meeting the antisubmarine menace.

Today Lockheed employs 66,556 persons, all devoted to new advances in aviation, electronics, shipbuilding, space sciences and related fields. The company's net assets come to $548 million.

Gross and the former Mary Bradford Palmer were married in 1920. They had one daughter, Palmer (Mrs. Charles E. Ducommun) and two grandchildren, Electra and Robert. They lived in Bel-Air, Los Angeles, with a beach home near Carpenteria, Calif. His mother, Mabel Bowman Gross, lives in Los Angeles. Gross' hobbies included fishing, cooking, and playing the piano. He liked baseball, football, dancing, and art. He was a great American, known around the globe as a gallant leader in man's conquest of the air and of the vast reaches of space beyond.

LEGISLATIVE PROGRAM

Mr. KUCHEL. Mr. President, I would like to ask the distinguished majority leader what the plans are for the labor of the Senate.

Mr. MANSFIELD. Mr. President, in response to the question of the distinguished acting minority leader, the Senate has already agreed that we will come into session at 9 o'clock tomorrow morning. We have an agreement also that following the morning hour we shall take up the items on the calendar to which there is no objection. Following that it is my understanding that various Senators will wish to discuss the steel situation, especially as it relates to prices and wages.

After that we will proceed to the consideration of various pieces of legislation awaiting consideration by the Senate.

POINT REYES NATIONAL SEASHORE, CALIF.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that Calendar No. 789, S. 476, be made the pending business.

The PRESIDING OFFICER (Mr. METCALF in the chair). The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 476) to establish the Point Reyes National Seashore in the State of California, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

Mr. KUCHEL. Mr. President, reserving the right to object—and I shall not object but, to the contrary, look with great glee upon the request made by the able majority leader—I thank him most humbly on behalf of the people of my State that this important bill will now receive the consideration of the Senate.

Mr. MANSFIELD. The person the Senator should thank is the senior Senator from Nevada [Mr. BIBLE], who worked long and arduously in behalf of the measure.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, following consideration of Calendar No. 789, there will be taken up Calendar No. 783, the Small Business Administration bill, S. 836; then Calendar No. 557, H.R. 2244, dealing with charitable contributions; then Calendar No. 727, Senate Joint Resolution 51, the Woodrow Wilson Memorial measure.

It is the intention then to take up Calendar No. 764, S. 923, dealing with the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in Idaho; then Calendar No. 734, S. 1563, dealing with the Clark Hill Reservoir; then Calendar No. 712, H.R. 2883, dealing with the indemnification of Federal employees.

After that, it is proposed to take up Calendar No. 842, H.R. 6775, the dual-rate shipping bill; then Calendar No. 844, H.R. 6141, to amend the Housing Act.

Possibly on Saturday there will be taken up the Disarmament Agency bill, which was reported unanimously today by the Foreign Relations Committee.

These measures will not be taken up necessarily in the order laid down, but they will be considered. No further business will be transacted this evening.

Mr. KUCHEL. I should like to ask my able friend if he still has under consideration the possibility of dealing with the Saturday session more humanely later in the week.

Mr. MANSFIELD. We have been treating Senators very humanely in the past few weeks, because there have been no meetings on Saturday.

Mr. KUCHEL. I trust the same wisdom will guide my friend in the future.

IN MEMORIAM: WALTER M. HARRISON

Mr. MONRONEY. Mr. President, the Skipper, one of the Nation's most famous newspapermen, is dead at 73, quickly, of a heart attack. The reporters and editors he taught will have to carry on his work of turning out newsmen who can write copy straight and quickly—who can get all the news, and get it before deadline. But there are hundreds of them scattered all over the world, and they have learned the hard way, so they can do it.

Walter M. Harrison, a newsman in Oklahoma for 40 years who achieved a national reputation through his alumni and as president of the American Society of Newspaper Editors and of Sigma Delta Chi, never tried to hold his star reporters when they wanted greener fields. He even helped them get more money where they were going and exulted in their successes wherever they landed. But as long as they stayed with him, he taught them and insisted on performance.

As a cub reporter I knew him as managing editor of the Daily Oklahoman and Times in Oklahoma City and as editor and columnist for the North Star nearby, but I understand from those who knew him in his 5 years of Army service, first in the Transportation Corps and then as a colonel in press headquarters of the 6th Army in the Pacific, that he was a hard hitter who demanded results there too.

One of his Army aids said today:

> He slashed at redtape. He sensed where the stories were going to be and had a man on the spot. Sometimes he went himself, mortar fire notwithstanding. He could spot a phony a mile off and strip him of his covering with a sentence.

Many of the best eulogies of Walter Harrison will not see the printed page. They are being spoken today, as people who feared the lash of his tongue at sloppiness or prized his rare compliments, share with friends or strangers their own tales of this demanding and delightful editor.

One of his former reporters insisted today:

> He was crisp, clever, hard, soft, smart, able, imaginative, witty, terse, courageous, impossible, and lovable.

Regardless of what his students thought when they worked for him or what positions of eminence they have reached today, I will wager there is not one who did not save one of these "well done—WMH" notes if they got one. Certainly there is no former employee who will forget this colorful editor.

Skipper Harrison made a real contribution to journalism in Oklahoma and to the country. I am glad he was as slim and alert, curious and alive at 73 when I saw him earlier this year as he was when I first knew him 30-odd years ago. I ask unanimous consent to insert in the RECORD the story of his death from the New York Times today.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WALTER M. HARRISON DEAD AT 73; OKLAHOMA NEWSMAN 40 YEARS

OKLAHOMA CITY, September 5.—Walter M. Harrison, Oklahoma newspaper editor for more than 40 years, died today in an Oklahoma City hospital of a coronary thrombosis. He was 73 years old.

Mr. Harrison was board chairman of the Brittion Printing Co., Inc., lessee of the North Star, a weekly newspaper. He had been editor and publisher from 1949 until 1957 when he became board chairman.

The Skipper, as he was known to hundreds of newspapermen who worked for him, suffered his first attack Friday while flying to Las Vegas to close a deal for a newspaper executive post with the Don Reynolds newspaper and television chain. He was to serve as a consultant for the chain during a period of reorganization.

Mr. Harrison returned to Oklahoma City and suffered a second attack Sunday morning.

He was managing editor of the Daily Oklahoman and Oklahoma City Times for 30 years and served one term as president of the American Society of Newspaper Editors. He also served as a member of the Oklahoma City council from 1949 until 1957, and made three unsuccessful races for mayor.

Mr. Harrison was born August 16, 1888, in Irvington, Ky. He came to Oklahoma in 1916 after having worked as managing editor of the Winnipeg Tribune in Manitoba. He also worked on newspapers in Des Moines and Minneapolis.

He spent 5 years on active duty during World War II and at his death was a colonel in the Inactive Reserve.

HOUSING STANDARDS OF LATIN AMERICAN NATIONS

Mr. MONRONEY. Mr. President, the United States in recent years has been engaged in seeking means to raise the housing standards of Latin American nations. Private enterprise, too, has been doing its share. I should like to call your attention to the efforts in this field being made by the National Association of Home Builders.

Many of its members have volunteered their services to the Government and have made housing studies in the Latin American nations. The organization has a committee on international housing which is concerned solely with this endeavor. Its chairman is Paul L. Burkhard, who has been in the building field for more than 30 years and is a former mayor of Glendale, Calif. I ask permission that remarks he made to the National Association of Home Builders International Housing Committee at a

recent meeting of the National Association of Home Builders board of directors be inserted in the RECORD. They outline clearly, concisely, and definitively the objects of the private homebuilding industry to raise housing standards in Latin America.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

STATEMENT BY PAUL L. BURKHARD

Numerous historic events have occurred during the past year which will influence or determine international housing policies for the coming year and possibly many years to come.

These include the Act of Bogotá, the President's alliance for progress, loans made by the Development Loan Fund, the creation of the Inter-American Development Bank, the meeting of the Organization of American States in Montevideo, and finally the Act for International Development of 1961.

Housing is one of the most tangible benefits which can be bestowed upon a long-suffering people in newly developing nations who, now for the first time, have been given a glimmer of hope for a better life for themselves and their children in a secure atmosphere of freedom.

Members of this committee have volunteered their services to the International Cooperation Administration for the purpose of making housing studies in a number of selected countries. They have served on missions to Mexico, Guatemala, El Salvador, Ecuador, Peru, Chile, and Jamaica. Housing tours sponsored by the National Association of Home Builders have visited many other nations. Members have made firsthand studies of housing problems in many critical areas and met with governmental officials. Discussions with local engineers, architects, and contractors covered the full scope of building problems including construction methods and financing difficulties.

In all countries visited the local construction people emphasized that the greatest boon to the development of a housing industry would be participation by experienced American homebuilders in joint ventures, not only to stimulate the construction of homes but to promote the economic development of the country.

As homebuilders we submit that the stanchest defender of private property and the most dependable opponent of communism is the man who owns a home of his own. On the other hand, the readiest victim of Communist propaganda is the man whose children lack a decent roof over their heads.

Homebuilders, fortunately, are not alone in recognizing that measures must be taken to improve housing conditions in the countries to which assistance is to be extended. Members of the Senate Committee on Foreign Relations and the Foreign Affairs Committee of the House, whose committee activities have taken them abroad, have called for greater efforts to alleviate the miserable conditions under which most inhabitants of the urban areas are condemned to live.

Foreign governments are keenly aware of the growing unrest and discontent among families living in shacks and hovels. Some effort has been made to provide housing through the use of public funds but the enormity of the problem has proven to be beyond the economic resources of the countries where projects have been undertaken.

The ICA has had considerable success in joint operation with several governments in conducting aided self-help programs. This type of activity has been carried on with a direct grant to the foreign government on a matching fund basis. Housing constructed under this program is restricted to low-income families who are selected by lot from those who qualify as purchasers. The man of the family contributes sweat equity for the downpayment by assisting in the manufacture or fabrication of components used in construction. This operation is limited by the amount of capital which can be contributed for this purpose by both governments.

The less-developed countries have the materials and the engineering and manual skills to produce housing in volume. It is the almost complete lack of mortgage credit which has retarded the development of a homebuilding industry. In an effort to supply the missing ingredient the ICA has instituted a program designed to establish savings and loan systems throughout Central and South America. The Development Loan Fund was persuaded to supply the seed capital necessary for this purpose. Previously the DLF had restricted its loans to activities assumed to contribute more permanently to increased production and employment. Within the past few months the DLF has approved seed capital loans ranging from $5 to $10 million to Peru, Chile, Venezuela, and Ecuador. Approval is pending for similar loans to other countries. These loans are being made directly to agencies of the foreign governments and will be made available to institutions designed by the local agencies. It is assumed that the establishment of savings and loan institutions will attract savings and investment from internal sources.

In recognition of the fact that DLF loans will prove to be insufficient and that the accumulation of domestic savings may develop very slowly, Senator SMATHERS of Florida has proposed an amendment to the Federal Home Loan Bank Act, designated as S. 582. This would provide for the creation of an International Home Loan Bank. It is intended that the Bank shall raise its funds through investment in its stock and shares by savings and loan associations in the United States, and that such funds may be invested in mutual thrift and home financing institutions in other countries. It also provides that savings and loan associations in the United States may invest not to exceed 1 percent of assets in mutual thrift and home financing institutions located outside the United States. It appears unlikely, however, that S. 582 will be enacted at this session of Congress.

A similar bill, H.R. 7256 has been introduced by Congressman MULTER, of New York, with no significant changes other than that the word "mutual" has been deleted, and the benefits of the act could consequently be shared by savings institutions other than mutuals.

We are heartily in accord with the establishment of savings and loan association systems. This is indicated by our support of legislation to accomplish that purpose. However, it is our considered opinion that other proven methods of attracting mortgage funds should be adopted. It must be recognized that the growth of savings and loan institutions even in the United States was not rapid at the inception. People must be educated to entrust their money to savings institutions, particularly in nations where severe deterioration of the currency has occurred. Other means having more immediate potentiality should be employed to do the job. There can be no question but that as long as seed capital is provided by the DLF houses will be built. There does remain, however, the danger that government-to-government loans will not be as productive of result, will not get as many houses built, will not get as much out of the dollar, as would be the case if the responsibility of Government were limited to the function of insuring mortgages under a sound mortgage insurance program.

The ICA has recognized the desirability of encouraging the establishment of mortgage insurance agencies to supplement savings institutions. Within the past year the Housing and Home Finance Agency was requested to assist in setting up a FHA in Guatemala. The proven methods and procedures developed by the FHA in the United States during the past 27 years were incorporated in the rules and regulations under which the Guatemala agency will function. The legislation creating the agency appropriated a specific insurance reserve fund. Schedules of mortgage insurance premiums and charges sufficient to make the operation fully self-supporting were adopted. Procedures for appraisal of plans and specifications, for qualification of applicants, and course of action in event of default were prescribed. All nations receiving aid from our Government should be encouraged to enact similar legislation as expeditiously as possible.

Unfortunately the establishment of a mortgage insurance agency cannot of itself increase the supply of mortgage money in a capital-starved nation. It does, however, provide the basic facilities for the origination of mortgages and simplifies the procedure necessary to attract mortgage credit from private investment sources in the United States.

Members of this committee have contacted numerous sources of investment capital including securities underwriters, insurance companies, trust companies, and pension funds. Ways and means of implementing the foreign-aid program with respect to housing through the utilization of private investment funds has been thoroughly studied. Assurances have been received that a substantial flow of long-term, low-interest rate, investment-type capital can be developed subject to the availability of good and sufficient guarantees.

There is both precedent and experience to justify the extension of the use of guarantees for this purpose. For several years the ICA has successfully administered the investment guarantee program with an authorization of $1 billion. The purpose of this program is to encourage private American investment abroad to the maximum extent practicable. The protection afforded under the guarantee program is limited to what may be described as: "political" risks, such as war, confiscation or expropriation, and convertibility of foreign currencies. It covers equity capital invested in ventures which presumably hold promise of better than average profits. To attract investment-type capital, seeking only safety and a commensurate rate of interest, it goes without saying that nothing less than full repayment guarantees would be acceptable.

Extension of the guarantee program to insure American investors against loss which may be sustained in connection with residential financing presents a sensible and logical alternative to a program of direct government-to-government loans. Recent history bears evidence that governments may fall, in which subsequent governments may not choose to honor their obligations. Barring complete takeover by communistic forces as in Cuba, experience indicates that the individual purchaser who has obligated himself to buy a home will make every effort to pay off the mortgage just as purchasers of comparable status and income in the United States have met their obligations on FHA-insured loans. The individual purchaser would only vaguely realize that government insurance or guarantees existed. The obligation which he incurred on purchasing a home would be payable at a local bank and the likelihood of default would be no greater than in the United States.

A precise method of managing the proposed operation would be dictated by the source of investment funds. Purchasers in

countries having agencies to insure mortgages, when qualified as to income and job status, would purchase homes and execute mortgages thereon to which the mortgage insurance would be attached. Mortgages would be packaged, held in trust, and serviced by the local bank or financial institution originating the mortgage. It is tentatively suggested that the source of American investment funds and the foreign bank would effect arrangements through a trust indenture whereby investment trust certificates, or participation certificates, supported by underlying first liens on residential property, would be issued to facilitate the procedure. Application would be made to the appropriate U.S. agency for guarantees of the aggregate investment in the certificates or other evidences of mortgage debt as may be determined.

In the hope that Congress, in its consideration of the foreign-aid bill, would make provision to encourage U.S. private capital to accept some responsibility for extending mortgage credit to less-developed countries I appeared before the Foreign Relations Committee of the Senate on June 20. At that time I submitted a statement on behalf of National Association of Home Builders urging consideration of a long-range program to supplement and accelerate existing efforts. In my presentation I offered a suggested amendment proposing an experimental authorization to guarantee long-term mortgage credit from private investment sources. This testimony appears on pages 1010–1016 of the Senate hearings on S. 1983. It was later presented to the House Committee on Foreign Affairs and appears on pages 1217–1219 of hearings on H.R. 7372.

Given the opportunity to demonstrate the workability of our concept we are confident that in the next session of Congress greater consideration will be given to the encouragement of private capital to share the burden.

Since the number of demonstration projects to which guaranties can be extended is limited by the amount of the authorization it is extremely important that only feasible projects be selected. Weight must be given to the integrity, financial responsibility, experience, and past record of accomplishment of participating sponsors of proposed housing developments. A horde of promoters out to make a fast buck have been overrunning Latin American countries for years. Many have had no previous experience in homebuilding. While it is to be assumed that foreign operations may be profitable, it is our conclusion that if profit is the only motive actuating one's interest it would be more regarding to confine one's efforts under the American flag. If we cannot further the policy of our Government by contributing from our know-how and experience, it would be more appropriate to remain at home.

It is considered judgment that, despite the urgent and immediate need, crash programs should not be undertaken. We caution against hastily conceived ventures which fail to gage the supply of material, the availability of skilled construction labor, and the impact on local economies. To develop and expand a homebuilding industry requires the exercise of commonsense as well as optimistic determination.

Of necessity the dwellings to be constructed must be primarily for low-income families. Opportunity must be afforded to enable those in the low- and middle-income brackets to raise their living standards through occupancy in good, safe, sanitary, and adequate homes having health and sanitation facilities essential to the welfare of the inhabitants. Through supervision the tendency to replace one slum area with a better slum can be prohibited.

The fundamental principle underlying our concept is that private initiative and private investment should be encouraged to meet the housing crisis insofar as it is humanly possible. Foreign government participation should be restricted to functions similar to those exercised by the FHA in the United States. The participation of our Government should be limited to the extension of guarantees subject to prescribed rules and regulations. It is generally recognized that government-to-government loans tends to strengthen the existing government rather than the private sector of the economy. In some instances the interests of the government are not the same as the interests of the people it is supposed to help.

It is our conviction that participation by American builders in the development of a homebuilding industry in a foreign country will accelerate the growth not only of the industry but of the economy as a whole. Housing is the one social and economic measure in which private enterprise and private investment can contribute substantially to assist our Government in accomplishing the objectives of the foreign aid program. It is one activity that can be made to pay its own way.

To implement our program I propose the following resolutions be adopted by the international housing committee and submitted to the board of directors of National Association of Home Builders:

"1. That National Association of Home Builders urge the International Cooperation Administration and the Housing and Home Finance Agency to encourage foreign nations to establish mortgage insurance agencies which would develop a mortgage system similar to that which has been so successful in the United States.

"2. That National Association of Home Builders support legislation in the U.S. Congress which would give the President authority to issue guarantees to American investors covering long-term mortgage credit. This would be where friendly foreign governments have established mortgage insurance agencies and guarantee the loans under their own laws.

"3. That National Association of Home Builders urge the State Department to encourage American builders to participate with the nationals of friendly nations to develop and expand the homebuilding industry in their countries through private enterprise."

These resolutions were approved unanimously by the international housing committee, the executive committee, and the board of directors of the National Association of Home Builders, at the directors' meeting in Seattle, Wash., August 17–21, 1961.

THOUGHT CONTROL FOR OUR MILITARY EXPERTS

Mr. CURTIS. Mr. President, many of us who have spoken out against the memorandum prescribing thought control for our military experts can be comforted by some of the enemies we have accumulated in this effort.

I hold in my hand an article from the Worker of Sunday, August 27, 1961, which castigates our colleagues, Senators THURMOND and MUNDT for their "ultra-right attack" on this memorandum.

The article also notes that five of the Worker's writers "exposed the ultra-right military plot against our democratic institutions." Needless to say, I am deeply moved by the Worker's concern for our democratic institutions. I am sure that the Members of this body who are lauded by this Worker story for pressing the fight against the "political generals" are not beguiled by the Worker's expressed concern for our democratic institutions.

There are many in public life who object to any showing of the film "Operation Abolition." I believe I am correct in noting that it was formerly used by our Armed Forces for training purposes.

In recent days it is not fashionable for the military to use this document in training troops. I feel this film is a responsible production which has an important message to convey. As yet, I have seen no critical analysis by any authority which invalidates its objective. If such exists, I would welcome an opportunity to study it.

There are, according to the Worker of August 13, 1961, other films in circulation in this country which might also be useful for training our Armed Forces. I read into the RECORD the article from the Worker identifying this film:

CUBA FILMS IN DETROIT

DETROIT.—New Cuban films will be premiered for a Detroit audience Thursday, August 17, at a public showing arranged by the Fair Play for Cuba Committee.

The films cover a wide range of topics, from movies of the unsuccessful invasion attempt to a just released color film showing many recent construction projects. Films of the May Day parade, of rallies in support of Cuba throughout the world and on a variety of other subjects will be included.

The screening will be held at 8 p.m. at Hartford Avenue Baptist Church, Hartford at Milford.

Mr. President, let us note that these films are sponsored by the Fair Play for Cuba Committee, a committee whose pedigree can be established for you by the Senate Internal Security Subcommittee.

I think these films praising Castro and his good works, these films showing Castro's picture of the invasion, should be packaged and portrayed widely along with "Operation Abolition" and "Communism on the March."

I have no fear of exposing our citizens to the subtleties of Communist propaganda. I feel that this experience, for both our military and civilians, is an important adjunct to our learning about Communist imperialism as it is waged under cold war.

NOTICE OF SHOWING OF FILM "CONTINENTAL CLASSROOM"

Mr. DOUGLAS. Mr. President, I announce that at 10:30 tomorrow morning in the Old House Office Building caucus room there will be shown a film entitled "Continental Classroom," one in a series of public service programs on American Government, which will be telecast nationwide this fall. The program is sponsored by the American Association of Colleges for Teachers' Associations, the American Political Science Association, NBC, and the National Council for the Association of Students.

I hope that as many Members of the Senate and of their staffs who may find it possible to attend will do so.

ADDRESS BY SENATOR PELL ON THE SUBJECT OF "BERLIN AND GERMANY"

Mr. MANSFIELD. Mr. President, a few days ago the Senator from Rhode Island [Mr. PELL] delivered an important address in the Senate on the question of Berlin and Germany. His remarks reflected both his diplomatic experience and his thoughtful consideration of the current international crisis. The Senator's speech has contributed in a significant fashion to the public discussion of the critical problem of peace in Germany and has evoked considerable comment in the press. I ask unanimous consent that an article by Arthur Krock in the New York Times and an editorial in the Providence Sunday Journal, both referring to the speech of the Senator from Rhode Island be included at this point in the RECORD.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 5, 1961]

A STATEMENT OF THE HARD FACTS IS IN ORDER

(By Arthur Krock)

WASHINGTON, September 4.—Perhaps it is because the U.S. Government has been concentrating for so long on winning propaganda victories in the cold war that such confrontations with the hard facts of the German crisis as that recently attempted by Senator PELL, of Rhode Island, have been submerged in the news. But the American people ought to take a good look at these facts before doing much dancing in the streets over propaganda victories like the resumption of atmospheric nuclear weapons testing by the U.S.S.R. and the Kennedy-Macmillan note urging Premier Khrushchev, as President Eisenhower did in 1959, to confine tests to outer space and underground.

In the first place, the U.S.S.R. contends with the United States of America for world opinion (which as a concept ignores the fact that hundreds of millions have no knowledge whatever of exterior events) only when this does not threaten any standstill or loss of military potential. Conversely, the U.S. Government for 3 years has taken the grave risk of this standstill or loss by suspending even the small underground nuclear weapons tests, creating no fallout, for which the Atomic Energy Commission was ready, and which the Commission and informed Members of Congress agreed was vital for two reasons. One, the extreme probability was the U.S.S.R. was making these tests clandestinely. The second, that, without a controlled ban, they are indispensable to maintaining our superiority and hence our national security.

Both the Eisenhower and Kennedy administrations, despite the expert sources of the warning, proceeded on the theory that the risk to national security was less than resumption even of nonfallout tests would be to world opinion. But, as the proceedings thus far of the so-called unalined nations (including Cuba, Ghana, and Indonesia, save the mark) have demonstrated, the theory doesn't work in the case of the U.S.S.R. "We could understand the reasons [for the new atmospheric test] advanced by the Government of the U.S.S.R.," was the sympathetic comment of Marshal Tito, applicant for and recipient of a couple of billions of U.S. mutual assistance funds. And that comment at least raises these questions for the American Government and people: Just what is this great propaganda victory we won? And what will it cost more precious than billions?

UNIFICATION OF GERMANY

Another longstanding theory of U.S. policy is that we must stand on the unification of Germany as a realistic position. But most of our European allies (also the U.S.S.R.), with firsthand memories of the death and devastation wrought among them by German militarism in the brief span of 70 years after Germany was unified, are far from allured by the prospect unless the Germans are neutralized and offensively unarmed. Therefore, this is another hard fact the American people could never detect in official U.S. documents.

A policy based on facing the hard facts and abandoning unsuccessful, risky theories would be likely to carry more persuasion at home and abroad. The U.S. has plenty of firm ground for these stands: To refuse to be pushed out of West Berlin by the U.S.S.R. or any combination of nations. To maintain, at any cost, the air, ground, and water routes of access, both civilian and military, to West Berlin from the West on which depend not only the independence and economic viability of the Berliners, but the honor of great nations, including the United States, once they committed themselves to this maintenance.

To negotiations on these foundations the following statements by PELL in a recent Senate speech are constructive contributions: "We cannot retreat because of our commitments. Nor can Khrushchev because of the pressures [on him]. * * * So we must not look primarily for mutual concessions. * * * We should seek out those factors which mean more to one side than the other. * * * We could [in exchange for treaty built-in safeguards of free access to West Berlin] accept the Oder-Neisse boundary, a temporary recognition of East Germany, and make a commitment never to promise nuclear weapons to West Germany provided the Soviets make the same vis-a-vis East Germany."

To those Leonidases of the parlor rug and dinner table who are quick to call realism such as this "appeasement" it might be noted that, in addition to the many Senators who congratulated PELL on his speech, the American Legion of Providence endorsed it completely.

[From the Providence Sunday Journal, Aug. 27, 1961]

THE VALUE OF SENATOR PELL'S BERLIN STAND

The blueprint of concessions outlined by Senator CLAIBORNE PELL as a possible basis of negotiation with the Soviet Union makes a useful contribution to the Berlin crisis, but not for the reasons that he cites.

In a Senate speech, he urged the Western Big Three to recognize the Oder-Neisse line as the eastern border of Germany, to give temporary recognition to East Germany in exchange for definitive Western rights in and to West Berlin, and to propose a nuclear free zone in Germany as a prelude to a troop rollback from both sides of the Iron Curtain.

Senator PELL, whose experience in foreign affairs both in and out of Government have given him a stature about that usually accorded freshman Senators, advanced his proposal on two grounds. First, he said that they would enable the Western Big Three to take the diplomatic initiative. Secondly, he seeks to guide American thinking away from the futile and dangerous quest for mutual concessions from the Soviet Union to a policy farsighted enough to permit the sacrifice of lesser points to win what he calls major points of interest in the overall Western security.

Yet it scarcely is initiative in the accepted sense to offer an antagonist just about what he was demanding. Secondly, Senator PELL is putting the cart before the horse in identifying the securing of Western rights in West Berlin as a primary interest, for which it would be worth ceding temporary recognition of East Germany.

It may be true, as he says, that the peoples in nations that have fought against Germany in the past would prefer to see Germany remain divided, its strength halved. Yet this is a response of emotion, a relatively short-term ingredient. Inasmuch as this attitude also is rationalized as a curb against an innately militaristic nation which has launched three major wars in 90 years, it is a misreading of history. In contrast to Hitler's unrelieved guilt for starting World War II, Germany emerges from modern scholarship less and less the sole villain responsible for World War I and the Franco-Prussian War.

For purposes of perspective, understanding of the meaning of the permanent division of Germany is important. It establishes two critical masses of German people with an inevitable attraction to unite—a built-in time bomb which would prime itself with the very revanchism the Kremlin purports to fight. Division of Germany then merely loads the dice for a future threat to peace. Thus, in the long-range, objective view, German reunification is a major point of interest, of which Berlin started as a symbol. It it only recently, after reunification in the immediate or near future patently became a political impossibility, that maintenance of West Berlin as a free enclave became an end in itself.

There are other illusory premises in Senator PELL's blueprint, such as his apparent assumption that the labeling of any recognition of East Germany as temporary would make the division of Germany any less permanent, at least as far as the Soviet Union is concerned.

Yet when all these exceptions have been made, it remains that Senator PELL has performed valuable service in opening for realistic discussion the entire matter of American policy and position, as distasteful as it may be, on the Berlin and German issues prior to any Big Four conference. For instance, his Oder-Neisse line concession makes eminent sense, as does his proposal for a nuclear free zone in Germany as a safety against the trigger of fear touching off nuclear war.

Beyond that, formulation of a meaningful fallback position requires the recognition of two stark facts only remotely implied by Senator PELL.

First, the West, to its credit, has no intention of risking nuclear war in order to force the Soviet Union out of East Germany, nor has it the means to prevent the Kremlin from transferring technical control of East Germany to its puppet there via a paper peace treaty.

The Soviet Union, meanwhile, is determined to keep East Germany in orbit, regardless of the long-range threat to European stability. Rightly or wrongly, Mr. Khrushchev, as the Kremlin's First Minister, is no more willing to cede East Germany than the West is willing to risk West Germany's being pulled into the Soviet camp. This standoff is implicit in the cold war.

And, as the Soviet Premier frankly acknowledged in a speech on August 7, the Soviet Union could not change its tack on East Germany if it wanted to—which it doesn't.

In a paragraph not widely quoted, he said in effect that a change of heart on an East German peace treaty would be interpreted as Soviet cold war weakness that would expose the entire Soviet satellite system to disintegration—an unlikely option for the man who ordered the tanks into Hungary.

Thus, as Senator PELL suggested, the West probably faces little choice at the conference table except to agree to live in some way with a divided Germany—until time and circumstances moderate both communism and Soviet imperialism.

This suggests that some form of recognition of East Germany—de facto, temporary, conditional or tongue-in-cheek, the name is secondary—may prove the only way for the West to guarantee West Berlin's freedom short of war. If true, the public has a right to know about and discuss the bitter fact that the Nation and the West might have to swallow. Yet the Government, as a player at the diplomatic poker table, cannot and should not show its hand.

It appears that Senator PELL, using semantics as sugar coating, has undertaken to start the thankless job of putting a good face on a tactical retreat from a dangerous—Senator PELL called it "impossible"—situation.

Mr. MANSFIELD. Mr. President, I also ask unanimous consent to have printed in the RECORD at this point a commentary published in the Christian Science Monitor of August 30, 1961, entitled "State of the Nations—Negotiate What?" written by Joseph C. Harsch.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STATE OF THE NATIONS—NEGOTIATE WHAT?

(By Joseph C. Harsch)

Everyone in high place, including Chancellor Adenauer of West Germany, says the West will be negotiating with Moscow about Germany sometime, presumably fairly soon.

But the nearer the diplomats come to negotiation, the less there is to negotiate about. The fact is that action is anticipating negotiation and leaving an ever-narrowing area of matters to be discussed in negotiation.

And if I read the signs of the times correctly, Western bargaining power in negotiation is dwindling with each passing day. If the Western governments continue much longer to be unable to agree over the time and purpose of negotiation, they will end up with nothing to do at the presumed future conference with the Soviets except to accept with or without protest a set of accomplished facts.

The division of Germany into two Germanys is an accomplished fact. The incorporation of East Berlin into East Germany is an accomplished fact. The closure of the refugee escape hatch between the two Berlins is an accomplished fact.

There was a time when willingness to grant what now has been taken might well have had some value on the bargaining table. Had the West been willing 6 months ago to accept the division of Germany in return for concessions from Moscow, it is quite conceivable that Western diplomats could have obtained firm and clear guarantees about access to West Berlin.

The opportunity for such a trade is gone now. Moscow has what it wants without negotiation and without offering something the West wants in return. This is not the first time that bargaining counters have been wasted from failing to use them when they still had some value.

Well back in the cold war Moscow was seriously concerned over the ring of Western airbases which surrounded the Communist empire. Moscow presumably would have been prepared to pay a price for the abandonment of some of those bases.

The bases are being abandoned now and there is nothing to show for it. Changing weapons and changing political conditions are driving the West from bases without the payment by Moscow of a single penny.

Well back in the cold war there was a time when Poland might have renounced some of its so-called "Western territories" in return for a West German agreement on the Polish-German frontier. The Poles were ready to give up Stettin and parts of Silesia, too, but not including Breslau. Bonn refused to consider any settlement of the frontier.

Subsequently the Poles have repopulated Stettin and the border area of Silesia. It is too late now for the Germans to get anything beyond the Oder-Neisse line.

Before the Soviets gave Walter Ulbricht the green light for his cement wall project through Berlin, Western diplomacy might have offered the Oder-Neisse line in return for continued four-power status in Berlin. In that case Herr Ulbricht might have had to be satisfied with East Germany without East Berlin.

It was not necessary for the West to lose its rights in East Berlin had it been willing to bargain when there was still time.

French diplomacy not only saw the dangers in the situation but itself and alone did accept the inevitable. Paris recognized the Oder-Neisse line. But because Bonn insisted on clinging to the reunification doctrine Washington and London reluctantly did the same. The Adenauer policy of giving nothing and admitting nothing may have lost to Germany valuable pieces of land now settled by Poles and the twilight freedom which East Berlin enjoyed until recent days.

Five years ago, probably even a year ago, Herr Ulbricht probably would have been delighted to settle for East Germany minus East Berlin. Now he has East Berlin.

In diplomacy a card is forfeited if it is not played while it still has value. Too many cards have been forfeited unnecessarily.

PROPOSED DEPARTMENT OF URBAN AFFAIRS AND HOUSING

Mr. SMITH of Massachusetts. Mr. President, Senate bill 1633, of which I am a cosponsor, comes up for consideration tomorrow. This bill would create a Department of Urban Affairs and Housing.

There is much bipartisan support for the measure. Governor Volpe, the Republican Governor of my State of Massachusetts, has endorsed the bill and said that the need for the Department is indisputable.

Furthermore, he has proposed the creation of a similar State agency in Massachusetts.

I ask unanimous consent to have printed in the body of the RECORD a letter from Governor Volpe to me, which was also sent to other members of the Massachusetts congressional delegation.

My reply to that letter, and Governor Volpe's message to the great and honorable General Court of Massachusetts calling for the creation of a State agency similar to the proposed Federal Urban Affairs and Housing Department, is also attached.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMONWEALTH OF MASSACHUSETTS,
EXECUTIVE DEPARTMENT,
Boston, August 18, 1961.

The Honorable BENJAMIN A. SMITH II,
U.S. Senate, Senate Office Building,
Washington, D.C.

DEAR SENATOR SMITH: I am taking this opportunity to express my endorsement of President Kennedy's proposed Department of Urban Affairs and Housing. In fact, prior to the submission of his legislation to the Congress I had proposed the establishment of a counterpart agency for the Commonwealth—a department of economic development and community renewal. It offers a similar consolidation and strengthening on the State level of programs designed to aid our cities and towns, and is under recess study by the General Court of the Commonwealth.

The need to afford Cabinet status to Federal programs concerned with the urban problems of the United States is, I believe, indisputable. These problems constitute a most serious and pervasive domestic challenge, and require the constructive attention of both Federal and State Governments. Because of my concern, I intend to place the proposed Department of Urban Affairs and Housing on the agenda of the next meeting of the New England Governors' conference.

Our proposed new department of the Commonwealth would mesh effectively with a Federal Department of Urban Affairs and Housing, since it would integrate State agencies responsible for urban renewal, housing, mass transportation, economic research, industrial and commercial development and local, regional, and statewide planning. And, as part of this comprehensive program of State assistance to our cities and towns, I have proposed direct financial participation by the Commonwealth in support of urban renewal, local and regional planning.

I know you share my interest in the maintenance of the economy of the New England region. The long-term prospects for employment opportunities for our people depends in large part upon the preservation and enhancement of the massive private and public capital investment in our urban areas. The responsibility for this is shared by Federal and State Governments.

A Federal Department of Urban Affairs and Housing and an effective counterpart in State government will serve to mobilize the resources of both levels of government on behalf of the best interests of our cities and towns. I am hopeful that you will support both.

Sincerely,

JOHN A. VOLPE,
Governor.

AUGUST 29, 1961.

Hon. JOHN A. VOLPE,
Governor, the Commonwealth of Massachusetts, Statehouse, Boston, Mass.

DEAR JOHN: This is to acknowledge and thank you for your recent communication.

As you know, I am a cosponsor of the bill which would create a Department of Urban Affairs and Housing. I, therefore, appreciate your endorsement of this bill.

With every good wish, I am,

Sincerely,

BENJAMIN A. SMITH.

To the Honorable Senate and House of Representatives:

In the words of President Kennedy, "Our communities are what we make them."

The Commonwealth of Massachusetts cannot afford the luxury of ignoring the fundamental problems of its cities and towns, for these are the most persistent challenge to the State government. Neither can the Commonwealth continue to dissipate its capacity to act with vigor and with purpose in dealing with this challenge.

In recent weeks—and for many years, we have seen example after example of the need to provide comprehensive solutions to an interlocking chain of municipal, metropolitan, regional, and statewide problems. The most basic of these involve the economic development and renewal of our communities through urban renewal, regional planning, metropolitan transportation, new highway construction, and the urgent promotion of commercial, industrial, and residential development, including vacation—travel.

I submit that, as public policy, these issues are not divisible. Certainly it is difficult to separate the economic potential of a prudential center from the inner belt.

New highway construction is unavoidably related to the problem of a rationally integrated transportation policy, which in turn reflects upon both publicly financed and privately operated commuter facilities. Our total transportation network exerts a controlling influence upon the distribution of population, land use patterns, and residential housing. Whenever families are displaced from urban renewal project areas or from the right-of-way of a limited-access highway, the provision of private and public housing adequate to the relocation need is an obligation of public policy and the conscience of the community. Success breeds success in economic development, so that those areas and regions most attractive in all aspects of private and public investment will continue to attract the most new investment. The more attractive the entire State in terms of the conservation of its natural and human advantages, the greater is the total potential for effective economic development.

Planning, in this context, becomes all important; but, as a word, "planning" is also overworked, almost to the point where it means all things to all men. To determine the route of a new highway is planning. To select an urban renewal project area is planning. To zone land for industrial development is planning. To provide for commuter transportation is planning. To establish a national park on Cape Cod is planning. From the viewpoint of individual jurisdictions and functions, there is much planning in Massachusetts. What we lack is the effective integration of many separate plans so as to maximize the advantages to be gained from all plans.

The primary mission of such integrated planning in Massachusetts is to halt the erosion of the economic base of the Commonwealth and to stimulate new economic growth. To the extent that the capacity to act against this erosion is within our power, we can neither accept nor tolerate high levels of unemployment and substandard living conditions. This is not and cannot be a partisan issue.

The obligation to mobilize effectively against economic erosion can no longer be avoided by our municipalities, and such mobilization requires not only community action, but also regional and metropolitan cooperation. Literally, Massachusetts can no longer afford major mistakes or omissions in its public policies. And the logic of public policy requires that the State government exchange the role of arbiter among its communities for that of an active partner. In assuming the obligations of partnership, the Commonwealth must insure the maximum integration of the efforts of its own agencies. The accuracy and concentrated force of a rifle is more appropriate to our long-range targets than the dispersion of a shotgun.

To achieve our objective, it is necessary to develop both an integrated program and an integrated vehicle for its administration. Therefore, I will submit to the general court legislation to achieve the following objectives:

1. Comprehensive State, regional, and local planning.
2. Integrated economic development.
3. Effective urban renewal.
4. Adequate relocation and public housing.
5. Rational transportation policies.
6. An administrative vehicle to coordinate these objectives as components of a single public policy—that of economic and community development for the entire Commonwealth.

Such legislation will provide in detail for the following recommendations:

A. ESTABLISH A DEPARTMENT OF ECONOMIC DEVELOPMENT AND COMMUNITY RENEWAL

Over the past 40 years, there has evolved an unfortunate tendency to violate the most elementary principles of good management by encouraging the proliferation of autonomous and mutually independent agencies within the executive branch of the State government. Legalistic devices and fictions have been employed to evade a soundly conceived constitutional limitation on the number of State departments. Such evasions have not only contributed to increasing the cost of State government while proportionately decreasing its efficiency, but they have frustrated the integrated planning of related programs and functions.

In both public and private business, effective reorganization and consolidation is designed to bring together for improved administration and planning separate organizational units which share appropriate common denominators. While many such consolidations may suggest themselves within the State government, few are more insistent or more appropriate than the consolidation of those agencies responsible for various aspects of economic and physical planning and community development.

Experience across the Nation indicates that the isolated administration of specific programs diminishes their potential contribution. This realization has led many States to organize fully rounded agencies capable of dealing with the technical necessity of a comprehensive approach to urban development and renewal.

The need for this approach is reflected at the Federal level of government, where President Kennedy has urged the creation of a new Department of Housing and Urban Affairs for the purpose of marshaling all the skills and abilities of the agencies concerned with these related problems into a single effective unit.

By effectively coordinating a comprehensive program for the planning and development of economic growth and community renewal, the Commonwealth can achieve its objective without further resort to fractionated government.

I therefore recommend that a new department of economic development and community renewal be established through consolidation of the functions exercised by the department of commerce, the mass transportation commission, the State housing board, and the division of urban and industrial renewal.

I must emphasize that the department of economic development and community renewal will consolidate and enhance the statutory responsibilities, powers, facilities and functions of the agencies it will absorb. It will constitute a positive mobilization of the Commonwealth's obligation in these areas.

Not only will this consolidation provide one source of information to which communities could turn with the assurance of receiving across-the-board advice and assistance for all aspects of economic development, it will also contribute substantially to reducing the inflexible organizational patterns which have sapped the capacity of State and municipal governments to take full advantage of Federal legislation and financial aid for planning, urban renewal, community development, mass transportation, housing and community facilities. In particular, it will prepare Massachusetts for full participation in future Federal programs for aid to distressed areas.

The department's chief missions will be:

First, to fight job destroying blight by launching an all-out attack upon the confusion, negligence and frustration—the negative factors—which undermine the economic stability and growth of every community and region in Massachusetts.

Second, to spur job-creating industry by generating a climate of public and private cooperation to support existing industry against injurious outside competition and to attract new industry to Massachusetts. It is important to recognize that the industrial base of Massachusetts incorporates not only manufacturing and research but also vacation travel, finance, and commerce and the support functions of service-oriented small business. The maintenance of a balanced economy must remain a prime objective of our economic development program.

Third, to tap the available resources of the Federal Government. Through depressed areas legislation and vastly expanded housing renewal, transportation, and economic development programs, the Federal Government will exert an increasing influence upon the private economy. Massachusetts taxes will support such programs whether or not we use them to advantage. Even more important is the fact that such Federal programs can adversely affect the competitive position of the Massachusetts economy, unless we are prepared to act aggressively on behalf of our own interests.

Anything less than a maximum effort in these directions will constitute dereliction on the part of the State government. Under the supervision of a commissioner of economic development and community renewal, the department will be organized in five divisions, each administered by a professionally qualified director. These divisions will include: A division of planning, a division of commerce, a division of transportation, a division of housing, and a division of urban and industrial renewal.

In recognition of the need to strengthen planning on all levels of State and local government, within the division of planning there will be established a bureau of local planning, a bureau of regional planning, and a bureau of State planning, together with a bureau of economic research and statistics reporting directly to the commissioner. The division will administer and coordinate the responsibilities of the Commonwealth for participation in the section 701 program of the Federal Government which provides financial assistance for State, regional, metropolitan, and local planning. In addition, the staff of the division will provide technical advice to local and regional planning agencies, and will undertake a comprehensive program of statewide planning.

The division of commerce will incorporate a bureau of commercial and industrial development, a bureau of promotion, a bureau of science and technology, a bureau of vacation and travel, and a women's bureau. Working in harness with the other components of the department, this division will concentrate upon applying their findings to all aspects of economic development, while guiding State promotional activities to encourage new industrial and commercial investment with particular emphasis upon strengthening the development phase of local urban renewal projects.

In Massachusetts it is not necessary to dwell on the role of scientific research and development in our economy. But it is necessary to do all in our power to enhance that role as the seedbed of our industrial economy of the future. Therefore, I propose to place within the division of commerce a small, expertly staffed bureau to concentrate on the needs of scientific and research-based industry. This bureau would assist new technological enterprises to draw upon the financial and business counsel, sources of investments, and production capability available in Massachusetts.

The division of mass transportation will incorporate and exercise the responsibility for planning and integrating all forms of public transportation planning within the context of a single agency devoted to the total development of the economic assets of the Commonwealth.

Responsibility for the planning, development, construction, and administration of State-aided public housing programs now assigned to the State housing board together with research capacity into the housing needs of the Commonwealth will be invested in the

division of housing. Inclusion of this function in the department will insure recognition for housing as a basic ingredient of the economic development of the Commonwealth and its relationship to transportation, planning, and urban renewal programs.

In order to assist the department of economic development and community renewal to mobilize on behalf of the public interest the expert knowledge and advice available in the private economy from business, industry, organized labor, and educational institutions, the legislation establishing the department will provide for unpaid advisory and coordinating committees on all aspects of the work of the department. These committees will assist the commissioner to maintain a continuous appraisal of the effectiveness of the programs administered by the department and shall include the following:

1. Committee of economic advisers.
2. Advisory committee of public and relocation housing.
3. Advisory committee on regional, metropolitan, and municipal planning.
4. Advisory committee on business and industrial development.
5. Advisory committee on technological unemployment.
6. Advisory committee on vacation and travel.
7. Advisory committee on urban renewal.
8. Interdepartmental coordinating committee on economic development and community renewal.

Each committee will include a qualified representative of labor and of business and industry.

Through the vehicle of the department of economic development and community renewal the Commonwealth will better provide for comprehensive and consistent direction of the economic policies and programs of the Commonwealth which affect the economic growth and improvement of Massachusetts and its cities and towns.

There is nothing sacred to the status quo of organization. Every agency of government exists solely to advance the public interest—of which it must be servant and not the master.

B. PLANNING—STATE, REGIONAL, AND LOCAL

If we are to achieve planning that is comprehensive and effective, it is not enough to provide administrative machinery properly harmonized with related functions. There are three jurisdictional levels to the planning process in Massachusetts: State, regional, and local. To produce results, each level requires intensive cultivation of its own potential—plus an efficient intermeshing of the efforts of all three.

For the direction we seek is the fulfillment of State and local policies directed toward economic growth and stability in Massachusetts and maximum protection for our natural, cultural, and economic assets.

Therefore, I submit the following recommendations to reinforce the planning function on each level of Massachusetts government:

1. Implementation of the bureau of State planning in the proposed division of planning with sufficient capability to undertake comprehensive statewide planning: Federal funds may be obtained to supplement the efforts of the Commonwealth in statewide planning; such planning would involve (1) continuous analysis of the economy of the State to guide legislative and executive policy; (2) preparation of a comprehensive economic base study of the entire Commonwealth to relate the results of regional and metropolitan planning; (3) preparation and maintenance of a long-range capital outlay plan for the Commonwealth; and (4) development and maintenance of a master plan for the physical and economic development of the Commonwealth which will relate in meaningful fashion the plans and programs of all State agencies calling for capital improvements with the needs and recommendations developed by regional planning agenices.

By drawing upon the findings and efforts of other divisions of the department of economic development and community renewal, it becomes feasible to attempt statewide planning. The installation of an efficient data processing system in the consolidated department will be justified and will permit, for the first time, the correlation of information previously too scattered and disorganized to be of practical use, to be geared to obtain full advantage of the byproducts of straight-line information handling.

2. Maximum encouragement of the formation of voluntary regional planning districts: Because of the special and almost crisis proportions of the problems of Metropolitan Boston, I will again recommend the immediate establishment of a mandatory metropolitan planning agency for Greater Boston. Other regions of the State require a similar agency responsible to the individual communities. Chapter 40B of the General Laws authorizes the formation of voluntary regional planning districts. Progress in forming such districts has been less than satisfactory.

Through the establishment of a bureau of regional planning in the proposed division of planning, it will be possible to give specific technical encouragement to the formation of such regional planning districts. In particular, regional planning districts will be encouraged to take advantage of Federal section 701 funds available to support regional planning.

As further encouragement to regional planning throughout Massachusetts, I recommend that the Commonwealth reimburse half the local funds expended in each regional planning district up to an annual limit of $20,000.

3. Maximum encouragement of municipal planning: Perhaps the greatest incentive to local planning in Massachusetts has been the availability of the Federal section 701 planning grants, which provides up to half the cost of specific local planning studies for municipalities less than 50,000 in population. However, certain limitations are associated with this program. First, the present staff of the department of commerce is inadequate to administer the program which must be processed through a State agency. Second, large communities receive no assistance. Third, the Federal program is designed to aid planning projects rather than a continuous planning process. Moreover, there is little inducement for neighboring communities to integrate their separate plans. Finally, there has been insufficient encouragement to our cities and towns to become aware of and to take advantage of other available Federal funds, such as may be obtained from the Federal Community Facilities Administration.

By organizing a specific bureau of local planning within the proposed division of planning, adequate attention can be paid to local planning needs, including the administration of the Federal section 701 program.

As an inducement to both local and regional planning, I recommend that the Commonwealth reimburse each community participating in regional planning districts for one-half the cost of their local planning activities up to an annual limit of $5,000.

The ultimate aim of planning is to prepare the maps of our future. A fundamental obligation of public policy is to know where we are going—and why.

C. STATE TECHNICAL ADVICE AND FINANCIAL ASSISTANCE TO MUNICIPAL URBAN RENEWAL PROGRAMS

The inadequacies and lack of progress in urban renewal efforts in the Commonwealth have been thoroughly documented. In accomplishment, the record of our cities and towns falls far short of the pressing need to revitalize our communities. In Massachusetts, the average project has required 60 months to complete the survey and planning stage and bring it into execution, as compared to a national average of 31 months and the maximum Federal performance standard of 18 months. Participation by Massachusetts in Federal funds authorized for urban renewal as of the end of 1960 amounted to a federally aided per capita percentage of 9.64. Meanwhile, Connecticut had reached 35.33 percent; New Jersey 16.63 percent; and Pennsylvania 14.88 percent. In actual money, this represents a loss of Federal funds available to Massachusetts in excess of $100 million. The actual loss in private investment, employment, income, improved housing, and tax base is incalculable.

A vastly expanded Federal urban renewal program recommended by President Kennedy is under consideration in the Congress, and there is little doubt that it will be enacted substantially as presented. This is a new opportunity for Massachusetts.

The Commonwealth's stake in the economic future of its cities and towns is too great to passively allow the forfeiture of additional hundreds of millions of dollars in Federal and private investment in the 1960's. The State government cannot ignore its responsibility as a partner to assist its political subdivisions to solve this problem of economic and community development. As one of the oldest and most urban States, the well-being of Massachusetts unavoidably is equated with that of its municipalities. Our assets and our economic strength are largely urban in character, and in no other State is the language of the President's message more in point than in Massachusetts.

"If the cities are to recapture their economic health, they must offer better opportunities for these commercial, industrial, and residential developments for which their central position is a distinct advantage. They must strengthen their cultural and recreational facilities and thus attract more middle and upper income residents. They should make space available for suitable light industries, especially those which need close-in locations. And they must improve their transportation systems, particularly rapid transit services.

"Urban renewal programs have been too narrow to cope effectively with the basic problems affecting older cities. We must do more than concern ourselves with bad housing—we must reshape our cities into effective nerve centers for expanding metropolitan areas. Our urban renewal efforts must be substantially reoriented from slum clearance and slum prevention into positive programs for economic and social regeneration.

"This program, if it is to be truly effective, must help communities go beyond the project-by-project approach * * * in which individual projects will be developed within the framework of an overall community program, a program which clearly identifies the city's long-term renewal needs and opportunities and the changing shape of the city."

We expect much from our cities and towns. In turn, the Commonwealth must provide effective technical guidance and leadership and a level of financial assistance at least equal to that provided by other urban, industrial States against which we must compete for our share of America's economic future.

1. Implement division of urban and industrial renewal: Presuming the establishment of the department of economic development and community renewal, I recommend provision and implementation therein for the division of urban and industrial renewal. In this agency would be vested administrative responsibility for the

role of State government in urban renewal, including research, planning, technical aid, and financial assistance.

2. State aid for federally assisted urban renewal projects: At the present time, the Federal Government assumes two-thirds or three-quarters of the net project cost of federally assisted urban renewal projects with the community paying the remaining one-third or one-quarter. Those States in which the most impressive progress in urban renewal has been attained provide State financial assistance up to one-half the local cost of federally assisted urban renewal projects. Last year the general court enacted similar legislation providing for such State aid through which the State would annually reimburse one-half the principal paid on urban renewal bonds, or in five equal annual installments where more than half the local cost is paid from appropriations other than bond issues. However, the method and amount of financing required for this legislation raised questions of interpretation which could not be easily resolved.

I strongly recommend that this legislation be effectuated, subject to the clarifying revisions I am proposing. I will, at the proper time, provide for the necessary appropriation. By making reimbursements in 20 equal annual installments, the cost of this program can be met from the general fund without the imposition of additional taxes, and without resorting to such devices as "skimming from the top" of the income tax or corporation tax distributions to the cities and towns.

3. State aid for nonfederally assisted urban renewal projects: I further recommend that existing legislation providing for financial assistance to nonfederally aided commercial and industrial redevelopment projects also be effectuated until existing restrictive provisions in Federal law are modified, to render it unnecessary. However, the greatest real benefit obtainable from this provision will derive from State aid to the redevelopment of blighted open areas for which Federal capital grants are not available. The recapture of this wasted acreage, and its addition to the tax base of our municipalities can become one of the most positive forms of assistance to the economic base of our cities and towns.

I therefore recommend that existing legislative policy be clarified to insure financial aid for the redevelopment of blighted open areas. The necessary funds can be provided as part of the basic State aid formula for urban renewal projects, as modified to insure its workability.

4. State aid for participation in community renewal programs: A most important amendment to the Federal Housing Act of 1959 authorized Federal grants of up to two-thirds of the cost of preparing comprehensive community renewal programs. The intent of a community renewal program is to identify and measure the total need for all forms of urban renewal on a community-wide basis. To quote from the Federal Housing Act:

"The Administrator may contract to make grants for the preparation of completion of community renewal programs, which may include, without being limited to (1) the identification of slum areas or blighted, deteriorated or deteriorating areas in the community, (2) the measurement of the nature and degree of blight and blighting factors within such areas, (3) determination of the financial, relocation and other resources needed and available to renew such areas, (4) the identification of potential project areas and, where feasible, types of urban renewal action contemplated within such areas, and (5) scheduling or programing of urban renewal activities. Such programs shall conform, in the determination of the governing body of the locality, to the general plan of the locality as a whole."

A community renewal program would enable a city or town to determine the priorities and schedule all of its urban renewal activities in terms of its financial resources, general plan and requirements for relocation housing.

When we consider that this approach offers a comprehensive attack on urban blight in each city and town, the fact that not one community in Massachusetts has received a Federal grant to proceed with a community renewal program is doubly significant. I submit that the encouraging of our municipalities to participate in the community renewal program will enable Massachusetts to extract maximum advantage from the huge investment from all sources that must be made in actual urban renewal and redevelopment projects.

I recommend that the Commonwealth assume one-half of the net local cost for community renewal programs approved for Federal assistance, and that provision therefore be incorporated in the State aid formula for urban renewal.

5. Liberalization of municipal debt limits for urban renewal: The restrictive limits now imposed on the financing of municipal urban renewal projects ought to be liberalized. Early repayment of bond issues for urban renewal imposes a distinct hardship because the heaviest payments come due before new construction has been added to the tax rolls. Urban renewal is a municipal investment program, and reasonable discretion ought to be accorded each municipality to achieve the most favorable financing suitable to its specific objectives.

I recommend that the general laws be amended to allow municipal bonds issued for urban renewal purposes to be repayable within a period not to exceed 25 years, rather than the existing limit of 20 years. I also recommend that the limit on municipal indebtedness which may be incurred for urban renewal purposes be raised from 2 percent to 3 percent of the average assessed valuation of a municipality for the preceding 3 years. I further recommend that municipalities be authorized to defer repayment of municipal bonds issued for urban renewal purposes for a period not to exceed 5 years.

6. Increased local discretion and home rule for urban renewal: There is a fine but important distinction between State aid and State interference. Nonessential statutory and bureaucratic intrusion has no justification, and ought to be eliminated wherever possible. Urban renewal is primarily a local responsibility, and the role of the State must be that of a supporting rather than a controlling partner.

I therefore recommend:

1. That cities and towns be accorded a reasonable local option to be exercised by either the city council or the town meeting in choosing the agency to be designated as the local redevelopment and renewal vehicle. The local governing body should be allowed to assign such responsibility to a housing or redevelopment authority or to establish an appropriate department of the municipal government to consolidate and exercise urban renewal functions.

2. That statutory State approvals and hearings now required for the institution of redevelopment or renewal projects be eliminated, and replaced by more appropriate review provisions.

3. That statutory requirements for State-appointed members of local urban renewal agencies be eliminated in favor of complete local appointments.

By thus reducing unnecessary and burdensome interference in local affairs, the Commonwealth will more closely fix the responsibilities of local leadership for effective urban renewal and economic development.

7. Technical clarification of existing urban renewal legislation: Inconsistencies of language and problems of interpretation have arisen with respect to existing provisions of law pertaining to urban renewal. I am recommending legislation necessary to achieve technical clarifications essential to the administration of State financial aid and to the authentication by bond counsel of municipal indebtedness authorized for urban renewal purposes.

8. The need to recodify existing urban renewal legislation: There is general agreement that existing statutory provisions governing urban renewal are awkward, and unreasonably complicated. The substantive recodification of all urban renewal legislation ought to be undertaken immediately. A most helpful start in this direction was initiated by the Speaker of the House in his proposal to reenumerate existing urban renewal and housing legislation into a new chapter of the general laws. The amendments I am recommending are submitted in the context of the Speaker's bill.

9. The need for effective conservation and rehabilitation: Existing legislation permits the conservation and rehabilitation of salvable structures. However, this most important instrument of urban renewal has yet to be effectively utilized, although a vast program to conserve the sound, established neighborhoods of our cities and towns is urgently required. One of the basic assignments to the division of urban and industrial renewal will be to devise technical solutions and to recommend legislative policy to strengthen conservation and rehabilitation techniques as essentials of a total program for community development and renewal.

10. Federal demonstration grants to develop a model State urban renewal program: On the presumption that the recommendation contained herein will be enacted into law, I have engaged in preliminary discussions with representatives of the Federal Urban Renewal Agency, and I have received assurance that, if these recommendations are adopted, Massachusetts would be eligible to receive major Federal demonstration grants to assist in developing a model State urban renewal program to serve as a guide for other States. It is probable that such demonstration grants could be applied to assist in the total recodification of urban renewal and related statutes. And it is also probable that these demonstration grants can be directly applied to the problem of relocating families and businesses displaced by new highway, urban renewal and other public construction in a metropolitan region such as Greater Boston—where the construction of interstate highways, the inner belt and various urban renewal projects is creating a potentially very difficult relocation problem.

I have instructed the commissioner of administration to prepare and to submit a formal application to the Federal Urban Renewal Administration for approval of such broad-scale demonstration grants.

Implicit in these recommendations is the intention of the Commonwealth to help, but not to control our cities and towns—to the end that the human, economic and urban resources of Massachusetts will be conserved and enhanced for the benefit of present and future generations.

I have appended legislation to effect these purposes. But, in consideration of the desire of the general court for a speedy conclusion to the work of this legislative session, I am requesting that this message and legislation be printed and filed for formal action at the next legislative session. Although I realize this procedure is not usual, it will provide the opportunity to invite you to join with me in a cooperative evaluation of this program. I will welcome your constructive suggestions and technical refinements between now and the next session.

During this period I will instruct the commissioner of administration to continue the

studies in progress. I believe you will agree with me that this program, these objectives, are of such consequence to the economic welfare of the Commonwealth and its cities and towns that it would indeed be unfortunate and unreasonable to subject this legislation to hasty disposition.

Respectfully submitted.

JOHN A. VOLPE,
Governor of the Commonwealth.

HOSPITAL SHIP SS "HOPE"

Mr. HUMPHREY. Mr. President, I have frequently praised the work and the success of the SS *Hope*, the hospital ship which has been bringing relief to the suffering and medical training to the people of the Indonesian area.

Project Hope is one of the most magnificent examples we have of voluntary, people-to-people efforts to bring help to the citizens of underdeveloped areas. I hope that it will continue and that such programs can be expanded.

The SS *Hope* is due back in the United States this month after a highly successful journey of mercy in the Pacific. One of the many articles about the SS *Hope's* work appeared in the August 6 edition of the New Haven, Conn., Register. I ask unanimous consent that this article titled, "Where There's Hope There's Life" be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHERE THERE'S HOPE THERE'S LIFE—VOLUNTEER DOCTOR, NURSES FROM CONNECTICUT PROVIDE MEDICAL AID IN INDONESIA

"The people I have met and cared for as patients (in Indonesia) have been wonderful. For many of them it is the first time they have seen such tall, light-skinned people, and it takes a little time to establish rapport, but like all human beings they respond to a smile and kindness.

"The children in particular are lovable. I find it a joy to work with and care for them. I love the expressions on their little faces when they taste ice cream for the first time. And just as in the States, chocolate sells itself the best."

Talking is Miss Nancy Campion, a graduate of St. Mary's Hospital in Waterbury. She is a nurse aboard the SS *Hope I*, a fully equipped and staffed floating medical center now in Indonesia.

She is but one of many Americans—among them current and former Connecticut residents—who, at a financial sacrifice to themselves, are participating in a program of cooperation in the field of health between people in the United States and people in underdeveloped countries in the Far East.

The undertaking is known as the Hope project, which stands for Health Opportunity for People Everywhere. It is sponsored by the People to People Health Foundation, an independent, nonprofit corporation.

Dr. Paul Winslow Tisher, a New Britain eye surgeon, who recently returned from the SS *Hope* after serving aboard it as a volunteer, says the U.S. State Department and the U.S. Department of Health are vitally interested in the accomplishments and influence of the SS *Hope*, but have no actual control of its activities.

Secretary of Health, Education, and Welfare Abraham A. Ribicoff wrote Dr. Tisher upon the latter's return to this country:

"It is quite obvious that your mission to Indonesia was a productive one and that it has caused you to put a great deal of thought on how relations with the countries of Asia might be improved through medicine."

KENNEDY PLEASED

Commenting on the mission of the SS *Hope*, which falls in line with purposes of his Peace Corps, President Kennedy said:

"I am confident that the project will continue to benefit the peoples of Indonesia and other countries of the world. * * * The good ship *Hope* is a project illustrative of effective people-to-people programs."

Through Project Hope, the entire world is seeing that the American people—acting on their own, outside the Government—are seriously concerned about the problems of other peoples. The great white ship is tangible evidence of the concern that American people have for their neighbors.

President Kennedy and Indonesian President Sukarno released a joint statement April 25, following 2 days of discussions between the two heads of state, in which they commended Project Hope. Their statement said:

"Both Presidents express gratification at the high degree of cooperation between their countries and noted the successful visit to Indonesia of the hospital ship, the SS *Hope*."

THOUSANDS HELPED

In the first 6 months that the ship has been in Indonesia, American medical personnel have performed some 600 operations, seen 16,000 patients aboard ship and on shore, given 800 classes, lectures and seminars, and made 4,687 diagnostic X-rays.

Former President Dwight D. Eisenhower, who extended encouragement to the project during its early days, said of its backers:

"The significance of your efforts goes beyond the worthy objective of bringing sorely needed medical assistance and training. It shows the world the warm heart of America."

The program was initiated to promote world peace through increased understanding between the people of the United States and the peoples of other nations. The originators of the project felt that better understanding among the peoples of the world could be achieved on a personal level through friendship, through sharing knowledge and through helping others to help themselves.

Its purpose is to bring the skills and techniques developed by the American medical professions to the people of other nations in their own environment, adapted specifically to their needs and their way of life.

To implement its purpose and hopes, the foundation acquired from the Government a U.S. Navy hospital ship, formerly the U.S.S. *Consolation*, which was constructed during World War II and which saw service during the Korean conflict. The 15,000-ton, 575-foot vessel had been part of the mothball reserve fleet of the U.S. Navy since December 1955.

Rechristened the SS *Hope*, the ship was equipped with 800 hospital beds, and ample space was reserved for class and demonstration rooms and laboratories. The surgical section is as complete as that of a land-based hospital.

WHY INDONESIA?

Why was Indonesia chosen as the first country on which the SS *Hope* would call? In addition to receiving an invitation from that nation's government to visit the archipelago, it was felt that the people were badly in need of medical care.

The country has 1,500 doctors—one for every 20,000 Indonesians. In some isolated cases, the ratio is 10 doctors for 5 million persons.

Cost of the project for a year's operation of SS *Hope I* is $3,500,000. Invitations to visit their countries have also been received from the medical professions in Korea, South Vietnam and Pakistan.

It is hoped that the work of SS *Hope* can be continued and that similar ships can be sent to Latin America and Africa.

The ship began her first mission of mercy in Indonesia last September.

Waterbury's Miss Campion, who is working as a nurse in the intensive care unit aboard the ship says they take care of the most seriously ill patients that come aboard.

"We have had several unusual operations performed on the ship," she says, "but we confine our operations to those which will be most beneficial for teaching purposes."

Another Connecticut resident, Miss Susan B. Glocke, a physiotherapist, of Mason's Island, Mystic, is also serving aboard the SS *Hope*.

Miss Glocke, who worked at the Grace-New Haven Community Hospital from 1956 to 1958 as a staff therapist, says serving on the ship "has * * * been an exciting and thrilling experience, and has presented me with many challenges.

PEOPLE ARE THE SAME

"Before the first week was out at Djakarta, it was * * * apparent to me that the people—especially the children in this area—are the same as they are in the States * * * people are the same all over, having the same problems and the need for rehabilitation.

"My experiences have included teaching as well as doing actual treatment work * * * I have been able to go into rehabilitation polio centers in Djakarta and Soerabaja, work with the assistant therapists there and also help train assistant therapists at the general hospital.

"Here at Makassar has come the greatest challenge (to me). Since there is no speech therapists abroad ship, they asked me to set up a program for a deaf and dumb Indonesian child, age 13.

"This is what I have been doing each day for the past week, treating both the mother and the child, so that she can continue the training after I leave.

"Granted this would be a challenge to a physical therapist to do in English at home, but to try to do this in the Indonesian language really makes it even more unusual for me."

Margaret M. Donahue, a nurse anesthetist from Grand Rapids, Mich., who worked at the Yale Medical Center here for 2 years before joining *Hope*, shows an awareness of the broad objectives of the mission.

"Our opportunities to create a better relationship between the people of Indonesia and the people of America," she says, "are numerous. Better friendship can only be attained through better knowledge and understanding of another's country and habits.

TEACH EACH OTHER

"We are living with several Indonesian people and each one is learning about the other's customs.

"The Indonesian people have a beautiful outlook on life. They are very friendly, easy going, and extremely eager to learn. I am happy to be here and real proud to be a part of this worthwhile organization."

Priscilla D. Strong, a nurse anesthetist from Pittsfield, Mass., also served at the Yale Medical Center before embarking on the ship.

Miss Strong, who has a sister living in Elmwood, Conn., says that she and the other anesthetists aboard the ship have benefited from their association with their Indonesian counterparts. "We have learned and used some of the Indonesian techniques and equipment," she says.

She adds that the Indonesian anesthetists who have been working with them aboard the ship have also learned American techniques and are now teaching others what they have absorbed.

Chief nurse on the SS *Hope* is Clair Eugenia O'Neil whose brother, Dr. Vincent B. O'Neil, practices medicine in Newington. She helped establish the hospital ship and is currently directing the work of the American nurses who are training 30 Indonesian nurses.

"We have a great responsibility to these girls," she says, "because they will be used as the nucleus of a staff that will establish a new hospital in Djakarta.

"All our work is not done on the ship. Many times we go into the local hospitals and work with the nurses there."

CAPTAIN FROM STAMFORD

Captain of the SS *Hope* is also a Connecticut man. He is Aime Gerber of Stamford, former captain of the SS *Atlantic*. He heads a crew of 150 men, who are assigned the task of navigating the ship into ports where patients wait to be taken aboard. To date some 65,000 patients and visitors have gone aboard the ship without a major mishap.

Although many thousands of persons have received hospital treatment aboard the ship, the SS *Hope* is primarily a teaching ship. In this way, according to the foundation, much more effective and lasting results are achieved than would be possible if the medical specialists concerned themselves solely with the immediate treatment of the sick.

Dr. Tisher, a member of the *Hope* medical advisory committee, was the first Connecticut physician to serve aboard the ship on a rotating basis. He says the medical training center of the ship makes its services available to doctors in foreign lands.

The purpose of this, he adds, is to exchange medical information and the latest techniques with doctors and medical technicians who are far away from teaching centers and have been out of contact with the latest advances in medical treatment.

Since the SS *Hope* first set sail, hundreds of doctors, dentists, pharmacists, nurses, technicians, and other medical specialists have learned and passed on to their associates new knowledge and skills acquired from their association with Project Hope medical staff members.

The good ship *Hope* goes only where invited. The entire program is developed with the cooperation and guidance of the medical societies in the countries to be visited.

TRAVEL INLAND

Units using motor vehicles and launches travel inland, bringing instruction and treatment to areas far removed from the better equipped and staffed port cities.

In these remote areas where medical attention is virtually nonexistent, mobile teams from the ship teach rudimentary sanitation, medication, inoculation, and other simple health procedures which can materially improve the well-being of the people.

The ship also serves as a logistic base and a receiving center for more complicated therapeutic and training problems, and is available in the event of such emergencies as natural disasters or epidemics.

Following an earthquake in March, the ship sailed from Kupang to the stricken city of Ende immediately after a request for assistance came from the Indonesia Health Minister.

A team of doctors and nurses preceded the ship and were airlifted to the disaster area where 80 percent of the city, including the only hospital, were destroyed.

The ship's permanent staff is made up of 15 volunteer doctors, 30 nurses, dentists, pharmacists, and supporting hygienists and technicians. Although they are paid, they receive less than if they held comparable jobs in the States.

In addition to the permanent staff, teams of volunteer doctors, serving without pay, are flown to the ship for periods of 2 to 4 months on a rotating basis.

ROTATING DOCTORS

The rotating doctors are selected from more than 3,000 of the Nation's leading medical men and women who volunteer for unpaid duty aboard the SS *Hope*. Rotating specialists are provided according to the immediate local needs.

Dr. Tisher is no newcomer to volunteer service. He has served at the Grenfell Mission in Newfoundland as a volunteer worker at least five times over a period of 10 years. The periods of service, which were intended to help the Indians and natives and teach medical students, lasted from 2 to 8 weeks. He was last there in 1955.

"The American doctors and nurses," says Dr. Tisher, "work with the foreign doctors and nurses to help them develop new skills and techniques, and add to their fund of medical knowledge.

"You can't go into these foreign places with a superior attitude, because a lot of them are as smart as you are."

Dr. Tisher, who served abroad the SS *Hope* from January 15 to February 26, says his duties included: instructing doctors doing eye surgery on the native population and working with eye doctors on shore in local hospitals.

At Ambon, Indonesia, he taught two doctors to do cataract operations, which they had never done before. Working very closely with the native doctors, he practically stood over their shoulders, guiding them during the operations and correcting their mistakes.

In this country it usually takes 6 months for a doctor to become proficient in performing cataract operations, but out there Dr. Tisher gave them an accelerated course in 2½ weeks.

Between February 10 and March 6, the ship's and cooperating native doctors saw 3,522 patients in Ambon. Of these, 112 were surgical cases; 2,500 required chest X-rays; 36,000 units of the new Ciba leprosy drug were dispersed.

At Djakarta, he lectured at the University Hospital, held consultations with native doctors on glaucoma, served as a consultant during many eye operations. He did the same at Bondong and Makassar.

MANY NATIVE DISEASES

Native eye diseases with which he came in contact in Indonesia included trachoma (a virus disease associated with dry, dusty regions), glaucoma, cataracts and diseases of malnutrition. Other diseases that were prevalent included malaria, leprosy, and tuberculosis.

In addition to performing operations on the ship, they also hold clinics for doctors to demonstrate techniques and new methods of treatment.

Operations conducted on the ship are televised on a closed circuit so that many doctors can observe them simultaneously. The operating doctors wear microphones around their necks so that they can explain to those watching and listening in other rooms what they are doing.

In some cases, American doctors are learning techniques from the native doctors, who have developed them because of the necessity of coping with the lack of instruments. Many of the native doctors, Dr. Tisher says, have received excellent training in their own and European schools.

American doctors are learning to recognize leprosy. They are also becoming familiar with various types of parasites which are unknown in this country and they have come upon a type of malignancy rarely found in the United States.

American and Indonesian urologists, alarmed by the disproportionate number of spleen, kidney, and bladder illnesses there, have started a joint research project to determine what is causing them.

"It gave me a great deal of satisfaction," the New Britain eye surgeon says, "to know that the level of work we do here in the United States of America and particularly in Connecticut, is commensurate with the best work done anywhere else in the world."

While in the Far East, Dr. Tisher was also able to stop off at eye hospitals in Calcutta, India; Tokyo, Japan; Bangkok, Thailand; and Cairo, Egypt.

A REAL SATISFACTION

"Anyone who does missionary work," he says, "gets the satisfaction of doing something good for others.

"Furthermore, it's the best way I know to fight communism. It's the strongest anti-communistic work being done in the world today.

"The Makassar people feel that the impact of Hope on this southern Celebes area has been more effective than a million dollars worth of aid (would be if) given directly to the area.

"The interest generated by *Hope's* visit extends far back up into the small mountain towns (and) throughout the whole area. It is difficult to really estimate how great it is.

"The Russians were so impressed with the operations of the SS *Hope* that they are building a hospital in Djakarta to be staffed by Russian personnel, to offset the favorable publicity achieved by Hope.

"Native peoples would travel as much as 500 miles in coming for treatment to the port where the ship was stationed.

"We would only treat those patients cleared and recommended by the local committee of doctors, for they alone can determine which are their most pressing needs and problems."

Dr. Tisher says he doesn't know how many formerly blind persons can now see as a result of the operations performed or supervised by *Hope* personnel, or how many persons have been nursed back to health at the ship, but he thinks the number might be considerable.

PRIMITIVE CONDITIONS

Conditions were so primitive in some local hospitals, he says, that there was no water with which the surgeon could wash his hands prior to an operation.

In such a place, he used the same pair of rubber gloves and the same gown through six or seven operations one morning. He says the best he could do was to wash the gloves with carbolic acid between operations.

Political strife and discontent are still evident in parts of Indonesia, he says. On Sundays when the American doctors were taken on outings into the country by their hosts, truckloads of armed soldiers would precede and follow their bus to protect them from the rebels.

It is believed, Dr. Tisher says, that the rebels wanted to kidnap the American doctors and have them administer medical care to the people living in the rebel camps in the mountains. He experienced no such incidents, however.

"The situation in each community that we visited," says Dr. Tisher, "was different. In Makassar, the native doctors and population were reticent in extending a welcome to us, while in Ambon, we were received with open arms the very first day."

There were some humorous aspects to his experiences. In Ambon, they were greeted by big printed streamers, which were strung across the street.

STRANGE GREETINGS

Some of the signs read:

"Have you a headache? Have you back trouble? Is your stomach upset? Have you been sick a long time? Come to Ambon. The ship SS *Hope* arrives February 4."

Also in Ambon they were taken to a school auditorium where a party was held for the Americans. They were entertained by a native choir of 40 voices, singing "God Bless

America" in English although not one of them could speak English. A 40-piece fife band also entertained them.

An 11-piece dance band played American dance songs, which they had imitated from records.

Dr. Tisher, who just happened to have his clarinet along, entered into the spirit of the occasion and joined the band, playing several hot Dixieland specialities, including "Sweet Georgia Brown."

He played a chorus and then a trumpet player played another chorus and then they played in unison, "bringing the house down," Dr. Tisher says. He added that this occurred only about 100 miles from communities where cannibalism is still practiced.

VOCATIONAL REHABILITATION

Mr. HUMPHREY. Mr. President, when the Congress passed the foreign aid bill, that program included an item known as the technical services for peace amendment which I had offered to the bill. The technical services for peace amendment urged that the AID administration utilize the facilities and personnel, and professional competence of the existing and established agencies of the Government wherever such was practicable or possible. The emphasis of the amendment was in the fields of education, health, housing, agriculture, and other areas where technical assistance might be useful. These other areas included such matters as labor, social welfare, public works, irrigation, conservation, and many other activities.

I was pleased to see the amount of work being done by some of our established departments of Government that are frequently referred to as domestic departments and not directly related to the foreign aid administration. I call to the Senate's attention a report from the Director of the Office of Vocational Rehabilitation, Miss Mary Switzer.

Miss Switzer assures me of her desire to assist in the development and operation of the rehabilitation activities under our foreign aid program. She gives a splendid report of the activities of the Office of Rehabilitation in our foreign aid endeavors.

I ask unanimous consent that excerpts of a report by Miss Switzer be printed at this point in the RECORD. I wish to commend the Department of Health, Education, and Welfare, and in particular the Office of Vocational Rehabilitation for the good work it is doing overseas as well as at home.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

AUGUST 23, 1961.

Hon. HUBERT HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR HUBERT: I want to applaud your sponsorship of the "technical services for peace" amendment to the foreign-aid bill and the fine statements you made in support of it. We, of course, would welcome the opportunity to assist in the development and operation of rehabilitation activities under our foreign-aid program and hope the legislation, as it comes out of conference, will make this possible. I think the following report on what our technical knowledge has already accomplished, internationally, firmly demonstrates the rightness of what you have been saying for years.

Under Public Law 480, the Agricultural Trade Development and Assistance Act, we now have approved 14 research projects in the following countries: Israel, 6; India, 4; Brazil, 3; and UAR-Egypt, 1. Projects in Indonesia and Burma are in the process of development. Two prosthetics experts from the Veterans' Administration, on detail to the Office of Vocational Rehabilitation, are now in Yugoslavia doing research on prosthetics.

One of the research projects we have in India is Dr. Brand's project, at the Christian Medical College in Vellore, for the rehabilitation of lepers. As you know, leprosy is one of the most serious problems in India—more hands are, perhaps, made useless by this disease than all other diseases combined. Dr. Brand needs and has requested expert assistance in his research and we are trying to provide this under Public Law 86-610, the International Health Research Act. Through Dr. William L. White, University of Pittsburgh Medical School, a group of specialists in plastic surgery is now being organized to go to the Christian Medical College in Vellore, in rotation, to do research and to help build a broad program for the rehabilitation of lepers. We hope that the first of these surgeons will be able to leave for India in early September to work in India for a period of 2 months.

All of the surgeons, who will probably number 12 in the first 2 years, are men of outstanding reputations and are affiliated with such medical schools as Harvard University, University of North Carolina, University of Pittsburgh, University of Kansas, Yale University, University of Michigan, Johns Hopkins University, University of Miami, St. Louis University, and the University of Texas. In carrying out this program, we plan to pay, from U.S.-owned local currencies, round-trip transportation and expenses in India for these doctors. We have requested the Ministry of Health in India to nominate Indian surgeons to do research here on an exchange basis. We hope to secure from voluntary agencies in the United States the dollars these experts would need while in this country.

I thought you would be interested in learning about these developments. We regard Public Law 86-610 and Public Law 480 as complementary and supplementary to each other in unique and unlimited ways. The programs that can be established under these acts will do much toward demonstrating our concern for the disabled over the world, strengthening our relationships with the cooperating foreign countries, and generally furthering our foreign-policy aims.

Sincerely yours,

MARY E. SWITZER,
Director, Office of Vocational Rehabilitation, Department of Health, Education, and Welfare.

DUAL-RATE SHIPPING

Mr. KEFAUVER. Mr. President, it is anticipated that on Friday of this week the Senate will take up H.R. 6775, the so-called dual rate shipping bill.

As this bill passed the House—on the Consent Calendar—it contained a number of antitrust safeguards. These were designed to protect the great mass of American shippers, both importers and exporters, as well as independent American steamship companies, both liners and tramps, from complete control of ocean freight rates by the shipping conferences. These conferences or, if you prefer, cartels completely dominate the foreign commerce of the United States.

In its report and by its unanimous action on H.R. 6775, the House clearly indicated that American shippers and independent carriers should not be left at the complete unregulated mercy of these cartels which are comprised in very large part of foreign ship owners.

Unfortunately, the Senate Commerce Committee has drastically amended the House bill. It not only eliminated the antitrust provisions, it added new provisions which would make the cartels even more powerful than they have been in the past. For example, it added a provision which would legalize a supercartel of shipping cartels, something unheard of in American law and tradition, and something which, I am confident, will not be acceptable to the Senate, the Congress, the business community, or the public.

On August 31 I wrote to the Attorney General seeking his views on the Senate Commerce Committee version of H.R. 6775. He replied on September 5. I ask that these letters, together with an earlier and more detailed one from Deputy Attorney General White, be printed in the RECORD.

Mr. President, you will see that the Attorney General is clearly opposed to passage of the legislation without clear antitrust safeguards. His letter is unequivocal.

I have had printed a number of amendments to H.R. 6775 and these are lying on the table. I shall call them up at the appropriate time. Several are perfecting amendments, which, I hope, will be accepted by the managers of the bill. Others are substantive and will be the subject of considerable debate. I invite my colleagues' attention to them, as well as to the material which I have inserted in the RECORD above.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AUGUST 31, 1961.

Hon. ROBERT F. KENNEDY,
The Attorney General, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: As you know, the Senate Commerce Committee has approved a version of the dual-rate shipping bill (H.R. 6775), which differs radically from that approved by the House of Representatives. I am very much concerned that many American interests would be sacrificed to international cartels if the Senate version were enacted.

I share the views expressed in your letter to Chairman BONNER, dated May 3, 1961, which stresses the indispensability of certain safeguards in any dual-rate bill. These safeguards have been largely eliminated in the Senate Commerce Committee version.

Therefore, I would appreciate it if you could study this version, which will be debated on the Senate floor within the next few days, and give me your views as quickly as possible.

With kindest regards.

Sincerely yours,

ESTES KEFAUVER.

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., September 5, 1961.

Hon. ESTES KEFAUVER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KEFAUVER: This is in response to your letter of August 31, 1961,

requesting the views of the Department of Justice on H.R. 6775, as it was reported by the Senate Committee on Commerce.

The Senate Committee version of H.R. 6775 differs materially from the bill as passed by the House of Representatives. The bill, as it was passed by the House of Representatives, contained specific safeguards to prevent ocean steamship conferences from using dual-rate systems or other concerted activity as predatory devices to drive nonconference competition out of business. These safeguards have been omitted in the Senate Committee bill. In particular the Senate Committee bill has deleted: (1) The provision that the dual-rate contracts referred to in the bill shall not be intended or reasonably likely to cause the exclusion of any other carrier from the trade; and (2) the provision that the Board shall not approve agreements whose probable effect will be reasonably likely to exclude any other carrier from the trade.

The deletion of these provisions would have the effect of reversing the rule of the Isbrandtsen case, thereby permitting ocean steamship conferences, which are international cartels, to stifle independent competition by resort to predatory dual-rate systems. In the opinion of the Department of Justice these provisions constitute competitive safeguards which are indispensable to any reasonable enactment on this subject. The public interest would be disregarded were these provisions to be omitted.

It is our opinion that no legislation on this subject should be enacted unless such provisions are included. We urge that these provisions, as they have appeared in the House-enacted bill, be restored.

In addition, for your information I am attaching a copy of a letter from Deputy Attorney General Byron White to Senator WARREN G. MAGNUSON, which expresses in detail the views of the Department of Justice on the Senate Merchant Marine and Fisheries Subcommittee Print, which is substantially similar to the Senate Committee version of H.R. 6775.

Sincerely,

ROBERT KENNEDY,
Attorney General.

U.S. DEPARTMENT OF JUSTICE, OFFICE OF THE DEPUTY ATTORNEY GENERAL,
Washington, D.C., August 16, 1961.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate,
Washington, D.C.

DEAR CHAIRMAN MAGNUSON: We have been furnished by Mr. Webster, counsel for the committee, with the subcommittee print of H.R. 6775, dated August 8, 1961. Mr. Webster informed us on August 3, 1961, that the Department of Justice comments on this print of the bill would be desired by your committee. Accordingly, we are pleased to submit the following report on the subcommittee print.

H.R. 6775 would amend the Shipping Act, 1916, as amended (46 U.S.C. 801 et seq.), in various respects. The comments which follow are directed to the provisions of the subcommittee print of the bill intended to effect changes in existing law which are of serious concern to this Department.

Section 3 of H.R. 6775 would amend section 14 of the Shipping Act by adding a new section 14b which would require the Federal Maritime Board (hereinafter referred to as "the Board") to permit the use by any common carrier or conference of carriers in foreign commerce of any contract which provides lower rates to shippers or consignees who agree to give all or any fixed portion of their patronage to such carrier or conference, if such contract would not have certain proscribed effects and if it meets requirements enumerated in the bill. The effect of enactment of section 3 would be to sanction the use in the ocean shipping trades of the exclusive patronage contract-noncontract rate system, more frequently referred to as the dual-rate system.

Section 4 of the bill would amend section 15 of the Shipping Act which deals with Board approval of agreements between carriers. The principal changes concern conference agreements.

Sections 3 and 4 of the subcommittee print depart radically from the version of H.R. 6775 which was unanimously enacted by the House of Representatives on June 12, 1961. The House legislation contained provisions in sections 1 and 2 (to which sections 3 and 4 of the subcommittee print are roughly comparable) designed to protect competing carriers, shippers, and the general public from untoward effects of the use of dual-rate contracts by ocean shipping conferences. These competitive safeguards—the very heart of this legislation, in our opinion—have been eliminated, either directly or in effect, from the subcommittee print. Therefore, were H.R. 6775 to be enacted in its present form, it would give ocean shipping conferences virtually unrestricted license to employ dual-rate contracts, and other conference practices, as deliberate predatory devices to stifle the competition of carriers not affiliated with the conferences.

As the committee is aware, ocean shipping conferences operating in the foreign commerce of the United States are private organizations, somewhat akin to trade associations, organized to further the business interests of the participating steamship lines. While the conferences must file their agreements with the Board and secure approval prior to initiating joint action, because of the international nature of the shipping industry the supervision which the Board may exercise is quite limited and hardly comparable to the comprehensive regulation exercised with respect to domestic transportation industries by such agencies as the Civil Aeronautics Board and the Interstate Commerce Commission. For example, the Board has no jurisdiction over the reasonableness of rates charged by steamship lines in American foreign commerce and, except as to subsidized U.S. carriers, has no control over the adequacy, frequency, or regularity of service provided by steamship lines operating to and from U.S. ports.

The most profound change in H.R. 6775 which would be effected by the subcommittee print deals with the right of nonconference carriers to enter or serve ocean trades with freedom from predatory and anticompetitive onslaughts by the conferences.

The typical shipping conference represents a tremendous concentration of power. On practically every one of the U.S. foreign trade routes the conferences enjoy monopoly control; indeed, there are few, if any, in which the conference does not control at least 80 percent of the liner cargo movement. in most trades the percentage is much higher. Absent the antitrust exemption which Congress provided in the Shipping Act, the joint rate-fixing activity and the other forms of anticompetitive collaboration typical of the conference system would do violence to the antitrust statutes. The history and weight of interpretation of the 1916 act amply demonstrate that while Congress made it possible for steamship lines to cooperate voluntarily in conference arrangements, Congress was equally determined to protect the rights of carriers who choose not to participate in conferences, as well as to insure to shippers the right to patronize nonconference carriers without retaliation from the conferences. Thus, for example, Congress specifically outlawed in section 14, first and second, of the Shipping Act two of the most vicious practices known in 1916 to have been employed by conferences against their competitors; namely, the deferred rebate and the operation of fighting ships. In section 14, third, Congress similarly prohibited retaliation against shippers who patronize other carriers.

H.R. 6775 as enacted by the House of Representatives took into account the demand for legalization of dual-rate contracts but at the same time provided that such contracts not be used where designed to drive another carrier out of business or where the reasonably likely result of their use would be equally adverse to the public interest in maintenance of free competition. By contrast, the subcommittee print of August 8, 1961, reflects the philosophy that a carrier ought to join a conference or suffer the consequences of predatory conference action. It is this approach to legislation on dual rates which the Department of Justice finds so disturbing.

The changes effected in sections 1 and 2 of H.R. 6775 by the subcommittee print are not fully apparent until study is made of all the provisions of sections 3 and 4 of the subcommittee print, and particularly of section 4. While section 3 appears to retain in substance the language of the House-passed version which would bar removal of any dual-rate contract which is intended or will be reasonably likely to cause the exclusion of any carrier from the trade, section 4 would wholly nullify the purport of this key provision. Section 4 of the subcommittee print provides that "(1)f a common carrier is eligible but unwilling, on reasonable and equal terms and conditions, to join a conference approved by the Board and serving a trade, such carrier may not be deemed excluded from that trade, or prevented from entering it, or eliminated from it, within the meaning of all such terms as used in this section and section 14b of this act."

The clear effect of the latter provision would be to deprive the nonconference carrier of the protection against unfair exclusion from a trade whenever the nonconference carrier has chosen to remain independent of the conference. Since almost every conference in the U.S. foreign trade would welcome the membership of the nonconference carrier in order to eliminate the latter's competition, it is impossible to conceive of a situation involving a nonconference carrier in competition with a conference which would not fall within the above quoted language of the subcommittee print. In sum, therefore, the Committee on Commerce, in considering adoption of the proposed language of the subcommittee print vis-a-vis the language of the House enactment, will be deciding which concept shall henceforth apply to the ocean shipping industry: freedom of opportunity for all steamship lines, whether as conference members or independent operators, according to individual preference, as opposed to compulsory conference membership resulting in elimination of competition and monopolistic freight rates.

The Department of Justice considers indispensable to any reasonable enactment on dual-rate and steamship conference agreements the inclusion of language unequivocally barring the approval of such agreements where they are intended or will be reasonably likely to cause the exclusion of another carrier from the trade. Assistant Attorney General Loevinger indicated in his testimony before the Merchant Marine and Fisheries Subcommittee on August 3, 1961, how important are the actual and potential benefits of this legislative protection to American carriers, shippers, and the general public. Judge Loevinger noted that, even though at a given moment there may be no American carrier operating independently of the conferences, the ability of an American carrier to withdraw without fear of conference retaliation provides it with leverage within the conference which may be exerted

to avert action which may be adverse to its interests or to the foreign commerce of the United States. This is of extreme significance to American carriers which account for only a small vote in virtually every important conference serving our foreign trade.

It is important also to bear in mind that in the ocean trades competition is the only practical restraint on unduly high freight rates. In this connection, the Under Secretary of State submitted to the Merchant Marine and Fisheries Committee on August 3, 1961, data obtained from foreign governments in response to the State Department's inquiry of them how reasonableness of rates is assured in waterborne commerce. Eight foreign nations—Belgium, Denmark, Federal Republic of Germany, Finland, Italy, Netherlands, Norway, and Sweden—of the 11 questioned, replied that they rely on free competition to achieve reasonable rates. The subcommittee print, however, would leave the way open for shipping conferences to eliminate the very competition which the United States has historically fostered and which a majority of foreign nations espouse, by withdrawing protection of the rights of the competitor who may choose to offer rate competition.

We would further direct the committee's attention to the example cited in Assistant Attorney General Loevinger's testimony of the unconscionable rate charged on an important commodity moving in American foreign commerce when there was no independent carrier providing competition in the particular trade. The entry of an independent carrier brought about a reduction of the rate from $80 to $40, the latter level being one which, by the admission of one of the American carriers involved, still permitted profitable operations.

For the reasons outlined above, we urge the committee to delete the provision appearing in the subcommittee print beginning at line 22 on page 5, which completely nullifies the protection for nonconference carriers, contained in the House-passed version. This important competitive safeguard, but for the language beginning at line 22 on page 5, would be preserved in the subcommittee print. We deem it essential that these protective provisions be retained as they were in the House-enacted version of H.R. 6775.

There are other provisions of the subcommittee print on which comment should also be made. Whereas section 1 of the House enactment would require the proponents of dual-rate systems to establish in Board proceedings that the proposed dual-rate contract would not have the proscribed effects, the subcommittee print would shift the burden to opponents thereof or to the Board. The latter would have to prove by the preponderance of the evidence that a dual-rate contract would contravene the language of the bill. We believe that the House approach is the more reasonable. It places the burden where it belongs, that is, upon the proponent and expected beneficiary of the proposed dual-rate contract.

The subcommittee print, also changes the House-enacted provisions dealing with dual-rate contracts by inserting the word "common" before the word "carrier" in several places. The insertion of the word "common" before the word "carrier" on line 17 of page 2 would limit the protection against exclusionary dual-rate systems to common carriers and would appear to permit the use of dual-rate contracts which are designed or are likely to exclude a carrier which is not a common carrier. We are aware of no justification for differentiating between the types of carrier that might be adversely affected by conference use of dual-rate contracts. We therefore recommend that the committee delete the word "common" wherever it has been added to H.R. 6775 by the subcommittee print. This comment would also apply to the addition of the word "common" on line 17 of page 5 of the print.

We turn now to the language of the subcommittee print which relates to provisions which must be expressly incorporated in any dual-rate contract to be lawful under the proposed legislation.

The subcommittee print would strike from H.R. 6775 the provision that prohibits dual-rate contracts from covering shipments of goods where the contract shipper has no legal right to select the carrier. The effect of this deletion will be to create endless controversy as to whether or not certain shipments, notably shipments of goods sold on f.o.b. and f.a.s. terms, are covered by approved dual-rate contracts. Without the provision contained in the House version, the way is left open for conferences to charge contract shippers with breach of their dual-rate contracts when they sell goods to buyers who elect to ship via nonconference carriers. The deletion of this provision could be construed to permit the conferences to forbid contract shippers from doing business with anyone who will not surrender his right to make his own shipping arrangements. We urge that this provision be restored to the bill in order that it be made clear that Congress does not intend to allow the shipping conferences to dictate the terms upon which one merchant must sell to another.

Another provision deleted from the House enactment which should be reinstated is that precluding any requirement that shippers divert their shipments from natural routings. The purpose of this provision was to insure shippers' freedom to choose the ports from which and to which to ship their goods. It is one thing for Congress to permit a system of contracts under which shippers must promise that when they ship from a particular port they will use conference vessels, but it is a wholly different thing to permit conferences to compel shippers to ship from a particular port when it may be more economical for them to ship from other ports which the conferences may not happen to serve. The Department of Justice recommends that the House provision on this point be reinstated in H.R. 6775.

We are also concerned with clause 3 of section 3 of the subcommittee print. This clause would limit damages recoverable for a shipper's breach of a dual-rate contract to actual damages, but the proviso permits liquidated damages not to exceed the freight charges at the contract rate, less cost of handling.

We reiterate our previous objection to the proviso in this clause. It is our understanding that clause 3 is in the bill for the purpose of barring the past practice of disguising oppressive penalties in the form of liquidated damages. At the same time it was desired to permit liquidated actual damages where desired by the parties so as to avoid possible future uncertainties and controversies in situations where actual damages were difficult to prove.

We are convinced that the present formula will not achieve the objective of eliminating penalties. The proviso assumes that the actual damages for a shipper's breach of a dual-rate contract are the same as damages resulting from breach of a space reservation or booking contract. As was made clear in Assistant Attorney General Loevinger's testimony on August 3, 1961, the present proviso, which in effect equates the two types of damage, can only result in damages for a shipper's dual-rate contract breach far in excess of actual damages. In its present form, therefore, the bill still leaves the way open for unduly harsh and punitive results.

While we recognize that any effort to specify liquidated damages may not in all cases result in an approximation of the actual damages, we observe that no liquidated damage formula has been advanced which does not also constitute a severe penalty all out of proportion to the actual damages suffered by the conference or its members. Since the demand is for a measure which is certain, is fair to the carrier, but at the same time not oppressively punitive, we respectfully suggest that the committee place a maximum on liquidated damages of 1½ times the spread between contract and noncontract rates. This, we believe, is a fair and reasonable approach to the problem. It would deter a shipper from disregarding his dual rate contractual obligations, but would not place him in jeopardy of being required, in the event of breach, to pay the conference an amount clearly having no logical relation to the loss which the conference can be considered to have sustained.

Clause 5 of section 3 of the subcommittee print permits the approval of dual rate systems where the maximum spread between contract and noncontract rates is 15 percent. We view any spread in excess of 10 percent as unwarranted. In this connection, it should be noted that the House report indicated a problem in determining a maximum spread figure which would not penalize a shipper who does not choose to limit his shipments to conference vessels and which at the same time would provide a reasonable inducement to execute such agreements. It is the considered view of the Department of Justice that the 15-percent maximum spread provided for in clause 5 of section 3 of the subcommittee print does not strike such balance. Rather, it weighs heavily on the side of coercing shippers to limit their cargoes to conference vessels. All would agree that shippers should be provided with a realistic choice in deciding whether to contract to ship exclusively on conference vessels or whether to retain their right to ship on both conference and nonconference vessels as they choose. There is good reason to believe that a spread of 15 percent would foreclose this choice.

While the difference between a 10-percent and a 15-percent spread may seem to be solely a matter of degree, the fact is that in the highly competitive and price-conscious world of international trade an additional handicap of 5 percentage points in freight rate markedly reduces a shipper's ability to determine whether he would prefer freedom to use both conference and nonconference vessels rather than being limited to the use of one type of service. We recommend that a 10-percent maximum be written into this clause by the committee.

We would next direct the committee's attention to the provision of section 4 of the bill which in effect would permit Board approval of agreements between conferences serving different trades which are competitive, with the proviso that each conference retain what the bill refers to as the "right of independent action." We urge the committee to delete the proviso thereby clearly prohibiting any interconference agreements.

While the existing language of the bill gives a conference the right to take independent action on matters embraced within the agreement, it nevertheless permits all parties to an agreement to establish a uniform policy on rates and other competitive matters when it serves their purpose to do so. The Department of Justice is convinced that it is not in the public interest to permit agreements which may create a virtual monopoly of ocean transportation to or from this country. Congress should not sanction private rate-fixing schemes or supercartels which could embrace every port through which the foreign commerce of the United States is conducted. Such an arrangement would deny shippers the cost savings resulting from their location on or in proximity to a particular coastal range.

Another amendment to section 15 of the Shipping Act is the provision of section 4

of the subcommittee print requiring conferences to police their agreements. We question the policy requiring conferences to engage in private policing. Congress should neither require nor permit cartels, even the ones in ocean shipping, to use penalties to coerce compliance with their cartel agreements. Nor do we believe Congress should delegate to cartels the responsibility for enforcing our maritime laws, especially in view of the potential harm that could be caused by unwarranted coerced disclosure of confidential business records to competitors and from the assessment by the cartels of harsh or discriminatory penalties.

Section 5 of the subcommittee print provides that agreements filed with the Board after passage of the proposed act are lawful until disapproved by the Board. There is no limit set on the period within which the Board must act on such agreements. The exemption from the antitrust laws of any cartel agreement, and certain cartel tying devices, is a most serious matter and a departure from our free-enterprise principle that competition should be the rule of trade. No dual-rate agreement should be permitted to go into effect for an unlimited period.

The Chairman of the Board, in his testimony before the House committee, indicated that a 1-year period would be a realistic one within which to review and dispose of the number of agreements which are likely to be filed after passage of this legislation. If it takes the Board a longer period to review such agreements, at least the unsupervised dual-rate system cannot continue to be employed during any such delay. On the other hand, under the provision in the subcommittee print, any delays experienced by the Board would have the effect of permitting the unsupervised dual-rate system to continue in effect. Clearly, this would encourage dilatory tactics and tend to postpone indefinitely the clarification of status of all dual-rate contracts which for the past 3 years Congress has been seeking to provide.

The Department of Justice also recommends the deletion of section 7 of the subcommittee print. This section would permit serious inroads to be made upon the confidential relationship between shippers and carriers established by section 20 of the 1916 Shipping Act. It must be appreciated that shippers are required to disclose certain of their private business affairs to carriers to permit the assessment of proper tariff charges. Under section 20 of the Shipping Act the carriers are in return put under the obligation of maintaining such data in secrecy so that the shippers' business transactions are not disclosed to competitors and that such information is not used in any way to the shippers' detriment.

The proposed legislation would depart from the traditional concept of section 20 and would cause a substantial lessening of the protection which shippers now enjoy. Under the instant bill not only could a common carrier furnish data on a shipper's transactions without the shipper's consent but a "conference or any person, firm, corporation or agency designated by the conference" could solicit information as to a shipper's transactions. Presumably this data could be solicited from freight forwarders, terminal operators, warehousemen or any other persons subject to the Shipping Act who may have knowledge of the shipper's transactions. This would involve a radical change in public policy and, in our opinion, would open the way for widespread abuses and breaches of confidence in the shipping industry.

In addition to these potential results, the bill creates an apparent paradox. While a conference or its agent would be permitted by the proposed legislation to solicit information without limitation, those other than a conference carrier who might be solicited would still be restrained by the language of section 20 from disclosing the solicited information. Thus section 7 of the instant bill would authorize the solicitation of data from persons whom, were they to divulge it, could be criminally prosecuted for doing so. Any further attempt to deal with this anomalous situation would probably create more problems than it would solve. Even if all persons subject to the Shipping Act were to be authorized to release data for the purposes stated in the bill, a terminal operator or warehouseman would obviously act at his peril in relying on a representation that confidential data he was solicited to disclose was desired solely for one of the purposes permitted by the bill.

For the reasons indicated in the foregoing analysis, the Department of Justice respectfully urges the Committee on Commerce to amend the subcommittee print of H.R. 6775 in accordance with the recommendations contained herein.

The Budget Bureau has advised that it has no objection to the submission of this report from the standpoint of the administration's program.

Sincerely yours,

BYRON WHITE,
Deputy Attorney General.

MIGRATORY BIRD TREATIES NOT VIOLATED BY ESKIMOS TAKING DUCKS FOR FOOD

Mr. GRUENING. Mr. President, 3 months ago, the people of Alaska were startled to hear over their radios and to read in their newspapers that the local agents of the Fish and Wildlife Service had arrested Eskimos in the far north and far west of the 49th State for shooting ducks and geese, and had confiscated their guns.

This has never happened before in the history of Alaska.

The fish and wildlife agents' justification for their unprecedented action was that the taking of these birds between March 10 and September 1 was in violation of a convention between the United States and Great Britain, adopted in 1916, for the protection of migratory waterfowl.

The convention makes exceptions in the case of Eskimos and Indians who, in the words of the convention, "may take at any season, auks, auklets, guillemots, murres, puffins, and their eggs, for food and their skins for clothing, but the birds and eggs so taken shall not be sold or offered for sale."

But the convention does not make exception for many other migratory game birds numbering more than two score, and including ducks and geese, for the taking of which the local fish and wildlife agents in Alaska arrested Eskimos in late May of 1961.

The news created a sensation. Two days after the arrests, the Associated Press reported that 100 Eskimos at Barrow, the northernmost community under the American flag, had gathered at a mass meeting, bringing the eider ducks they had killed, and had freely signed statements admitting their actions. At a subsequent mass meeting, 300 Barrow natives signed a petition asking President Kennedy to issue emergency regulations permitting them to hunt migratory waterfowl for food at any time of the year, and if enforcement against them to prevent this was to take place thereafter, to seek a change in the convention.

To those familiar with this long-established custom of the Eskimos, this unprecedented action caused surprise and indignation. This was the universal reaction in Alaska among natives and most whites. Governor Egan immediately wrote to Secretary of the Interior Stewart Udall in protest. As a press conference, the Governor stated that it appeared to him that the treaty was flexible, and that the Secretary of the Interior had it within his power to permit such of the native population as had always taken ducks and geese for food at any time of the year to continue to do so. Governor Egan said:

> They have done so for generations, and the flocks have not diminished because of their activities. Commonsense and good judgment should prevail. We should not deprive these people of their very existence.

Welfare costs would jump $150,000 a year, the Governor further pointed out, if this always hitherto available food supply, on which the Eskimos had depended, were cut off.

Governor Egan also voiced a widely believed reason for the unprecedented action of the local fish and wildlife agents; namely, that "now that the State has taken over its own game and fisheries program, the Fish and Wildlife Service had to do something to justify its existence in Alaska."

In Alaska, the fish and wildlife agents demanded prompt prosecution of the Eskimos by the U.S. attorney at Fairbanks. However, Assistant U.S. Attorney Jerry Shortell referred the matter to the Department of Justice for guidance. The Associated Press reported Secretary Udall as saying, at a press conference, "The law is the law," and indicating that he had no choice but to enforce it.

Being convinced that an error had been committed somewhere, or that at least an unfortunate situation had been needlessly created, the Alaska congressional delegation, Senator BARTLETT, Representative RALPH RIVERS, and I called on Secretary Udall to discuss the matter. The meeting took place in his office on the Assistant Secretary of Fish and Wildlife, Mr. Frank P. Briggs, and other representatives of the Fish and Wildlife Service were present.

Secretary Udall's stated position at that time was again that "the law is the law" and that he had no choice but to enforce it.

The members of the Alaska delegation, however, expressed the opinion that there was substantial doubt in their minds just what "the law" in this case was. They voiced the view that it was difficult to reconcile the action taken by the fish and wildlife agents in Alaska in May 1961 with the fact that since 1916 no Secretary of the Interior or no Secretary of Agriculture had made any attempt to enforce what was now, for the first time, presumed to be "the law." From 1916 to 1940, the protection of birds and other wildlife was under the jurisdiction of the Department of Agriculture through its agency, the Biological

Survey, which in 1940 was merged with the Bureau of Fisheries of the Department of Commerce, and the resulting agency, the Fish and Wildlife Service, with jurisdiction over both marine and land animals, transferred to the Department of the Interior. But throughout this entire period of the convention between Canada and the United States to protect migratory birds, the responsibility for the Eskimos and Indians in Alaska had been vested in the Department of the Interior.

The delegation, therefore, expressed its dissent to Secretary Udall from the position he had taken at that time, shortly after arrests of Eskimos in Alaska.

The reason for that dissent is based on a number of factors.

The Eskimos are meat-eaters, for the obvious reason that vegetables do not grow naturally in the Arctic. Before the coming of the white man, so-called white man's food—flour, cereals, dried fruits, canned vegetables, coffee, tea, sugar—did not exist in the Eskimo world. In villages where they now exist, the Eskimo frequently has no money to buy them.

So, the Eskimo has depended on whale meat, seal, walrus, fish, caribou, and birds, particularly the eider duck. From time immemorial, the Eskimos have been taking eider ducks and geese, as well as other nonmigratory birds—taking them with slings and other implements of their own devising before the white man introduced firearms. In the late spring, and with time variations in different parts of farflung Eskimo Alaska, no other form of life-sustaining game is available. The nonavailability at such times of these other game foods is based on climatic conditions, such as the breaking up of the pack ice in the Arctic Ocean and Bering Sea and the inaccessibility or scarcity of certain food animals because of these seasonal conditions.

It seems clear to me that despite the inclusion in the Migratory Bird Convention—or treaty—of ducks and geese among the birds not to be taken from March 10 to September 1, the established habits of the Eskimos and their essential needs were considered by the Federal authorities after the convention was ratified in 1916. How otherwise explain the total absence of any effort at enforcement of the provisions of the treaty against the Eskimos of Alaska? A corresponding absence of enforcement against Canadian Eskimos appears to have characterized the corresponding Canadian authorities, including—and thus differing from the U.S. fish and wildlife agents in Alaska—the year 1961.

It should be especially noted that in transmitting the treaty to the Congress, neither the President nor the Secretary of State made mention of the fact that ratification of the treaty would involve substantial budgetary implications in welfare costs for natives who would be deprived of a vital food source. Can it be said that the President and the Secretary of State did not make full disclosure to the Senate as to the full implications of the requested ratification?

Such an interpretation, attributing, in effect, bad faith to the President and the Secretary of State must be rejected.

Instead it is more logical to interpret their actions as indictating that they did not believe that the ratification of the treaty would cause any change in the living habits of the natives and that hungry Eskimos could still hunt as they had done since time immemorial to keep themselves from starvation.

In 1916, Franklin Knight Lane was Secretary of the Interior in President Wilson's Cabinet, and continued in that post until 1920. He was, of course, fully aware of the provisions of the United States-Canada Migratory Bird Treaty, indeed perhaps peculiarly interested since he was born in Canada. Moreover, more than any previous Secretary of the Interior, he exhibited a deep interest in and concern for Alaska. On his motion, two Alaskan residents were successively appointed as Governors of Alaska. No previous Secretary of the Interior had so great a knowledge of Alaska's problems and needs. If enforcement of the Migratory Bird Treaty of 1916 had been of concern for its effects on the Eskimos of Alaska, Secretary Lane, vocal as no other Secretary had been on Alaskan matters, and particularly outspoken on the conflicting and overlapping of Federal bureaucracy in that territory, would certainly have asserted himself.

While at the time the Secretary of the Interior had jurisdiction over the natives of Alaska—Eskimos, Aleuts, and Indians—and, indeed, over all Alaskan matters not specifically assigned to some other Federal department, the responsibility for the management of wildlife was, as I have pointed out, lodged in the Department of Agriculture. The Secretary of Agriculture in President Wilson's Cabinet was David F. Houston. The special responsibility for wildlife was vested in one of the Department of Agriculture's agencies, the Biological Survey.

That bureau was headed by one of the Nation's foremost naturalists, Edward William Nelson. He had been with the Biological Survey since 1890, was promoted through its ranks, was made its chief in 1916, and continued as such throughout the Wilson administration and long thereafter. Now it happened that despite his nationwide jurisdiction, Nelson was one of the great specialists within his field on Alaska and particularly in what may be described as the Eskimo country—the littoral of the Arctic Ocean and the Bering Sea. He had engaged in extensive scientific explorations in these regions as far back as 1877, and had continued them throughout his long and distinguished public service. While his knowledge covered the broad field of biology, he was preeminently an ornithologist. In addition to other scientific distinctions, he was elected president of the American Ornithological Union. His published scientific writings included: "Birds of Bering Sea and the Arctic Ocean," as well as numerous other papers on birds and the need for their conservation. But his interest ranged beyond animal life, and in 1908 he had published his study entitled "The Eskimo About Bering Straits."

To that highly and uniquely informed public servant fell the responsibility for any action in Alaska involving the taking by Eskimos of the birds of the Bering Sea and the Arctic Ocean. He took no action. There is no evidence that he saw the need for any action. We shall see how 45 years later, another group of distinguished scientists located on the scene, and through personal observation highly knowledgeable, would register their view that the enforcement procedures of 1961 were harmful both to the Eskimo and to the ducks.

Thus, in the year of the Migratory Bird Convention, 1916, and in the years immediately following, neither Secretary of the Interior Franklin K. Lane, in whom was lodged the jurisdiction over the Eskimos and Indians of Alaska, and Edward W. Nelson, as the representative of the Secretary of Agriculture in his responsibility for the migratory and other birds of the territory of Alaska, saw any need for action in regard to the taking of ducks for food by the Eskimos.

If ever the issue was pertinent, it was then—in the year of the ratification of the Migratory Bird Treaty between the United States and Canada, and in the years immediately following.

And, understandably, with that precedent of no action established during the sequent 4 years in the Wilson administration by incumbents Lane and Houston, no action to prosecute the Eskimos for taking ducks was taken in the successive secretaryships of the Interior of John Barton Payne, of Albert B. Fall, of Hubert Work, of Roy O. West, of Ray Lyman Wilbur, or Harold L. Ickes, nor in the successive Secretaryships of Agriculture of Henry T. Meredith, of Henry C. Wallace, of Howard M. Gore, of W. M. Jardine, of Arthur M. Hyde, of Henry A. Wallace.

In 1940, as I have pointed out, the functions of the Biological Survey were transferred from the Department of Agriculture and vested in the Fish and Wildlife Service of the Department of the Interior. This Department thereafter had responsibility for the Eskimos and Indians of Alaska, and, until statehood, for wildlife management and conservation, retaining the latter responsibility after statehood only in the case of previously established fish and wildlife game refuges or ranges, and for the enforcement of international treaties. Yet neither Secretary Ickes, after receiving this dual responsibility in his Department for the years 1940–45, nor his successors, Julius A. Krug, Oscar L. Chapman, Douglas McKay, and Fred A. Seaton felt impelled to order action such as was taken by the Alaska fish and wildlife agents in May of 1961.

While the negative action of nonenforcement, as far as Eskimos and their taking of ducks was concerned in the first 43 years of the United States-Canadian Convention is impressively evidential, positive evidence that Eskimo bird taking was not deemed within the purview of the convention is furnished by Circular No. 10 of the Biological Survey

issued in April 1933. In this pamphlet, which incorporates the Alaska game law of January 13, 1925, as amended on February 14, 1931, whose enforcement was the province of the Biological Survey, it is stated:

> Nor except as herein provided, shall (any regulation) prohibit any Indian or Eskimo, prospector or traveler, to take animals or birds during the close season when in absolute need of food and other food is not available * * * but the Secretary (of Agriculture) by regulation may prohibit such native Indians or Eskimos, prospectors or travelers from taking any species of animals or birds for food during the close season in any section of the Territory (of Alaska) within which he shall determine that the supply of such species of animals or birds is in danger of extermination.

Clearly, it is here provided that Indians and Eskimos may take birds for food during the close season for food, when the need is there, and other food not available, and that a contrary regulation of the Secretary is required only if and when there appeared to be danger of extermination.

Let it be noted here that Fish and Wildlife officials have admitted to me in June of 1961 that the taking of ducks and geese by Eskimos during the years have in nowise depleted the supply.

Shortly thereafter, in 1936, a convention was negotiated between the United States and Mexico "* * * for the protection of migratory birds * * *." In transmitting the draft to the Senate, President Franklin Delano Roosevelt stated that it was a treaty similar to the one with Canada of 1916. Since some of the species of birds protected in the earlier convention migrated to Mexico, it was, he said, desirable to extend protection to them there, also.

There were some interesting differences in the texts of the letters of transmission from our Secretaries of State and in the texts of the two treaties, although both seemed designed for the same general purpose; namely, to save the migratory waterfowl from extinction.

In his letter of transmission of the Canadian treaty on August 17, 1916, Secretary of State Robert Lansing gave this justification for it:

> That a very great number of people in the United States are personally interested in the protection of our migratory wild birds is evidenced by the fact that there are about 5 million sportsmen in this country and their number is steadily increasing. These men are all dependent upon the continuance of our supply of wildfowl for their sport, and a very large number of them are in consequence taking an active interest in the present treaty. In addition, the value of the proper protection of our migratory insectivorous birds is of the deepest interest to farmers for the practical assistance they give in destroying insects injurious to crops. Furthermore, millions of people in the United States are deeply interested in the conservation and increase of bird life from an esthetic viewpoint, as well as on account of their practical utility.

Conservation of the birds, first, for sport; second, for the farmers' crops; third, for their esthetic value—these are the three and the only reasons alleged in Secretary Lansing's letter of transmittal.

It is a well accepted principle of treaty interpretation that when a topic is not specifically covered by the written words of a treaty, then customs and usage prevailing at the time of ratification and drafting of the treaty, and continuing unabated thereafter, can be consulted in interpreting the treaty. Neither the Canadian nor the Mexican treaties provides specifically for situations where individuals were permitted to hunt for essential food. We must, therefore, go outside the written words of the treaties to determine the intent of the signatories to the treaties.

As already indicated, custom and usage when the treaties were negotiated, signed and ratified, and subsequent thereto, permitted the taking of ducks and geese for food.

One may well ask: Was the most basic of all purposes to justify conservation of these migratory waterfowl—namely, their use as food for those who needed the food—considered insufficiently important to list, or was it taken for granted as one purpose of the treaty?

I prefer to assume the latter. That assumption is justified by the text of the convention. Indeed, its preamble lists the value of the birds for food first, their insectivorous service second, and says nothing about their use for sport.

The letters of transmission of the Mexican Treaty, either by Secretary of State Cordell Hull to the President, or by the President of the Senate, contain no declaration of purpose, but the Mexican Treaty, in its preamble, lists four values of the migratory birds in the following order: sport, food, commerce, and industry.

There are other differences: The Canadian Treaty, in article VIII, provides:

> The high contracting powers agree themselves to take, or propose to their respective appropriate lawmaking bodies, the necessary measures for insuring the execution of the present convention.

The Mexican Convention, following article I, which declares its purpose to prevent the extinction of migratory species, provides, in article II:

> The high contracting parties agree to establish laws, regulations, and provisions to satisfy the need set forth in the preceding article.

And it lists five general provisions, one of which is modified by permitting the taking of birds in conformity with the laws of each contracting country.

This language is significant. In the preparatory work for the Mexican Treaty are two memorandums prepared for the U.S. Chargé d'Affaires in Mexico City, stating that the Mexican Government intended that poor people might take such birds for food but not for sale. The Mexican authorities were desirous of including a specific exception for the indigent poor but were persuaded not to include this modification in the final treaty draft.

Yet article 857 of the Mexican Civil Code permits the indigent poor to take such migratory fowl at any time regardless of season. This provision continues in full effect.

Thus, the three nations, signatories to the treaties, achieved the same result until 1960: in the case of Canada as in the United States through nonapplication of its provisions to Eskimos taking ducks for food; in the case of Mexico, by excluding from possible prosecution, in its civil laws, the indigent poor. The United States alone, for the first time—in 1961—operated to prevent the greatest of all possible uses of migratory birds: their use for food by those needing the food.

These considerations prompted me to write Secretary of State Dean Rusk as follows:

JUNE 13, 1961.

Hon. DEAN RUSK,
The Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: I am greatly disturbed at the sudden prosecution of Eskimos and Indians in Alaska under the migratory bird laws for hunting ducks and geese which, since time immemorial, have formed an essential portion of their food supply. I am at a loss to explain this sudden zeal for law enforcement.

It is my understanding that this action is founded on an interpretation of the 1916 treaty with Great Britain and the 1936 treaty with Mexico. Since one treaty is 45 years old and the other is 25 years old and since the Eskimos and the Indians in Alaska have all during those years—and before—been hunting ducks and geese for food without prosecution, can it not be said that the proper interpretation of both these treaties is that the preexising rights of Eskimos and Indians are not be affected by their provisions?

If this interpretation is not possible, then I would suggest that the Governments of Canada and Mexico be approached without delay and codicils adopted for both treaties exempting the hunting of geese and ducks by Eskimos and Indians where such hunting is for the purpose of securing food for themselves and their families.

I am writing the Secretary of the Interior requesting that enforcement measures against Indians and Eskimos hunting ducks and geese in Alaska for food be suspended until a ruling on this interpretation can be obtained or until the adoption of appropriate codicils to these treaties can be negotiated.

In any event, I would appreciate an opportunity of conferring with the appropriate officials of your Department and of the Department of the Interior at the earliest possible moment on this most pressing matter.

With all best wishes, I am,
Cordially yours,
ERNEST GRUENING,
U.S. Senator.

I sent a copy of the letter I had written to Secretary Rusk to Secretary Udall, as follows:

Hon. STEWART L. UDALL,
Secretary of the Interior,
Washington, D.C.

DEAR MR. SECRETARY: I am enclosing a copy of a letter I have sent to the Secretary of State concerning the interpretation of the Migratory Bird Treaties with Great Britain and Mexico. I believe this letter is self-explanatory.

I believe that, in all fairness to the Indians and Eskimos of Alaska, this sudden reversal in enforcement procedures should be suspended until there has been ample opportunity either to explore fully the validity of the interpretation of the treaty which I have advanced or to negotiate protocols with the Governments of Mexico and Canada. I hope that you will follow this course of action.

In the meantime, as I suggested to the Secretary of State, I would welcome an opportunity in the immediate future of conferring with the appropriate officials of your Department and the Department of State.

With all best wishes, I am,

Cordially yours,

ERNEST GRUENING,
U.S. Senator.

Secretary of State Rusk replied as follows:

DEAR SENATOR GRUENING: Your letter of June 13 was the first indication to the Department that a problem exists in relation to enforcement of migratory bird regulations with respect to Eskimos and Indians in Alaska.

The laws governing the taking of ducks and geese are formulated under applicable provisions of a treaty with Great Britain on behalf of Canada signed in 1916 and a treaty with Mexico signed in 1936. While these treaties provide sufficient latitude for regulations permitting the taking of certain migratory birds for food, a closed session is provided for between March 10 and September 1 of each year for conservation purposes. Certain exceptions are noted in the Canadian Treaty, but they are not in question here. The Department has no responsibility for enforcing these treaties.

However, should it be determined that inequities do exist, the Department would interpose no objection to the correction of these inequities. It would be expected that any such measures would be based on scientific findings in respect to sound conservation principles.

I should be happy to make representatives of the Department, knowledgeable in this field, available for discussion with you, at your convenience.

Sincerely yours,

DEAN RUSK.

I likewise sent a copy of my letter to Secretary Rusk to Assistant Secretary of the Interior, Frank P. Briggs, who is in charge of fish and wildlife. Assistant Secretary Briggs replied as follows:

DEAR SENATOR GRUENING: Thank you for your letter of June 13 transmitting a copy of your letter to Secretary Rusk regarding the Migratory Bird Treaty.

As you will recall, during our recent meeting with the Alaskan congressional delegation, this subject was thoroughly discussed. I thought it was a fruitful session and trust we were able to clarify the Department's position on this matter.

Sincerely yours,

FRANK P. BRIGGS.

Since it was evident to me that the Department's position, as expressed by Assistant Secretary Briggs, did not afford any satisfactory solution, I replied as follows:

Hon. FRANK P. BRIGGS,
Assistant Secretary of the Interior for Fish and Wildlife, Department of the Interior, Washington, D.C.

DEAR MR. BRIGGS: Replying to your letter of July 12, in which you say, concerning the Migratory Bird Treaty, that at the recent meeting with the Congressional delegation, this subject—namely, the taking of birds by the Eskimos for food—was thoroughly discussed, and further, that you considered it a fruitful session, in the course of which you were able to clarify the Department's position on the matter.

My impression is that the Department's position, as stated at the meeting, was that the Eskimos were entitled to no special consideration; that although they had taken ducks for food since time immemorial without let or hindrance, the unprecedented strict enforcement this year, for the first time, by the Fish and Wildlife Service, had the Department's approval.

Speaking for myself, and I feel I likewise express the view of my two colleagues in the congressional delegation, I think this is a most regrettable attitude and one that needs further study and, we hope, revision. It is my belief that when the Migratory Bird Treaties with Mexico and Canada were enacted, the aboriginal rights of our natives in this field were either tacitly recognized by nonenforcement—and should continue to be—or that if that is not the case, those of us concerned with this human and vital problem should press for reinterpretation or modification of the treaties.

It does seem contrary, in my judgment at least, to the ideology of the "New Frontier" that these natives, who, in the great majority of cases are dependent on a supply of migratory birds during this session of the year (I am referring to those who still pursue a subsistence economy) should not have prior consideration over the interests of a few professional duck hunters for sport in the older 48 States. There is the further fact, which I think could be substantiated, that the taking of these ducks in the past by the Eskimos for food has not, in any sense, depleted the supply.

In the circumstances, I hope that the Department will not consider its position established as it appeared to be at our meeting, but that it will be prepared to approach this question from a standpoint of relative values and essential human rights.

Cordially yours,

ERNEST GRUENING,
U.S. Senator.

Secretary Briggs replied, more or less reaffirming his previous position. His letter follows:

DEAR SENATOR GRUENING: This will acknowledge your letter of July 18. As indicated in our earlier correspondence and in conversation, we are much concerned about the welfare of the Eskimos. However, treaty provisions give the Department no recourse but to carry out a progressive program of enforcement.

Our program continues to be one of information and education. It has not been one of sudden enforcement. Rather it has been in effect since the midforties with attention at first given to the more heavily populated settlements.

We certainly intend to continue studying all possible solutions. Talks will be initiated with representatives of the Canadian Government in an attempt to secure treaty revisions. I am sure you recognize that there is no easy, equitable solution, particularly with respect to the enforcement of existing laws and regulations.

Sincerely yours,

FRANK P. BRIGGS,
Assistant Secretary of the Interior.

Meanwhile, numerous letters had been received, not merely from Eskimos presenting their plight and requesting some remedy, but letters from others expressing their dismay at the unprecedented enforcement.

Typical of the Eskimos' plea was a petition sent by Paul Green and 133 others from Nome addressed to the Fish and Wildlife Service. It said:

We, the people that live along the coast of the Bering Sea and the Arctic Ocean have always experienced a lot of trouble in obtaining enough to eat during the time of the spring breakup. At this time of year seals are scarce and hard to catch, the rivers have much ice, and the fish runs have not begun, nor have the greens appeared. In the past we have been able to get waterfowl for food during this time, but now you tell us that we cannot hunt them for food during the spring. We would like to have those laws changed, especially on eider ducks.

Many waterfowl fly by the coast during the spring and many of them fly over to Siberia and are killed there. We have heard that very few of the eider ducks ever leave Alaska, and that we are the only people that hunt them. Thus we believe that we should be permitted to shoot eider ducks during the spring because there are many of them and we need them for food.

We hope that you can change the regulations soon. We have always needed waterfowl during the spring, and we still need them for food. If you cannot change the laws for us, many of the families will be hungry and unhappy. We want to obey the laws but it is difficult to do so when the family is hungry and needs the food you say we cannot take.

Six residents of Anvik, an Eskimo village on the lower Yukon River, wrote as follows:

We here in Anvik feel a real hardship because of this law. We find it impossible to obtain fresh meat of any kind. In the past we have always relied on what few geese and ducks we could get in the spring to tide us over until we could get fresh fish after the breakup. Those of us with big families could never afford to buy canned meat from the store, even if it was always available in the store. We don't even like to eat canned meat.

We have always hunted ducks and geese in the spring and we can't see how the few ducks and geese we get each year are going to cut down the total number in the world. It seems that this problem might be caused by the many who just hunt for the sport of it.

As it is now we are faced with two choices here. We can either go without meat for about 2 months, or we are forced to break the law in order to feed our families.

As you know, legal bird-game hunting is from September 1 to December 3. We here in the interior only see ducks and geese for less than half of that time. If we could have some of this season in the springtime when we need it more, it would really help.

A letter from a clergyman, the Reverend Rene Astruc, S.J., from St. Michael, on the Bering Sea, to Senator BARTLETT, of which I received a copy, states:

These parts of Alaska have been in quite an uproar recently: the sudden decision by the Fish and Wildlife to enforce the law of no hunting waterfowl at the spring of the year has taken everybody by surprise. This law is well known but has seldom been enforced on the native population for the simple reason that these birds are just about the only food these people have at this time of the year. Therefore 1961 has been a particularly bad year resourcewise.

When there is no other food available at this time of the year, you cannot expect these people who have always depended on the waterfowl to stop hunting. I should add that they kill relatively little and that all is used for food. Very little seems to be done is these parts to destroy natural predators * * * and the damage caused by these far surpasses any other. The people are going to continue hunting for food * * * It is my observation that the lack of wise rules is destroying, in the mind of the native people, the notion that such organization as the Fish and Wildlife is there to help them by protecting their resources. Neither can work well without the cooperation of the other. This, I am afraid, is not the way to obtain that of the native people.

Typical of another letter from other than Eskimos was one written from

Minto, a native village on the Tanana River, by the Reverend Gordon Olson, whose experience, in addition to his missionary service, included the local postmastership and acting as a licensing agent and tagging officer for the Alaska State Department of Fish and Game. The Reverend Olson wrote as follows:

DEAR SENATOR GRUENING: The news of the arrest of several hunters at Barrow and the confiscation of a large amount of ducks and geese from residents there by an agent or agents of the U.S. Fish and Wildlife Service is a very disturbing matter to the people of the villages. To a person who is aware of the native dependence on wildlife, this episode borders on the ridiculous.

In the past 9 years in serving as a missionary in villages and lately also as license agent and tagging officer for the Alaska Department of Fish and Game, I have come in close contact with the need of natives to hunt in order to provide for their families when there is a need. At times the shelves in the homes are bare. A meal may consist of coffee or tea and meat in some form. Then for someone to come along and say you can't hunt because the season is closed seems absolutely absurd. Should the Fish and Wildlife Service continue this harassment of the native way of providing for their families—carried on long before the coming of the white man—most villages would be nearly 100 percent dependent on welfare. Also the initiative of providing for their families would be lost. This whole matter is a very serious matter, for in effect, all the native people are on trial.

You have been so helpful in the past in matters concerning the needs of villages. I know that the native people will deeply appreciate a strong effort to see that the people can continue their way of living in a way which is morally right.

Sincerely yours,

Rev. GORDON OLSON,
Postmaster.

A letter from another clergyman, the Reverend Norman Donohue, S.J., pastor of the Little Flower Mission at Hooper Bay, raised some additional points on related issues. Father Donohue wrote as follows:

HONORABLE AND DEAR SENATOR GRUENING: I suppose you have heard from many Alaskans regarding the "Battle of Barrow" between the Eskimos and Fish and Wildlife. I have been intending to write you, but it took a remark in your May 5 Newsletter to get me to the typewriter.

In that letter it is stated that you were not opposing the appropriation for the Kuskokwim National Wildlife Range because State officials said it "may serve a useful purpose in the management of the waterfowl resources of the area." First of all, if the "State officials" quoted are the State Division of Fish and Game, their attitude has been no better than that of the Federal Fish and Game. A year ago, when a bill was introduced in the State legislature to remove a discrimination against the people of this coast in the matter of seal bounties, the State Fish and Game Division fought it tooth and nail. After the bill was passed in spite of them they stalled for months before paying the bounty, and they are still making what I consider an illegal requirement for certification of bounties. I do not know about Mr. Anderson; he was on leave at the time of the bounty bill. But he is leaving the service, and quite likely one of his underlings who was guilty of fighting justice last year will take his place.

Now about the Kuskokwim Range, I think Mr. Seaton's last-minute move to establish it was quite as blameworthy as in the case of the Arctic Range. When this withdrawal was first proposed, around 1955 or 1956, a public hearing was held in Bethel by the Bureau of Land Management, with speakers from the Fish and Wildlife. I was stationed in Bethel in those days, and I have never seen anything like the way in which the Eskimos threw off their usual lethargy to speak against the measure. They sent representatives from all the villages in and near the area. Everyone, white and Eskimo, opposed the measure, and none would believe the promises of the representatives of Fish and Wildlife. The whole proceedings were tape-recorded as well as transcribed, and they are probably still somewhere in the precincts of the Department of the Interior.

According to Fish and Wildlife, the sole purpose of the reservation was to give the Department power to regulate oil drilling and mining so that the nesting areas would not be polluted. It seemed like using a cannon to kill a mosquito; surely some simpler expedient would have sufficed. Now the first step is to spend $120,000 for a base in Bethel. To make the occasional inspection that would be necessary to check on oil operations? More likely to provide a base for breathing down the necks of all the residents of the area.

And that brings me back to my original remark about the "Battle of Barrow." As you must realize, the problem is not confined to Barrow, nor to the Arctic in a strict sense. The same conditions prevail at least far enough south to include the Kuskokwim Basin, and probably all the way to the Aleutians. Our people here at Hooper Bay, for instance, are probably more dependent on waterfowl than those of Barrow.

And, of course, it is not just a question of eider ducks. The people of Barrow, and Governor Egan, have been making a fight on the eider duck question, probably because they feel they have a better case there. But what needs to be cleared up is the whole question of migratory birds. If Fish and Wildlife has suddenly developed a tender conscience concerning treaty violations, why it seems we shall just have to revise the treaty.

It was perhaps humorous to make the magnanimous gesture of allowing Alaskans to hunt waterfowl until the 15th of December when the last birds had headed south in early October. It may have been funny when Fish and Wildlife was not paying much attention to the Eskimos, but it ceases to be funny now.

Governor Egan put his finger on the trouble when he stated it looked as though Fish and Wildlife, now that the State had taken over many of their former duties, had nothing left now but to annoy the Eskimos. Branson practically admitted the same thing later, when he said that formerly they did not have enough money to provide operatives to police remote areas.

Now, Senator, I think that is where you come in. With a battle for the world on our hands, we surely cannot afford to spend the taxpayers money on paying Fish and Wildlife to harass the Eskimos. So they do not have so much work to do now that the State has taken over: Fine. Let's cut their budget accordingly. No need for them to look for new wildlife activities. If they have too many men, let them fire a few. Maybe they can find some useful work in another line; if not, they can go on relief, whither they are trying to force the rest of the Eskimos.

If I sound a bit hot, you, as an Alaskan, will understand. You know how it has long been said it was safer to kill a man than a moose in Alaska. Again, honest law-enforcement officers cannot search without a warrant; why is the same not true of game wardens? It seems to me to be high time to get our scale of values back to order.

Our high today is 42°; sorry I cannot send you a little to refresh you in a Washington summer. I hope you will be able to keep hitting hard for the rest of the session, and then get away for a good vacation.

Sincerely yours,

NORMAN DONOHUE, S.J.

Considering Father Donohue's views highly pertinent and valuable, I transmitted his letter to Secretary Udall, as follows:

DEAR MR. SECRETARY: I am enclosing copy of a very pertinent letter from Father Norman Donohue, a Jesuit priest stationed at Hooper Bay, Alaska, which bears on the sudden enforcement by the Fish and Wildlife Service against the Eskimos of the Migratory Bird Treaty provisions.

As you know, it is my view that this treaty can properly be interpreted to permit natives to continue doing what they have always done—to take some of these ducks for food; and that is particularly true in the case of certain species of ducks.

Likewise, you will notice Father Donohue's views on the action of former Secretary Seaton to have the Kuskokwim Range withdrawn after he had been notified by the American people that he would no longer continue to be Secretary of the Interior. You are familiar with the views of the Alaska congressional delegation, as well as the Governor and the State legislature, on this subject, and I trust you will give heed to this additional valuable testimony from one who knows the problems first hand—Father Donohue.

Cordially yours,

ERNEST GRUENING,
U.S. Senator.

Secretary Udall answered my letter, transmitting Father Donohue's letter, replying to some of the criticisms made by Father Donohue. Secretary Udall's letter follows:

DEAR SENATOR GRUENING: Father Norman Donohue quite apparently has had much experience with the Alaska Eskimos and we appreciate receiving a copy of his letter of June 21 which accompanied your letter of July 11.

The dedication of the lands within the Clarence Rhode (Kuskokwim) National Wildlife Range for waterfowl management purposes has been applauded by conservationists of the Nation. The lands within the range comprise the most important waterfowl production habitat in all of Alaska. Important also is the waterfowl production contribution this area makes to the total waterfowl resource of North America.

The management of the Clarence Rhode Range, by the Bureau of Sport Fisheries and Wildlife of this Department, will be directed at preserving and improving the ecology and waterfowl production capacity. Additionally, the Bureau will regulate those exploitive activities that if uncontrolled could permanently endanger and destroy this native waterfowl habitat. Experience has taught us that the very thing that Alaskans want, assured fish and wildlife populations for public enjoyment and use, can only be had through applied management.

Father Donohue is correct in his statement that the conflict between the terms of the migratory bird treaties and the desires of native people of Alaska is not confined to Barrow or to the killing of eider ducks. Under the terms of the Treaties with Great Britain (Canada) and Mexico, ducks of all species are fully protected from March 10 to September 1. The Barrow people are particularly concerned with hunting eider ducks in the spring but Eskimos in other parts of

Alaska do not want to confine their hunting to this species. This, of course, complicates our approach to solving some of the conflicts.

In considering some of Father Donohue's remarks, it is noteworthy that of the 26,000 Eskimos in Alaska only 12 individuals were arrested in the spring of 1960 and 15 were apprehended this year for taking migratory waterfowl contrary to Federal and State regulations. This includes two men apprehended in the vicinity of Barrow, Alaska.

These people were from established communities where ample food is available. The basic conflict is the desire of the natives to continue certain primitive customs and yet live in civilized communities. They have by choice given up many of their old customs but they want to cling to their assumed right to hunt in the spring.

We are not unaware of the human emotions involving the Eskimo people in Alaska. We want to be fair with them and with all other citizens, but we must recognize that the settlement of the issues with which we are concerned in this instance cannot be reached quickly. Neither can the purposes of the treaties with Great Britain (Canada) and Mexico be ignored in reaching this settlement. All of us, including the Eskimos, must realize that the development of any country in the world brings with it advantages and disadvantages, and one of the great disadvantages is the closer regulation of man's activities. This is true in any civilization; and it must have become obvious already to many of the native people of Alaska.

Some of the publicity concerning U.S. game management agents in Alaska has been distorted. Prior to statehood these men were enforcing the terms of the migratory bird treaties and the Migratory Bird Treaty Act in addition to their other enforcement responsibilities. Enforcement activities in behalf of resident game and fish naturally occupied a part of the time of each agent in Alaska under Territorial status, but in those days there were more than twice as many agents. With statehood, the number of agents was reduced, and only sufficient men were retained to meet the responsibilities of the Federal Government.

One of these responsibilities is the enforcement of provisions of the conventions (treaties) with Great Britain (Canada) and Mexico, and no one has authority to set aside these provisions. U.S. game management agents are expected to use good judgment in the enforcement of these treaties and the Treaty Act regulations, but they cannot in good conscience overlook violations of these agreements and the regulations adopted pursuant to them.

Sincerely yours,

STEWART,
Secretary of the Interior.

I acknowledged Secretary Udall's letter of July 27, and summarized my beliefs and purpose regarding this unfortunate situation by saying:

I believe that we have not gotten to the bottom of this issue at all, and I am studying a two-way approach: one to determine whether it cannot be assumed that since the provisions of the treaty were never enforced against the Eskimos in the nearly half a century in which it has been in effect, it may be assumed that it was never intended to be enforced in the case of natives taking this supply for food. Apparently a similar tradition exists in Canada. A second approach would be a modification of the treaty, which, of course, would be more cumbersome and more difficult.

Mr. President, I ask unanimous consent that my letter to Secretary Udall of August 7 be printed at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 7, 1961.

Hon. STEWART L. UDALL,
Secretary of the Interior, Department of the Interior, Washington, D.C.

DEAR MR. SECRETARY: I acknowledge your letter of July 27, in reply to mine of July 11, which included the letter of Father Norman Donohue concerning the problems of the ducks and the Eskimos. I wish merely to acknowledge the letter at this time because I believe that we have not gotten to the bottom of this issue at all, and I am studying a two-way approach: one, to determine whether it cannot be assumed that since the provisions of the treaty were never enforced against the Eskimos in the nearly half a century in which it has been in effect, it may be assumed that it was never intended to be enforced in the case of natives taking this supply for food. Apparently, a similar situation exists in Canada. The situation is a pretty serious one, and the feeling among the Eskimos is far deeper than you are aware of. A second approach would be a modification of the treaty, which, of course, would be more cumbersome and more difficult.

In any event, I want you to know that most nearly everyone in Alaska is concerned with this issue, and that the sentiment is almost universal that the food needs of the Eskimos should be given a prior and sympathetic consideration rather than the possible additional availability of these birds for duck hunters.

At a meeting in my office with representatives of the Fish and Wildlife Service, they admitted that the taking of these birds by Eskimos had caused no appreciable depletion in the supply.

Cordially yours,

ERNEST GRUENING,
U.S. Senator.

Mr. GRUENING. Mr. President, meanwhile, new light on the ecological relations of Eskimos and the eider ducks came from the Arctic Research Laboratory at Point Barrow, where a distinguished group of scholars have been working under the auspices of the University of Alaska.

This important research laboratory on the shore of the Arctic Ocean, at the northernmost point under the American flag, was established in 1947 with funds from the Office of Naval Research. For years its scientists have been living in the very Eskimo community most deeply involved in the present conflict, and have had a unique and unequaled opportunity to observe all its aspects.

Their pertinent and important views on hitherto unappreciated biological factors are set forth in a letter dated August 1 from Max C. Brewer, Director of the Arctic Research Laboratory.

I ask unanimous consent that his letter, as well as my reply to Mr. Brewer, be printed at this point in my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

ARCTIC RESEARCH LABORATORY,
UNIVERSITY OF ALASKA,
Point Barrow, Alaska.

Senator ERNEST GRUENING,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GRUENING: Recent publicity, both Alaskan and national, appears to disregard some very salient aspects of the existing relationship between the Eskimo and eider duck populations of northern Alaska. This relationship has existed for many hundreds of years and from the biological point has attained a natural predator-prey relationship.

Eskimos apparently have always taken eiders as soon as they arrived in the spring, usually early May, and have also taken both juvenile and adult birds migrating south in the early fall. These birds are an essential part of the Eskimo diet not only because these native people are predominantly meat eaters but also because their method of preparation provides certain necessary items of diet normally obtained through eating vegetables by more southerly located populations. To deprive the Eskimos of these very necessary items of diet could have far reaching undesirable effects on the already precarious health of these people.

It is the general consensus of the Arctic Research Laboratory and its associates that the population of eider ducks apparently is in ecological balance with the natural predators which include foxes, wolverines, bears, weasels, several species of predatory waterfowl, perhaps some fish, and the Eskimos. In fact, the urbanization of the Eskimos, particularly in the Point Barrow area, may tend to upset the ecological balance in favor of the ducks. The increase in the duck population would be expected to be offset by an increase in some faction of the small predator population, i.e., foxes, wolverines or weasels and thus maintain the ecologic balance of nature leaving a healthy and vigorous duck population. Since the maintenance of these vigorous populations as a result of ecological balance would fulfill the aims of good conservation practice it seems biologically irrelevant if the Eskimo or if the fox is the predator.

Eider ducks are not a sports duck inasmuch as they winter at sea, do not travel the great natural flyways, and because of their fishy flavor, are not eaten by nonnative populations. This factor has served to protect the eiders by restricting the hunting population to a constant group. Although no intensive population statistics are available, there appears to be little change other than cyclical, in the eider population.

The Eskimo people have a great respect for the law and their recent difficulty with the authorities is the result of their method of protest to a law which they regard as unrealistic and a very great threat to their health and economy. The most outstanding aspect of this unrealism is that the eider duck is not present in northern Alaska during the legal hunting season. For these reasons, we believe that it would be desirable to have a moratorium on enforcement, with respect to Eskimos, of the hunting provisions of the treaty of 1916 with Great Britain and the treaty of 1936 with Mexico and to endeavor to reinterpret these treaties with respect to the Eskimo. We believe that this would be advantageous to both the Eskimo and a healthy eider duck population.

We are happy that the Arctic Research Laboratory could be of service to you in forwarding this information. Please do not hesitate to call on us should you wish that we investigate this matter in greater detail.

Sincerely yours,

MAX C. BREWER,
Director.

AUGUST 4, 1961.

Mr. MAX C. BREWER,
Director, Arctic Research Laboratory, Barrow, Alaska.

DEAR MAX: Thank you so much for that excellent letter on the subject of Eskimos and eiders.

I am anything but happy, as are many others, at what has taken place. There is

a suspicion that the Fish and Wildlife Service, which never enforced its regulations about the taking of ducks by Eskimos out of season, is doing this in order to demonstrate that it is still around, its existence in Alaska is justified, and its role there essential, and that not all of its functions have been assumed by the state department of fish and game.

Since the treaty has never been enforced during the near half century of its existence in regard to Eskimos, and I am informed that a similar situation exists in Canada, it seems to me implicit that it was never intended to be enforced as far as natives taking ducks for food. Certainly it is more important that they should take these ducks for food than that the birds be saved for the use of sport hunters elsewhere. Actually, the Fish and Wildlife people have admitted that there has been no serious depletion as a result of the Eskimos' take.

I am making every effort to prevent similar Fish and Wildlife action in the future.

I am approaching the question in two ways: First, to see whether we cannot get an administrative decision to assume that the enforcement such as was practiced this spring was not called for—although, to date, I have made no progress with the Interior Department with that approach—and the second is to try to get a revision of the treaty. This will naturally be more cumbersome and perhaps more difficult, and it will take longer. I shall try both approaches.

Thanks so much for the helpful suggestions in your letter. I appreciate having them. They will, if agreeable to you, be included in a speech I expect to make in the Senate on this issue.

With best regards, I remain,

Cordially yours,

ERNEST GRUENING,
U.S. Senator.

Mr. GRUENING. Mr. President, however, good news lay ahead. On August 25 I received a letter from Secretary Udall and was happy to detect in it a change in attitude and a consequent willingness to consider a solution by way of interpretation of the treaty, as I had hoped could and would be done.

I ask unanimous consent that Secretary Udall's letter of August 25 be printed at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., August 25, 1961.

Hon. ERNEST GRUENING,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GRUENING: Thank you for your letter of August 7. I share your deep concern for the welfare of the Eskimos, and I am continuing, as you are, to give careful study to ways and means of working out these problems.

I appreciate your thoughts in the interpretation of the treaty language, and I am having this matter looked into by the Solicitor. I am personally hopeful, Ernest, that it will not be necessary to reopen negotiations for revision of the treaty itself, for, as you point out, this procedure is cumbersome and difficult.

Sincerely yours,

STEWART,
Secretary of the Interior.

Mr. GRUENING. Mr. President, I certainly appreciate the apparent modification in Secretary Udall's position and his hope, which my colleagues in Congress, Senator Bartlett and Representative Ralph Rivers, Governor Egan, and countless other Alaskans, share, that a way out may be found without the need of reopening negotiations for revision of the treaty itself, which Secretary Udall and I agree would be cumbersome and difficult.

The fact is that the local agents in Alaska of the Fish and Wildlife Service, while no doubt acting in the faith that they were authorized to act as they did, should, in view of the past history of the treaty in Alaska in its relation to the Eskimos' taking birds for food, as well as the similar situation in Canada, have laid the whole problem before the Secretary of the Interior before acting. By not doing so, they placed him in the embarrassing position of being obliged to say that he had no recourse but to enforce the law. By so acting, they were, in fact, making policy for the Department of the Interior and for the United States, which should have been left to the higher authority to which they are responsible—namely, Secretary of the Interior Stewart Udall.

A great deal of other pertinent material—letters from Alaskans, Eskimo and non-Eskimo, and from interested non-Alaskans, and replies to them, memorandums of meeting with State and Interior Department officials, editorials and newspaper articles—is too voluminous to include here.

I do ask unanimous consent, however, that the full texts—to which previous reference has been made—of Executive Document E of the 64th Congress, 1st session—namely, the letters of transmission relating to the Migratory Bird Convention with Canada, and the text of the convention—as well as Executive A, 74th Congress, 2d session, dealing similarly with the Migratory Bird Convention with Mexico, be printed at this point in my remarks.

There being no objection, the documents and letters were ordered to be printed in the RECORD, as follows:

SENATE EXECUTIVE DOCUMENT E, 64TH CONGRESS, 1ST SESSION, ON PROTECTION OF MIGRATORY BIRDS

(Message from the President of the United States, transmitting convention between the United States and Great Britain for the protection of migratory birds in the United States and Canada)

To the Senate:

In pursuance of the resolution adopted by the Senate on July 7, 1913, requesting the President to propose to the governments of other countries the negotiation of a convention for the protection and preservation of birds, negotiations were by my direction initiated with the Government of Great Britain through the British Ambassador for the conclusion of a convention that would insure protection to migratory and insectivorous birds in the United States and Canada.

These negotiations have resulted in the signature, on August 16, 1916, of a convention for this purpose between the United States and Great Britain, which I transmit herewith to receive the advice and consent of the Senate to its ratification.

The attention of the Senate is invited to the accompanying report of the Secretary of State and to the views of the Department of Agriculture therein presented.

WOODROW WILSON.

THE WHITE HOUSE, *Washington, August 21, 1916.*

REPORT OF THE SECRETARY OF STATE

DEPARTMENT OF STATE,
Washington, August 17, 1916.

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate, if his judgment approve thereof, to receive the advice and consent of that body to its ratification, a convention between the United States and Great Britain for the protection of migratory birds in the United States and Canada, signed at Washington on August 16, 1916.

This convention is the result of negotiations initiated with the British Ambassador at Washington in pursuance of the resolution adopted by the Senate on July 7, 1913, "That the President be requested to propose to the Governments of other countries the negotiation of a convention for the protection and preservation of birds."

The Department of Agriculture has taken keen interest in the negotiations, and has been of great help in their final conclusion. The views of that Department regarding the negotiation of this treaty were expressed in a communication recently addressed to this Department, as follows:

"Not very many years ago vast numbers of waterfoul and shore birds nested within the limits of the United States, especially in the Far West, but the extension of agriculture, and particularly the draining on a large scale of swamps and meadows, together with improved firearms and a vast increase in the number of sportsmen, have so altered conditions that comparatively few migratory game birds nest within our limits. Th greater part of the supply still remaining, the value of which must be estimated at many millions of dollars, breed largely in the Canadian Provinces and consist of birds that winter within or to the south of the United States and journey back and forth in autumn and spring across our territory.

"That a very great number of people in the United States are personally interested in the protection of our migratory wild birds is evidenced by the fact that there are about 5 million sportsmen in this country and their number is steadily increasing. These men are all dependent upon the continuance of our supply of wild fowl for their sport, and a very large number of them are in consequence taking an active interest in the present treaty. In addition the value of the proper protection of our migratory insectivorous birds is of the deepest interest to farmers for the practical assistance they give in destroying insects injurious to crops. Furthermore, millions of people in the United States are deeply interested in the conservation and increase of our bird life from an esthetic viewpoint, as well as on account of their practical utility. As a result the number of persons who approve and are deeply interested in the conclusion and enforcement of the present treaty includes many millions. There is no question but that the Federal migratory bird law and the present treaty for the protection of migratory wild fowl now being negotiated between the United States and Canada are conservation measures of prime importance."

Respectfully submitted.

ROBERT LANSING.

CONVENTION

Whereas many species of birds in the course of their annual migrations traverse certain parts of the United States and the Dominion of Canada; and

Whereas many of these species are of great value as a source of food or in destroying insects which are injurious to forests and forage plants on the public domain, as well as to agricultural crops, in both the United States and Canada, but are nevertheless in danger of extermination through lack of ade-

quate protection during the nesting season or while on their way to and from their breeding grounds;

The United States of America and His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British dominions beyond the seas, Emperor of India, being desirous of saving from indiscriminate slaughter and of insuring the preservation of such migratory birds as are either useful to man or are harmless, have resolved to adopt some uniform system of protection which shall effectively accomplish such objects, and to the end of concluding a convention for this purpose have appointed as their respective plenipotentiaries:

The President of the United States of America, Robert Lansing, Secretary of State of the United States; and

His Britannic Majesty, the Right Honorable Sir Cecil Arthur Spring Rice, G.C.V.O., K.C.M.G., etc., His Majesty's ambassador extraordinary and plenipotentiary at Washington;

Who, after having communicated to each other their respective full powers which were found to be in due and proper form, have agreed to and adopted the following articles:

ARTICLE I

The High Contracting Powers declare that the migratory birds included in the terms of this Convention shall be as follows:

1. Migratory Game Birds;

(a) Anatidæ or waterfowl, including brant, wild ducks, geese, and swans.

(b) Gruidæ or cranes, including little brown, sandhill, and whooping cranes.

(c) Rallidæ or rails, including coots, gallinules and sora and other rails.

(d) Limicolæ or shorebirds, including avocets, curlew, dowitchers, godwits, knots, oyster catchers, phalaropes, plovers, sandpipers, snipe, stilts, surf birds, turnstones, willet, woodcock, and yellowlegs.

(e) Columbidæ or pigeons, including doves and wild pigeons.

2. Migratory Insectivorous Birds: Bobolinks, catbirds, chickadees, cuckoos, flickers, flycatchers, grosbeaks, humming birds, kinglets, martins, meadowlarks, nighthawks or bull bats, nut-hatches, orioles, robins, shrikes, swallows, swifts, tanagers, titmice, thrushes, vireos, warblers, wax-wings, whippoorwills, woodpeckers, and wrens, and all other perching birds which feed entirely or chiefly on insects.

3. Other Migratory Nongame Birds: Auks, auklets, bitterns, fulmars, gannets, grebes, guillemots, gulls, herons, jaegers, loons, murres, petrels, puffins, shearwaters, and terns.

ARTICLE II

The High Contracting Powers agree that, as an effective means of preserving migratory birds there shall be established the following close seasons during which no hunting shall be done except for scientific or propagating purposes under permits issued by proper authorities.

1. The close season on migratory game birds shall be between March 10 and September 1, except that the close season on the Limicolae or shorebirds in the Maritime Provinces of Canada and in those States of the United States bordering on the Atlantic Ocean which are situated wholly or in part north of Chesapeake Bay shall be between February 1 and August 15, and that Indians may take at any time scoters for food but not for sale. The season for hunting shall be further restricted to such period not exceeding three and one-half months as the High Contracting Powers may severally deem appropriate and define by law or regulation.

2. The close season on migratory insectivorous birds shall continue throughout the year.

3. The close season on other migratory nongame birds shall continue throughout the year, except that Eskimos and Indians may take at any season auks, auklets, guillemots, murres and puffins, and their eggs, for food and their skins for clothing, but the birds and eggs so taken shall not be sold or offered for sale.

ARTICLE III

The High Contracting Powers agree that during the period of ten years next following the going into effect of this Convention, there shall be a continuous close season on the following migratory game birds, to-wit:

Band-tailed pigeons, little brown, sandhill and whooping cranes, swans, curlew and all shorebirds (except the black-breasted and golden plover, Wilson or jack snipe, woodcock, and the greater and lesser yellowlegs); provided that during such ten years the close seasons on cranes, swans and curlew in the Province of British Columbia shall be made by the proper authorities of that Province within the general dates and limitations elsewhere prescribed in this Convention for the respective groups to which these birds belong.

ARTICLE IV

The High Contracting Powers agree that special protection shall be given the wood duck and the eider duck either (1) by a close season extending over a period of at least five year, or (2) by the establishment of refuges, or (3) by such other regulations as may be deemed appropriate.

ARTICLE V

The taking of nests or eggs of migratory game or insectivorous or nongame birds shall be prohibited, except for scientific or propagating purposes under such laws or regulations as the High Contracting Powers may severally deem appropriate.

ARTICLE VI

The High Contracting Powers agree that the shipment or export of migratory birds or their eggs from any State or Province, during the continuance of the close season in such State or Province, shall be prohibited except for scientific or propagating purposes, and the international traffic in any birds or eggs at such time captured, killed, taken, or shipped at any time contrary to the laws of the State or Province in which the same were captured, killed, taken, or shipped shall be likewise prohibited. Every package containing migratory birds or any parts thereof or any eggs of migratory birds transported, or offered for transportation from the Dominion of Canada into the United States or from the United States into the Dominion of Canada, shall have the name and address of the shipper and an accurate statement of the contents clearly marked on the outside of such package.

ARTICLE VII

Permits to kill any of the above-named birds which, under extraordinary conditions, may become seriously injurious to the agricultural or other interests in any particular community, may be issued by the proper authorities of the High Contracting Powers under suitable regulations prescribed therefor by them respectively, but such permits shall lapse, or may be cancelled, at any time when, in the opinion of said authorities, the particular exigency has passed, and no birds killed under this article shall be shipped, sold, or offered for sale.

ARTICLE VIII

The High Contracting Powers agree themselves to take, or propose to their respective appropriate law-making bodies, the necessary measures for insuring the execution of the present Convention.

ARTICLE IX

The present Convention shall be ratified by the President of the United States of America, by and with the advice and consent of the Senate thereof, and by His Britannic Majesty. The ratifications shall be exchanged at Washington as soon as possible and the Convention shall take effect on the date of the exchange of the ratifications. It shall remain in force for fifteen years, and in the event of neither of the High Contracting Powers having given notification, twelve months before the expiration of said period of fifteen years, of its intention of terminating its operation, the Convention shall continue to remain in force for one year and so on from year to year.

In faith whereof, the respective Plenipotentiaries have signed the present Convention in duplicate and have hereunto affixed their seals.

Done at Washington this 16th day of August, 1916.

ROBERT LANSING.
CECIL SPRING RICE.

SENATE EXECUTIVE DOCUMENT A ON A CONVENTION FOR THE PROTECTION OF MIGRATORY BIRDS AND GAME MAMMALS

(Message from the President of the United States transmitting a convention between the United States of America and the United Mexican States for the protection of migratory birds and game mammals, signed at Mexico City, February 7, 1936)

THE WHITE HOUSE,
March 5, 1936.

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith a convention for the protection of migratory birds and game mammals, between the United States of America and the United Mexican States, signed at Mexico City February 7, 1936, and an exchange of notes expressing an understanding between the Governments of the two countries that ratifications are to be exchanged in Washington and the convention will come into force on the day on which ratifications are exchanged.

The convention is similar to the treaty for the protection of migratory birds in the United States and Canada, signed August 16, 1916. That convention was unquestionably a great step forward toward the restoration and protection of our migratory birds. But inasmuch as numbers of species of the birds whose protection in the United States and Canada has long been provided for extend their migrations to Mexico and still farther south, and in order to protect other groups of birds which migrate between the United States and the United Mexican States, it is obvious that effective conservation requires further international cooperation. It is for these purposes that the convention with Mexico has been concluded.

The attention of the Senate is invited to the accompanying report from the Secretary of State and the comment of the Secretary of Agriculture presented therein.

FRANKLIN D. ROOSEVELT.

(Accompaniments: Report of the Secretary of State. Convention. Exchange of notes.)

THE PRESIDENT:

I have the honor to forward to you herewith a convention between the United States of America and the United Mexican States for the protection of migratory birds and game mammals, signed at Mexico City February 7, 1936, which is being brought to your attention for transmittal to the Senate, if you approve thereof, with a view to receiving the advice and consent of that body to its ratification.

This convention, which represents the culmination of some years of negotiations, embodies the conservation principles contained in the well known migratory bird treaty, signed at Washington August 16, 1916, for the protection of migratory birds in the United States and Canada.

The present convention limits, with certain exceptions, the taking, transportation,

and sale of migratory birds and their products to a maximum period of 4 months annually in each country under a system of permits; provides for the establishment of refuge zones; prohibits hunting from aircraft; and specifically provides for a closed season for wild ducks extending from March 10 to September 1 of each year.

Further, the present convention prohibits the transportation of migratory birds and game mammals, dead or alive, their parts or products, across the American-Mexican border without a permit of authorization provided by the Government of each country.

Pursuant to an understanding between the governments of the two countries, expressed in an exchange of notes which accompanies the convention, ratifications are to be exchanged in Washington and the convention will come into force on the day on which ratifications are exchanged.

The Department of Agriculture has taken an active interest in the negotiations and has greatly assisted in the conclusion of the convention. In a recent letter to me the Secretary of Agriculture made the following comments:

"A vast stride toward the restoration and protection, indeed in some cases the rescue from extirpation, of our migratory game, and various groups of our insectivorous and other birds, was taken by the conclusion of the convention of August 16, 1916, with Great Britain, for the protection of birds migrating between Canada and the United States. But as numbers of species of these birds, both game and nongame, extend their migrations and winter dispersals to Mexico and beyond, it has been manifest that to insure their more effective conservation, as well as the conservation of other groups of birds migrating between Mexico and the United States, cooperation with the United Mexican States is not only desirable but also quite imperative, and to that end the Department of Agriculture has earnestly desired and for some years past has sought to bring about the negotiation of a convention with that Republic."

"It is with genuine satisfaction and no little anticipation that we are now informed that the consummation of our hope shortly may be realized.

"Millions of our citizens, and their numbers are growing apace, whether they be tillers of the soil, nature lovers, sportsmen, or merely those aesthetically inclined, are very earnestly interested in and concerned about the conservation of our birds, and it is not too much to say that they would heartily acclaim such a convention as this.

"With Canada, the United States, and Mexico cooperating in the conservation of migratory species of birds it confidently may be expected that the perpetuity of these birds is assured against all contingencies save the untoward operations of nature."

Respectfully submitted.

CORDELL HULL.

DEPARTMENT OF STATE, *Washington.*

(Enclosures: Convention and exchange of notes.)

CONVENTION BETWEEN THE UNITED STATES OF AMERICA AND THE UNITED MEXICAN STATES FOR THE PROTECTION OF MIGRATORY BIRDS AND GAME MAMMALS

Whereas some of the birds denominated migratory, in their movements cross the United States of America and the United Mexican States, in which countries they live temporarily;

Whereas it is right and proper to protect the said migratory birds, whatever may be their origin, in the United States of America and the United Mexican States, in order that the species may not be exterminated;

Whereas for this purpose it is necessary to employ adequate measures which will permit a rational utilization of migratory birds for the purposes of sport as well as for food, commerce, and industry;

The Governments of the two countries have agreed to conclude a convention which will satisfy the above-mentioned need and to that end have appointed as their respective plenipotentiaries: The Honorable Josephus Daniels, representing the President of the United States of America, Franklin D. Roosevelt, and the Honorable Eduardo Hay, representing the President of the United Mexican States, General Lázaro Cárdenas, who, having exhibited to each other and found satisfactory their respective full powers, conclude the following convention:

ARTICLE I

In order that the species may not be exterminated, the high contracting parties declare that it is right and proper to protect birds denominated as migratory, whatever may be or origin, which in their movements live temporarily in the United States of America and the United Mexican States, by means of adequate methods which will permit, insofar as the respective high contracting parties may see fit, the utilization of said birds rationally for purposes of sport, food, commerce, and industry.

ARTICLE II

The high contracting parties agree to establish laws, regulations, and provisions to satisfy the need set forth in the preceding article, including:

(A) The establishment of closed seasons, which will prohibit in certain periods of the year the taking of migratory birds, their nests or eggs, as well as their transportation or sale, alive or dead, their products or parts, except when preceeding, with appropriate authorization, from private game farms or when used for scientific purposes, for propagation, or for museums.

(B) The establishment of refuge zones in which the taking of such birds will be prohibited.

(C) The limitation of their hunting to 4 months in each year, as a maximum, under permits issued by the respective authorities in each case.

(D) The establishment of a closed season for wild ducks from the 10th of March to the 1st of September.

(E) The prohibition of the killing of migratory insectivorous birds, except when they become injurious to agriculture and constitute plagues, as well as when they come from reserves or game farms; provided however, that such birds may be captured alive and used in conformity with the laws of each contracting country.

(F) The prohibition of hunting from aircraft.

ARTICLE III

The high contracting parties respectively agree, in addition, not to permit the transportation over the American-Mexican border of migratory birds, dead or alive, their parts or products, without a permit of authorization provided for that purpose by the government of each country, with the understanding that in the case that the said birds, their parts or products are transported from one country to the other without the stipulated authorization, they will be considered as contraband and treated accordingly.

ARTICLE IV

The high contracting parties declare that for the purposes of the present convention the following birds shall be considered migratory:

Migratory game birds: Familia Anatidae, Familia Gruidae, Familia Rallidae, Familia Charadriidae, Familia Scolopacidae, Familia Recurvirostridae, Familia Phalaropodidae, Familia Columbidae.

Migratory nongame birds: Familia Cuculidae, Familia Caprimulgidae, Familia Micropodidae, Familia Trochilidae, Familia Picidae, Familia Tyrannidae, Familia Alaudidae, Familia Hirundinidae, Familia Paridae, Familia Certhüdae, Familia Troglodytidae, Familia Turdidae, Familia Mimidae, Familia Sylviidae, Familia Motacillidae, Familia Bombycillidae, Familia Ptilogonatidae, Familia Laniidae, Familia Vireonidae, Familia Compsothlypidae, Familia Icteridae, Familia Thraupidae, Familia Fringillidae.

Others which the Presidents of the United States of America and the United Mexican States may determine by common agreement.

ARTICLE V

The high contracting parties agree to apply the stipulations set forth in article III with respect to the game mammals which live in their respective countries.

ARTICLE VI

This convention shall be ratified by the high contracting parties in accordance with their constitutional methods and shall remain in force for fifteen years and shall be understood to be extended from year to year if the high contracting parties have not indicated twelve months in advance their intention to terminate it.

The respective plenipotentiaries sign the present convention in duplicate in English and Spanish, affixing thereto their respective seals, in the city of Mexico, the 7th day of February of 1936.

JOSEPHUS DANIELS.
EDUARDO HAY.

DEPARTMENT OF FOREIGN RELATIONS, UNITED MEXICAN STATES,
MEXICO,

Mexico, February 10, 1936.

Mr. HENRY R. NORWEB,
Chargé d'Affaires and Interim of the United States of America, City.

MR. CHARGÉ D'AFFAIRES: I have the honor of state to you in relation to the convention between the United Mexican States and the United States of North America for the Protection of Migratory Birds and of Game Mammals, signed in this city the 7th date of the current month, that this Department takes the liberty of proposing the city of Washington for effecting the exchange of ratifications referred to by article VI of the said convention as soon as may be practicable.

I avail myself of the opportunity to renew to you the assurances of my respectful consideration.

EDUARDO HAY.

[No. 1488]

EMBASSY OF THE
UNITED STATES OF AMERICA,
Mexico, February 11, 1936.

His Excellency Señor General EDUARDO HAY,
Minister for Foreign Affairs, Mexico.

EXCELLENCY: I have the honor to acknowledge with appreciation Your Excellency's courteous note No. 3, Ref. III, of February 10, 1936, in which it is suggested with reference to the Convention between the United States of America and the United Mexican States for the Protection of Migratory Birds and Game Mammals signed in this city on the 7th of this month that the ratifications provided for in article VI of the above-mentioned convention be exchanged in Washington. It is understood that this proposal is satisfactory to my Government and that the treaty shall take effect on the date of the exchange of ratifications.

Please accept, Excellency, the renewed assurances of my highest and most distinguished consideration.

R. HENRY NORWEB,
Chargé d'Affaires ad interim.

Mr. GRUENING. Mr. President, I have gotten to know the Eskimo through my quarter of a century association with Alaska. I came to appreciate them fully when, in the early days of World War II, I organized them in the Alaska Territorial Guard, later securing their inclusion in the Scout Battalions of the

Alaska National Guard. No more loyal, brave and patriotic Americans are to be found under the flag; no finer, more decent, more kindly people anywhere. Their generosity has been testified to innumerable times by those who have been its beneficiaries. But perhaps the best and most succinct appraisal of the Eskimo was given 13 years ago, before a Senate subcommittee, by Vilhjalmur Stefansson, the noted Arctic explorer, who spent years among the Eskimos. Said he:

I have heard of the merits of the Golden Rule from my Sunday school days up, but I have never seen it practiced as consistently as it is by the uncivilized and civilized Eskimos.

PROGRESS IN OUR PACIFIC POSSESSIONS

Mr. LONG of Hawaii. Mr. President, I am happy to report that there is a new attitude both in Congress and in the Kennedy administration toward meeting our responsibilities in our Pacific possessions—American Samoa and Guam—and in the Trust Territory of the Pacific.

As members of a special study mission appointed by the Interior and Insular Affairs Committee, pursuant to Senate Resolution 330 of the 86th Congress, Senator ERNEST GRUENING, of Alaska, and I visited Samoa, Guam, and the Trust Territory late last year. The report on our findings in American Samoa, along with the findings of a staff of carefully selected consultants, has been published as Senate Document No. 38. The report documents the results of the neglect which American Samoa has experienced during the past 8 or 9 years and offers a number of recommendations to overcome some of the problems which have accumulated. In conclusion, our report states:

In American Samoa, the United States has a tremendous opportunity to show, both in the strategic South Pacific and to the world at large, that we do practice what we preach, and that a Christian nation can and will do justice to a minority group, however small and however far away.

Both Congress and the administration are moving to seize that opportunity.

Secretary of Interior Stewart Udall informed me of his Department's plans for Samoa in a letter dated July 19, 1961:

A vigorous and accelerated program is now underway to upgrade substantially and as rapidly as possible essential programs in the education, medical, and economic fields. While congressional appropriations for the current fiscal year are double those of last year, we are asking for even more money to insure that adequate public services are provided. If funds are made available, we expect by September 1962 to provide classrooms for all high school students in the territory; to pave the most heavily traveled portion of the road system; to have a modern power generating and distribution system in operation; and to renovate or rebuild many of the other essential public facilities. The foregoing represents only some of the highlights of our accelerated program.

I should like to assure you that this Department and the newly appointed Governor, the Honorable H. Rex Lee, will not neglect American Samoa, and we shall exert every effort to improve upon our performance in the past. We propose to aid the people of American Samoa to achieve the local self-government and economic status which they desire and rightfully deserve. In turn, I know we can rely on your continued support in our efforts to better conditions in American Samoa.

Immediately after taking office in January, the Kennedy administration moved to speed help for Samoa. In February, approval was given for the use of $100,000 in local Samoan funds to start preparations for the South Pacific Conference to be held in Pago Pago in July 1962.

At the same time, the administration made a supplemental request for a $465,000 appropriation for the construction of housing and meeting facilities for the conference which will be attended by indigenous representatives from 16 Pacific areas. The facilities will be permanent installations long overdue for schoolroom and other uses. Congress approved the full amount which was signed by the President and made available on March 31—Public Law 87–14.

Of great importance to Samoa was the approval of $2,350,000 in the Interior Department's appropriation bill for the new jet runway now under construction in Samoa. This was signed by the President on August 3—Public Law 87–122. The funds will make it possible to speed construction so that the jet runway will be operational next year, making Samoa a key link in the chain of jet airbases being built to handle the increasing air traffic of the Pacific.

Meanwhile, Congress, with administration help, has been taking steps to implement the recommendations of the special study mission that Samoa be included in various Federal-aid programs.

I wish to commend particularly the senior Senator from Oregon [Mr. MORSE] for his invaluable assistance in having Samoa included in the Federal aid to education bill, S. 1021. Not only would Samoa be included in the proposed new aid program for construction and teachers salaries, but it also would be made eligible for possible aid under the impacted schools program, Public Laws 815 and 874. Samoa may need such aid as the result of the possible Federal buildup in connection with the new jet runway.

Again with the help of the Senator from Oregon [Mr. MORSE], Samoa was included in the Senate bill to extend the National Defense Education Act (S. 2345).

Although, because of the recent action of the House of Representatives, it appears that these particular bills will be not enacted at this time, I am confident that the 87th Congress will eventually pass some education legislation and that Samoa will be included in it.

Thanks to the cooperation of the senior Senator from Illinois [Mr. DOUGLAS] Samoa was included in S. 1, the area redevelopment bill which was signed into law on May 1—Public Law 87–27. This legislation is intended to give Federal assistance for the development of local economies and for broadening employment opportunities in economically depressed areas.

Meanwhile, I have introduced for Senator GRUENING and myself S. 2440 to include Samoa in various other programs as recommended by the study mission. The bill would provide authority for the Secretary of Agriculture to provide technical assistance to Samoa and include Samoa under the Vocational Education Act, the National School Lunch Act, the Public Health Service Act, and the Library Services Act.

Other recent actions to help our Pacific friends include:

Senate passage of S. 1742 to make Guam, American Samoa, and the Trust Territory of the Pacific Islands eligible for Federal assistance under the Federal Disaster Act of 1950.

Passed and sent to the President, H.R. 29 to make American Samoans eligible for appointment to the U.S. Merchant Marine Academy.

Approved by the Senate Commerce Committee, H.R. 3296 to authcrize the Secretary of Interior to nominate citizens of the trust territory for appointment to the U.S. Merchant Marine Academy.

Inclusion by the Senate of Guam in S. 1991, the proposed Manpower Development and Training Act of 1961.

Enactment of S. 539 to include Samoans under the Fulbright scholarship program—Public Law 87–153, signed August 17.

Enactment of S. 1087 to transfer certain Federal land formerly held by the U.S. Navy to the government of Samoa—Public Law 87–158, signed August 17.

Senate passage of S. 1589 to permit Samoans to obtain radio operator licenses.

The variety of the problems facing Guam and Samoa is evident from this brief summary of actions taken or proposed for these areas. We have made a good beginning. A very great deal remains to be done. I am hopeful that as Congress becomes more aware of the large amount of work which is required to meet our responsibilities in these areas, that it will also become apparent that Guam and Samoa should have some kind of representation here in the Congress.

In this connection I have introduced S. 994 and S. 995 which would provide for a nonvoting deputy to represent Guam and Samoa respectively in the House of Representatives. In this way, Guam and Samoa would have the means of keeping track directly of the legislation moving through Congress which affects those two areas.

RESUMPTION OF NUCLEAR TESTING BY SOVIET UNION

Mr. MILLER. Mr. President, the day after the announcement from Moscow that the Soviets were resuming nuclear tests, I expressed the hope that the President would heed the advice of the Atomic Energy Commission and of his military advisers and direct that our own testing of refined nuclear weapons be resumed. I am reassured that the President has now done so. Let me add that I am in thorough agreement with the President in his efforts to obtain an agreement with the Soviets which will enable nuclear testing to be conducted

without danger of fallout. I also wish to make clear that I believe that we should continue negotiations with the Soviets looking forward to a nuclear test ban, with effective inspection and controls, as long as the Soviets give any indication of a willingness to make an honest effort to reach such an agreement.

My position with respect to the resumption of nuclear testing is well set forth in an excellent article published in the Des Moines Sunday Register of September 3 by Mr. Richard Wilson, entitled "The Crisis We Face on Nuclear Tests;" in a very shrewd editorial appearing in the Cedar Rapids Gazette on September 3; and in the lead editorial appearing in today's Washington Evening Star, which makes it clear why there was really no other choice for the President. I ask unanimous consent that the article and editorials be printed in the RECORD.

There being no objection, the article and editorials were ordered to be printed in the RECORD, as follows:

[From the Des Moines Sunday Register, Sept. 3, 1961]

THE CRISIS WE FACE ON NUCLEAR TESTS

(By Richard Wilson)

WASHINGTON, D.C.—The Soviet decision to renew nuclear testing has impressed official Washington as never before that the present showdown with Russia is absolutely critical.

It is not so much that the Russians have resumed testing, but the timing that impresses the highest officials here.

They are calling this the greatest crisis since World War II. They do so because they now think that the Soviet leaders are committing themselves fully and absolutely to destroying the prestige of the United States and its president in Berlin and in every other area of the world.

It is thought by the highest officials here that the Soviet leaders have measured the adverse world reaction to testing against the advantages in terms of world power of a stronger nuclear establishment. The decision favored the latter so that the Soviet Union would be in a position to press to a showdown the issue with the United States.

TACTICAL WEAPONS

Much emphasis has been placed on the development of the 100-megaton "hell bomb." But informed officials in Washington are paying more attention to the possible development of tactical weapons.

In his book "Nuclear Policy for War and Peace," the late Thomas E. Murray, AEC Commissioner for 7 years, put it this way:

"Today, at least so far as the United States is concerned, third-generation weapons are in the planning stage. (The 3-year moratorium on testing prevented their testing.)

"These third-generation devices would be primarily antipersonnel in character. They would be capable of being used in a discriminating way to destroy a foe's military forces without posing suicidal dangers to the side which employs them.

"COULD BE DISASTROUS

"We must assume that the Soviets may already have them, or soon will have. Neither a tacit mutual moratorium nor a formal test ban treaty will prevent the Soviets from developing such weapons.

"If it is in their interest to do so, they can be expected to proceed with underground tests and not risk detection.

"A large stockpile of such weapons in Soviet hands could be disastrous. The United States, if it persists in its present test-ban policy and forfeits the opportunity to improve its stockpile, will wake up one morning and find it obsolete.

"In the realm of military technology, which is a dynamic one, the concept of a permanent technological stalemate is absurd."

With these possibilities in view, the Russians have now timed their resumed testing to affect a particular situation, Berlin. It is within scientific speculation that the Russians may be on the verge of a breakthrough to produce tactical antipersonnel nuclear weapons on a large scale for use against military forces.

Premier Nikita Khrushchev has also long spoken of what he called a fantastic weapon. Murray said in 1960: "Mr. Khrushchev's talk of possessing a fantastic weapon may not be dismissed as an idle boast; it may well be true.

"The nuclear area that Mr. Khrushchev claims has been conquered by the Soviet scientists may be the very area that our own scientists are urgently asking to explore."

Again, in 1960, Murray was more specific. He said the new weapon is as radically different from the H-bomb as the H-bomb was from the Hiroshima-type A-bomb. "All that may be said of it here is that it is primarily antipersonnel in destination and effect. Hence it is apt for properly military uses."

PERHAPS THE N-BOMB

Scientific speculation is that this is the so-called N-bomb, which is thought to be a highly secret project at the Atomic Energy Commission's Livermore Weapons Laboratory in California.

The project is thought to be an attempt to develop a hydrogen weapon that would release most of its energy in the form of deadly neutron radiation instead of a combination of neutrons, heat, light, blast, and fission products.

According to Murray, if the Russians perfect such a weapon before we do, "our present symbol of strength, the old H-bomb, becomes a symbol of weakness and inferiority."

Murray continued: "Conceptual designs for this new type of weapon have existed in American laboratories. They would have already been tested, had it not been for our test moratorium. The moratorium has effectively blocked American advances to a new position of military and political strength."

MAY BE AHEAD

Now, it is anticipated by U.S. officials that the Russians not only have executed their conceptual designs of a new weapon but are ready to test it. They may thus be a long stride ahead.

It is clear to officials now that Khrushchev intends to report the success of the new weapons to the Communist Party Congress next month as a part of the continuing campaign of pressure and terror.

Before this, U.S. officials have noted an abrupt change in the attitude of Soviet officials with whom they have dealt.

They noted that after the first and second manned space flights Russians adopted attitudes of confidence and became even less manageable in negotiations for disarmament and a nuclear test ban.

This new attitude is related by U.S. officials to a general policy announced by Khrushchev last January 6. Both President Kennedy and Secretary of State Dean Rusk have referred to this speech many times as indicating a new departure in Soviet policy.

NEW BALANCE OF POWER

The doctrine is that with the rise in Soviet nuclear and rocket capability a new balance of power has been established in the world. The moment in history has arrived to use that new balance in favor of the Soviet Union to achieve new gains.

This is why the President has referred to the Soviet action resuming testing as "atomic blackmail."

What is basically involved is that a highly challenging attitude will force the West to accept compromises in Berlin and elsewhere and try to gloss them over.

For, whatever the U.S. position, it must reckon with the anxieties of its European allies.

Khrushchev is going all-out on Berlin, and he is doing so in a way which may convince the peoples of Europe that the single alternative to knuckling down in Berlin is an atomic war, with new and more effective weapons in the hands of the Russians.

MONUMENTAL GAMBLE

It is a gamble of monumental proportions, and one which Western leaders never thought Khrushchev would actually take.

The attitude is developing here that Berlin cannot be taken separately, that any backdown there cannot be glossed over or dressed up, and if Khrushchev wins, he will have dealt a blow to America's world position of far reaching importance.

In an article in the current Reader's Digest, former AEC Chairman Lewis L. Straus says:

"In the autumn of 1960, President Eisenhower told various members of his administration that, in his opinion, the time had come to resume nuclear tests, either underground or in outer space where there would be no fallout problem.

"However, he added, such action would necessarily extend beyond his administration, and he considered it proper to leave the incoming President a free hand.

"This was the decision that President Kennedy faced when he took office last January."

[From the Cedar Rapids Gazette, Sept. 3, 1961]

DANGER OF BEING MOUSETRAPPED

Reportedly the official tactic in Washington with respect to the Russians' resumption of nuclear testing is for the United States not to follow suit immediately but to hold off for a little while to let the Soviet Union get the full brunt of world disapproval of their move. This may be all right so long as the master minds remain keenly aware that the tactic is fraught with danger and could easily backfire.

If we dilly-dally too long in resuming our own tests, it would be relatively simple for the U.S.S.R. to come out smelling like a rose and leave us in the same position they now occupy so far as world opinion is concerned. Or in an even worse position so far as our own national security is concerned.

Manifestly the Russians did not announce their decision to resume testing until they were all ready to go on some tests they felt they needed to make and couldn't make without detection. It is conceivable that they could rush these tests through in a few days, before the conference of in-between nations in Belgrade ends.

Then, having got the information they need, they could yield magnanimously to the sentiment of the so-called neutrals, concede that perhaps they were a bit hasty in resuming the nuclear tests, and announce the suspension of further testing, in the interests of world peace. The relieved delegates at Belgrade, in any such event, doubtless would praise them to the skies and possibly nominate Khrushchev for a Nobel Prize.

And there we'd sit, out in Yucca Flats with the punk lit and our untested bombs ready to go.

Then we'd either have to say we were resuming testing anyway, thereby incurring all the condemnation that is now being directed at the Russians, or acquiesce meekly in a wholly unpoliced nuclear testing moratorium such as we already have let the Russians enjoy for 3 years while we argued futilely at Geneva against making any such arrangement permanent.

Pleasant as it may be to hear the fans in the bleachers riding the Russians instead of us, for a change, we'd better seize quickly the legitimate excuse Russia has given us to carry out whatever important nuclear tests we have been holding in abeyance.

[From the Washington Evening Star, Sept. 6, 1961]

NO OTHER CHOICE

President Kennedy has done the right and imperative thing in ordering the resumption of underground nuclear tests, which cause no health-endangering fallout. Certainly, as he has explained in his brief and admirable statement on the subject, our Government, in striving for nearly 3 years past to work out with the Russians an adequately policed ban on all such experimentation, has taken "every step that reasonable men could justify." But now, because of the Kremlin's sudden decision to resume atomic-hydrogen detonations in the earth's atmosphere, we must take "those steps which prudent men find essential. We have no other choice. * * *"

This is so, this fact of no other choice, because the security and very survival of our country and the free world as a whole could be gravely imperiled if we continued to debar ourselves from testing while the Russians staged shot after shot designed to help them develop weapons that might give them a decisive advantage over us. Actually, even if the Kremlin had not resumed atmosperic detonations (the kind that can unleash radiactivity capable of doing genetic harm to the human race), the United States would have had good reason to reactivate its program of underground explosions, together perhaps with some in outer space.

Indeed, well over 18 months ago, some of our most knowledgeable experts began exhorting the United States to resume such testing without delay. This they did because of the fact that there is at present no effective means of detecting underground shots and that therefore the Kremlin could easily have staged clandestine experiments throughout the so-called moratorium that began in October of 1958. Perhaps the Russians have not really cheated on us in this fashion, but they could have done so quite readily in view of our easy-going trustfulness. That is why our Atomic Energy Commission, in its last annual report to Congress, warned as follows:

"Nuclear weapons development is not a static science. Important advances in weapons design are possible—advances which would have great military significance. * * * Our weapons scientists are convinced that further nuclear testing would achieve major advances. * * *

"The military advantages to be gained from clandestine nuclear testing are great, and the probabilities of detecting and identifying clandestine tests are very small. This will be the free world's situation so long as there is an unpoliced de facto moratorium on nuclear weapons testing."

Well, all that particular kind of American risktaking now has come to an end—and none too soon—as a result of the President's decision. This does not mean, of course, that our Government will not continue to strive for a trustworthy ban agreement, a first step toward which would be Premier Khrushchev's acceptance of Mr. Kennedy's and Prime Minister Macmillan's proposal for an immediate and lasting halt to atmospheric tests. Unhappily, however, such acceptance, even though the proposal would require no policing of the type called espionage by the Kremlin, is not likely to be forthcoming. In the circumstances, nothing could be more important than for our country to move forward as fast as possible with the program ordered by the President.

THE SO-CALLED NEUTRAL NATIONS

Mr. MILLER. Mr. President, much attention has been given during the past few years to the opinion of the so-called neutral nations. The Washington Daily News, on August 30, 1961, published an editorial entitled "Our Neutral Friends," which pointed out some of the difficulties which we encounter from the so-called neutral nations and some of the defects in their so-called policy of neutrality. The editorial states that perhaps the so-called neutral nations would do well to recognize the fact that their neutrality is possible only because there are free world powers, such as the United States of America, to afford them this protection.

I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Daily News, Aug. 30, 1961]

OUR NEUTRAL FRIENDS

"Why should that man speak ill of me?" once asked Pennsylvania Political Boss Boise Penrose. "I've never done a favor for him."

Meeting in Belgrade this week are the representatives of 24 nations or political entities that could, if they would, count favors from the United States to the total of $8.2 billion.

That is the amount of money we have given, or are committed to give them, in various forms of aid—military, economic, food, loans, grants.

It is advertised as a meeting of neutrals.

It will be interesting to observe—from their deliberations and resolutions and future votes in the United Nations—whom they are neutral against.

Let's call the roll, alphabetically, and list the U.S. dollars (in millions):

Afghanistan 146, Algerian FLN none, Burma 93, Cambodia 263, Ceylon 65, Cuba 41 (pre-Castro), Cyprus none, Ethiopia 114, Ghana 4, Guinea 4, India 3,800, Indonesia 560, Iraq 46, Lebanon 86, Mali none, Morocco 194, Nepal 40, Saudi Arabia 46, Somali 9, Sudan 44, Tunisia 135, United Arab Republic 295, Yemen 11, and Yugoslavia 2,200.

Some of these countries have also received substantial Russian aid.

The largest voices at the Belgrade powwow, as the figures indicate, will be India's Nehru, Yugoslavia's Tito, UAR's Nasser, and Indonesia's Sukarno. They will all be vocal for peace, in sincere idealism, and also perhaps as a matter of self-interest. For if big-power shooting should start, the foreign aid spigot would be shut off tight while we used all our resources for our own survival, and some neutrals would not even be able to feed themselves.

And as self-appointed umpires of the cold war, they'll have ideas on how to settle the Berlin crisis—ideas easier to come by since none has a single soldier guarding freedom in Berlin.

But will they applaud Britain, France, and the United States for trying to keep the peace? Will they condemn the U.S.S.R. and puppet East Germany for erecting concrete and barbed-wire barricades across Berlin and creating the cisis? On the basis of past performance, that is not likely. For the neutrals have learned they may criticize the free world and be heeded, whereas the Communist dictatorships pay no attention whatever to criticisms.

Neutrality has its obvious advantages to all of the nations represented at Belgrade, and we could wish some were more neutral than they are. But it would be heartening if there were an occasional sign of recognition that their neutrality is possible only because there are free world powers to give them protection.

Mr. MILLER. Mr. President, also on August 30, the Wall Street Journal published an editorial entitled "Power and Opinion," which states that the so-called neutral nations may have an undue amount of weight upon so-called world opinion, and that the danger of giving too much weight to their opinion is that we may be inclined to disapprove of doing things which we in our own self-interest must do.

I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 30, 1961]

POWER AND OPINION

Twenty-four uncommitted countries will meet this week in Belgrade, Yugoslavia, to express their opinions on world affairs. The Soviets don't seem especially interested, but Washington is waiting rather anxiously to hear what the neutrals think about Berlin.

What accounts for this sharp difference in attitude? Soviet disinterest is explained by the fact that the nations which will assemble at Belgrade are weak, and weakness does not command Mr. Khrushchev's respect. Moreover, he doesn't take the "uncommitted" tag seriously. In his brutal view, the world is split into Communist and non-Communist camps; so-called neutrals are merely those against whom the full weight of Soviet power is not yet committed. Their opinions are of no importance.

The United States, on the other hand, has long placed great importance on showing a decent respect for the opinions of mankind. And properly so. We would, if we could, have every nation understand why we act.

Harsh as it may seem, Khrushchev's view of the world—as the arena of struggle between two great powers—is more realistic. Small, weak and backward nations cannot deeply influence the cold war. Indeed, their independence is a result of the West's power to check the ambitions of the East. The fact is, the U.S. commitment to opposing communism permits their posture of noncommitment.

Yet, paradoxically, the United States gets little but criticism for its pains. Part of the explanation of this is that others do not understand, or refuse to admit, that their own rights flow from the rights we uphold. If the world had to count on the Soviets to protect the right of self-determination, it would soon see the blessings of U.S. self-assertion.

But the heaviest blame for neutralist buffeting of U.S. policy falls on ourselves; we invite it. While the Soviets stand stony-faced and quick to punish those who cross them, Washington seems only too willing to try to please everyone. It even takes the uncommitted at face value, crediting them with a special place above the cold war battle that makes them somehow more moral and peace loving than the fully committed antagonists. Yet the more influence they gain over U.S. policy, the more they must scorn a great power that does not know its own mind.

No one can argue that the United States should be indifferent to the opinions of others. But if the neutrals cannot see how their self-interest coincides with our interest in safeguarding freedom, their blindness does not excuse our paralysis. The danger of

placing the world's good opinion before all else is that, when others disapprove, we may become powerless to do what we must.

Mr. MILLER. Mr. President, the Washington Evening Star of today contains an article entitled "A Moral Issue Belies Neutrals," written by David Lawrence, which states some of the defects in the logic of the neutrals in claiming to possess a neutral attitude.

I ask unanimous consent that the article may be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A MORAL ISSUE BELIES NEUTRALS: SOFT STAND ON BERLIN AND NUCLEAR BLASTS BELIEVED LOSING THEM MUCH RESPECT

(By David Lawrence)

Maybe the 25 so-called nonalined nations thought they were building up their prestige by their summit conference just held at Belgrade, Yugoslavia, but the truth is they gave the world an example of why doubledealing doesn't pay.

This group of nations can hardly be called neutral, for they do take a position on issues which affect them directly. They cannot truly describe themselves as nonalined because they have for the most part sought favors, financial and otherwise, from both sides—the East and the West.

The 25 nations sought to give the impression that they are not only against war but have become the chief exponents of all that is good and virtuous in international relations. The sad fact is, however, that when the Soviet Union broke faith with the world and abandoned its pledges that it would not resume nuclear tests unless the West did so first, the voices of protest from the nonalined group were soft and almost inaudible. It was indeed proof that they were alined with the Soviets. For they failed to denounce the steps taken by Moscow—three nuclear tests in the air—during the very time the nonalined nations were actually in conference at Belgrade.

Former President Truman, who is by no means inarticulate on these matters, put it this way:

"The only thing that pleases me is the jolt the neutralists got. They got what's coming to them. They ought to take sides with the free world if they're going to survive. They're free now because we made them free. The Russians didn't do that. All the satellites they (the Russians) took after World War II are slave states now. You name one that isn't."

The conference of the nonalined was, however, a useful event in one respect. It exposed the hypocrisy of the uncommitted nations. They are uncommitted primarily because they want to derive benefits from both sides—the East and the West. But when the subsidies and donations and grants are added up, it will be found that these nations got many times more from the United States and its allies than from the Russians.

The impression made here by the Belgrade conference is a painful one. Officials in Washington were shocked to note that, in the resolutions adopted, there was no denunciation of the Soviets for resuming nuclear tests in the air. Despite all the talk by Nehru of India about the importance of preserving peace, he himself was restrained in his comments.

The mission of President Sukarno of Indonesia and President Keita of Mali, in coming to Washington on a special trip to persuade President Kennedy to negotiate with Nikita Khrushchev at a summit conference, is something of an anticlimax.

Here was a group of nations which profess to be against war and especially against colonialism. Yet they fail to stand up to the biggest practitioner of colonialism in the modern world—the Soviet Union. If ever a moral issue has presented itself to challenge the peace-loving elements of the whole world, it is in the Berlin issue—especially in the fate of the people of the divided sectors of Germany. Despite all the pious words about liquidating colonialism wherever it exists, not a word was spoken or written at the Belgrade conference in favor of liberating the East German people from the colonial yoke imposed upon them by Moscow.

Also, despite all the many words denouncing nuclear tests, the action of the Soviet Government in resuming such tests in the atmosphere was glossed over.

The conclusion is inescapable that most of the so-called nonalined nations are not idealistic but materialistic, that they will play the West against the East and vice versa in order to get funds. As between right and wrong, there can be no neutrality. Countries like Sweden and Switzerland, which shunned the Belgrade Conference, are neutral, too, but only in the sense that they stay out of international disputes on the political front. Their newspapers, however, are far from neutral, and the sharpest denunciation of Premier Khrushchev's policy in resuming nuclear tests in the air has come from Swedish and Swiss newspapers.

The nonalined may have thought they would gain prestige by the Belgrade Conference. In truth, they have lost the respect of many other governments. For most of the group of nonalined now are considered "alined" with the position of Moscow, though professing not to accept its doctrines. The Belgrade group seems to be willing to equate the evils of aggression—as evidenced in the Berlin issue—with the heroic efforts of the West to preserve peace and save the nonalined nations themselves from being enslaved.

WHAT LAND REFORM IS NEEDED?

Mr. MILLER. Mr. President, an editorial entitled "Blight Upon the Farm," which was published in the Wall Street Journal of today, September 6, deals with statements, purportedly emanating from the Department of Agriculture, to the effect that there should be land reform in agriculture in the United States. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Sept. 6, 1961]

BLIGHT UPON THE FARM

Anyone who wanders about the Department of Agriculture these days is sure to hear the phrase "land reform" crop up in the conversation soon or late. Indeed, Secretary Freeman observed not long ago: "We are selling land reform to other countries while drifting into trouble here in our own country."

Well, it seems clear that what this country lacks is land reform. But what isn't clear at all is what Mr. Freeman means by this phrase he tosses about.

Land reform is usually associated with backward, feudal countries, where many are landless because they lack the means or the opportunity to satisfy their hunger for their own piece of ground. Antiquated land tenure systems and perpetuation of great holdings in the hands of a very few are common obstacles. In some countries, the hunger of the many has been satisfied without grave injustice to the few; landholders have been paid for what they were required to surrender.

In other countries, "land reform" is a catch-phrase to cover robbery, or worse, by the State. In Castro's Cuba today, as in the Soviet Ukraine a generation ago, "land reform" is the regime's euphemism for forced collectivization of the soil and the debasing of the tillers to serfdom.

But wherever land reform is carried out, regardless of the circumstances, it means government redistribtuion of the land—the taking of one man's property and the giving of it into the hands of others.

How can anyone even consider such a scheme in a country where land is distributed and redistributed daily by the free-market? Any man who pleases may go into the market, without let or hindrance by the Government, and realize his wish to own or sell land. Indeed, we are a nation of landowners, if only of a piece of greenery in suburbia. Moreover, 97 percent of the Nation's farms, according to the Agriculture Department's own figures, are family operated units.

True, a great deal of the land is presently ill used, and some men in Government think it is because it isn't in the right hands. That reasoning is familiar enough; it is of a piece with the prevailing philosophy in Washington that the Government must set its hand to running just about everything.

Yet much of the Nation's farmland is ill used only in the sense that what's grown on it is intended not for use but for storage in the Government's overflowing warehouses. Certainly it is not the farmer who puts his hand to such useless toil. It is the Government which directs his hand that bears the blame for this foolishness.

So there is something to be said for reforming the land, and Charles B. Shuman, president of the American Farm Bureau Federation, has said it well: "The only land reform American farmers need is greater opportunity—not more restrictions." Land reform is an excellent idea—if it reforms the main evil; namely, the blight of Government controls upon the land.

U.S. FARMERS FACE LOSS OF MARKET IN EUROPE

Mr. MILLER. Mr. President, an article entitled "U.S. Farmers Face Loss of Market in Europe" was published in the Wall Street Journal of August 30. The article points out that if certain plans and policies of the Common Market are implemented, "imports of feed grains into the Common Market could drop by 50 percent or much more in a short number of years," and it is also stated that "American farmers stand to lose a $250 million a year market if proposals now before the six-member European Economic Community are adopted."

I ask unanimous consent that this timely article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 30, 1961]

U.S. FARMERS FACE LOSS OF MARKET IN EUROPE—EXPORT OFFICIAL SAYS PROPOSALS NOW BEFORE COMMON MARKET WOULD ALTER EXPORTS

CHICAGO.—American farmers stand to lose a $250 million a year market if proposals now before the six-member European Economic Community are adopted, an export official warned.

Walter C. Klein, president of Bunge Corp., New York exporting firm, expressed the fear in an address for delivery to the American Soybean Association meeting in Indianapolis today. The group represents about 6,200 soybean growers.

The EEC is considering marketing and pricing policies for agricultural goods which could most seriously affect exports, Mr. Klein said. The group, also called the Common Market, is composed of West Germany, France, Italy, Belgium, Holland, and Luxembourg.

"Their proposals would seek to increase domestic production at fixed high prices under the protection of various import controls that would keep the price of imports (from other than Common Market countries) always at or above the domestic prices. This would relegate the United States and other exporting countries to positions of residual suppliers," Mr. Klein added.

The Common Market countries combined annually take about one-forth of U.S. total agricultural exports, which amounted to $4.8 billion in 1960, he noted.

Specific proposals have been made concerning wheat, coarse grains, sugar, milk and dairy products, beef, pork, poultry, eggs, tobacco, fruits, vegetables, and wine. These products make up about one-half of annual U.S. exports to Common Market countries, Mr. Klein said.

Measures proposed to restrict common market imports of commodities include fixed tariffs and variable import duties for livestock products and most other goods as well as a system of support purchases of wheat and feed grains by a proposed European Grain Bureau serving the member lands. This bureau would also have the emergency power to completely suspend all imports at any time, Mr. Klein said.

"Imports of feed grains into the Common Market could drop by 50 percent or much more in a short number of years," Mr. Klein said. The area has a large unused productive capacity for feed grains and can undoubtedly expand production substantially, he said. This would cost the United States 90 million bushels of feed grain exports each year, he said. Last year this country exported 181 million bushels of feed grains to Common Market countries.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following additional routine business was transacted:

ADDITIONAL REPORT OF A COMMITTEE

Mr. SPARKMAN, from the Committee on Foreign Relations, to which was referred the joint resolution (S.J. Res. 132) extending recognition to the International Exposition for Southern California in the year 1966 and authorizing the President to issue a proclamation calling upon the several States of the Union and foreign countries to take part in the exposition, reported it favorably, without amendment, and submitted a report (No. 883) thereon.

ADDITIONAL BILL INTRODUCED

Mrs. NEUBERGER (for herself and Mr. MORSE), by unanimous consent, introduced a bill (S. 2508) to establish reciprocity between members of the Confederated Tribes of the Umatilla and Warm Springs Indian Reservations and other Indian tribes in the matter of succession by will or inheritance to certain types of restricted or trust properties, and for other purposes, which was read twice by its title and referred to the Committee on Interior and Insular Affairs.

AMENDMENT OF SENATE RULE XXII, RELATING TO CLOTURE—AMENDMENTS

Mr. MILLER submitted amendments, intended to be proposed by him to the resolution (S. Res. 4) to amend the cloture rule by providing for adoption by a three-fifths vote, which were ordered to lie on the table and to be printed.

NOTICE OF HEARING ON NOMINATION OF JAMES R. BROWNING TO BE U.S. CIRCUIT JUDGE, NINTH CIRCUIT

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Wednesday, September 13, 1961, at 11 a.m., in room 2228, New Senate Office Building, on the nomination of James R. Browning, of Montana, to be U.S. circuit judge, ninth circuit, vice Walter L. Pope, retired.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The subcommittee consists of the Senator from South Carolina [Mr. JOHNSTON], the Senator from Nebraska [Mr. HRUSKA], and myself, as chairman.

NOTICE CONCERNING NOMINATION BEFORE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary: Robert H. Cowen, of North Carolina, to be U.S. attorney, eastern district of North Carolina, term of 4 years, vice Julian T. Gaskill.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Wednesday, September 13, 1961, any representations or objections they may wish to present concerning the above nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. HUMPHREY. Mr. President, in accordance with the order previously entered, I move that the Senate now adjourn until tomorrow, at 9 a.m.

The motion was agreed to; and (at 8 o'clock and 2 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Thursday, September 7, 1961, at 9 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate September 6, 1961:

U.S. CIRCUIT JUDGE

James R. Browning, of Montana, to be U.S. circuit judge for the ninth circuit, vice Walter L. Pope, retired.

U.S. ATTORNEY

Robert H. Cowen, of North Carolina, to be U.S. attorney for the eastern district of North Carolina for the term of 4 years, vice Julian T. Gaskill.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in rank as follows:

Maj. Gen. Robert William Porter, Jr., O18048, U.S. Army, in the rank of lieutenant general.

IN THE ARMY

The following-named officers for appointment in the Regular Army of the United States to the grade indicated, under the provisions of title 10, United States Code, sections 3284 and 3306:

To be brigadier generals

Brig. Gen. Charles Salvatore D'Orsa, O18866, Army of the United States (colonel, U.S. Army).

Brig. Gen. Andrew Ralph Lolli, O29844, Army of the United States (colonel, U.S. Army).

Brig. Gen. James Abner Richardson, 3d, O29906, Army of the United States (colonel, U.S. Army).

Brig. Gen. Roland Haddaway del Mar, O29917, Army of the United States (colonel, U.S. Army).

Brig. Gen. William Allen Harris, O18976, Army of the United States (colonel, U.S. Army).

Brig. Gen. Herbert George Sparrow, O19003, Army of the United States (colonel, U.S. Army).

Brig. Gen. John Joseph Lane, O19021, Army of the United States (colonel, U.S. Army).

Brig. Gen. John Frederick Thorlin, O19067, Army of the United States (colonel, U.S. Army).

Brig. Gen. Ethan Allen Chapman, O19076, Army of the United States (colonel, U.S. Army).

Brig. Gen. Oren Eugene Hurlbut, O19077, Army of the United States (colonel, U.S. Army).

Brig. Gen. George Allen Carver, O19122, Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard John Meyer, O19147, Army of the United States (colonel U.S. Army).

Brig. Gen. Joseph Edward Bastion, Jr., O19162, Army of the United States (colonel, U.S. Army).

Brig. Gen. Thomas Bowes Evans, O19174, Army of the United States (colonel, U.S. Army).

Brig. Gen. David Parker Gibbs, O19189, Army of the United States (colonel, U.S. Army).

Brig. Gen. Carl Darnell, Jr., O19213, Army of the United States (colonel, U.S. Army).

Brig. Gen. Frederick Otto Hartel, O19254, Army of the United States (colonel, U.S. Army).

Brig. Gen. Benjamin Henry Pochyla, O30103, Army of the United States (colonel, U.S. Army).

Maj. Gen. Stuart Sheets Hoff, O38766, Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert George MacDonnell, O19361, Army of the United States (colonel, U.S. Army).

Brig. Gen. Thomas Heber Lipscomb, O19371, Army of the United States (colonel, U.S. Army).

Brig. Gen. Austin Wortham Betts, O19373, Army of the United States (colonel U.S. Army).

Brig. Gen. Jonathan Owen Seaman, O19385, Army of the United States (colonel, U.S. Army).

Brig. Gen. Harvey Julius Jablonsky, O19390, Army of the United States (colonel, U.S. Army).

Brig. Gen. John Francis Franklin, Jr., O19476, Army of the United States (colonel, U.S. Army).

Brig. Gen. James Richard Winn, O19491, Army of the United States (colonel, U.S. Army).

Brig. Gen. William Hutcheson Craig, O19526, Army of the United States (colonel, U.S. Army).

Brig. Gen. Oliver Clark Harvey, O38776, Army of the United States (colonel, U.S. Army).

Brig. Gen. Julian Alexander Wilson, O30359, Army of the United States (colonel, U.S. Army).

Brig. Gen. Charles Scott Hays, O42534, Army of the United States (colonel, U.S. Army).

Brig. Gen. William Winston Lapsley, O19727, Army of the United States (colonel, U.S. Army).

Maj. Gen. John Lathrop Throckmorton, O19732, Army of the United States (colonel, U.S. Army).

Brig. Gen. George Ruhlen, O19733, Army of the United States (colonel, U.S. Army).

Brig. Gen. George Stafford Eckhardt, O19766, Army of the United States (colonel, U.S. Army).

Brig. Gen. Charles Frederick Leonard, Jr., O19829, Army of the United States (colonel, U.S. Army).

Maj. Gen. James Dyce Alger, O19848, Army of the United States (colonel, U.S. Army).

Brig. Gen. Ralph Edward Haines, Jr., O19849, Army of the United States (colonel, U.S. Army).

Brig. Gen. Francis Mark McGoldrick, O19857, Army of the United States (colonel, U.S. Army).

Brig. Gen. Autrey Joseph Maroun, O19865, Army of the United States (colonel, U.S. Army).

Maj. Gen. Reuben Henry Tucker, 3d, O19894, Army of the United States (colonel, U.S. Army).

Brig. Gen. Vernon Price Mock, O19906, Army of the United States (colonel, U.S. Army).

Maj. Gen. Charles Wythe Gleaves Rich, O19910, Army of the United States (colonel, U.S. Army).

Brig. Gen. Andrew Jackson Boyle, O19924, Army of the United States (colonel, U.S. Army).

2. I nominate the officers named herein for appointment as Reserve commissioned officers of the Army under the provisions of title 10, United States Code, sections 593(a) and 3392:

To be major generals

Col. Malcolm Hay, O284748, Adjutant General's Corps, Army National Guard of the United States.

Brig. Gen. James Edward Taylor, O376731, Army National Guard of the United States.

3. I nominate the officer named herein for promotion as Reserve commissioned officer of the Army under the provisions of title 10, United States Code, sections 593(a) and 3385:

To be brigadier general

Col. Walter Woodrow Nations, O346660, Artillery, Army National Guard of the United States.

The following-named officers for promotion in the Regular Army of the United States, under the provisions of title 10, United States Code, sections 3284 and 3299:

To be lieutenant colonels
